MODESTO CITY COUNCIL
RESOLUTION NO. 2007-021

A RESOLUTION OF INTENTION TO ANNEX TERRITORY TO COMMUNITY FACILITIES DISTRICT NO. 1997-1 (NORTH BEYER PARK) AND TO AUTHORIZE THE LEVY OF SPECIAL TAXES THEREIN (ANNEXATION NO. 2)

WHEREAS, pursuant to Chapter 3.5 Division 2 of Title 5 (commencing with Section 53311) of the California Government Code, commonly known as the "Mello-Roos Community Facilities Act of 1982" (the "Act"), proceedings for the annexation of territory to an existing community facilities district may, pursuant to Chapter 3.5 of the Act, be instituted by the adoption by the legislative body of a resolution of intention to annex such territory, and

WHEREAS, pursuant to the Act, this Council did, by its Resolution No. 97-355 adopted on June 24, 1997 (the "Resolution of Formation"), establishing the City's Community Facilities District No. 1997-1 (North Beyer Park) ("the District"), and

WHEREAS, pursuant to the Act, this Council did, by its Resolution No. 99-211, adopted on June 8, 1999, order the annexation of additional territory to the District, and

WHEREAS, this Council hereby determines that the public convenience and necessity require the annexation of certain territory to the District, and

WHEREAS, the territory to be annexed is within the City limits, and

NOW, THEREFORE, BE IT RESOLVED, ORDERED AND FOUND by the City Council of the City of Modesto, California, that:

SECTION 1. The above recitals are true and correct.

SECTION 2. The boundaries of the District are shown on a map entitled "Boundary Map of Community Facilities District No. 1997-1 (North Beyer Specific Plan)", on file with the

County Recorder of the County of Stanislaus, at Book 2 of Maps of Assessments of Community Facilities Districts, at Page 80, and the map entitled "Annexation Map No. 1 of Community Facilities District No. 1997-1 of the City of Modesto, County of Stanislaus, State of California" on file with the County Recorder at Book 3 of Maps of Assessment and Community Facilities Districts, at Page 14.

SECTION 3. The territory proposed to be annexed to the District (the "Territory") is described in **Exhibit A.**

SECTION 4. The boundaries of the Territory are also shown on the map thereof, entitled "Annexation Map No. 2 of Community Facilities District No. 1997-1 (North Beyer Park), City of Modesto, County of Stanislaus, State of California," on file in the office of the City Clerk, which map is hereby approved and adopted. Pursuant to Sections 3110.5 and 3113 of the California Streets and Highways Code, the City Clerk shall endorse her certificate on the original and one copy of the map evidencing the date and adoption of this Resolution, file the original in her office and, not later than ten days after the adoption of this Resolution, file a copy of the map with the County Recorder of the County of Stanislaus. The map shall contain the legends provided in Sections 3110, 3110.5, and 3313 of the California Streets and Highways Code, including a reference to the title, book, page and recording date of the original boundary map of the District.

SECTION 5. The public facilities and services to be provided for the District are set forth in the Resolution of Formation. It is intended that these same facilities and services be provided to the Territory.

SECTION 6. The special taxes to be levied in the District are set forth in the Resolution of Formation. It is intended that the same special taxes be levied in the Territory.

SECTION 7. A public hearing on this Resolution will be held at 5:30 p.m., or as soon thereafter as practicable, on Tuesday, February 6, 2007, at the regular meeting place of the City Council, City Council Chambers, Basement Level, 1010 Tenth Street, Modesto, California 95353, such time being not less than 30 or more than 60 days following the adoption hereof.

SECTION 8. At the hearing, any interested persons for or against the annexation of the Territory to the District, and the levy of the special taxes therein, may appear and will be heard and considered. Any protest may be made orally or in writing. However, any protests pertaining to the regularity or sufficiency of the proceedings shall be in writing and clearly set forth the irregularities and defects to which the objection is made. All written protests shall be filed with the City Clerk on or before the time fixed for the public hearing. Written protests may be withdrawn in writing at any time before the conclusion of the hearing.

SECTION 9. The City Clerk is directed to publish, not later than seven days prior thereto, a notice of the hearing, in the form required by the Act, in a newspaper of general circulation published in the area of the District, being *The Modesto Bee*, and otherwise in accordance with Section 6061 of the California Government Code, stating (a) the text or a summary of this Resolution, (b) the time and place of the hearing, and (c) that all interested persons for or against the annexation of the Territory to the District or the levying of the special taxes in the Territory will be heard.

SECTION 10. (a) If a majority (but at least six) of the registered voters residing within the District or a majority (but at least six) of the registered voters residing within the Territory, or the owners of one-half or more of the area of the land in the District and not exempt from the special tax, or the owners of one-half or more of the Territory, file written protests against the proposed annexation, and the protests are not withdrawn so as to reduce the value of the protests

to less than a majority, no further proceedings to annex the Territory to the District, or to levy in the Territory the special taxes to be levied in the District, shall be taken for a period of one year from the date of the decision of the Council on the issues discussed at the hearing.

SECTION 11. At the conclusion of the hearing, if the Council determines to annex the Territory to the District, it will submit the levy of the special taxes to the qualified electors of the Territory in a special election.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007- 022

A RESOLUTION AMENDING THE FISCAL YEAR 2006-07 BUDGET TO: 1) ESTIMATE $767,904 IN REVENUE FROM THE SALE OF 17TH AND G STREETS PARK; 2) APPROPRIATE SAID REVENUE TO 1400-310-3100-8101; 3) ESTABLISH A MULTI-YEAR OPERATING ORGANIZATION IN FUND 1400, FOR SPECIAL PROJECTS AND APPROPRIATE $70,000 FROM THE PARK FUND RESERVE TO SAID ORGANIZATION; AND 4) APPROVE PAYMENT OF $74,750 TO THE CALIFORNIA WILDLIFE FOUNDATION FROM CAPITAL IMPROVEMENT PROJECT P501, MARY E. GROGAN COMMUNITY PARK, TO MITIGATE THE IMPACTS TO SWAINSON'S HAWKS RESULTING FROM CONSTRUCTION OF THE PARK.

WHEREAS, as part of the Parks, Recreation and Neighborhoods Department's Fund Development Plan, Council accepted a recommendation to sell surplus parcels that are not needed to meet the Open Space requirements in the General Plan, and

WHEREAS, the City of Modesto recently sold the property known as 17th and G Streets Park (also known as Tower Park) to the Redevelopment Agency, and

WHEREAS, the proceeds from this sale were $767,904; the check has been received and deposited into the Park Fund (Fund 1400) Reserve, and

WHEREAS, $600,000 was allocated to Capital Improvement Program project 1400-310-P854, Thurman Field Improvements as part of the Council adoption of the 2006-07 Capital Improvement Plan in anticipation of receipt of the proceeds from sale of 17th and G Streets Park, and

WHEREAS, as part of the Council adoption of the 2006-07 Capital Improvement Plan and in anticipation of receipt of the proceeds from the sale of 17th and G Streets Park, $74,750 was allocated from the Park Fund Reserve to the Mary E. Grogan

Community Park Capital Improvement Project for mitigation of Swainson's Hawk habitat, and

WHEREAS, staff is recommending that $70,000 be appropriated to a new multi-year Fund 1400 organization, and

WHEREAS, these funds will be used for Special Projects related to funding for capital projects, and

WHEREAS, staff is further recommending that the balance of $23,154 remain in the Park Fund Reserve at this time,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves amending the Fiscal Year 2006-07 budget to estimate $767,904 in revenue from the sale of 17th and G Streets Park.

BE IT FURTHER RESOLVED that the Council herby approves amending the Fiscal Year 2006-07 budget to appropriate said revenue to 1400-310-3100-8101.

BE IT FURTHER RESOLVED that the Council herby approves amending the Fiscal Year 2006-07 budget to establish a multi-year operating organization in Fund 1400, for Special Projects, and appropriate $70,000 from the Park Fund Reserve to said organization, with $20,000 of said funding to be placed in the City's Parks Fund with the Stanislaus Community Foundation.

BE IT FURTHER RESOLVED that the Council herby approves payment of $74,750 to the California Wildlife Foundation from Capital Improvement Project P501, Mary E. Grogan Community Park, to mitigate the impacts to Swainson's Hawks resulting from construction of the park.

BE IT FURTHER RESOLVED that the Finance Director, or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-023

A RESOLUTION ACCEPTING $1,5263,000 IN GRANT FUNDING UNDER THE PROPOSITION 50 – RIVER PARKWAYS GRANT PROGRAM FROM THE STATE OF CALIFORNIA RESOURCES AGENCY FOR PHASE I DEVELOPMENT OF THE GATEWAY PARCEL OF THE TUOLUMNE RIVER REGIONAL PARK AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE GRANT CONTRACT.

WHEREAS, staff has been notified by the State of California Resources Agency that the City has been awarded $1,506,000 in funding from the Proposition 50 – River Parkways Grant Program, and

WHEREAS, said funding will allow for the development of Phase I of the Gateway Parcel of the Tuolumne Regional River Park (TRRP), and

WHEREAS, specifically, funding will be used for site preparation, grading and drainage, irrigation system and planting of the entire site, and

WHEREAS, Phase I of the Gateway area is intended to encompass 11 acres of grading, trail connection from Confluence Point to the 7th Street Bridge, backwater channel creation, plant establishment and irrigation (for the first 3 year) and river restoration work, and

WHEREAS, in order to accept the funding, the City Manager, or his designee, must be authorized to execute the Grant Contract,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby accepts $1,526,000 in grant funding under the Proposition 50 – River Parkways Grant Program from the State of California Resources Agency.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Grant Contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-024

A RESOLUTION APPROVING A PROFESSIONAL SERVICES AGREEMENT WITH PACIFIC DESIGN ASSOCIATES, INC. TO PROVIDE ARCHITECTURAL SERVICES FOR THE 1230 12TH STREET SEISMIC RETROFIT, REPAIR AND RENOVATION PROJECT, IN THE NOT-TO-EXCEED AMOUNT OF $70,575.20, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT.

WHEREAS, on August 29, 2003, the City of Modesto received a "Notice of Determination," which indicated that the Social Security Administration (SSA) Building, located at 1230 12th Street, (GSA No. 9-G-CA-1610), had been determined to be surplus government property, and

WHEREAS, the notice, issued by the U.S. General Services Administration (GSA) of the Federal Government, reported that the property was also determined to be suitable by the Department of Housing and Urban Development (HUD), and the first priority for use is for homeless programs or services for the homeless, and

WHEREAS, on October 14, 2003, by Resolution No. 2003-548, the City Council authorized staff to submit a "Letter of Interest" to the Department of Health and Human Services (HHS) in order to receive an application for the surplus property located on 1230 12th Street, previously used by the Social Security Administration, and approved staff recommendation for future use of the former Social Security Administration building, and

WHEREAS, On January 6, 2004, by Resolution No. 2004-019, the City Council approved the submission of an application for the surplus property located at 1230 12th Street and authorized the City Manager to execute the agreement and subsequent documents, and

WHEREAS, On September 13, 2004, the City of Modesto received a letter from the Department of Health and Human Services, Division of Property Management with an original Quitclaim Deed; by signing this document the City indicated its acceptance, and

WHEREAS, in accepting this property, the City of Modesto committed to preparing the site for occupancy, within 36 months if major renovations are done; or within 12 months if minor repairs need to be done, and

WHEREAS, the 1230 12th Street building must be retrofitted and renovated before it can be occupied, and

WHEREAS, the building does not meet current seismic standards, and

WHEREAS, although the building is in good condition, the mechanical and electrical system and the roof are the major items requiring repair and/or replacement, and

WHEREAS, funding for the renovation of this building is available through CDBG funds; the allocations of the CDBG funds were approved on May 11, 2004, by Council Resolution No. 2004-265 and on May 24, 2005 by Council Resolution 2005-279, and

WHEREAS, the selection process for the architectural services followed the City's accelerated selection procedure for professional consultants as outlined in Administrative Directive 3.1, and

WHEREAS, the City sent a Request for Proposals for the Seismic Retrofit, Repair and Renovation of this building to local architectural firms that had previously indicated and interest in providing architectural design services to the City to four consulting firms, and

WHEREAS, the City received one proposal and a letter from another firm indicating that they were not able to assemble a consulting team before the proposal's due date, and

WHEREAS, after reviewing the fee proposal for architectural services and clarifying their proposed fees from Pacific Design Associates, Inc., staff is recommending approval of a professional services agreement with Pacific Design Associates, Inc. at a total fee not to exceed $70,575.20,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves a professional services agreement with Pacific Design Associates, Inc. to provide architectural services for the 1230 12th Street Seismic Retrofit, Repair and Renovation project, in the not-to-exceed amount of $70,575.20.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

-MODESTO CITY COUNCIL
RESOLUTION NO. 2007-025

A RESOLUTION APPROVING AN AMENDMENT TO THE LICENSE AGREEMENT WITH THE MODESTO NUTS PROFESSIONAL BASEBALL CLUB TO REQUIRE INSTALLATION OF A NEW SCOREBOARD BY THE MODESTO NUTS PROFESSIONAL BASEBALL CLUB IN PLACE OF THE CITY OF MODESTO INVOKING THE CITY CHARTER AMENDMENT THAT ALLOWS A PUBLIC WORKS EXCEPTION FOR PARKS PROJECTS, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AMENDMENT

WHEREAS, the City owns, operates and manages John Thurman Field, a Class A professional baseball stadium, and

WHEREAS, on October 24, 2006, the City of Modesto and the Modesto Nuts Professional Baseball Club entered into a ten-year license agreement under authority of Resolution No. 2006-691 for the lease of John Thurman Field, and

WHEREAS, it is the desire of the City of Modesto and the Modesto Nuts Professional Baseball Club to install a new scoreboard by the 2007 baseball season, and

WHEREAS, the existing license agreement will be amended to require installation of a new scoreboard by the Modesto Nuts Professional Baseball Club, and

WHEREAS, the Modesto Nuts Professional Baseball Club will donate all or a portion of the construction management of the project to install the new scoreboard, and

WHEREAS, the Modesto Nuts Professional Baseball Club will also donate the cost of electrical modifications required for installation of the subject scoreboard in excess of $30,000,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves the amendment to the license agreement with the Modesto Nuts Professional Baseball Club to require installation of a new scoreboard by the Modesto Nuts Professional Baseball Club in place of the City of Modesto invoking the City Charter amendment that allows a public works exception for parks projects.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the amendment.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-027

A RESOLUTION REVISING THE POSITION CLASSIFICATION PLAN FOR THE CITY OF MODESTO.

WHEREAS, a Position Classification Plan for the City of Modesto was adopted by Modesto City Council Resolution 88-338 pursuant to Rule 2 of the Personnel Rules and Regulations of the City of Modesto, and

WHEREAS, the City Manager has recommended to the Council amendments to the Position Classification Plan, and

WHEREAS, Rule 2.2 of the City of Modesto Personnel Rules provides that revisions to the Classification Plan shall be effective upon adoption of resolution of the City Council,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION I. CLASSIFICATION AMENDED. The Position Classification Plan of the City of Modesto is hereby amended to revise the job specification for Fire Business Services Analyst and change the title to Public Safety Business Services Analyst.

The job specification for this classification is being amended to incorporate an assignment in the Police Department. The job specification for the former classification of Fire Business Services Analyst, as shown on the attached **Exhibit "A,"** which is hereby made a part of this resolution by reference, is hereby approved and made part of the Position Classification Plan of the City of Modesto.

SECTION 2. EFFECTIVE DATE. This resolution shall become effective on and after January 2, 2007.

The foregoing resolution was introduced in a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-029

A RESOLUTION APPROVING A STANDARD AGREEMENT FOR CONSULTANT SERVICES WITH BRYCE CONSULTING, INCORPORATED TO CONDUCT CLASSIFICATION STUDY AND REVIEW OF INTERNAL SALARY ALIGNMENT IN AN AMOUNT NOT TO EXCEED $139,800, AND AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO EXECUTE THE AGREEMENT

WHEREAS, the City desires to obtain the services of Bryce Consulting, Incorporated (Bryce Consulting) to provide an organizational assessment, and

WHEREAS, the City desires to enter into a Standard Consultant Agreement with Bryce Consulting in the total amount of $139,800 which includes professional fees and expenses, and

WHEREAS, the firm of Bryce Consulting is specially trained, experienced and competent to conduct a classification study and internal salary relationship review of non-sworn positions within the City, and

WHEREAS, the public interest, economy and general welfare will be served by this agreement,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves a Standard Agreement For Consultant Services with the firm of Bryce Consulting, Incorporated in the amount of $139,800 with respect to conducting a classification study and internal salary relationship review of non-sworn positions within the City.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced in a regular meeting of the Council of the City of Modesto held on the 2nd of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-030

A RESOLUTION AMENDING THE FISCAL YEAR 06-07 OPERATING BUDGET TO APPROPRIATE $139,800 FROM 0100-800-8000-8003 GENERAL FUND RESERVE TO 0100-030-0301-0235 PERSONNEL DEPARTMENT PROFESSIONAL SERVICES TO PROVIDE FUNDING FOR CLASSIFICATION STUDY.

WHEREAS, the City Council desires to implement a classification study in accordance with negotiated agreements with the City's non-sworn bargaining units, and

WHEREAS, the FY 06-07 costs associated with this classification study are not to exceed $139,800, and

WHEREAS, this expenditure has not yet been budgeted,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Fiscal Year 2006-07 Operating Budget is hereby amended to transfer $139,800 from the General Fund Reserve, 0100-800-8000-8003, to the Personnel Department, Professional Services, 0100-030-0301-0235.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-031

A RESOLUTION APPROVING AN AGREEMENT FOR THE PURCHASE OF RETIRED CITY OF MODESTO POLICE CANINE BY THE ASSIGNED MODESTO POLICE DEPARTMENT CANINE HANDLER, OFFICER HART, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE AN AGREEMENT WITH THE OFFICER FOR PURCHASE OF HIS POLICE CANINE.

WHEREAS, the Police Chief for the City of Modesto, from time to time, officially retires police canines from departmental service, and

WHEREAS, City of Modesto police canine handler, Officer Hart, wishes to purchase and assume possession of his assigned canine, Syler, upon the dog's official retirement, and

WHEREAS, it is necessary to adopt a resolution authorizing the purchase of City of Modesto police canines by their assigned department handler,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the agreement with Officer Hart for the purchase of his retired police canine, Syler, in the amount of One Dollar ($1.00) as more fully set forth in the Modesto Police Department Canine Transfer Contract attached hereto as **Exhibit "A"** and incorporated herein by this reference.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute said contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO POLICE DEPARTMENT CANINE TRANSFER CONTRACT

This AGREEMENT, made and entered into in the City of Modesto, State of California, this **8th** day of **November, 2006**, by and between the City of Modesto, a municipal corporation of the State of California, hereinafter referred to as "CITY", and Robert Hart, canine handler for the Modesto Police Department, hereinafter referred to as "HANDLER".

Facts:

Canine "Syler" has been with the Modesto Police Department since April of 1999. "Syler" has served the city for seven years. "Syler" was born in June of 1997 and will be ten years old in June of 2007. "Syler" has had a long and distinguished career as both a police service dog and a narcotic dog. "Syler" has reached an age where his health has begun to decline and he is slowing down. His ability to continue to do police work is no longer there and it is my recommendation he be retired from service.

This **AGREEMENT** is made with regard to the following recitals:

A. *HANDLER* wishes to assume ownership and take possession of that certain retired City of Modesto police canine named "Syler". *HANDLER* was previously the assigned canine handler for "Syler".

B. *HANDLER* wishes to maintain ownership of the above-referenced dog, and the CITY wishes to divest itself of both ownership and vicarious or direct liability for the subject dog.

C. CITY does hereby agree to relinquish all of its right, title and ownership interest in said dog whatsoever, effective upon *HANDLER's* execution and return of this document and payment of the sum of one and no/100ths dollars ($1.00) to the City of Modesto.

NOW, THEREFORE, in consideration of this AGREEMENT, the parties hereto agree as

follows:

1. *HANDLER* does agree to assume ownership of the Modesto police canine named "Syler", and to assume any and all risks, including, but not limited to, risk of injury or death to third persons, and to hold CITY, its police department, and its employees and/or agents or volunteers harmless from any and all liability, claims, administrative proceedings or other responsibility whatsoever arising from any injuries or damages that may occur on or after the date ownership of the dog is transferred pursuant to this AGREEMENT. That date is hereby fixed by agreement by and among the parties hereto as being **November 8, 2006**.

2. *HANDLER* further agrees to assume all liability for risks and dangers relating to his/her ownership of the subject police dog on and after the aforementioned date, and to indemnify and hold CITY harmless in the event that any legal or administrative action, whether by claim, demand or otherwise, is made by any person or entity as a consequence of or arising out of any event, act or disturbance involving the subject police dog on or after the date ownership is transferred. These hold harmless provisions shall extend to any direct or vicarious liability arising from any and all losses, liabilities, charges (including reasonable attorney fees and court costs), and any other expenses whatsoever which may arise in any manner after the new owners assumption of ownership on the date identified herein.

3. *HANDLER* must retain ownership of "Syler" for at least eighteen (18) months prior to any sale of the aforementioned retired police canine.

4. The retired police canine "Syler" shall revert to CITY should the purchaser, *HANDLER* determine he/she can no longer care for the aforementioned dog within the period of time commencing on the date of this AGREEMENT and ending eighteen (18) months from the date fixed by this AGREEMENT.

5. *HANDLER* acknowledges that he/she has read the foregoing AGREEMENT and understands that it is contractual in nature and understands each of its provisions.

IN WITNESS WHEREOF, the CITY OF MODESTO, a municipal corporation, has caused this Agreement to be executed in duplicate by its City Manager and attested by its City Clerk under authority of Resolution No. 99-370 adopted by the City Council of the City of Modesto on the 20th day of July, 1999.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-032

A RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO ISSUE INFORMAL REQUEST FOR BIDS (RFB) FOR A THREE (3) YEAR LEASE PURCHASE OF A TRIMBLE S6 3" ROBOTIC TOTAL STATION, FOR THE PUBLIC WORKS DEPARTMENT, CONSTRUCTION ADMINISTRATION DIVISION, FOR A TOTAL ESTIMATED COST OF $45,000.

WHEREAS, the Public Works Department, Construction Administration Division purchased a Topcon 802A Total Station in April 1999 and upgraded it to an 802AR Robotic Total Station in September 2000, and

WHEREAS, in March 2004 the Public Works Department, Construction Administration Division purchased the Trimble 5800 GPS Rover and Base Station, and

WHEREAS, Total Station technology has improved significantly since September 2000, and

WHEREAS, operating the Topcon Total Station with the Trimble 5800 GPS Rover has compatibility issues, especially the communication between the Topcon Total Station and the Trimble GPS equipment, and

WHEREAS, there are issues with the different software packages required for downloading and processing the survey data collected from the two different brands of equipment, and

WHEREAS, dealing with different manufacturers for technical support, maintenance, repair and service causes problems and delays, and

WHEREAS, replacing the Topcon 802AR Total Station with the Trimble S6 3" Robotic Total Station is cheaper than replacing the Trimble 5800 GPS Rover and Base Station with a Topcon GPS Rover and Base Station, and

WHEREAS, purchase of the Trimble S6 3" Robotic Total Station will eliminate the need for the extra data collector, and

WHEREAS, Modesto Municipal Code Section 8-3.203 generally requires all purchases, which meet or exceed $50,000.00 for material, equipment or contractual services to be formally bid. However, one exception to the code (8-3.204 (c)), allows for the Purchasing Manager, in his or her discretion, to determine that calling for formal bids on a competitive basis, as set forth in Section 8-3.203 is undesirable due to demanding circumstances, and

WHEREAS, based on the critical nature of the request the Purchasing Manager evoked that exception for this purchase. The solicitation of informal competitive bids for a three (3) year lease purchase of a Trimble S6 3" Robotic Total Station, for the Public Works Department, Construction Administration Division, for a total estimated cost of $45,000, will conform to Modesto Municipal Code Section 8-3.203, and demonstrate that a competitive process was met

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Purchasing Manager to issue an informal request for bids for a three (3) year lease purchase of a Trimble S6 3" Robotic Total Station for the Public Works Department, Construction Division, for a total estimated cost of $45,000.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-033

A RESOLUTION APPROVING AN AMENDMENT TO THE AGREEMENT WITH LARRY WALKER ASSOCIATES IN THE AMOUNT OF $136,226, REFLECTING THE REVISED SCOPE OF SERVICES AND REVISED COST ESTIMATE FOR PROFESSIONAL SERVICES FOR THE NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM (NPDES) PERMIT RENEWAL FOR DISCHARGE TO THE SAN JOAQUIN RIVER, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AMENDMENT.

WHEREAS, on August 3, 2005, by Resolution No. 2005-389, Council approved an agreement with Larry Walker Associates in the amount of $242,000 for professional services for the Wastewater Treatment Plant NPDES permit renewal to discharge to the San Joaquin River, and

WHEREAS, the draft Wastewater Master Plan proposes an additional 4.8 mgd of year-round discharge to the San Joaquin River, and

WHEREAS, as a result of the proposed year-round discharge, the Regional Board will be requiring an Antidegradation Analysis for the NPDES Permit renewal, and

WHEREAS, Regional Board staff will require an "antidegradation" review as part of the NPDES renewal, and

WHEREAS, because of experience with other antidegradation reviews, it is recommended that Larry Walker Associates perform the Antidegradation Analysis, and

WHEREAS, this analysis broadens the original Reasonable Potential Analysis (RPA) effort as described on the original Scope of Services Task 2.3, and

WHEREAS, the Scope of Services has been revised to reflect the most current tasks for this contract, and

WHEREAS, the cost for this additional analysis is $136,226, making the project total cost $378,226, and

WHEREAS, funds are budgeted in Account 6210-480-5217-0235 for the additional scope of work,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Amendment to the Agreement with Larry Walker Associates in the amount of $136,226, reflecting the revised Scope of Services and revised Cost Estimate for professional services for the NPDES Permit renewal for discharge to the San Joaquin River.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the amendment to the agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-034

A RESOLUTION APPROVING AN AMENDMENT TO THE AGREEMENT WITH CAROLLO ENGINEERS FOR ON-CALL ENGINEERING SERVICES IN THE AMOUNT OF $70,000, REFLECTING THE REVISED SCOPE OF SERVICES FOR FY2006-07, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AMENDMENT.

WHEREAS, on January 3, 2006, Council approved an on-call engineering services agreement with Carollo Engineers in the amount of $44,000 annually, and

WHEREAS, the on-call engineering services contractor for Water Quality Control (WQC) performs a number of critical tasks requiring engineering services that are currently not available in-house, and

WHEREAS, during the initial contract period with Carollo Engineers for on-call engineering services, they have assisted with the following:

- FEMA Evaluation – Carollo was used to gather detailed engineering estimates for the City to provide FEMA regarding damages to the Jennings Treatment Plant and Ranch area. Staff anticipates receiving up to $89,000 in FEMA funds from this effort.
- River Discharge Evaluation – Due to early season flooding on the ranch land and high water levels in the City's storage ponds, Carollo assisted the City with bench-scale testing and treatment design prior to discharging waters into the San Joaquin River one month earlier than usual. This action prevented the overflow or discharge of wastewater in excess of the City's NPDES permit limitations
- Ranch RFP Development – Carollo is assisting in the development of conditions for a new lease of ranch land scheduled for summer 2007

WHEREAS, of the above tasks, the Ranch RFP Development was the only anticipated project, and

WHEREAS, spring rains and excessive flooding required staff to utilize the on-call engineering services, and

WHEREAS, these tasks have depleted the funds in the contract and additional funds are needed to cover additional on-call engineering services, and

WHEREAS, staff is requesting an increase in the annual funding of this contract for FY2006-07 only in the amount of $70,000, increasing the contract amount from $44,000 to $114,000, and

WHEREAS, funds are budgeted in the amount of $35,000 each from Account 6210-480-5213-0235 and 6210-480-5214-0235,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Amendment to the Agreement with Carollo Engineers for on-call engineering services in the amount of $70,000, reflecting the revised scope of services for FY2006-07.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Amendment to the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-035

A RESOLUTIONAUTHORIZING THE TRANSFER OF FUNDS IN THE AMOUNT OF $192,000 FROM FLEET SERVICES RESERVES (7210-800-8000-8003) TO FLEET SERVICES REPLACEMENT (7210-480-5814-5700) TO COVER THE COST FOR ADDITIONAL VEHICLES AND EQUIPMENT FOR THE SECONDARY TREATMENT PLANT.

WHEREAS, the Secondary Treatment Plant (STP) has paid funds in the amount of $192,000 into the Fleet Reserve in preparation of adding one 14-yard dump truck, one backhoe and backhoe trailer, and one forklift, and

WHEREAS, the estimated purchase price for the additional vehicles and equipment is $192,000, and

WHEREAS, it is necessary to transfer funds from Fleet Services Reserve (7210-800-8000-8003) to the Fleet Services Replacement Account (7210-480-5814-5744, 5745, 5746) to cover the purchase of the additional vehicles and equipment, and

WHEREAS, the Finance Committee, at its December 14, 2006 meeting, recommended approval of this item,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the transfer of funds in the amount of $192,000 from Fleet Services Reserve (7210-800-8000-8003) to Fleet Services Replacement (7210-480-5814-5700) to cover the cost for additional vehicles and equipment for the Secondary Treatment Plant.

BE IT FURTHER RESOLVED that the Finance Department is hereby authorized to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-036

A RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO ISSUE A FORMAL REQUEST FOR BIDS FOR THE PURCHASE OF ADDITIONAL VEHICLES AND EQUIPMENT FOR THE SECONDARY TREATMENT PLANT.

WHEREAS, the Secondary Treatment Plant (STP) has paid funds in the amount of $192,000 into the Fleet Reserve in preparation of adding one 14-yard dump truck, one backhoe and backhoe trailer, and one forklift, and

WHEREAS, the current twenty-eight foot trailer has limitations in small areas such as the oxidations ponds, and on the roads and bridges, and

WHEREAS, in the past, smaller dump trucks have been rented to do this work, at a cost of over $100,000 since 2001, and

WHEREAS, the cost of a new 14-yard dump truck is approximately $90,000, and

WHEREAS, this vehicle will be needed when the construction of new facilities at the STP begin within the next months, and

WHEREAS, the current backhoe is two-wheel drive and is not meeting the current needs of the Plant and the existing trailer cannot be used with the new backhoe, and

WHEREAS, the current backhoe will be replaced with a four-wheel drive unit, which has better traction to meet the needs at the STP on a year-round basis, including adverse conditions caused from heavy rains, and

WHEREAS, a trailer for the backhoe is needed to move the backhoe to different locations around the STP, and

WHEREAS, the Secondary Treatment Plant currently uses the Compost Facility forklift, and

WHEREAS, with the current amount of materials coming in and the amount that will be coming in with the planned construction, it is necessary to have a forklift designated for the STP, and

WHEREAS, funds are budgeted in Fleet Services Replacement (7210-480-5814-5744, 5745, 5746) in the amount of $192,000 to fund the purchase of these additional vehicles and equipment,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Purchasing Manager to solicit formal bids for the purchase of additional vehicles and equipment for the Secondary Treatment Facility.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-037

A RESOLUTION APPROVING THE PROJECT, INCLUDING PLANS AND SPECIFICATIONS, FOR THE PROJECT TITLED "DISSOLVED AIR FLOTATION FACILITY," ACCEPTING THE BID AND APPROVING A $6,010,403.00 CONTRACT WITH KAWEAH CONSTRUCTION CO., FOR THE PROJECT TITLED, "DISSOLVED AIR FLOTATION FACILITY," AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE CONTRACT.

WHEREAS, plans and specifications have been prepared for the project titled "Dissolved Air Flotation Facility" and City staff recommends approval to the City Council, and

WHEREAS, the bids received for "Dissolved Air Flotation Facility" were opened at 11:00 a.m. on November 14, 2006, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the Public Works Director has recommended that the bid of $6,010,403.00 received from Kaweah Construction Co., be accepted as the lowest responsible bid and the contract be awarded to Kaweah Construction Co.,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the "Dissolved Air Flotation Facility" project, including the plans and specifications.

BE IT FURTHER RESOLVED that the Council hereby accepts the bid of Kaweah Construction Co., in the amount of $6,010,403.00, and hereby awards Kaweah Construction Co., the contract titled "Dissolved Air Flotation Facility."

BE IT FURTHER RESOLVED that Kaweah Construction Co. will receive an incentive for every day of beneficial use of the DAFF according to the following schedule:

$2,000/day – 4 DAF units
$1,500/day – 3 DAF units
$1,000/day – 2 DAF units
No incentive for less than 2 DAF units.

The incentives for beneficial use of the DAF are only valid during the 45-day period between October 1, 2007 and November 15, 2007. If the beneficial use of the DAF is delayed beyond this period for any reason, no incentives will be paid and Kaweah Construction Co. shall have no right to claim any portion of the incentive that would be paid had the delay not occurred.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-038

A RESOLUTION APPROVING A CONSULTANT AGREEMENT WITH CONSOLIDATED CM FOR CONSTRUCTION MANAGEMENT SERVICES OF THE DISSOLVED AIR FLOTATION FACILITY PROJECT IN THE NOT-TO-EXCEED AMOUNT OF $698,716, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, on January 2, 2007, concurrently City Council awarded by Resolution No. 2007-037 a construction contract in the amount of $6,010,403.00 to Kaweah Construction Co., to construct the Dissolved Air Flotation (DAF) Facility Project, and

WHEREAS, the Dissolved Air Flotation (DAF) Facility Project is a large specialized project that will require augmentation of the City's capacity to provide construction management and inspection, and

WHEREAS, due to the complexity of the construction of the DAF Facility and current staffing levels, a construction management company is being tasked with the management of the project, and

WHEREAS, the selection process for construction management services followed the City's selection procedures for professional consultants, and

WHEREAS, in accordance with Administrative Directive 3.1, Capital Improvement Services (CIS) staff mailed a Request for Qualifications for engineering design services to all firms that had previously indicated an interest in providing construction management services to the City, and

WHEREAS, three specialized consulting firms of construction management services were asked to provide a proposal, and

WHEREAS, the City's Selection Committee reviewed the proposals submitted and held interviews with the three firms, and

WHEREAS, the firm of Consolidated CM was considered to be the most qualified to provide construction management services for the project, and

WHEREAS, Consolidated CM is a respected construction management firm that specializes in wastewater projects, and

WHEREAS, their proposed construction manager, Dave Lee, has over 30 years of experience in managing construction projects similar to the DAFF. He holds a Grade V wastewater operators license, and is a registered Civil Engineer. In addition to his construction management experience, he has served as an expert witness for construction claims, and

WHEREAS, CIS staff recommends the consulting firm of Consolidated CM be awarded a contract to perform the construction management services as current workload and experience levels do not provide for timely in-house solutions/responses, and

WHEREAS, City desires to enter into an Agreement with Consolidated CM in an amount not-to-exceed $698,716.00 to perform construction management services of the Dissolved Air Flotation (DAF) Facility Project, and

WHEREAS, Consolidated CM will be paid on a time and materials basis for actual hours required performing individual tasks at a set rate,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Agreement for Construction Management Services with Consolidated CM in an amount not-to-exceed $698,716.00 for construction management services of the Dissolved Air Flotation (DAF) Facility Project.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-039

A RESOLUTION AMENDING THE AGREEMENT WITH MINAGAR & ASSOCIATES, INC., IN THE AMOUNT OF $11,812, EXPANDING THE SCOPE OF WORK WITH THE ADDITION OF SIGNAL TIMING OPTIMIZATION WITH 90-SECOND CYCLE LENGTH FOR G, H, 9TH, AND NEEDHAM STREETS, AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT

WHEREAS, on November 25, 2003, by Resolution No. 2003-621, the City Council approved a Consultant Services Agreement with Minagar & Associates, Inc., in the amount of $179,279, for a Traffic Signal Synchronization Study for traffic signals in downtown Modesto to improve traffic signal synchronization, and

WHEREAS, the City has requested that the agreement be modified to allow for expanding the Scope of Work with the addition of signal timing optimization with 90-second cycle length for G, H, 9th, and Needham Streets, and

WHEREAS, all funds are programmed in the Capital Improvement Program Account 2300-160-N062, "Traffic Coord Downtown (100)," and

WHEREAS, modifying the Scope of Work with Minagar & Associates, Inc., will have a financial impact to the project of $11,812 for the cost of additional Scope of Work, and

WHEREAS, Minagar & Associates, Inc., has completed the addition of signal timing optimization with 90-second cycle length for G, H, 9th, and Needham Streets, and

WHEREAS, the Economic Development Committee at their December 11, 2006, meeting reviewed this Amendment to the Agreement with Minagar & Associates, Inc., in

the amount of $11,812, expanding the scope of work with the addition of signal timing optimization with 90-second cycle length for G, H, 9th, and Needham Streets.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves amending the Agreement with Minagar & Associates Inc., in the amount of $11,812, expanding the Scope of Work with the addition of signal timing optimization with 90-second cycle length for G, H, 9th, and Needham Streets.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-040

A RESOLUTION AUTHORIZING THE PARKS, RECREATION, AND NEIGHBORHOODS DEPARTMENT TO ISSUE A REQUEST FOR PROPOSALS FOR A SITE ASSESSMENT AND DEVELOPMENT OF A MITIGATION AND MONITORING PLAN FOR THE CLOSED CARPENTER ROAD LANDFILL.

WHEREAS, the City of Modesto operated the Carpenter Road landfill from 1956 until its closure in 1968, and

WHEREAS, as the owners of the landfill site, the City of Modesto is responsible for current maintenance and repair, and

WHEREAS, monitoring wells located on the site have indicated the presence of methane gas at the boundaries of the landfill in excess of statutory limits, and

WHEREAS, the California Integrated Waste Management Board is requiring the City to determine the cause of the high methane readings and develop a Mitigation and Monitoring Plan to ensure that the closed landfill remains in compliance with the statutes, and

WHEREAS, staff is recommending that the Council authorize the Parks, Recreation and Neighborhoods Department to issue a Request For Proposals (RFP) for the preparation of a Site Assessment and development of a Mitigation and Monitoring Plan for the closed Carpenter Road Landfill, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on December 12, 2006, in the Tenth Street Place Chambers, located at 1010 Tenth Street, Modesto California, and

WHEREAS, by a memo dated December 6, 2006, staff requested that the public hearing be continued until January 2, 2007, to allow staff time to incorporate additional information, and

WHEREAS, on December 12, 2006, the City Council, by motion, approved continuing the hearing to January 2, 2007, and

WHEREAS, a duly noticed public hearing was held at said time and place, at which time evidence, both oral and documentary, was received and considered, and

WHEREAS, it was found and determined by the Council of the City of Modesto that the Parks, Recreation and Neighborhoods Department should be authorized to issue a Request For Proposals (RFP) for the preparation of a Site Assessment and development of a Mitigation and Monitoring Plan for the closed Carpenter Road Landfill.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby authorizes the Parks, Recreation and Neighborhoods Department to issue a Request For Proposals (RFP) for the preparation of a Site Assessment and development of a Mitigation and Monitoring Plan for the closed Carpenter Road Landfill.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-041

A RESOLUTION AUTHORIZING THE CREATION OF A CARPENTER ROAD LANDFILL MITIGATION FUND; AND AUTHORIZING A GENERAL FUND TRANSFER TO FUND UP TO $150,000 FOR AN RFP FOR A SITE ASSESSMENT AND DEVELOPMENT OF A MITIGATION AND MONITORING PLAN FOR THE CARPENTER ROAD LANDFILL.

WHEREAS, the City of Modesto operated the Carpenter Road landfill from 1956 until its closure in 1968, and

WHEREAS, as the owners of the landfill site, the City of Modesto is responsible for current maintenance and repair, and

WHEREAS, monitoring wells located on the site have indicated the presence of methane gas at the boundaries of the landfill in excess of statutory limits, and

WHEREAS, the California Integrated Waste Management Board is requiring the City to determine the cause of the high methane readings and develop a Mitigation and Monitoring Plan to ensure that the closed landfill remains in compliance with the statutes, and

WHEREAS, staff has recommended and the Council has approved and authorized the Parks, Recreation and Neighborhoods Department to issue a Request For Proposals (RFP) for the preparation of a Site Assessment and development of a Mitigation and Monitoring Plan for the closed Carpenter Road Landfill, and

WHEREAS, this Mitigation and Monitoring work will require a funding source, and staff is recommending the establishment of a Carpenter Road Landfill Mitigation Fund, initially as a sub-fund of the Solid Waste Fund, and subsequently as a separate Fund with the adoption of the FY 2007-2008 Budget, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on December 12, 2006, in the Tenth Street Place Chambers, located at 1010 Tenth Street, Modesto California, and

WHEREAS, by a memo dated December 6, 2006, staff requested that the public hearing be continued until January 2, 2007, to allow staff time to incorporate additional information, and

WHEREAS, on December 12, 2006, the City Council, by motion, approved continuing the hearing to January 2, 2007, and

WHEREAS, a duly noticed public hearing was held at said time and place, at which time evidence, both oral and documentary, was received and considered, and

WHEREAS, it was found and determined by the Council of the City of Modesto that the Parks, Recreation and Neighborhoods Department should be authorized to issue a Request For Proposals (RFP) for the preparation of a Site Assessment and development of a Mitigation and Monitoring Plan for the closed Carpenter Road Landfill, and

WHEREAS, it was found and determined by the Council of the City of Modesto that a Carpenter Road Landfill Mitigation Fund should be established, initially as a sub-fund of the Solid Waste Fund, and subsequently as a separate Fund with the adoption of the FY 2007-2008 Budget, and

WHEREAS, it was found and determined by the Council of the City of Modesto that the General Fund should loan the Carpenter Road Landfill Mitigation Fund up to $150,000 to perform the Site Assessment and develop the Mitigation and Monitoring Plan, with the General Fund to be reimbursed via the garbage rates or from some other funding source upon determination of the actual cost of this work, and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby authorizes that a Carpenter Road Landfill Mitigation Fund is established as a sub-fund of the Solid Waste Fund, to be subsequently established as a separate Fund with the adoption of the FY 2007-2008 Budget, and that the Finance Director or his designee is hereby authorized to take the steps necessary to implement this provision.

BE IT FURTHER RESOLVED that the General Fund shall loan the Carpenter Road Landfill Mitigation Fund up to $150,000 to perform the Site Assessment and develop the Mitigation and Monitoring Plan, with the General Fund to be reimbursed via the garbage rates or from some other funding source upon determination of the actual cost of this work.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-042

A RESOLUTION DESIGNATING THE PROPERTY AT 218 ELMWOOD COURT AS A MODESTO LANDMARK PRESERVATION SITE (OWNER: CHEZ LUNDGREN)

WHEREAS, Chapter 10 of Title 9 of the Modesto Municipal Code establishes Landmark Preservation Site status as a way to recognize, preserve, enhance and perpetuate significant landmarks in the community, and

WHEREAS, a public hearing was held on September 18, 2006 at the McHenry Museum, 1402 I Street, Modesto, California, in which the Landmark Preservation Commission found and recommended in their Resolution No. 2006-3, that the property at 218 Elmwood Court is eligible for designation as a Landmark Preservation Site for the following reasons:

(1) The location and setting is compatible with future preservation and use.
(2) The physical condition is such that preservation, maintenance or adaptive use is economically feasible.
(3) The distinguishing characteristics of significance are for the most part original and intact or capable of restoration.
(4) The existing or proposed use is compatible with the preservation and maintenance of the site

and

WHEREAS, the Safety and Communities Committee met on December 4, 2006 and supported the Landmark Preservation Commission recommendation, and

WHEREAS, a report dated December 15, 2006, from the Parks, Recreation and Neighborhoods Department, a copy of which is on file in the office of the City Clerk, sets forth said recommendation, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on January 2, 2007, in the Tenth Street Place Chambers, located at 1010 Tenth Street, Modesto California, and

WHEREAS, a duly noticed public hearing was held at said time and place, at which time evidence, both oral and documentary, was received and considered, and

WHEREAS, after said public hearing, the Council found and determined that the property at 218 Elmwood Court is eligible for designation as a Landmark Preservation Site for reasons set forth by the Landmark Preservation Commission,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the property located at 218 Elmwood Court is more particularly described in Exhibit "A" attached hereto and incorporated herein by reference.

BE IT FURTHER RESOLVED that the property at 218 Elmwood Court has historical significance for the following reason:

This 1926 Provincial-style house was part of the Coldwell subdivision, which was formed on August 24, 1903 and owned by Virginia Coldwell. Mr. and Mrs. Coldwell came to Stanislaus County in 1875 and purchased a 400-acre ranch about three miles north of Modesto. The subdivision was not developed until the mid to late 1920's.

BE IT FURTHER RESOLVED that the property at 218 Elmwood Court has architectural significance as a Provincial-style house from the 1920's and is hereby designated a Landmark Preservation Site for the following reason:

> Architectural significance-Possessing distinctive characteristics of a style, place, period, method or materials or construction, builder or architect.
>
> Built in 1926, this one-story Provincial-style house is sheathed in rough stucco and topped by a steeply pitched roof with intersecting gables and exposed rafters. There are two front facing gables with the front gable containing a louvered vent in the peak and a multipaned casement window. The second gable is recessed slightly behind the front and lower gable and shelters the main entrance in a small porch with arched openings. A large arched stationary window with a single center pane flanked by multipane side lights faces the street. There is an exterior chimney to one side of the house. This house design was a popular Revival style in the 1920's.

BE IT FURTHER RESOLVED that pursuant to Section 9-10.104(e)(1) of the Modesto Municipal Code, the City Clerk shall record a copy of this resolution with the County Recorder's Office of Stanislaus County.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 2nd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-044

A RESOLUTION APPROVING TASK ORDER NO. 4 TO THE MASTER PROFESSIONAL SERVICES AGREEMENT FOR CONSULTANT SERVICES WITH HARRIS AND ASSOCIATES, FOR THE PREPARATION OF A FACILITIES MASTER PLAN, INFRASTRUCTURE FINANCE PLAN, AND FOR FORMATION OF A COMMUNITY FACILITIES DISTRICT FOR THE TIVOLI SPECIFIC PLAN AREA

WHEREAS, the City Council is desirous of creating a Facilities Master Plan ("FMP") and Infrastructure Finance Plan ("IFP") for the Tivoli Specific Plan Area ("Project"), and

WHEREAS, Russell A. Newman, Professional Law Corporation ("Applicant"), has a legal interest in real property located within the Tivoli Specific Plan Area, shown in **Exhibit "A"**, and is interested in pursuing development of properties in the Specific Plan Area, and

WHEREAS, on September 26, 2006, by Resolution No. 2006-599, the Council of the City of Modesto approved a Master Professional Services Agreement for Consultant Services with Harris and Associates ("Consultant"), for the preparation of FMPs, IFPs, technical studies and related on-call services as assigned by City, and

WHEREAS, Consultant has prepared Task Order No. 4 ("Task Order") for the Project, attached as Exhibit "B", and

WHEREAS, Applicant has advanced a deposit in the amount of three hundred thousand dollars ($300,000) to the City to fund a portion of Task Order No. 4 and to pay staff and consultant expenses expected to be incurred in connection with the Project, and

WHEREAS, additional deposits will be provided by Applicant, as required by the City and as necessary to fund the Task Order, and

WHEREAS, the City will issue Notices to Proceed to the City's Consultant only for those subtasks for which the Applicant has deposited funds,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that Task Order No. 4, attached as **Exhibit "B"** hereto is hereby approved.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

EXHIBIT B

City of Modesto
TASK ORDER NO. 4
for
Harris & Associates
Master Professional Services Agreement for Consultant Services

Tivoli Specific Plan Area FMP/IFF

This Task Order No. 4 is made and entered into by and between the City of Modesto, a municipal corporation (hereinafter "CITY"), and Harris and Associates, a California corporation (hereinafter "CONSULTANT") and is effective as of _____, 2007.

RECITALS

A. CONSULTANT has entered into a Master Professional Services Agreement for Consultant Services, (hereinafter "Agreement"), dated September 26, 2006 ("AGREEMENT") with the CITY, by which the CONSULTANT has agreed to provide professional engineering and financial engineering services for various development projects, which is incorporated herein by reference.

B. At the request of CITY and in compliance with the terms of the AGREEMENT, CONSULTANT has prepared the Task Order No. 4, a copy of which is attached hereto as Exhibit A.

C. CITY and CONSULTANT desire that CONSULTANT perform the services as identified in the attached Task Order.

NOW THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

1. **INCORPORATION OF MASTER PROFESSIONAL SERVICES AGREEMENT FOR CONSULTANT SERVICES.** This Task Order hereby incorporates by reference all terms and conditions set forth in the Master Professional Services Agreement, unless expressly modified by this Task Order. The AGREEMENT and this Task Order shall, to the fullest extent possible, be read and considered as fully integrated documents and shall be interpreted so as to avoid inconsistencies, comply with all applicable laws and ensure that the objectives of the parties will be fully realized.

   Nothing in this Task Order is intended to supersede, terminate, modify or otherwise affect any provision of the AGREEMENT, except to the extent that a provision of this AGREEMENT is in direct and irreconcilable conflict with a provision of the AGREEMENT. Then, and only in that event, the provisions of the AGREEMENT shall prevail over the contradictory provision of the Task Order.

2. **SCOPE OF SERVICES**. CONSULTANT shall perform the services described in Exhibit "A" attached hereto and incorporated herein by reference. CONSULTANT shall not replace its Authorized Representative, nor shall CONSULTANT use any subcontractors or subconsultants not listed in this Task Order, without the prior written consent of CITY.

3. **TIME OF PERFORMANCE**. CONSULTANT shall commence performance within five (5) working days after receipt of a Notice to Proceed from City, and shall complete all required services no later than the dates set forth in Exhibit "A".

4. **COMPENSATION**. For services performed by CONSULTANT in accordance with this Task Order, CONSULTANT agrees to accept a sum not to exceed $704,043. CONSULTANT shall be paid at the times and in the manner set forth in Paragraph 3 of the Master Professional Services Agreement, unless expressly provided otherwise in the attached Task Order.

5. **SIGNATURES.** The individuals executing this Task Order represent and warrant that they have the right, power, legal capacity, and authority to enter into and to execute this Task Order on behalf of the respective legal entities of the CONSULTANT and CITY. This Task Order shall inure to the benefit of and be binding upon the parties hereto and their respective successors and assigns.

IN WITNESS WHEREOF, the City of Modesto, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. 2007-_____, adopted by the Council of the City of Modesto on the ____ day of _____, 2007, and _____ has caused this Agreement to be duly executed in duplicate as of the Effective Date set forth above.

Harris & Associates
Scope of Work
For Task Order No. 4
Tivoli Development Project
Preparation of the Facilities Master Plan
and Infrastructure Financing Plan
December 27, 2006

The following describes Harris and Associates' (Harris) approach and level of effort for this scope of work. There are four sub consultants on this project; West Yost and Associates for Water; Carollo Engineers for Wastewater; Omni Means for Traffic; and Stantec for Storm Drainage. The scopes of work for each of the sub consultants are shown in Exhibits A through D. The cost estimate for Harris' hours and the sub-consultants are summarized in Exhibit E. Harris' hourly rates are shown in Exhibit F. In addition, Goodwin Consulting Group will prepare the necessary documents for the Community Facilities District. That fee is included in Exhibit D.

The following work will be performed on a time and materials (four sub-tasks):

- Task 4.1 reviews the technical studies associated with the project's Final EIR and defines the obligation (benefit and burden) that each acre of land within the development will have for infrastructure improvements;
- Task 4.2 produces the infrastructure financing plan for the build out of the Tivoli development and specifically sets the financing for the Capital Improvement Projects that are triggered by the development and anticipated during the first 10 years. The City and developer will define the phasing of development and the costs as identified in Task 4.1;
- Task 4.3 prepares of the Facilities Master Plan for the proposed development.
- Task 4.4 establishes the Community Facilities District formation

Task 4.1 – Preparation of a Benefit and Burden Analysis

The City will provide all of the technical studies prepared for the project's Final EIR, and Harris will review the required data on land uses that are anticipated in the Tivoli Specific Plan Area. Harris will collect from the developer, with the City's help, this land use data in electronic format. The land use data will include the development layout, irrigation areas (potable water demand), land uses, acreage, dwelling units, square footage of non-residential building space, pavement areas, and planned layout of the arterial streets and internal street network, which will be the responsibility of the project on and off-site infrastructure, as outlined in the project's Specific Plan and Draft EIR. Harris will also review the Draft Environmental Impact Report to determine all recommended mitigation measures

Harris will describe each type of capital facility that has been and will need to be constructed to serve the Tivoli Specific Plan Area. This data will be given to each of the sub-consultants to prepare the necessary reports to support the development of the Infrastructure Finance Plan

(IFP). These sub-consultants' reports will tier off the work completed for the Draft EIR by the City, and will include conceptual layouts and cost estimates of the infrastructure needed to support build-out of the development.

Based on the existing technical studies for the EIR and the new studies to support the IFP, Harris will prepare a Benefit and Burden Analysis. This analysis will define the infrastructure and cost burden that each land use will receive from the infrastructure that will be included in the IFP and detailed in the Facilities Master Plan (FMP). It will also identify the cost burden that each acre of land will have towards public facility improvements, by land use, at build-out of the development area. The benefit and burden analysis will also identify those projects that will need to be funded up-front by the developer in order to allow the development to proceed regardless of how the developer chooses to phase the construction of the project. This analysis will not define how these costs will be paid for. The analysis will be prepared for the entire development at build-out. As the project is further defined, if a phased Benefit and Burden Analysis is proposed, additional scope and consultant fees will be required.

Traffic Assessment – Omni-Means, Ltd.

Based on provided traffic model updated by Downling and Associates, Omni-Means will perform a "select link" analysis to identify traffic improvements required to mitigate the Tivoli development impact. These improvements will be determined based on existing deficiencies and the proportion of total improvements needed for new development phasing. Omni-Means will also prepare cost estimates for these mitigation projects, including cost per square foot for right-of-way acquisition. The traffic fee will be developed and applied on a cost per trip generation rate for each land use. Additionally, possible alternative funding sources will be reviewed and evaluated.

Water Capacity Study – West Yost associates (WYA)

Based on provided information regarding land use, roadway alignments, etc. WYA will model the proposed water system for project build-out. WYA will modify the existing water system hydraulic model to be representative of the new water demands of the project. This model will then be used to evaluate the potential hydraulic impacts of adding the new water demands required to serve the project on the City's existing water system. If the City's existing water system cannot meet the City's minimum water system design criteria with the increased demands, then WYA will make recommendations for whatever new water supply sources and/or water system infrastructure facilities will be required to mitigate the hydraulic impacts of the Project for both build-out and project phasing. WYA will prepare an estimate of the probable construction costs for the infrastructure required to provide adequate supply.

Wastewater – Carollo Engineers

Based on provided land use information, Carollo will update the hydraulic model to reflect changes in planning assumptions that have occurred since they completed the 2005 Final Wastewater Capacity Study. Carollo will revise needed sewer improvements to reflect changes in planning assumptions. The collection system and WWTP improvements will also be revised as necessary to accommodate growth based on revisions to the hydraulic model and updates to the WWTP Master Plan currently being prepared by Carollo. Carollo will develop probable construction cost estimates to reflect changes in the Capacity Study.

Storm Drain - Stantec

Based on provided land use information, existing studies, and Developer provided grading plans and detention basin plans and inverts, Stantec will define drainage sub-basin areas and perform hydrologic evaluations to determine10-year and 100-year discharges that will be generated by the development at build-out. Stantec will additionally provide peer review of the proposed dual use detention basin to access conformance to existing City guidelines.

Harris will participate in one (1) City Council presentation associated with this task, as well as three (3) meetings with staff and the developer. Harris will also set and attend meetings related to each infrastructure analysis with the sub consultants and various City departments as necessary. The Benefit and Burden analysis will define water, sewer, traffic, park, storm drainage and public and government facilities impacts.

Harris will provide ten (10) copies of the Draft Benefit and Burden Analysis for review by the City staff. Once written comments have been received, at the City's direction, a final draft will be prepared for review by the developers. At this point, Harris will try to reach consensus among the parties in order to proceed with a facility cost summary that all agree is appropriate. Twenty (20) final copies, including 1 electronic copy, will be provided to the City once all final comments have been received and incorporated.

Harris will assist the City in the preparation of the City Council staff report associated with the presentation of the Tivoli Development Benefit and Burden Analysis.

Estimated Level of Effort and Costs for Task 4.1:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	460	$ 69,540	3 w/staff; 1 w/Council
West Yost - Water	180	$ 28,000	
Carollo - Wastewater	200	$ 37,500	2 w/staff
Omni-Means - Traffic	292	$ 43,660	2 w/staff
Stantec - Drainage	164	$ 18,011	2
Mark-ups on Subs		$ 12,717	
Totals	**1,296**	**$ 209,428**	

Deliverables for Task 4.1

10 copies of the draft Benefit and Burden Analysis
10 copies of a final draft of the Benefit and Burden Analysis
20 copies of the final Benefit and Burden Analysis
1 electronic copy of the final Benefit and Burden Analysis.

Task 4.2 – Infrastructure Finance Plan

After the Benefit and Burden analysis is completed and prior to beginning the Infrastructure Finance Plan or Facilities Master Plan, Harris will meet with the developer and the City to determine how all of the infrastructure project costs will be paid. These payment methods include: 1) Developer "build and dedicate", 2) condition of approval on the development mapping, 3) defined points within a development agreement, 4) part of a land secure financing district and/or 5) paid for by the development impact fees for the Tivoli development.

Harris will work with the City and developer(s) to set project phasing. Harris, the sub-consultants and the City will build upon the Benefit and Burden analysis, and shall meet with and proceed with the coordination of all Finance Plan Consultants, including City CFD staff, the Appraiser, and Bond Counsel (assumed to have separate contracts with the City) regarding assumptions upon which the Tivoli Development Project IFP shall be performed.

The purpose of the IFP will be to clearly describe what is expected to occur with regard to land uses, infrastructure costs and financing. This is an iterative process that will require consensus building among all of the stakeholders. Harris will play an integral role in generating this consensus.

The IFP will define the financing details related to water, sewer, storm drainage, traffic, public facilities and parks. For those portions of the infrastructure that are associated with impact fees being prepared by Harris or the CFD being prepared by the City, a cash flow analysis will be provided defining when each project is anticipated and can be funded.

Harris will prepare a Draft Infrastructure Finance Plan based on the Technical Analyses performed by the Sub-consultants to include for each program: a project detail sheet, the project description, the itemized project costs, the capital improvement program (CIP) numbers, a priority list of projects, and cash flow projections based upon estimated revenue from fees and debt financing.

Upon approval of the draft plan, Harris will assist City staff in two (2) City Council presentations for the IFP. The first presentation will be a public meeting to present the IFP and receive comments. The second presentation will adopt the IFP and associated Development Impact Fees for Tivoli.

Harris will assist the City in the preparation of all required City Council staff reports, resolutions and public notices associated with the adoption of the IFP.

Harris will provide ten (10) copies for City staff review. At the City's direction, Harris will complete a final draft to be presented to stakeholders.

Estimated Level of Effort and Costs for Task 4.2:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	457	$ 63,250	4 w/staff; 2 w/Council
West Yost - Water	200	$ 29,500	1 w/staff
Carollo - Wastewater	128	$ 23,950	2 w/staff
Omni-Means - Traffic	208	$ 33,896	2 w/staff
Stantec - Drainage	376	$ 44,199	2
Mark-ups on Subs		$ 13,155	
Totals	**1,369**	**$ 207,950**	

Deliverables for Task 4.2

10 copies of the draft Infrastructure Finance Plan
10 copies of a final draft of the Infrastructure Finance Plan
20 copies of the final Infrastructure Finance Plan
1 electronic copy of the final Infrastructure Finance Plan.

Task 4.3 – Facilities Master Plan

Harris will prepare the Facilities Master Plan, which includes the following:

- Introduction
- Sanitary Sewer System
- Storm Drainage System
- Construction Phasing
- Opinion of Probable Cost (shown in IFP)
- Circulation System
- Potable Water System
- Parks (provided by City)

Harris will prepare the "Tivoli Facilities Master Plan". It will incorporate all of the information provided by the Sub-consultants related to infrastructure requirements. This task assumes that no aerial or field surveying is required but will be available from the other work being completed by the developer. If survey information is not available, then an additional task to provide this service will be needed.

The document will also include:

- Mitigation Measures from the EIR for Tivoli Specific Plan.
- Implementation and Funding
- Amendment Process.

This scope of work assumes that thirty (30) sheets of drawings will be created during this process.

Harris assumes that the adoption of the FMP will occur as part of the IFP process discussed in Task 4.2.

Ten (10) copies of the 30% design level drawings will be submitted to the City for review. The 30% submittal would include all drawings anticipated to be submitted and would include alignments and planned locations of all facilities. Once the City has submitted written comments to Harris, 90% drawings will be completed. Ten (10) copies of the 90% drawings will be submitted to the City for final review. The 90% submittal would include all alignments for roads and pipes including face of curb, edge of pavement, existing right-of-way, future right-of-way, and existing buildings, profiles for all roads and pipes including slopes, and elevation call-outs, cross section of roads including lane widths, landscaping widths and side walk widths, intersection details including lengths of turn lanes, lane configurations, face of curb, edge of pavement, existing right of way, future right of way, and any existing buildings and location of any planned detention basins, parks, schools, and any other pertinent facilities. The 90% would also include all notes, all call-outs, any details that are to be incorporated such as curb and gutter, sidewalk, etc. or reference to the City's design standards.

Twenty (20) copies of the final drawings, including an electronic copy, will be provided to the City when all comments have been addressed.

Task 4.3 assumes 4 meetings with the City and/or developers to discuss the drawings.

Estimated Level of Effort and Costs for Task 4.3:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	1,356	$ 157,060	4 w/staff
West Yost - Water	80	$ 17,500	
Carollo - Wastewater	24	$ 5,150	2 w/staff
Omni-Means - Traffic	36	$ 5,904	2 Public
Stantec - Drainage	164	$ 21,742	2
Mark-ups on Subs		$ 5,030	
Totals	**1,660**	**$ 212,386**	

Deliverables for Task 4.3

10 copies of the 30% level drawings of the Facilities Master Plan
10 copies of a 90% level drawings of the Facilities Master Plan
20 copies of the final Facilities Master Plan
1 electronic copy of the final Facilities Master Plan

Task 4.4 – Community Facilities District

Harris will manage the formation of the Community Facilities District.

A. Goodwin Consulting Group, Inc. (GCG) will serve as special tax consultant to assist the City of Modesto (City) in the formation of a Mello-Roos Community Facilities District (CFD) that will fund public improvements and public services required to serve the Tivoli project. GCG will meet with City staff, property owners, the City's financial advisor, bond counsel and other members of the financing team to compile data, and to discuss the structure and components of the Mello-Roos cash flow analysis.

This task will include:

(i) Determining the initial boundaries of the CFD and future annexation areas both inside and outside existing City limits

(ii) Identifying proposed land uses, public facilities to be financed, annual storm drain and landscape maintenance costs, anticipated absorption rates, and timing and number of bond issues

(iii) Discussing assumptions to be used for the initial allocation of special taxes to land uses within the CFD and reviewing the advantages and disadvantages associated with various allocation methods

(iv) Evaluating the potential for separate CFDs, improvement areas or tax zones based on the objectives of the City and developers, and

(v) Coordinating with the financial advisor regarding the anticipated bond structure, including special tax/debt service escalator, bond interest rate, short-term reinvestment rate, capitalized interest, reserve fund, and other features that may affect the size of bond issues and the corresponding annual debt service.

B. Mello-Roos Cash Flow Analysis: GCG will use the information compiled to prepare an analysis of the annual cash flow of the CFD. The analysis will identify the maximum special tax that will be needed to maintain required debt service coverage on bonded indebtedness issued on behalf of the CFD.

In addition, the cash flow analysis will

(i) Estimate the special tax burden on undeveloped property based on a given absorption scenario

(ii) Determine the size of the initial and subsequent bond sales taking into consideration minimum value-to-lien requirements set forth in state law and City policy, and

(iii) Evaluate the increased bonding capacity that is created from an escalating special tax and debt service or other unique bond structure.

GCG will present the cash flow analysis at a second meeting and discuss alternatives that the working group would like analyzed. Subsequent iterations of the analysis will be prepared based on feedback from City staff, affected property owners, the financial advisor, bond counsel and other members of the working group. Ultimately, through review and discussion of each alternative, the team will select a special tax structure, which GCG will incorporate in the Rate and Method of Apportionment of Special Tax outlined below.

C. Rate and Method of Apportionment of Special Tax: Based on the special tax structure selected pursuant to Task B-2 above, GCG will prepare the Rate and Method of

Apportionment of Special Tax (RMA), which will serve as the official special tax formula for the CFD. The RMA will provide detail and direction as to how the special tax should be levied in future years to ensure adequate revenues are available for timely repayment of debt service on bonded indebtedness issued by the CFD. The RMA will be included as an exhibit to the Resolution of Intention to Form the CFD, which will be adopted by the City Council as part of the first set of actions taken towards forming the CFD.

In addition to providing guidance relative to the annual levy of special taxes in the CFD, the RMA will provide some or all of the following items:

- Identification of the maximum special tax for each special tax category, including each category of developed and undeveloped property
- Provision for a back-up special tax or alternate mechanism to be used to maintain maximum special tax revenues in the event that land uses change in future years
- A detailed prepayment formula that will provide flexibility for a property owner to prepay all or a portion of the special tax obligation after some or all bonds have been issued for the CFD
- If additional property is expected to annex into the CFD, a description of the "catch-up tax" that will apply to annexing parcels to equalize the cumulative special tax burdens (if applicable)

D. *Contributions and Review of Other CFD Formation Documents:* In coordination with Harris, the City, and Stakeholders, GCG will review, prepare and contribute to other documents required in the CFD formation proceedings. Specifically, GCG will prepare the CFD Report required, pursuant to Section 53321.5 of the Government Code, to be filed with the City Clerk prior to the public hearing. GCG will also review all CFD formation documents and, based on results of the cash flow analysis, assist in calculating the maximum bond authorization and appropriations limit for the CFD. GCG will also ensure that the CFD boundary map is consistent with the areas expected to be included in the CFD when the maximum special tax and/or bonding capacity is calculated.

E. In preparation for the issuance of bonds, GCG will review the bond purchase agreement, fiscal agent agreement and/or bond indenture to assure that the flow of special tax revenues and interest earnings as set forth in these documents are consistent with assumptions used in the Mello-Roos cash flow analysis.

In addition, GCG will review the preliminary official statement and, at the request of the financial advisor or underwriter, prepare one or more of the following:

- A table demonstrating special tax coverage based on the projected stream of revenues compared to annual debt service on the bonds
- If multiple landowners/developers are included within the CFD, a table showing diversification of special tax burdens among the major participants
- Incorporating information provided in the appraisal, a table identifying the value-to-lien ratios for each assessor parcel or major property owner

- A table summarizing a sample tax bill for individual residential units within each tax category to demonstrate compliance with City policy pertaining to the total effective tax rate
- Any other tables requested by the financial advisor and/or underwriter to assist in disclosure related to the special tax formula

F. *Certification of Special Tax Revenues and Acceptance of Associated Liability:* GCG will execute the Certificate of Special Tax Consultant, which commits to bond buyers that the minimum debt service coverage will be maintained by application of GCG's tax formula regardless of land use changes that occur within the CFD in future years.

Task 4.4 assumes 4 meetings with the City and/or developers.

Estimated Level of Effort and Costs for Task 4.4:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	212	$ 24,780	4 w/staff
Goodwin Consult Grp		$ 45,000	4 w/staff
Mark-ups on Subs		$ 4,500	
Totals	**212**	**$ 74,280**	

Deliverables for Task 4.4

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-045

A RESOLUTION AMENDING THE FISCAL YEAR 2006-2007 OPERATING BUDGET TO CREATE A MULTI-YEAR ACCOUNT (2900-020-0265) AND APPROPRIATING $300,000, FUNDED BY RUSSELL A. NEWMAN, PROFESSIONAL LAW CORPORATION, FOR THE PREPARATION OF A FACILITIES MASTER PLAN, INFRASTRUCTURE FINANCE PLAN, AND FOR FORMATION OF A COMMUNITY FACILITIES DISTRICT FOR THE TIVOLI SPECIFIC PLAN AREA

WHEREAS, the Tivoli Specific Plan Area is in need of a Facilities Master Plan ("FMP"), and Infrastructure Finance Plan ("IFP") to plan for necessary facilities and associated costs for buildout of that specific plan area, and

WHEREAS, on September 26, 2006, by Resolution No. 2006-599, the Council of the City of Modesto approved a Master Professional Services Agreement for Consultant Services ("Agreement") with Harris and Associates, a California corporation, for the preparation of FMPs, IFPs, technical studies and related on-call services as assigned by City, and

WHEREAS, on January 9, 2007, by Resolution No.2007-044, the Council of the City of Modesto approved Task Order No. 4 to the Agreement for the preparation of a FMP, IFP, and for formation of a Community Facilities District ("CFD"), and

WHEREAS, on January 9, 2007, by Resolution No.2007-046, an Advanced Funding Agreement between the City and Russell A. Newman, Professional Law Corporation ("Applicant") was approved by the City Council, and

WHEREAS, Applicant has deposited with the City the amount of three hundred thousand dollars ($300,000.00) to fund a portion of the costs for the Project and provide for reimbursement as appropriate, and

WHEREAS, additional deposits will be provided by Applicant, as required by the City and as necessary to fund Task Order No. 4, and

WHEREAS, the City will issue Notices to Proceed to the City's Consultant only for those subtasks for which the Applicant has deposited funds,

NOW, THEREFORE, BE IT RESOLVED, by the Council of the City of Modesto that it hereby amends the Fiscal Year 2006-2007 operating budget to create a multi-year account for the preparation of the Tivoli Specific Plan Area Facilities Master Plan and Infrastructure Finance Plan and appropriates $210,000 to 2900-020-0265-0235 for professional services and $90,000 to 2900-020-0265-0255 for City services.

BE IT FURTHER RESOLVED that the Finance Director, or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-046

A RESOLUTION APPROVING AN ADVANCED FUNDING AGREEMENT FOR THE TIVOLI SPECIFIC PLAN AREA BETWEEN THE CITY OF MODESTO AND RUSSELL A. NEWMAN, PROFESSIONAL LAW CORPORATION, FOR THE PREPARATION OF A FACILTIES MASTER PLAN, INFRASTRUCTURE FINANCE PLAN, AND FOR FORMATION OF A COMMUNITY FACILITIES DISTRICT FOR THE TIVOLI SPECIFIC PLAN AREA AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT

WHEREAS, Russell A. Newman, Professional Law Corporation ("Applicant"), has agreed to advance all funds necessary to prepare a Facilities Master Plan ("FMP") and Infrastructure Finance Plan ("IFP"), and for formation of a Community Facilities District ("CFD") for the Tivoli Specific Plan Area, and

WHEREAS, the parties agreed to enter into an Advanced Funding Agreement for the Tivoli Specific Plan Area by and between the City and the Applicant relating to advances made and to be made by the Applicant to the City, and providing for potential reimbursement to the Applicant if and when certain funds from the Tivoli CFD become available, a copy of which is attached as **Exhibit A**,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Advanced Funding Agreement for the Tivoli Specific Plan Area between the City of Modesto and Russell A. Newman, Professional Law Corporation, is hereby approved.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Advanced Funding Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

ADVANCED FUNDING AGREEMENT
FOR THE TIVOLI SPECIFIC PLAN AREA

THIS ADVANCED FUNDING AGREEMENT FOR THE TIVOLI SPECIFIC PLAN AREA (this "Agreement"), dated as of _____, 2007, is entered into by and between the CITY OF MODESTO, a municipal corporation of the State of California (the "City") and RUSSELL A. NEWMAN, PROFESSIONAL LAW CORPORATION (the "Applicant").

RECITALS:

A. Applicant has a legal interest in real property located within a portion of the Tivoli Specific Plan Area ("Specific Plan"), shown in Exhibit A attached hereto and incorporated herein by this reference, and is interested in pursuing development of properties in the Specific Plan.

B. Applicant has requested that the City prepare a Facilities Master Plan and Infrastructure Finance Plan ("FMP/IFP"), and create an appropriate financing mechanism, such as a community facilities district ("CFD") for the principal purpose of master planning and financing the various public facilities and services which are necessary to serve or desirable for the development of the Specific Plan (collectively the "Project").

C. City has either retained, or will retain outside consultants, to assist it with the Project and, if the City determines to proceed with the formation of a CFD, to assist it in connection therewith and with the possible issuance of bonds.

D. The scope of work for the Project ("Scope"), including the estimated costs for completing the Project ("Estimated Costs"), is attached as Exhibit B.

E. Applicant is prepared to deposit with the City the amount needed to fund Task 1 as set forth in the Scope plus 30% for staff time and expenses in order to provide the City with an initial source of funds with which to pay expenses expected to be incurred in connection with the Project. Additional deposits will be provided by Applicant, as required by the City.

F. The City and Applicant are desirous of entering into this Agreement in order to provide monies for the City's costs for preparing the Project on a time and materials basis, to provide mechanisms by which the funds deposited under this Agreement shall be applied and by which Applicant may make additional deposits, and to reimburse Applicant for monies advanced for the benefit of other landowners in the Project.

G. Pursuant to California Government Code Section 53314.9 and the City's CFD Policies and Procedures, the City Council of the City is authorized to accept advances of funds or work-in-kind from any source, including, but not limited to, private persons or private entities, and may provide, by resolution, for the use of those funds or work-in-kind for any authorized purpose, including, but not limited to, paying any costs incurred in connection with the planning and formation of a community facilities district. The City Council of the City is also authorized to enter into an agreement, by resolution, with the person or entity advancing the funds or work-in-kind to repay all or a portion of the funds advanced or to reimburse the person or entity for the cost or value of the work-in-kind provided that certain conditions are met. The conditions to be satisfied with respect to funds advanced require that (1) the proposal to repay the funds or to pay the cost or value of the work-in-kind must be included in the resolution of intention for the proposed community

facilities district and in the resolution of formation for the proposed community facilities district, (2) any proposed special tax is approved by the qualified electors of the community facilities district and, if a proposed special tax is not approved, any funds advanced which have not been committed for any authorized purpose by the time of the election must be returned to the person or entity advancing funds and (3) any work-in-kind accepted shall have been performed or constructed as if the work had been performed or constructed under the direction and supervision, or under the authority, of the local agency.

H. The City and the Applicant are desirous of entering into this Agreement in accordance with Government Code Section 53314.9 and the City's CFD Policies and Procedures in order to provide a mechanism by which the Applicant may make additional deposits if determined necessary pursuant to the City's CFD Policies and Procedures and, when and if bonds are issued and proceeds are available, the CFD can reimburse the Applicant for the amounts advanced by the Applicant.

AGREEMENT

NOW, THEREFORE, in consideration of the mutual promises and covenants set forth herein, the parties hereto agree as follows:

1. Recitals. Each of the above recitals is incorporated herein and is true and correct.

2. Proposed Preparation of the Facilities Master Plan and Infrastructure Financing Plan.

   a. Applicant agrees to pay all costs of preparing, processing and approving the FMP/IFP.

   b. Within ten (10) calendar days after the City Council approves this Agreement, Applicant shall deposit with the City the sum of $300,000.00 ("Initial Deposit") to fund Task 1 as identified in the Scope ("Task 1"). The Initial Deposit includes 30% for staff time and expenses associated with said Task. The Initial Deposit will be held in trust by the City and used solely for the purposes set forth in this Agreement. Upon receipt by the City of the Initial Deposit and all documents deemed necessary by the City to proceed with the Project, the City will commence work on Task 1 on a time and materials basis and will provide a Notice to Proceed to its Consultant to proceed with Task 1. In connection therewith, the City has either retained, or will retain, the consultants that the City determines necessary or convenient to assist it with the Project and, if the City determines to proceed with the formation of the CFD, to assist it in connection therewith and with the possible issuance of bonds.

      After the Initial Deposit has been expended on the Project, Applicant shall make additional advances to the City as provided by subparagraph (d), below, until the Project has been completed or terminated, and all costs associated with the Project have been fully paid. City will commence work on subsequent Tasks as identified in the Scope on a time and materials basis and will provide a Notice to Proceed to Consultant for each such Task within ten (10) calendar days after it has received an additional deposit sufficient to cover the estimated costs for said Task plus 30% for staff time and expenses associated with said Task.

c. The consultants shall submit invoices to the City for payments based on work completed; such invoices will be promptly sent by the City to the Applicant, which will have five (5) business days to challenge the work performed, and the City will in good faith consider the position of the Applicant prior to approving payment. Applicant understands and agrees that City shall have the right, in its sole discretion, to approve and pay all such consultant invoices, and may do so without obtaining Applicant's approval.

Applicant shall make additional advances to the City within ten (10) business days following receipt from the City of a request for an additional advance to the cover the costs referred to herein. In the event that Applicant does not deliver the requested amount to the City within such ten (10) business day period, the City will have no obligation to proceed with any activity relating to the Project. The Applicant may notify the City at any time, in writing, of its intention to abandon the Project. Immediately upon City's receipt of such notice, but in no case later than two (2) business days, the City shall instruct in writing its consultants to cease work immediately. The Applicant shall be responsible for all costs and expenses incurred by the City or any City consultant or advisors relating to the Project until City issues this cease work notice.

d. Within 60 calendar days after issuance of a cease work notice, City agrees to return to Applicant all unexpended amounts of the Initial Deposit (and any subsequent deposits) which exceed all costs and expenses incurred by City relating to the Project.

e. Applicant agrees that, notwithstanding the Applicant's funding and reimbursement obligation under this Agreement, the consultants selected by the City shall be the contractors exclusively of the City and not of the Applicant. Except for those disclosures required by law including, without limitation the Public Records Act, all conversations, notes, memoranda, correspondence, and other forms of communication by and between the City and its consultants shall be, to the extent permissible by law, privileged and confidential and not subject to disclosure to the Applicant. Applicant agrees that it shall have no claim to, nor shall it assert any right in any reports, correspondence, plans, maps, drawings, news releases or any and all other documents or work project produced by City's consultants. Applicant understands that it will not be a third party beneficiary to City's contracts with the consultant. City will consult with Applicant prior to replacing its current consultants; however, Applicant agrees that City may select other consultants to replace its current consultants and may do so without obtaining Applicant's approval.

f. City and Applicant shall work cooperatively and in good faith to facilitate completion of Project as quickly as possible and in the most cost effective way. City and Applicant shall meet and consult on dates and times as may be mutually agreed upon to discuss the progress and any key issues involved in the Project; provided, however, that Applicant's role is advisory only and that City shall control all aspects of the Project. The final work product to be produced by City's consultants shall be subject to the City' sole approval and control.

3. Proposed Formation of the CFD and Issuance of Bonds.

a. Applicant agrees to pay all costs of preparing, processing and forming a CFD for the Specific Plan area.

b. Upon receipt by the City of a completed application for the formation of the CFD, the formation deposit for the CFD, and all documents related thereto as described in the City's CFD Policies and Procedures, the City will undertake to analyze the appropriateness of forming the CFD and the issuance of bonds by it. In connection therewith, the City has either retained or will retain, at the Applicant's expense, the consultants that the City determines necessary or convenient to assist it in studying the proposed formation of the CFD and, if the City determines to proceed with the formation of the CFD, to assist it in connection therewith and with the possible issuance of bonds.

c. Pursuant to the City's CFD Policies and Procedures, the Applicant shall make additional advances to the City within ten (10) days following receipt from the City of a request for an additional advance to cover the costs referred to herein. In the event the Applicant does not deliver the requested amount to the City within such ten (10) day period, the City will have no obligation to proceed with any activity relating to the formation of the CFD and/or the issuance of bonds. The Applicant may notify the City at any time, in writing, of its intention to abandon the formation of the CFD or the issuance of bonds. Upon receipt of such notice, the City shall instruct its consultants to cease work as soon as practicable. The Applicant shall be responsible for all costs and expenses incurred by the City or any City consultant or advisor relating to the proposed formation of the CFD and/or bond issuance until work with respect to the proposed formation or bond issuance ceases following the receipt of the Applicant's notice of abandonment. Within 60 calendar days after receipt of the Applicant's notice of abandonment, City agrees to return to Applicant all unexpended amounts of the Initial Deposit (and any subsequent deposits) which exceed all costs and expenses incurred by City relating to the Project.

4. Reimbursement Procedure. If the CFD is formed and bonds are issued, bond proceeds in excess of the amount determined by the City's District Administrator to be required in order to satisfy the requirements of the City's CFD Policies and Procedures with respect to capitalized interest and reserves and to pay for the Facilities and other Incidental Expenses may be used to reimburse the Applicant for the amounts that the Applicant has advanced to the City in connection with this Agreement, all as provided for in the City's CFD Policies and Procedures. In the event that the CFD is not formed for any reason, or in the event that the CFD is formed and bonds are not issued for any reason, the City shall return any funds which have been advanced by the Applicant pursuant to this Agreement and which have not been expended, obligated or otherwise committed for any authorized purpose, subject to the complete reimbursement to the City of all of its direct and indirect costs. If the amounts previously advanced by the Applicant are insufficient to fully reimburse the City for all of its direct and indirect costs, the Applicant shall promptly pay to the City the amount of the deficiency. The City shall be entitled to pay any refund required pursuant to the provisions hereof to the entity that is the signatory to this Agreement irrespective of any changes in the ownership of the property or the organization of the Applicant, and the City shall not be required to pay interest on any amount required to be refunded pursuant to this Agreement.

5. Abandonment of the Project. The Applicant understands that, subject to the satisfaction of all applicable legal requirements, the decision to review, process, prepare or approved the proposed Project, shall be each in the sole discretion of the City. No provision of this Agreement shall be construed as a promise, warranty or agreement by the City to review, process, prepare or approve the proposed Project. The City shall have no liability to Applicant for a decision not to review, process, prepare or approve the proposed Project.

6. Abandonment of Proposed CFD. The Applicant understands that, subject to the satisfaction of all applicable legal requirements, the decision to form the CFD and the decision to issue bonds shall be each in the sole discretion of the City. No provision of this Agreement shall be construed as a promise, warranty or agreement by the City to form the CFD or to issue bonds. Should the proceedings to form the CFD be abandoned for any reason, the City shall provide written notification of such abandonment to the Applicant and shall return to the Applicant all unexpended amounts of the Initial Deposit (and any subsequent deposits) which exceed all costs and expenses incurred by the City relating to formation of the CFD. Said monies shall be returned within 60 days of the issuance of the written notice of abandonment. Except for such reimbursement, the City shall have no liability to Applicant for a decision not to form the CFD or issue bonds.

7. Indemnification and Hold Harmless. The Applicant hereby assumes the defense of, and indemnifies and saves harmless, the City and each of its officers, directors and employees, from and against all actions, damages, claims, losses or expenses of every type and description to which they may be subjected or put, by reason of or arising out of any acts or omissions of the Applicant or any of the Applicant's officers, employees, contractors and agents in connection with the proposed formation of the CFD or any work-in-kind provided by or on behalf of the Applicant or its consultants, except for any action, damages, claims, losses or expenses arising out of the sole negligence or willful misconduct of the City, its officers, directors, employees or agents.

8. Notices. Any and all notices permitted or required to be given hereunder shall be deemed duly given and effective (1) upon actual delivery, if delivery is by hand; or (2) five (5) days after delivery into the United States mail if delivery is by postage paid registered or certified (return receipt requested) mail. Each such notice shall be sent to the parties at the address respectively indicated below or to any other address as the respective parties may designate from time to time.

Applicant: RUSSELL A. NEWMAN, Professional Law Corporation

Modesto, CA 95354
Attention: Dave Romano

and

Cal-Pacific
c/o Reininga Corporation
456 Montgomery Street, Suite 1000
San Francisco, CA 94104

City: City of Modesto
1010 Tenth Street, Suite 6100
Modesto, California 95354
Attention: IFP Administrative Officer

Phone: 209-577-5211
Facsimile: 209-571-5128

Each party may change its address for delivery of notice by delivering written notice of such change of address to the other party.

9. Assignment. The Applicant may not assign its interest in this Agreement without the prior written consent of the City, which consent shall not be unreasonably withheld. Any assignment or attempt to assign this Agreement without the prior written consent of City shall be deemed null and void as of the date of the purported assignment. All covenants, stipulations, and agreements in this Agreement shall bind any such representatives, successors and assigns.

10. Severability. If any part of this Agreement is held to be illegal or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall be given effect to the fullest extent permitted by law.

11. Entire Agreement. This Agreement contains the entire agreement between the parties with respect to the matters provided for herein. All previous proposals, offers and communications relative to this Agreement, whether oral or written, are hereby superseded except to the extent that they have been incorporated into this Agreement. No future waiver of or exception to any of the terms, conditions, and provisions of this Agreement shall be considered valid unless specifically agreed to in writing by all the parties.

12. Amendments. This Agreement may be amended or modified only by written instrument signed by all parties. Any amendment or addendum to this Agreement shall expressly refer to this Agreement.

13. Governing Law. This Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State of California.

14. No Third Party Beneficiaries. No person or entity shall be deemed to be a third party beneficiary hereof; and nothing in this Agreement (either express or implied) is intended to confer upon any person or entity, other than the City (and its officers, directors, employees and agents providing services under this Agreement) and the Applicant, any rights, remedies, obligations or liabilities under or by reason of this Agreement.

15. Singular and Plural; Gender. As used herein, the singular of any word includes the plural, and terms in the masculine gender shall include the feminine.

16. Termination. This Agreement shall terminate and be of no further force and effect on the third anniversary of the date of this Agreement unless expressly amended by the parties; provided, however, that the Applicant's obligations under Section 7 shall survive the termination and the City's obligation to provide reimbursement in accordance with Section 4 for expenses incurred prior to the termination date shall also survive termination.

17. Time is of the Essence. Except as otherwise expressly stated, time is of the essence in the performance of each and every action required pursuant to this Agreement.

18. Language Construction. The language of each and all paragraphs, terms and/or provisions of this Agreement, shall, in all cases and for any and all purposes, and in any way and all circumstances whatsoever, be construed as a whole, according to its fair meaning, and not for or against any party hereto and with no regard whatsoever to the identity or status of any person or persons who drafted all or any portion of this Agreement.

19. Representations of Authority. Each party signing this Agreement on behalf of a party which is not a natural person hereby represents and warrants to the other party that all necessary legal prerequisites to that party's execution of this Agreement have been satisfied and that he or she has been authorized to sign this Agreement and bind the party on whose behalf he or she signs.

20. Relationship of Parties. Nothing contained in this Agreement shall be interpreted or understood by any of the parties, or by any third person, as creating the relationship of employer and employee, principal and agent, limited or general partnership, or joint venture between City and Applicant or its agents, employees or contractors. Except as City may specify in writing, Applicant shall have no authority to act as an agent of City or to bind City to any obligation.

21. Title of Parts and Sections. Any titles of the sections or subsections of this Agreement are inserted for convenience of reference only and shall be disregarded in interpreting any part of this Agreement's provisions.

22. Waiver. The waiver by any party to this Agreement of any action, obligation, or commitment required by this Agreement or of a breach of any provision hereof shall be in writing and shall not operate or be construed as a waiver of any other or subsequent breach hereof or of any action, obligation, or commitment required by this Agreement unless specifically stated in writing.

23. Discretion of the City. City's execution of this Agreement in no way limits the discretion of City in the permit and approval process in connection with any entitlements within City's jurisdiction, including those related to the Project, or with the design, construction or funding of any onsite or offsite infrastructure improvements within the City's jurisdiction.

IN WITNESS WHEREOF, the CITY OF MODESTO, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. 2007-____, adopted by the Council of the City of Modesto on the _____day of _____, 2007, and Russell A. Newman, PLC, has caused this Agreement to be executed in duplicate, effective as of the date first written above.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-047

A RESOLUTION APPROVING AMENDMENT NO. 2 TO THE STANDARD AGREEMENT FOR CONSULTANT SERVICES BETWEEN THE CITY OF MODESTO AND GEORGE OSNER, AICP, FOR ON-CALL PLANNING AND ENVIRONMENTAL SUPPORT SERVICES FOR THE COMMUNITY & ECONOMIC DEVELOPMENT DEPARTMENT AND PUBLIC WORKS DEPARTMENT, FOR AN ADDITIONAL AMOUNT OF $50,000, FOR A TOTAL AMOUNT NOT TO EXCEED $189,999 AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT

WHEREAS, on November 14, 2005, the City of Modesto entered into a Standard Agreement for consultant services with George Osner, AICP, Planning Consultant, to provide planning services for the Community & Economic Development Department, in an amount not to exceed $49,000, and

WHEREAS, on July 11, 2006, by Resolution No. 2006-429, the contract was amended for an additional $90,000, for a total amount not to exceed $139,999, and

WHEREAS, the contract amendment extended planning services for the Community & Economic Development Department, Planning Division for an additional amount of $50,000, and,

WHEREAS, the remaining $40,000 was budgeted for services to the Public Works Department, Capital Improvement Services Division, through the Community & Economic Development Department, and,

WHEREAS, the Planning Division performs a number of tasks requiring planning support services, and,

WHEREAS, due to workload levels, and shortfalls in staffing levels, on-call planning support services are necessary to augment planning services provided by the Planning Division, and,

WHEREAS, Mr. Osner is currently providing planning services to the Community & Economic Development Department, including interpreting and applying environmental quality laws, and regulations to ensure City projects are in compliance with State and Federal laws, assisting in preparing request for proposals, preparing amendments to the Zoning Code for review and consideration, preparing ordinances for review and consideration, developing recommendations and preparing planning reports on various development proposals and applications and special studies, preparing appropriate planning, statistical, financial and narrative reports with technical studies, preparing planning applications, brochures and handout material associated with the development review process, and,

WHEREAS, in accordance with the amended agreement, George Osner has been providing on-call and environmental planning support services, and the amended amount of $50,000 has almost been reached, and,

WHEREAS, in order to satisfy on-going needs, the Community and Economic Development Department is proposing an Amendment No. 2 to the Standard Agreement for Consultant Services with George Osner for an additional amount of $50,000, for a total amount not to exceed $189,999, and,

WHEREAS, George Osner, AICP, is familiar with the City's standards, policies, municipal code and operating procedures, having provided prior services in conjunction with the City's overall urban and environmental planning efforts, and has demonstrated satisfactory services to the City on past and current projects, and

WHEREAS, staff has selected Mr. Osner, AICP, to provide on-call planning and environmental support services because of his extensive experience in the planning field and on similar projects, and

WHEREAS, Mr. Osner, AICP, will be paid on an hourly basis for actual hours required to perform specific tasks orders at a set rate, and

WHEREAS, funding for the services to the Community and Economic Development Department is allocated in the FY 06/07 CEDD budget in the amount of $50,000, located in the 0235 Professional Services Object of organization 1430, in combination with salary savings as a result of vacant positions for a Planning Division Manager, an Office Supervisor, a Senior Planner and an Administrative Services Technician II,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves Amendment No. 2 to the Standard Agreement for Consultant Services between the City of Modesto and George Osner, AICP, Planning Consultant, for on-call planning and environmental support services for the Community & Economic Development Department and public Works Department, for an additional amount of $50,000, for a total amount not to exceed $189,999.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-048

A RESOLUTION APPROVING AMENDMENT NO. 2 TO THE STANDARD AGREEMENT FOR CONSULTANT SERVICES BETWEEN THE CITY OF MODESTO AND JERRY HAAG, FOR PLANNING SUPPORT SERVICES FOR THE COMMUNITY & ECONOMIC DEVELOPMENT DEPARTMENT, FOR AN ADDITIONAL AMOUNT OF $50,000, FOR A TOTAL AMOUNT NOT TO EXCEED $99,999 AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT

WHEREAS, on November 14, 2005, the City of Modesto entered into a Standard Agreement for consultant services with Jerry Haag, Planning Consultant, to provide planning services for the Community & Economic Development Department, in an amount not to exceed $49,000, and

WHEREAS, on November 14, 2006, the contract was amended to extend the term of agreement to continue in effect until CITY'S acceptance of and payment for all services authorized by CITY and performed by CONSULTANT, and

WHEREAS, the Planning Division performs a number of tasks requiring planning support services, and,

WHEREAS, due to workload levels, and shortfalls in staffing levels, planning support services are necessary to augment planning services provided by the Planning Division, and,

WHEREAS, contract planning assistance is necessary to assist the City to efficiently manage the specific plan project load in a manner that is responsive to the City's customers, and,

WHEREAS, there are currently 7 specific plan proposals underway in the City, and,

WHEREAS, Mr. Haag is currently providing planning services on a time and materials basis, to manage 2 specific plans currently underway: Woodglen and Pelandale-McHenry, and,

WHEREAS, Mr. Haag has also assisted the City in reviewing and providing comments on preliminary concept plans for the Johansen-Empire North Specific Plan and the Kiernan Business park East Specific Plan Amendment, and,

WHEREAS, in accordance with the Standard Agreement, Jerry Haag has been providing planning support services, and the contract amount of $49,999 has almost been reached, and,

WHEREAS, in order to satisfy on-going needs, the Community and Economic Development Department is proposing an Amendment No. 2 to the Standard Agreement for Consultant Services with Jerry Haag for an additional amount of $50,000, for a total amount not to exceed $99,999, and,

WHEREAS, Jerry Haag, is familiar with the City's standards, policies, and operating procedures, having provided prior services in conjunction with the City's overall urban and environmental planning efforts, and has demonstrated satisfactory services to the City on past and current projects, and,

WHEREAS, Mr. Haag is also qualified to provide the requested planning support services in a timely and cost effective manner, and,

WHEREAS, Mr. Haag has intimate knowledge of coordinating with City staff in furtherance of planning services and conferring with and advising City staff regarding environmental laws, regulations, and policies, and,

WHEREAS, funding for the services to the Community and Economic Development Department is allocated in the FY 06/07 CEDD budget in the amount of

$50,000, located in the 0235 Professional Services Object of organization 1430, in combination with salary savings as a result of vacant positions for a Planning Division Manager, an Office Supervisor, a Senior Planner and an Administrative Services Technician II,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves Amendment No. 2 to the Standard Agreement for Consultant Services between the City of Modesto and Jerry Haag, Planning Consultant, for planning support services for the Community & Economic Development Department, Planning Division for an additional amount of $50,000, for a total amount not to exceed $99,999.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-049

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE PURCHASE OF FEDERAL BRAND AMMUNITION FOR THE POLICE DEPARTMENT, TO SAN DIEGO POLICE EQUIPMENT CO., INC., SAN DIEGO, CA, FOR A TWO (2) YEAR AGREEMENT, WITH THREE (3) ONE-YEAR EXTENSION OPTIONS AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED ANNUAL COST OF $75,902

WHEREAS, the Police Department maintains an inventory of Federal Brand Ammunition for issuance to sworn staff and for training purposes, and

WHEREAS, a one-time purchase is made each fiscal year to replenish the supply for the department, and

WHEREAS, the FBI established a standardized bullet testing protocol, and

WHEREAS, about six (6) years ago the Modesto Police Department tested several bullet brands using the FBI protocol, and

WHEREAS, at the time the department was using Remington Brand, and

WHEREAS, the best performing bullet was the Speer Gold Dot; however, this brand is very expensive, and

WHEREAS, the next best performing brand was Federal, and

WHEREAS, Federal is competitively priced when compared to Remington and Winchester brands, and

WHEREAS, for this reason, the department purchases Federal Brand, and

WHEREAS, on October 10, 2006, Council approved Resolution No. 2006-647 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for the purchase of Federal Brand Ammunition for the Police Department, for a two (2) year

agreement, with three (3) one-year extension options at the sole discretion of the City, and

WHEREAS, on November 3, 2006, the Purchasing Division issued Request for Bid No. 0607-17 for the purchase of Federal Brand Ammunition to seven (7) Federal Brand distributors, three (3) of which were local companies, posted the bid on the City's web site, and formally advertised as required by law, and

WHEREAS, on December 5, 2006, RFB's were formally opened in the City Clerk's office, and

WHEREAS, of the seven (7) prospective bidders, one (1) company chose to respond, and

WHEREAS, based on providing a responsive and responsible bid, City staff recommends the award of bid and contract for the purchase of Federal Brand Ammunition for the Police Department, to San Diego Police Equipment Co., Inc., San Diego CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $75,902, and

WHEREAS, Modesto Municipal Code Section 8-3.203 generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid. The award of bid and contract for the purchase of Federal Brand Ammunition for the Police Department, conforms to code.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contract for the purchase of Federal Brand Ammunition for the Police Department, to San Diego Equipment Co., Inc., San Diego,

CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $75,902.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue a purchase agreement for the purchase of Federal Brand Ammunition for the Police Department, to San Diego Equipment Co., Inc., San Diego, CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $75,902.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-050

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE PURCHASE OF FOUR (4) UTILITY TYPE TRUCKS FOR THE PUBLIC WORKS DEPARTMENT, FLEET SERVICES DIVISION, TO BROADWAY MOTORS FORD, OAKLAND, CA FOR A TOTAL ESTIMATED COST OF $185,587.

WHEREAS, on August 3, 2005, Council approved Resolution No. 2005-381 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for new vehicles and heavy equipment throughout FY 05/06 through various competitive processes, with the Purchasing Division coming back to Council for award authorization, and

WHEREAS, on April 26, 2006, The Purchasing Division issued formal bids for six (6) new current year/model utility trucks on RFB 0506-29, with a bid opening date of May 16, 2006, and

WHEREAS, twenty-eight (28) vendors were solicited of which five (5) were local vendors. One (1) bidder chose to respond to the RFB, and

WHEREAS, the bid received was for one (1), crew cab & chassis F550 truck with utility body, with the bid amount exceeding the budgeted amount of $70,000, and

WHEREAS, on July 5, 2006, Council approved Resolution No. 2006-418 authorizing the Purchasing Manager to reject the sole bid and re-issue formal RFB's for the purchase of six new, current year/model utility truck for an estimated total cost of $332,000, and

WHEREAS, on September 12, 2006, Council approved Resolution No. 2006-573 authorizing the purchase of two (2) new, current year/model stencil paint trucks by

"accessing the terms" of a competitively bid contract through Line Master Engineering Inc., for a total estimated cost of $173,583, and

WHEREAS, on September 19, 2006, the Purchasing Division issued RFB No. 0607-21 for the purchase of four (4) Utility Type trucks to thirty (30) prospective bidders, twelve (12) of which were local companies, posted the bid on the City's web site and formally advertised as required by law, and

WHEREAS, on October 24, 2006, RFB's were formally opened in the City Clerk's office, and

WHEREAS, of the thirty (30) prospective bidders, four (4) companies chose to respond, and

WHEREAS, based on being deemed the lowest responsive and responsible bidder, City staff recommends the award of bid and contract for the purchase of four (4) utility type trucks for the Public Works Department, Fleet Services Division, to Broadway Motors Ford, Oakland, CA, for the total estimated cost of $185,587, and

WHEREAS, Modesto Municipal Code Section 8-3.203 generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid. The award of bid and contract for the purchase of four (4) utility type trucks for the Public Works Department, Fleet Services Division, conforms to code requirements.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contract for the purchase of four (4) utility type trucks for the Public Works Department, Fleet Services Division, to Broadway Motors Ford, Oakland, CA, for the total estimated cost of $185,587.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue a purchase order for the purchase of four (4) utility type trucks for the Public Works Department, Fleet Services Division, to Broadway Motors Ford, Oakland, CA, for the total estimated cost of $185,587.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-051

A RESOLUTION DECLARING AS SURPLUS FROM FEBRUARY 1, 2007 THROUGH JANUARY 31, 2008 THE FOLLOWING ITEMS: STOLEN, UNCLAIMED AND/OR SEIZED PROPERTY FROM THE POLICE DEPARTMENT, EXCESS PROPERTY ACCUMULATED BY THE CITY, AND SURPLUS CITY VEHICLES AND AUTHORIZING THE PURCHASING DIVISION TO SELL SAME BY SEALED BID, CONSIGNMENT, PUBLIC AUCTION, ONLINE AUCTION, OR AS SCRAP. THE AUCTION HOUSE, LOCATED AT 824 W. KIERNAN AVENUE IN ACCORDANCE WITH AUCTIONEERING AGREEMENT DATED AUGUST 14, 2001 WILL CONDUCT THE PUBLIC AUCTION. PUBLICSURPLUS.COM OF PROVO, UTAH WILL CONDUCT ONLINE AUCTIONS FOR SELECTED SURPLUS PROPERTY AS NEEDED.

WHEREAS, Section 801 of the City Charter authorizes the City Manager to sell obsolete, unclaimed, or surplus personal property of the City with the approval of the City Council, and

WHEREAS, the City's surplus items consist of: (1), obsolete traffic signal equipment; (2), lost, stolen, unclaimed and/or seized property, and excess property accumulated by the City; unclaimed bicycles accumulated at the Police Department Evidence and Property Room; and (3), and surplus City vehicles, and

WHEREAS, the current auction agreement calls for auctioneering services to be provided by the Auction House (Resolution Number 2001-423); and

WHEREAS, public auctions are conducted at their facility located at 824 W. Kiernan Avenue in Modesto, and

WHEREAS, the Purchasing Division will sale selected surplus property online through PublicSurplus.com, and

WHEREAS, the items sold online would consist of surplus items that could possibly bring a higher price over use of a conventional auction, and

WHEREAS, from January 1, 2006 through December 14, 2006, the City had received $336,906.37 from the sale of surplus property, and

WHEREAS, revenues from the sale of surplus Fleet vehicles/equipment (less administrative fees) are deposited into the Fleet Replacement Fund, 7210, and

WHEREAS, all revenues received (less administrative fees) from the sale of non-rolling stock are deposited in the General Fund (per MCC 2-7.08), and

WHEREAS, by authorizing the Purchasing Division to process property, as items become surplus, from February 1, 2007 through January 31, 2008, without returning to City Council for subsequent approvals, the City will save substantial staff and processing time and be compliant with City Charter and Modesto Municipal Code (MMC), and

WHEREAS, the list of property to be sold will be on file with the City Clerk, and

WHEREAS, the City could sell all surplus as scrap or choose to donate it to charitable organizations, and

WHEREAS, after the auction, the Purchasing Division will prepare a recap memorandum to account for the items sold and the proceeds obtained from the auction,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. The City Council hereby authorizes the City Purchasing Division to seek City Council approval each year for the disposition of surplus property in accordance with Section 801 of the City Charter and Modesto Municipal Code (MMC), and hereby declares as surplus from February 1, 2007, through January 31, 2008, the property items set forth above.

SECTION 2. The City Manager, or his designated representative, is hereby authorized and directed to sell on consignment to the highest bidder any surplus properties as set forth on the list on file in the City Clerk's office.

SECTION 3. If said property cannot be sold on consignment as listed above, the City Manager, or his designated representative, is hereby authorized and directed to sell on a sealed bid basis to the highest bidder any surplus properties as set forth on the list on file in the City Clerk's office.

SECTION 4. If said property cannot be sold on consignment or on a sealed bid basis as provided, then said property may be sold online pursuant to Resolution No. 2006-192, adopted on April 4, 2006.

SECTION 5. If said property cannot be sold on consignment online or on a sealed bid basis as provided for above, then said property may be sold at public auction utilizing the current agreement with The Auction House which was entered into on August 14, 2001, and approved by Council Resolution No. 2001-423. Said resolution provides for auctioneering services to be provided by The Auction House, subject to the appropriate insurance being on file in the office of the City Clerk, and subject to at least five (5) days notice being given before the time fixed for the sale. The City Clerk shall cause notice thereof to be published in the Modesto Bee, the official newspaper of the City of Modesto. Said notice shall set forth the time and place of the sale and shall state that the list of items to be offered for sale can be inspected in the office of the City Clerk.

SECTION 6. If said property cannot be sold on consignment, on a sealed bid basis, online or through the public auction process, then said property may be sold for scrap.

SECTION 7. The City Central Stores Manager is hereby authorized to contact The Auction House to coordinate pick-up for surplus property after the Purchasing Division has approved the necessary surplus property forms.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-052

A RESOLUTION APPOINTING 2007 BOND ISSUE AND REFINANCING TEAM CONSISTING OF SIDLEY AUSTIN, LLC, BOND COUNSEL; STRADLING YOCCA CARLSON & RAUTH, DISCLOSURE COUNSEL; PUBLIC FINANCIAL MANAGEMENT INC., FINANCIAL ADVISOR; BANC OF AMERICA SECURITIES LLC, UNDERWRITER, AND CITY STAFF WITH RESPECT TO THE PROPOSED ISSUANCE OF CERTAIN LEASE REVENUE BONDS AND LEASE REVENUE REFINANCING BONDS FOR FUTURE CONSIDERATION OF COUNCIL, AND AUTHORIZING SAID BOND FINANCING TEAM TO PROCEED WITH ACTIONS NECESSARY FOR BOND DOCUMENT DEVELOPMENT

WHEREAS, pursuant to the City of Modesto Municipal Code Section 301 of Chapter 4 of Article VIII, the City of Modesto, California (the "City") is authorized to issue lease revenue bonds to provide funds to finance the costs for the design, construction and equipping of improvements to the John Thurman Stadium and for the purpose of refunding existing lease revenue bonds, and

WHEREAS, staff has identified the opportunity to refinance the existing 1997 and 1998 Lease Revenue bonds while generating debt service savings and borrowing $2.4 million in additional proceeds for use in constructing improvements at John Thurman Stadium, and

WHEREAS, the City desires to appoint certain professionals to assist the City in connection with such proposed issuance, and to authorize such professionals and City staff to take all actions necessary, including the preparation of documents to effect such issuance, for future consideration by this City Council,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto, that it hereby appoints Sidley Austin, LLC of San Francisco, as Bond Counsel ("Bond Counsel"); Stradling Yocca Carlson & Rauth, A Professional Corporation of Newport

Beach, California, as the Disclosure Counsel; Public Financial Management Inc., San Francisco, California, as Financial Advisor ("Financial Advisor"), and Banc of America Securities LLC as the Underwriter.

BE IT FURTHER RESOLVED that City staff is hereby authorized and directed to proceed with any and all actions deemed necessary or advisable, including directing the finance professionals appointed pursuant to this Resolution, to begin preparation of documents in connection with the proposed issuance of the City's lease revenue and lease revenue financing bonds, for future consideration by the City Council

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the Resolution adopted by the following vote:

RESOLUTION NO. 2007-055

ADOPT A RESOLUTION AUTHORIZING THE MODESTO FIRE DEPARTMENT TO PARTICIPATE IN THE CENTER FOR PUBLIC SAFETY EXCELLENCE INCORPORATED'S (CPSE) SELF ASSESSMENT PROCESS, AND APPLY FOR ACCREDITATION.

WHEREAS, the Modesto Fire Department wishes to apply for accreditation which would measure the Modesto Fire Department's administration and response system against internationally recognized standards, and

WHEREAS, the first step of the accreditation process is to participate in the CPSE self assessment process, and

WHEREAS, the Safety and Communities Committee approved this request on December 4, 2006, for recommendation to the full Council,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Modesto Fire Department to participate in the Center For Public Safety Excellence Incorporated's (CPSE) self assessment process, and apply for accreditation.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-056

A RESOLUTION APPROVING AN AMENDMENT TO THE AGREEMENT WITH COLE MANAGEMENT & ENGINEERING, INC., FOR ADDITIONAL WORK NOT INCLUDED IN THE ORIGINAL AGREEMENT AND FOR REIMBURSABLE EXPENSES TO PERFORM CONSTRUCTION MANAGEMENT SERVICES OF THE CELESTE/ROSE/SCENIC SANITARY SEWER IMPROVEMENTS PROJECT IN THE AMOUNT OF $56,800.00, CONTRACT TOTAL OF $262,584.00, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AMENDMENT

WHEREAS, on March 7, 2006, by Resolution 2006-133, the City Council awarded a construction contract in the amount of $3,707,105.00 to California Trenchless, Inc., to construct the Celeste/Rose/Scenic Sanitary Sewer Improvements Project, and

WHEREAS, the Celeste/Rose/Scenic Sanitary Sewer Improvements Project is a large specialized project that will require augmentation of the City's capacity to provide construction management and inspection, and

WHEREAS, on April 4, 2006, by Resolution 2006-213, Cole Management & Engineering, Inc. (CME), a construction management firm specializing in these types of inspections was selected and approved to assist with this project, and

WHEREAS, the City's contractor, California Trenchless, Inc., should have completed the project on December 5, 2006, and is behind schedule, and

WHEREAS, the contractor, at times, has experienced slower drilling rates than our design consultant expected, including experiencing minor equipment breakdowns and vandalism, and

WHEREAS, the majority of the delay is due to the relatively new method of construction and our contractor's experience with that method. Many adjustments to those methods were required during construction due to soil conditions other than what the contractor anticipated, and

WHEREAS, over the course of this project, Cole Management was required to expend $15,938 on overtime for inspection and project management. Due to the relatively new nature of the construction method more of their budget was consumed on submittal review and consultations with the City's design consultant, and

WHEREAS, due to the size and complexity of this project, City Staff recommends that Cole Management continue to provide construction management services, as current workload and experience levels do not provide for timely in-house solutions/responses; and, in addition, integration of an additional item beyond the scope of the existing contract, such as, project closeout and assistance for extra work claims, if needed, and

WHEREAS, the City's consultant agreement with CME is a time and materials contract. As part of this Amendment, CME will continue to provide full-time inspection for the Celeste/Rose/Scenic Sanitary Sewer Improvements Project, and

WHEREAS, the total cost of the Agreement with Cole Management, including this Amendment, is less than 7.1 % of the cost of the construction contract, and no additional Change Order costs have been identified, and none are anticipated at this time.

WHEREAS, there are sufficient funds available in CIP Account 6210-430-A049 "Celeste/Rose/Scenic Sewer Improvements" to continue work on the ongoing and additional tasks to complete the additional work as follows: 1) Task 2: Schedule Review; 2) Task 3: Submittal and Request For Information, 3) Task 4: Construction Management, 4) Task 5: Administrative Duties, and 5) Task 6: Claims Assistance/Closeout, and

WHEREAS, the Original Agreement was for $205,784 and the additional work associated with this Amendment is $56,800, which will increase the total Agreement to an amount not-to-exceed $262,584, and

WHEREAS, the current budgeted amount of $56,800 for the Amendment to the Agreement is available in the CIP Account 6210-430-A049 "Celeste/Rose/Scenic Sewer Improvements" to cover the cost for these additional services,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves an Amendment to the Agreement between City of Modesto and Cole Management & Engineering, Inc., for additional services related to the Celeste/Rose/Scenic Sanitary Sewer Improvements Project in the amount of $56,800.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute said Amendment to the Agreement.

The foregoing resolution was introduced at a special meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-057

A RESOLUTION REJECTING THE SOLE BID FOR THE PROJECT TITLED, "MERLE AVENUE AND MAID MARIANE LANE ROUNDABOUT IMPROVEMENTS," AND AUTHORIZING STAFF TO REBID THE PROJECT

WHEREAS, the bids received for Merle Avenue and Maid Mariane Lane Roundabout Improvements were opened at 11:00 a.m. on November 14, 2006, and

WHEREAS, during the bid evaluation process, staff determined that the sole bid unreasonably exceeds the Engineer's estimate; therefore, staff recommends the bid be rejected and the specifications be revised and re-solicitation for this service be conducted at a later date, and

WHEREAS, there will be no impact to the operating budget if the low bid is rejected and the project re-advertised,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the bids received for Merle Avenue and Maid Mariane Lane Roundabout Improvements, opened in the office of the City Clerk on November 14, 2006, are hereby rejected.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that City staff is hereby authorized to rebid the project titled "Merle Avenue and Maid Mariane Lane Roundabout Improvements."

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-058

A RESOLUTION APPROVING THE PLANS AND SPECIFICATIONS, AWARDING THE BID, AND APPROVING A $235,600.00 CONSTRUCTION CONTRACT WITH JOHN D. BAKER CONSTRUCTION COMPANY FOR THE PROJECT ENTITLED "INSTALLATION OF DETECTOR LOOPS AT 7 INTERSECTIONS," AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE CONTRACT.

WHEREAS, City staff has reviewed the plans and specifications for the project entitled, "Installation of Detector Loops at 7 Intersections" and recommends approval to the City Council, and

WHEREAS, the bids received for the "Installation of Detector Loops at 7 Intersections" project were opened at 11:00 a.m., on November 21, 2006, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the Public Works Director has recommended that the bid of $235,600.00 received from John D. Baker Construction Company be accepted as the lowest responsible bid, and the contract be awarded to John D. Baker Construction Company,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the plans and specifications for the "Installation of Detector Loops at 7 Intersections" project.

BE IT FURTHER RESOLVED that the Council accepts the bid of John D. Baker Construction Company in the amount of $235,600.00, and hereby awards John D. Baker Construction Company the contract for "Installation of Detector Loops at 7 Intersections."

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-061

A RESOLUTION REJECTING ALL BIDS FOR THE PROJECT TITLED "KING-KENNEDY MEMORIAL CENTER KITCHEN AND AUDITORIUM RENOVATION" AND AUTHORIZING STAFF TO RE-ADVERTISE THE PROJECT AT A FUTURE DATE.

WHEREAS, the two bids received for "King-Kennedy Memorial Center Kitchen and Auditorium Renovation" were opened at 11:00 a.m. on December 12, 2006, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, an apparent low bid by Menghetti Construction Inc., was 17.06% above the architect's estimate, and

WHEREAS, the apparent low bid for the project exceeded the estimate by an excessive amount, and

WHEREAS, the plans included the renovation of the kitchen and auditorium at the King-Kennedy Memorial Center, and

WHEREAS, during the bid evaluation process staff determined that there were insufficient funds available for this project. Therefore, staff recommends all bids be rejected and staff be allowed to re-advertise the project,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that all bids received for "King-Kennedy Memorial Center Kitchen and Auditorium Renovation," opened in the office of the City Clerk on December 12, 2006, are hereby rejected.

BE IT FURTHER RESOLVED that staff is hereby authorized to re-advertise the project at a future date.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-062

A RESOLUTION VACATING AND ABANDONING AN ALLEYWAY LOCATED BETWEEN COFFEE ROAD AND SUNNYSIDE AVENUE BETWEEN LOCKE ROAD AND LUCERN AVENUE

WHEREAS, Sutter Gould Medical Foundation filed an application to vacate and abandon a 590- foot alleyway, located between Coffee Road and Sunnyside Avenue ("Proposed Abandonment"), and

WHEREAS, Streets and Highways Code Section 8320 et seq. prescribes the procedures to vacate and abandon public rights-of-way, and

WHEREAS, a title report was submitted by Sutter Gould Medical Foundation with the abandonment request which shows that fee title to the property underlying the proposed abandonment belongs to Sutter Gould Medical Foundation who are proponents of the abandonment, and

WHEREAS, the homes which the alleyway has served will be demolished to accommodate parking for the Sutter Gould Medical Facility renovation; and

WHEREAS, the proposed abandonment has been referred to affected City departments and local utility companies, and no objection to the Proposed Abandonment has been received, and

WHEREAS, Government Code Section 65402(a) requires that prior to abandoning a public right-of-way, the Planning Commission shall make a determination as to whether the abandonment is consistent with the General Plan, and

WHEREAS, a hearing by the Planning Commission was scheduled for November 20, 2006, but was continued to December 4, 2006, due to incomplete documentation relating to the alley abandonment, and

WHEREAS, a hearing was held by the Planning Commission on December 4, 2006, in the Tenth Street Chambers, located at 1010 Tenth Street, Modesto, California, at which hearing both oral and documentary was received and considered regarding the proposed vacation and abandonment, and

WHEREAS, by Planning Commission Resolution No. 2006-74, the Planning Commission rendered a report finding that the Proposed Abandonment is in conformance with the Modesto Urban Area General Plan and recommended that the Council vacate and abandon the said right-of-way, and

WHEREAS, a duly noticed public hearing was held by the Council of the City of Modesto on Monday, January 9, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California, at which time all persons interested in or objecting to the Proposed Abandonment were afforded the opportunity to appear, and

WHEREAS, three notices were posted at the site of the proposed right-of-way abandonment for two successive weeks prior to the hearing, and notice was published in the Modesto Bee for two successive weeks prior to the hearing, per Streets & Highways Code sections 8323 and 8332, respectively, and,

WHEREAS, all things and acts necessary to be done as required by the State of California Streets and Highways Code, Section 8300 through 8363: Public Streets, Highways and Service Easements Vacation Law, in order to vacate and abandon the subject right-of-way have been done and accomplished, and

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Modesto finds and determines as follows:

1. The alleyway is not necessary to serve present or future traffic needs in the area.

2. The alleyway abandonment provides for the improvements necessary for upgraded medical facilities to serve the community.

3. That the vacation and abandonment of the 590- foot long right-of-way is in conformance with the City of Modesto General Plan.

BE IT FURTHER RESOLVED that the Council hereby orders and declares the vacation and abandonment of a 590- foot long alleyway, located between Coffee Road and Sunnyside Avenue between Locke Road and Lucern Avenue.

Said right-of-way to be vacated and abandoned is more particularly described in **Exhibit "A"** attached hereto, and by this reference made a part hereof as though set forth in full herein.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Keating, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

AYES: Councilmembers: Dunbar, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-063

A RESOLUTION APPROVING A DEVELOPMENT PLAN FOR PLANNED DEVELOPMENT ZONE, P-D(30), AS AN ADDITION TO PLANNED DEVELOPMENT ZONE, P-D(30).

WHEREAS, the City Council by Ordinance No. 829–C.S., which became effective on June 21, 1967, granted Planned Development Zone, P-D(30), to allow expansion of an existing medical clinic, property located at the northeast corner of Coffee Road and Lucern Avenue, and

WHEREAS, City Council Resolution No. 67-352 adopted by the City Council on May 8, 1967, approved the development plan for Planned Development Zone, P-D(30), and contained conditions of approval thereof, and

WHEREAS, the City Council by Ordinance No. 1167–C.S., which became effective on January 26, 1972, and Resolution No. 71-1131 adopted by the City Council on December 20, 1971, amended Planned Development Zone, P-D(30), to permit additional uses, and

WHEREAS, an expansion of Planned Development Zone, P-D(30), was approved by the City Council by Ordinance No. 2096-C.S., which became effective on January 7, 1982, and Resolution No. 81-1031 adopted on November 24, 1981, approved additional medical/professional facilities including parking areas and ancillary buildings on property located east of Coffee Road and south of Locke Road, and

WHEREAS, Planning Commission Resolution No. 82-180 adopted November 15, 1982, approved a revised plot plan for Planned Development Zone, P-D(30), and

WHEREAS, the City Council by Ordinance No. 2403-C.S., which became effective on March 13, 1986, approved a 27,000 square-foot three-story addition atop an

existing one-story building, property located on the east side of Coffee Road, north of Lucern Avenue, and for an expansion of Planned Development Zone, P-D(30), to provide an off-street parking area that the southwest corner of Coffee Road and Lucern Avenue, and

WHEREAS, the City Council by Resolution No. 86-171 adopted February 4, 1986, approved an amended development plan for Planned Development Zone, P-D(30), and

WHEREAS, the City Council by Ordinance No. 2652-C.S., which became effective on April 6, 1989, approved an addition to Planned Development Zone, P-D(30), to allow a 272-space parking area property located on the west side of Sunnyside Avenue south of Lucern Avenue, and

WHEREAS, a verified application for an amendment to Sections 22-3-9 and 27-3-9 of the Zoning Map was filed by Sutter Gould Medical Foundation on July 27, 2005, to reclassify from Low Density Residential Zone, R-1, and Medium Density Residential Zone, R-2, to Planned Development Zone, P-D(30), as an addition to Planned Development Zone, P-D(30), for expansion of the Gould Medical Facility and relocation of the Medical Facility building located at 600 Coffee Road, described as follows:

R-1 to P-D(30)

BEING Lots 1,2,3,4,5,6, and 7 of Block 1032 as shown on the Map of Downey Manor, recorded in Volume 18 of Maps, at Page 32, Stanislaus County Records, together with the South half of the 60' wide Locke Road, the West 30.0 feet of the 50 foot wide Sunnyside Avenue and the North half of the 20' wide alley adjacent to said lots, lying in the Southwest Quarter of Section 22, Township 3 South, Range 9 East, Mount Diablo Base and Meridian, City of Modesto, County of Stanislaus, State of California.

Containing 1.89 acres of land.

R-2 to P-D(30)

BEING a portion of Lot 43 of the "Broughton Colony Tract", according to the Official Map thereof, filed in Volume 1 of Maps, at Page 78, Stanislaus County Records, lying in the Northeast Quarter of Section 28, Township 3 South, Range 9 East, Mount Diablo Base and Meridian, City of Modesto, County of Stanislaus, State of California, more particularly described as follows:

BEGINNING at a point 170.5 feet South of the Northeast corner of Section 28, Township 3 South, Range 9 East, Mount Diablo Base and Meridian according to the United States Government Township Plats, thence West 182 feet; thence South 192 feet; thence East 182 feet to the East line of Section 28; thence Northerly along the East line of Section 28, 192 feet to the Point of Beginning.

Containing 0.8 acres of land.

BEING a portion of Lots 2 and 3 of "Sunnyside Acres" according to the Official Map thereof, filed in Volume 5 of Maps, at Page 45, Stanislaus County Records, and a portion of Lot 31 of the "Broughton Colony Tract" according to the Official Map thereof, filed in Volume 1 of Maps, at Page 78, Stanislaus County Records, lying in the Southwest Quarter of Section 22, and the Northwest Quarter of Section 27, Township 3 South, Range 9 East, Mount Diablo Base and Meridian, City of Modesto, County of Stanislaus, State of California, more particularly described as follows:

BEGINNING at the Southwest corner of Lot 31 of the "Broughton Colony Tract" said Southwest corner is also the center line intersection of Lucern Avenue and Sunnyside Avenue; thence North 00°08'52" West along the center line of Sunnyside Avenue, 82.09 feet; thence departing said center line South 89°33'19" East, 264.36 feet to a point on the West line of Lot "G" as per the Map filed in Book 6 of Surveys, at Page 16, Stanislaus County Records; thence South 00°11'16" East along said West line, 82.06 feet to a point on the South line of Lot 31 of the Broughton Colony Tract; thence South 89°33'41" East along said South line, 65.58 feet to the Northeast corner of Lot 2 of Sunnyside Acres; thence South 00°11'29" East. 164.71 feet to the Southeast corner of said Lot 2; thence North 89°33'22" West along the South line of Lot 2, 165.03 feet; thence departing said South line North 00°10'47" West, 74.84 feet; thence North 89°33'22" West, 165.01 feet to a point on the East line of said Lot 3 of Sunnyside Acres, said point lies on the center line of Sunnyside Avenue; thence South 00°10'47" East, 75.07 feet along said center line to the Southeast corner of Lot 3; thence North 89°35'13" West along the South line of said Lot 3, 300.0 feet to the Southwest corner of that certain parcel designated as Assessor's parcel number 34-06-04; thence North 00°10'05" West along the West line of said parcel, 164.94 feet to a point on the center line of Lucern Avenue; thence South 89°34'42" East along said center line, 299.97 to the Point of Beginning.

Containing 2.61 acres of land.

WHEREAS, after a public hearing held on November 20, 2006, and continued to December 4, 2006, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, it was found and determined by the Planning Commission, by its Resolution No. 2006-73, that rezoning of the property as requested is required by public necessity, convenience, and general welfare for the following reasons:

1. That the proposed amendment to the Planned Development Zone allows for the provision of expanded and upgraded medical facilities to serve the community.

2. That the proposed Planned Development Zone, by reason of its plot plan design and conditions of approval, will be compatible with the surrounding land uses, as the amendment is necessary to provide adequate parking for the existing medical facility. Parking is a compatible use within the mixed use and Residential zoning districts.

3. The proposed rezoning and P-D amendment are consistent with the Modesto Urban Area General Plan, as the existing facilities are within an existing development zone P-D(30) which allows for medical office uses. The medical office building will be relocated within the boundaries of this existing P-D zone. The proposed rezoning of parcels designated Residential would be used for surface parking, which is a conditional use in residential zones as adjunct to office or commercial uses. Parking is allowed in both R and P-D(30); however, the rezone provides consistency for the entire medical office building facilities within the P-D(30) zone. The Modesto Urban Area General Plan states that the zoning code and zoning map shall be the primary vehicle to guide future development in the Baseline Developed Area.

WHEREAS, said matter was set for a public hearing of the City Council to be held on January 9, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing was held, and

WHEREAS, after said public hearing the Council found and determined that the application of Sutter Gould Medical Foundation for an addition to Planned Development

Zone, P-D(30), and an amendment to the development plan should be granted as consonant with public necessity, convenience and general welfare for the reasons set forth in Planning Commission Resolution No. 2006-73 and quoted above, and

WHEREAS, the Council has introduced Ordinance No. 3431-C.S. on the 9th day of January, 2007, reclassifying the above-described property from Low Density Residential Zone, R-1, and Medium Density Residential Zone, R-2, to Planned Development Zone, P-D(30), as an addition to Planned Development Zone, P-D(30).

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. DEVELOPMENT PLAN. The development plan for Planned Development Zone, P-D(30), is hereby approved subject to the following conditions:

1. All development shall conform to the site plan and elevations titled "Sutter Gould Medical Foundation 600 Coffee Road Replacement MOB Shell Package" stamped approved by the Planning Commission on December 4, 2006.

2. Prior to issuance of a building permit, a landscaping and irrigation plan shall be approved by the Parks, Recreation and Neighborhood Director or designee. Landscaping and the irrigation system shall be installed and maintained in accordance with the approved plan.

3. Walls shall be constructed as follows:

   a.) Prior to any construction above the foundation of the medical office building, a six-foot high masonry wall shall be constructed as shown on the site plan to buffer the parking area along the south side of Locke Road, between Coffee Road and Sunnyside Avenue. An emergency access through said wall shall be provided if required by the Fire Marshal. The location of the emergency access shall not damage or interfere with the existing street trees on Locke Road.

   b.) Prior to occupancy of the medical office building, a seven-foot high masonry wall shall be installed along the western property line of the parking lot (APN 34-006-004) at the southwest corner of Sunnyside Avenue and Lucern Avenue.

c.) Prior to a foundation inspection for the office building, a 6-foot high masonry wall shall be constructed and enhanced screen landscaping as approved by the Parks, Recreation and Neighborhoods Director shall be installed to provide an adequate screen during the construction period around the northern, eastern, and southern perimeters of the proposed construction staging area and future parking lot to be located on APN's 32-012-037, 34-007-021, 34-007-022 on the east side of Sunnyside Avenue. Alternative fencing materials may be approved by the Community and Economic Development Director or designee.

4. All landscaping, fences, and walls shall be maintained and the premises shall be kept free of weeds, trash, and other debris.

5. Street Trees shall be preserved as follows:

   a.) All street trees located along the south side of Locke Road shall be preserved

   b.) Mature street trees within the public right-of-way on Sunnyside, Lucern, and Coffee shall be preserved unless removal is necessary for street, sidewalk or driveway improvements required to meet City standards. Preference shall be given to native oak species.

   c.) Prior to issuance of a building permit, all street trees to be preserved shall be fenced and otherwise protected during the construction period to ensure their survival. A tree preservation plan for trees to be preserved, and a tree removal and replacement plan for trees to be removed, shall be submitted and approved by the Parks, Recreation, and Neighborhoods Department Director and Public Works Department Directors, or their designee.

6. All street dedications consistent with Standard Specifications shall be made prior to the issuance of a building permit or at any time requested by the City Engineer or designee to alleviate a health, safety, or traffic problem in the area.

7. Street improvements consistent to Standard Specifications shall be provided prior to the occupancy of any structures or when requested by the City Engineer or designee to alleviate a health, safety, or traffic problem in the area.

8. Prior to the issuance of Certificate of Occupancy, the developer shall install the following street dedication and improvements as shown on the stamped approved plan per City Standards:

   a. Dedicate and improve the intersection of Coffee Road and Lucern Avenue, per the City of Modesto Standard of Specification Detail 379. Dedications and all curbs shall be built at ultimate locations as per detail.

b. Dedicate and improve Coffee Road at the intersection with Locke Road, per the City of Modesto Standard of Specification Detail 379. Dedications and all curbs shall be built at ultimate locations as approved by the City Engineer.

c. Dedicate and improve the southwest intersection of Locke Road and Sunnyside Avenue, per the City of Modesto Standard Specification Detail 377. Dedications and all curbs shall be built at ultimate locations as per detail. Improvements shall be required on Sunnyside Road only.

d. Dedicate and improve the intersection of Lucern and Sunnyside, per the City of Modesto Standard Specification Detail 377. Dedications and all curbs shall be built at ultimate locations as per detail.

e. Five-foot-wide sidewalks shall be permitted along Locke Road, Sunnyside Avenue and the South side of Lucern. 10-foot wide side-walks shall be required along Coffee Road and the North side of Lucern.

f. A bus turnout shall be installed along the project's frontage on Coffee Road north of Lucern Avenue.

g. A right-turn deceleration lane for the proposed driveway on Coffee Road shall be required. The deceleration lane must be at least 50 feet plus a taper.

h. The throat depth of the proposed driveway on Coffee Road shall be 100 feet to the first aisle or parking space on the site, measured from the new property line after right-of-way dedication.

i. The proposed driveway on Lucern Avenue shall be 240 feet from the signalized intersection of Coffee Road and Lucern Avenue measured from the new property line after the right-of-way dedication and the nearside of the proposed driveway.

j The throat depth of the proposed driveway on Lucern Avenue shall be 50 feet measured from the property line to the first aisle on site. The inbound lane should be reduced to 15 feet and the outbound side should be 24 feet for two lanes.

k. The driveways along Coffee and Sunnyside located at the existing alley entrances shall have a throat width of 30'

l. The taper shown on the East side of Sunnyside Avenue shall start at the South end of the alley property line and tie into the existing north end of the alley.

9. Prior to issuance of any permit for the installation of parking lots on APN's 32-0120-037, 34-007-21, 34-007-22, 34-002-002, and 34-002-003, plans for development shall be approved by the C&ED Director, or designee. If plans for these parcels are changed from the intended used solely as parking lots, the revised plans shall be subject to approval by the Planning Commission.

10. Demolition of the existing building shall begin within 6 months of issuance of Certificate of Occupancy for the new medical office building.

11. Prior to issuance of a building permit, improvement plans for required improvements shall be prepared by a Registered Civil Engineer and approved by the City Engineer or designee. Improvements shall be constructed in accordance with the approved plans.

12. All weather, hard surfaced roadways shall be constructed and maintained free of obstructions prior to and at all times during construction.

13. Prior to issuance of a building permit the developer shall dedicate public utility easements as required by the utility companies and the City Engineer or designee.

14. Irrigation lines shall be removed, relocated, or protected as required by the Modesto Irrigation District and the City Engineer or designee. Easements for irrigation lines to remain shall be dedicated.

15. All outdoor lighting shall be shielded from adjacent residential properties as required by the City Engineer or designee.

16. Ten-foot-wide public utility easements, and six-foot-wide planting easements located within the ten-foot-wide public utility easements, as required by the City Engineer or designee shall be dedicated along all street frontages.

17. The developer must obtain coverage under the General Construction Activity Storm Water Permit (General Construction Permit) issued by the State Water Resources Control Board (SWRCB) including the following items:

    a. A Notice of Intent (NOI) filed with the SWRCB. One copy of the NOI must be submitted to Development Services, Stormwater.

    b. A Stormwater Pollution Prevention Plan (SWPPP) to be prepared and held on site. One copy of the SWPPP must be submitted to Development Services, Stormwater.

18. Provide treatment to remove pollutants from the first ½ inch of stormwater runoff from all impervious areas of the site, including parking lots and building rooftops. For details, refer to the City of Modesto Guidance Manual for New Development Stormwater Quality Control Measures.

19. Prior to obtaining a grading permit, the developer shall provide owner-signed and notarized Stormwater Treatment Device Access and Maintenance Agreement to Development Services, Stormwater, for recording.

20. All storm drainage shall be retained on-site.

21. Prior to issuance of a Certificate of Occupancy, the following water line improvements shall be installed:

    a. The water line in Sunnyside Avenue from Lucern Avenue to Locke Road shall be upsized to an 8 inch line.

    b. The 2 inch water line in the alley shall be abandoned and removed.

    c. The 8 inch water line in Lucern Avenue shall be extended to Coffee Road.

    d. The old water services along Locke Road shall be abandoned and removed.

    e. New water services shall be installed to serve the new facility. The service will need to be upsized from the existing size.

    f. The water line in Locke Road shall be field-verified for size.

    g. The development shall provide the City with water demands.

    h. The water line used for fire service shall be looped.

22. Prior to issuance of a Certificate of Occupancy, the following sewer improvements shall be installed:

    a. The sewer line in Locke Road is currently at capacity and there are minimal flows on Lucern and Sunnyside. The sewer line shall be designed as approved by the City Engineer following field verification of pipe size.

    b. New service connections shall be made at the manhole at Coffee and Lucern and the old services abandoned and removed.

    c. The sewer line shall be connected to the 15" trunk line on Coffee Road.

23. Trash bins shall be kept in enclosures in accordance with the approved plan and in accordance with plans approved by the Public Works Director or designee. Enclosures shall be constructed of building materials consistent with those used in the major buildings as approved by the Community and Economic Development Department Director or designee.

24. Trash enclosures shall be of a size and design to permit the storage and removal of required recyclable material receptacles, or a separate enclosure of the collection for recyclable materials shall be provided as approved by the Public Works Director or designee.

25. Trash enclosures shall be bermed to prevent stormwater run-on and graded to drain to adjacent landscape areas as required by the Public Works director or designee.

26. Trash enclosures shall be screened from view from any public street.

27. Prior to issuance of a building permit, the developer shall show on the plans submitted to Building and Development Services all fire hydrants and FDC's required by the Fire Chief. All hydrants and FDC's required by the Fire Chief shall be installed and operable prior to construction of any structures.

28. Internal circulation shall provide adequate emergency services access as determined by the Fire Chief.

29. The fire department connection(s) shall be accessible and within 90 feet of a fire hydrant.

30. Details shall be shown of the underground fire main supplying the fire sprinkler system and fire hydrants on the plans. Type and size of pipes, associated underground valving, and location of FDC shall also be shown on the plans.

31. All signs shall comply with the sign requirements of the P-D(30) Zone.

32. The new entry sign on Lucern Avenue shall be moved 10 feet north from the location shown on the site plan to allow adequate sight distance.

33. The new entry sign on Coffee Road shall be moved 10 feet east of the location shown on the site plan to allow adequate sight distance.

34. Operations conducted on the premises shall not cause an unreasonable amount of noise, odor, dust, mud, smoke, vibration, or electrical interference detectable off the premises. All machinery or equipment shall be soundproofed as required by the Chief Building Official.

35. The property owner and developer shall, at their sole expense, defend, indemnify and hold harmless the City of Modesto, its agents, officers, directors and employees, from and against all claims, actions, damages, losses, or expenses of every type and description, including but not limited

to payment of attorneys' fees and costs, by reason of, or arising out of, this development approval. The obligation to defend, indemnify and hold harmless shall include but is not limited to any action to arbitrate, attack, review, set aside, void or annul this development approval on any grounds whatsoever. The City of Modesto shall promptly notify the developer of any such claim, action, or proceeding and shall cooperate fully in the defense.

36. The Capital Facilities Fees payable at the time of the issuance of a building permit for any construction in this development shall be based on the rates in effect at time of issuance of the building permit.

37. The developer shall implement pre- and post-construction best management practices (BMPs) to minimize pollutants entering the storm system.

38. Prior to the issuance of a building permit, the developer shall submit a plan for approval by the Operations and Maintenance Director to provide on-site treatment of storm water in accordance with the guidance manual for new development stormwater quality control measures. Storm drain improvements shall be constructed in accordance with the approved plans.

39. Prior to issuance of a building permit for each of the buildings within the development, the applicant shall pay the water connection fees at the rate in effect at the time of issuance of the building permit.

40. All conditions of Resolution No.'s 67-352, 71-1131, 81-1031, 86-171, 89-371 not in conflict with this action shall remain in full force and effect.

In addition, the following recommended Conditions of Approval are mitigation measures from the Modesto Urban Area General Plan Master Environmental Impact Report that should be applied to the project:

41. All disturbed areas, including storage piles, which are not being actively utilized for construction purposes, shall be effectively stabilized of dust emissions using water, chemical stabilizer/suppressant, covered with a tarp or other suitable cover or vegetative ground cover.

42. All land clearing, grubbing, scraping, excavation, land leveling, grading, cut and fill, and demolition activities shall be effectively controlled of fugitive dust emissions utilizing application of water or by presoaking.

43. When materials are transported off-site, all material shall be covered, or effectively wetted to limit visible dust emissions, and at least six inches of freeboard space from the top of the container shall be maintained.

44. All operations shall limit or expeditiously remove the accumulation of mud or dirt from adjacent public streets at the end of each workday. The use of

dry rotary brushes is expressly prohibited except where preceded or accompanied by sufficient wetting to limit the visible dust emissions. Use of blower devices is expressly forbidden.

45. Following the addition of materials to, or the removal of materials from, the surface of outdoor storage piles, said piles shall be effectively stabilized of fugitive dust emissions utilizing sufficient water or chemical stabilizer/ suppressant.

46. Within urban areas, track out shall be immediately removed when it extends 50 or more feet from the site and at the end of each workday.

47. Install wheel washers for all exiting trucks, or wash off all trucks and equipment leaving the site.

48. Suspend excavation and grading activity when winds exceed 20 mph.

49. Limit the area subject to excavation, grading and other construction activity at any one time.

50. The City's Noise Ordinance (Modesto Municipal Code Section 4-9.101) prohibits the "loud and raucous discharge into the open air of the steam of any steam equipment or exhaust from any stationary internal-combustion engine."

    The Noise Ordinance prohibits the loud and raucous operation or use of any of the following before 7:00 a.m. or after 9:00 p.m. daily (except Saturday and Sunday and State or Federal holidays, when the prohibited time shall be before 9:00 a.m. and after 9:00 p.m.):

    a. A hammer or any other device or implement used to pound or strike an object.

    b. An impact wrench or other tool or equipment powered by compressed air.

    c. A hand-powered saw.

    d. Any tool or piece of equipment powered by an internal-combustion engine such as, but not limited to, chain saw, backpack blower, and lawn mower.

    e. Any electrically powered (whether by alternating current electricity or by direct current electricity) tool or piece of equipment used for cutting, drilling, or shaping wood, plastic, metal, or other materials or objects, such as, but not limited to, a saw, drill, lathe, or router.

    f. Any of the following: heavy equipment (such as but not limited to bulldozer, steam shovel, road grader, back hoe), ground drilling and boring equipment (such as but not limited to derrick or dredge), hydraulic crane and boom equipment, portable power generator or

pump, pavement equipment (such as but not limited to pneumatic hammer, pavement breaker, tamper, compacting equipment), pile-driving equipment, vibrating roller, sand blaster, gunite machine, trencher, concrete truck, and hot kettle pump.

g. Any construction, demolition, excavation, erection, alteration, or repair activity. In the case of urgent necessity and in the interest of public health and safety, the Chief Building Official may issue a permit for exemption from these. Such period shall not exceed three (3) working days in length while the emergency continues but may be renewed for successive periods of three (3) days or less while the emergency continues. The Chief Building Official may limit such permit as to time of use and/or permitted action, depending upon the nature of the emergency and the type of action requested.

h. Construction equipment and vehicles should be equipped with properly operating mufflers according to the manufacturers' recommendations. Air compressors and pneumatic equipment should be equipped with mufflers, and impact tools should be equipped with shrouds or shields.

51. If archaeological resources are discovered at any time during construction, all activity shall cease until the site is surveyed by a qualified archaeologist. The survey shall include mitigation measures, which shall be implemented before construction resumes. The survey shall follow the criteria as presented in Appendix K.

SECTION 2. DEVELOPMENT SCHEDULE. The following development schedule is hereby approved for said Planned Development Zone, P-D(30) as an addition to Planned Development Zone, P-D(30):

It is recommended that the construction program be accomplished in two phases as follows:

Phase I - Construction to begin on or before January 9, 2009 and completion to be no later than January 9, 2010.

Phase II - Construction to begin on or before January 9, 2010 and completion to be not later than January 9, 2011.

SECTION 3. CHANGES IN DEVELOPMENT PLAN. Any changes in the above approved development plan shall be made in accordance with the provisions of Section 10-2.1709 of the Modesto Municipal Code.

SECTION 4. COMPLIANCE WITH CODE PROVISIONS, ETC. In all other respects said planned development shall be accomplished in accordance with and in strict adherence to the provisions of Article 17 of Title 10 of the Modesto Municipal Code relating to Planned Development Zones and other applicable City laws, rules, regulations and procedures.

SECTION 5. EFFECTIVE DATE. This resolution shall not become effective unless and until the ordinance reclassifying the above-described property to Planned Development Zone, P-D(30), as an addition to Planned Development Zone, P-D(30),becomes effective.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Keating, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-064

A RESOLUTION FINDING THAT THE FOLLOWING PROJECT IS WITHIN THE SCOPE OF THE PROJECT COVERED BY THE MODESTO URBAN AREA GENERAL PLAN MASTER ENVIRONMENTAL IMPACT REPORT (SCH NO. 1999082041): AMENDMENT TO SECTIONS 22-3-9 AND 27-3-9 OF THE ZONING MAP OF THE CITY OF MODESTO TO REZONE FROM LOW DENSITY RESIDENTIAL ZONE, R-1, AND MEDIUM-DENSITY RESIDENTIAL ZONE, R-2, TO PLANNED DEVELOPMENT ZONE, P-D(30), AS AN ADDITION TO PLANNED DEVELOPMENT ZONE,P-D(30), FOR PROPERTIES LOCATED ON LOCKE ROAD, LUCERN AVENUE, AND THE SOUTHEAST CORNER OF COFFEE AND LUCERN AND TO AMEND P-D(30) TO ALLOW FOR THE REDEVELOPMENT OF THE SUTTER GOULD MEDICAL FACILITY INCLUDING A NEW RELOCATED MAIN BUILDING AT 600 COFFEE ROAD.

WHEREAS, on March 4, 2003, the City Council of the City of Modesto certified the Final Master Environmental Impact Report ("Master EIR") (SCH No. 1999082041) for the Modesto Urban Area General Plan, and

WHEREAS, Sutter Gould Medical Foundation has proposed that the zoning designation for properties located on Locke Road, Lucern Avenue, and the Southeast corner of Coffee and Lucern be amended from Low Density Residential Zone, R-1, and Medium Density Residential Zone, R-2 to Planned Development Zone, P-D(30), as an addition to Planned Development Zone, P-D(30), and to allow for the redevelopment of the Sutter Gould Medical Facility including a new relocated main building at 600 Coffee Road, and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a Master EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master

environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the project, and

WHEREAS, the City's Community & Economic Development Department by Environmental Assessment Initial Study EA/C&ED 2006-53 ("Initial Study") reviewed the proposed Amendment to the Zoning Map from Low Density Residential Zone, R-1, and Medium Density Residential Zone, R-2 to Planned Development Zone, P-D(30), and Amendment to Planned Development Zone, P-D(30) to determine whether the project is within the scope of the project covered by the Modesto Urban Area General Plan Master EIR ("Master EIR"), and concluded that the proposed project is within the scope of the Master EIR and will have no additional significant effect on the environment that was not identified in the Master EIR, and further, that no new additional mitigation measures or alternatives are required, and that, therefore, the proposed project is within the scope of the project covered by the Master EIR, and

WHEREAS, in accordance with CEQA guidelines begininning on December 19, 2006, City caused to be published a 20-day notice of the City's intent to make a finding that the proposed project conforms with the Master EIR, and

WHEREAS, said matter was considered by the City Council at a duly noticed public hearing which was held on January 9, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Initial Study prepared for the proposed Rezone from Low Density Residential Zone, R-1, and Medium Density Residential Zone, R-2 to Planned Development Zone, P-D(30), and Amendment to Planned Development

Zone, P-D(30), a copy of which is attached hereto as **Exhibit "A",** and incorporated herein by reference, and based on the substantial evidence included in said Initial Study makes the following findings:

1. That the proposed project is contemplated and described in the Master EIR (SCH No. 1999082041) as being within the scope of the Master EIR.

2. That the project will have no new significant effects on the environment not identified or examined in the Master EIR, and no new or additional mitigation measures are required.

3. That, as per Section 21157.1 of the Public Resources Code, no new environmental document or findings are required by the California Environmental Quality Act (CEQA).

4. That there are no specific features which are unique to the proposed project that require project specific mitigation measures. Accordingly, the certified mitigation measures identified in the Master EIR will be sufficient for this project.

5. That all feasible mitigation measures set forth in the Master EIR which are appropriate to the project shall be incorporated in the project.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Community & Economic Development Director is hereby authorized and directed to file a notice of approval or determination within five (5) business days with the Stanislaus County Clerk pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 9th day of January 2007, by Councilmember Keating, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

I. PURPOSE

Section 21157 of the California Environmental Quality Act (CEQA) and CEQA Guidelines Section 15177 allow for limited environmental review of subsequent projects under a Master Environmental Impact Report (EIR). This Initial Study Checklist is being used to determine whether the **Sutter Gould Medical Foundation Medical Office Building Expansion and Amendment to Planned Development Zone 30** is "within the scope" of the project analyzed in the Modesto Urban Area General Plan Master EIR (SCH# 1999082041) (Public Resources Code Section 21157.1), most recently updated in March 2003. If the Initial Study determines the project is within the scope of the Master EIR analysis, the City will issue a finding of conformity.

Section 15177(b) of the CEQA Guidelines states that neither a new environmental document nor the preparation of findings pursuant to Section 15091 shall be required of a subsequent project when all the following requirements are met:

1. The lead agency for the subsequent project is the lead agency or any responsible agency identified in the Master EIR.

2. The lead agency for the subsequent project prepares an Initial Study on the proposal. The Initial Study shall analyze whether the subsequent project was described in the Master EIR and whether the subsequent project may cause any additional significant effect on the environment which was not previously examined in the Master EIR.

3. The lead agency for the subsequent project determines, on the basis of written findings, that no additional significant environmental effect will result from the proposal, no new additional mitigation measures or alternatives may be required, and that the project is within the scope of the Master EIR. "Additional significant environmental effect" means any project-specific effect which was not addressed as a significant effect in the Master EIR.

"Additional significant effects" means a project-specific effect that was not addressed as a significant effect in the Master EIR (Public Resources Code Section 21158[d]).

The determination of conformity must be based on substantial evidence in the record. "Substantial evidence" means facts, reasonable assumptions predicated upon facts, or expert opinion based on facts. It does not include speculation or unsubstantiated opinion (CEQA Guidelines Section 15384).

The City of Modesto was the lead agency for the Master EIR and is the lead agency for this Initial Study. City staff consulted with appropriate Responsible Agencies and City Departments regarding potential environmental impacts associated with this project. Any significant comments or conditions are incorporated into this Initial Study. The City's Master EIR was also consulted, which lists both Modesto Urban Area General Plan policies and mitigation measures for each area of environmental study.

II. PROJECT DESCRIPTION

PROJECT INFORMATION		
1.	Project Title:	Sutter Gould Medical Foundation Medical Office Building Expansion and Amendment to P-D (30)
2.	Lead Agency Name and Address:	City of Modesto Community and Economic Development Department, Planning Division 1010 Tenth Street, Suite 3300, Modesto, CA 95353
3.	Contact Person and Phone Number:	Steve Mitchell, Principal Planner (209)577-5276
4.	Project Location:	Sutter Gould Medial Office Building 600 Coffee Road, Modesto, CA 95355 APN 032-12-33 through 38 APN 032-12-54 APN 032-12-21 and 22 APN 034-07-20 APN 034-06-01 through 05 APN 034-06-21 and 22 APN 032-12-28 through 32
5.	Project Sponsor's Name and Address:	Sutter Gould Medical Foundation 600 Coffee Road, Modesto, CA 95355
6.	General Plan Designation:	According to Figure II-1 on page II-8 of the Modesto Urban Area General Plan, the project site is located in the Baseline Developed Area. In addition, Figure III-1 of the General Plan, the Adopted Land Use Diagram (revised June 19, 2003), designates the project site as Mixed Use (MU) and Residential (R).
7.	Zoning:	Planned Development Zone (P-D [30]) Low Density Residential (R-1) Medium Density Residential (R-2)
8.	Description of Project:	See pages three through eight
9.	Surrounding Land Uses and Setting: (Briefly describe the project's surroundings)	The medical office building is surrounded by single family residential and a parking lot to the north along Locke Road, single family residential and a parking lot to the east along Sunnyside Avenue, and single family residential and an office to the south along Lucern Avenue. In addition, John Muir elementary school and another parking lot are located to the west of the medical center, on the west side of Coffee Road. The surrounding land uses are shown on Exhibit 4.
10.	Other public agencies whose approval is required: (e.g., permits, financing approval, or participation agreement)	City of Modesto (various departments) and utility will-serve letters

II. PROJECT DESCRIPTION (Continued)

Background

The Sutter Gould Medical Foundation (Sutter) proposes an on-site relocation and expansion of the existing medical office building located at 600 Coffee Road in the City of Modesto (City) (Exhibits 1 and 2). The existing facility was originally constructed in 1954 and currently consists of approximately 99,500 square feet (sf) of medical offices and associated medical and administrative uses (Exhibit 3). The existing building is four stories (61 feet in height) and constructed of wood, steel and concrete. There are currently a total of 779 parking spaces for staff and visitors. The main lot, located east of the medical office building and accessed from Lucern Avenue (Exhibit 3, site key "B"), provides 238 parking spaces for patients (including ten handicapped spaces). A second patient parking lot is located at the corner of Coffee Road and Locke Road (Exhibit 3, site key "D") and provides an additional 17 parking spaces (including two handicapped spaces). Physician parking is provided in the 100-space parking lot on Sunnyside Avenue (Exhibit 3, site key "G"). Additional staff parking is provided in two lots, the lot located at the southwest corner of Coffee Road and Lucern Avenue provides 125 spaces (Exhibit 3, site key "Q") and the lot located southeast of the medical office building on Sunnyside Avenue (Exhibit 3, site key "N"), provides 289 spaces. There are also ten parking spaces associated with the administration building located on Lucern Avenue, just south of the medical office building (Exhibit 3, site key "P"). The medical office building is surrounded by detached single family houses to the north along Locke Road, to the east along Sunnyside Avenue, and to the south along Lucern Avenue (zoned Low Density Residential [R-1] and Medium Density Residential [R-2]). In addition, John Muir Elementary School is located to the west of the medical center, on Coffee Road (Exhibit 4).

The current facility provides primary care (internal medicine and family practice), laboratory, imaging, clinical research, occupational medicine, same-day clinic, allergy, dermatology, endocrinology, oncology, rheumatology, neurology, ear-nose-throat, urology, audiology, pulmonology, and podiatry. The medical offices are open Monday through Friday from 8:00 AM to 5:00 PM The laboratory is open Monday through Friday from 7:00 AM to 5:30 PM and the same-day clinic is open from 8:00 AM to 8:00 PM Monday through Friday and 8:00 AM to 6:00 PM on Saturday, Sunday, and holidays (except Christmas and Thanksgiving). The facility has an estimated 387 staff on site during regular business hours. This estimate is based on the various work shifts that the departments have to best serve their patients. There are also approximately ten janitorial staff that work from 5:00 PM to 2:00 AM Monday through Friday. Between 9:00 AM and 5:00 PM, it is estimated that there are approximately 94 patients on site at any one time. After 5:00 PM, the patient population is estimated to drop to approximately 25 because the only department that is routinely open at this time is the prompt care clinic. Due to the volume of staff and patients and the age of the facility, the facility is experiencing over crowding and the facilities and equipment are out of date and need to be modernized.

Project Objectives

The project is intended to provide sufficient building space and a more modern and efficient medical facility with improved parking to serve the current numbers of staff and visitors. The specific objectives of the project are to:

- Rezone the project area through an amendment to the existing Planned Development Zone (P-D [30]) to allow expansion of the facility.
- Expand the medical office facilities as cost-effectively as possible to meet forecasted demand for medical services in the community.

- Continue to provide the same level of medical service during construction.
- Provide adequate parking to serve the projected demand and prevent on-street parking in the surrounding neighborhood.
- Provide more efficient parking access via Coffee Road.

Project Characteristics

Amend Existing Planned Development Zone (P-D [30])

The project would involve rezoning the following parcels, which are owned by Sutter Gould, from Low Density Residential (R-1) and Medium Density Residential (R-2) to Planned Development Zone (P-D [30]) through an amendment to the P-D (30) zone boundaries:

- The single family houses along the northern portion of the project site on Locke Road (1306, 1310, 1314, 1318, 1322, 1326, and 1330 Locke Road, identified in Exhibit 3 as site key "E, F, S, T, U, V, and W"), currently zoned R-1;
- The vacant parcels near the intersection of Lucern Avenue and Sunnyside Avenue intersection, identified as Exhibit 3, site key "I" and "K," currently zoned R-2;
- The two single family houses on Lucern Avenue, identified in Exhibit 3 as site key "L" and "M," currently zoned R-2 ; and
- The vacant lot near the intersection of Coffee Road and Lucern Avenue, identified in Exhibit 3 as site key "R," currently zoned R-2.

After the amendment to P-D (30), the single family houses along the northern portion of the project site on Locke Road would be demolished and replaced by surface parking for the medical office building. The vacant lots would also be used for surface parking. (Parking is described in detail below.) The two single family houses on Lucern Avenue (Exhibit 3, site key "L" and "M") would not be redeveloped and would remain as single family houses.

Alley Abandonment

A request has been submitted to abandon the existing public alley that runs along the north side of the existing medical office building between Coffee Road and Sunnyside Avenue. If abandonment is approved, the alley would become a two-way driveway in the on-site medical office building parking lot. The alley would be reserved as a utility easement if the utility companies need to continue to service the corridor, and the utilities would be undergrounded so as not to conflict with the replacement medical office building.

Replacement Medical Office Building

As shown in Exhibit 5, the replacement medical office building would be located on-site directly adjacent and east of the existing facility on property owned by Sutter Gould that currently provides 238 surface parking spaces for patients (Exhibit 5, site key "B"). Because the replacement medical office building would be constructed on this parking lot, the 238-space patient parking lot would be demolished during construction. (Parking during and after construction is discussed in detail below.) The replacement building would be four stories in height (61 feet), would have a building footprint of approximately 47,000 sf, and would provide a total of approximately 144,000 sf of space. The exterior of the building would be stucco, curtain wall, and glazing and the colors would incorporate aspects of the natural materials in the surrounding areas (Exhibits 6 through 8). The proposed glazing would be an insulated glazing, which is tinted, heat absorbing, and light reducing. Lighting would be provided around the

building, along walkways, and in the parking lots. The primary Sutter Gould facility name exterior signage would be located on the corner of Coffee Road and Lucern Avenue, with secondary directional signage at the vehicle and pedestrian entrances.

The square footage of the replacement medical office building would increase by approximately 44,500 sf over the existing building to improve flow, comply with Americans with Disabilities Act (ADA) and City codes, and provide space for modernized equipment. The facility would continue to provide the same services as it currently provides and would provide the same hours of operation (described above). Sutter Gould anticipates that the number of staff at any one time would remain at approximately 387, but that the estimated patient load at any one time would increase to approximately 109.

Parking

Parking for the existing medical office building and for the replacement building would be provided in multiple parking lots throughout all phases of construction to facilitate the transition of operations to the replacement building. As described above, because the replacement medical office building would be constructed on the parking lot adjacent to the existing medical office building (Exhibit 5, site key "B"), the 238-space patient parking lot would be lost during construction. However, the existing staff parking lot at the southwest corner of Coffee Road and Lucern Avenue (Exhibit 5, site key "Q") with 125 spaces and the two staff parking lots on Sunnyside Avenue, which would provide 100 spaces (Exhibit 5, site key "G") and 282 spaces (Exhibit 5, site key "N"), would also be made available for patient parking during construction. To provide additional parking, a new 26-space surface parking lot would be constructed in the first phase of construction at the southwest corner of the Lucern Avenue and Sunnyside Avenue intersection (Exhibit 5, site key "K"). Furthermore, the ten spaces at the administration building on Lucern Avenue would remain in place.

The residences along the northern portion of the site (1306, 1310, 1314, 1318, 1322, 1326, and 1330 Locke Road, identified on Exhibit 5 as site key "E, F, S, T, U, V, and W") would be rezoned to P-D (30) and would be demolished and replaced by surface parking for the replacement medical office building. During construction, a portion of this area would provide approximately 50 new surface parking spaces for patients. At buildout of the project, there would be a total of 110 spaces provided along the northern boundary of the project site. In addition, the vacant lot to the east of the Lucern Avenue and Sunnyside Avenue intersection, identified on Exhibit 5 as site key "I," would be rezoned to P-D (30) and used for additional parking. During construction, the "I" lot would be used for construction staging; after construction is complete, it would be developed into a 135-space surface parking lot.

After the replacement medical office building is operational and the existing building is demolished, the new main patient parking lot would be constructed to the west of the replacement building. This surface parking lot would provide 150 parking spaces. The total parking spaces for the replacement medical office building would be 938 spaces, an increase of 159 spaces over the existing parking supply. All of the parking lots for the completed project are illustrated in Exhibit 5.

Site Access

The vehicular access points to/from the replacement medical office building would remain the same as the current access points. The primary patient access would continue to be provided from Lucern Avenue. During construction, service entry/exit would continue to occur via the alley that runs east-west between Coffee Road and Sunnyside Avenue. Under the project, the

alley would be abandoned and would become a two-way driveway in the on-site parking lot, but it would continue to act as a service entry/exit. A "No Left Turn" sign would be posted at the service exit on Coffee Road.

Public Improvements

A bus turnout would be constructed on the east side of Coffee Road in front of the medical office building. Road widening would also be implemented on Coffee Road approaching Locke Road, to provide a deceleration lane. The right-hand-turn from Lucern Avenue onto Coffee Road would also be improved to adjust to the road widening on Lucern Avenue and the bus turn out on Coffee Road. To accommodate the road widening, bus turnout, and deceleration lane, all of the curb, gutter, and sidewalks would be replaced on the east side of Coffee Road, the western portion of Locke Road along the northern boundary of the site, and the western side of Sunnyside Avenue bordering the medical office building. In addition, where necessary along portions of Lucern Avenue, portions of Locke Road, and the east side of Sunnyside Avenue, curb and gutters damaged due to construction would be replaced and new sidewalk easements would be dedicated to the City of Modesto as necessary.

Utilities

The City of Modesto would continue to serve the medical office building with water and wastewater. The water supply pipeline in Lucern Avenue would be upgraded from a six-inch line to an eight-inch line and the water supply pipeline in Sunnyside Avenue would be upgraded from a four-inch line to an eight-inch line. In addition, the wastewater pipeline in Lucern Avenue would be upgraded from a six-inch line to an eight-inch line and the wastewater pipeline in Sunnyside Avenue would be upgraded from a four-inch line to an eight-inch line. Both the water and wastewater line replacements are consistent with the City's design criteria for such facilities and the replacements are being implemented to address existing water pressure problems.

The Modesto Irrigation District (MID) would continue to provide electricity to the replacement medical office building. If possible, the electrical lines would be undergrounded in the alley as part of the project. Natural gas would continue to be provided by PG &E. Telephone service would continue to be provided by AT&T.

In accordance with the City's requirements, all stormwater would be retained and infiltrated on-site through special medial filtration drainage inlets, tied into rock-well drains that allow the water to percolate into the ground.

Tree Removal

The project site currently has 123 mature ornamental trees, which include a mix of species such as *Eucalyptus* sp., *Podocarpus* sp., oak (*Quercus* sp.), pistachio (*Pistacia* sp.), birch (*Betula* sp.), carob tree (*Ceratonia* sp.), sweet gum (*Liquidambar* sp.), elm (*Ulmus parvifolia*), locust (*Robinia* sp.), and maple (*Acer* sp). Construction of the replacement medical office building and associated parking would require the removal all of the trees located on the interior of the block bound by Coffee Road, Locke Road, Sunnyside Avenue, and Lucern Avenue. In addition, approximately 50 street trees would need to be removed along Coffee Road, Locke Road, Sunnyside Avenue, and Lucern Avenue to widen the roads and make street improvements. However, all street trees would be replaced as part of the project, as shown in Exhibit 9. The primary street trees to be preserved would be along the northeastern corner of the block on Locke Road, and emphasis would be placed on preserving native oak trees where feasible. All street trees to be preserved would be fenced during construction to protect them from construction disturbance.

Landscaping

The project landscaping would consist of preservation of limited street trees, with specific concern for native oak species, and the introduction of trees and shrubs suitable to site-specific conditions that require minimal maintenance but provide visual color and interest. Plantings would be massed, with variety showing up at entrances, seating areas, the fountain at the building entrance, and the Healing Garden at the southeast corner of the building (Exhibit 5). Turf areas would be limited to streetscape and functional zones. Meandering pedestrian paths would connect parking lots to the medical office building. Drought tolerant and hardy shrubs and ground covers are proposed for landscaping around the building and along the perimeter of the site. Shade trees would be planted in the parking lots and near walkways to cut down on the sun exposure to the asphalt and concrete. The tree planting plan for the new medical office building is shown in Exhibit 10.

Shrub plantings would include evergreens, consisting of species such as *Abelia grandiflora*, *Escallonia*, *Phormium tenax*, *Ligustrum*, *Viburnum*, *Coleonema pulchrum*, *Lavatera maritima*, *Cistus purpureus*, *Xylosma congestum*, and *Rhaphiolepis indica.* Ground covers and foreground accents would consist of species such as *Hemerocallis hybridus*, *Lantana*, *Agapanthus africanus*, *Dietes vegeta*, *Tulbaghia violacea*, *Cotoneaster lowfast*, *Verbena*, *Rosa*, *Myoporum*, and *Ceanothus.* Turf would be a dwarf fescue. Ornamental tree species would include *Prunus* sp., *Pyrus calleryana*, and *Lagerstroemia indica.* Shade trees in the parking lots may include *Zelkova serrata, Pistacia chinensis, Ulmus parvifolia, Cinnamomum camphora, Quercus rubra*, and *Nyssa sylvatica.* Mature perimeter trees would be preserved where possible and new perimeter trees may include *Quercus* sp., *Pistacia chinensis*, *Liquidambar* sp., *Betula pendula*, *Eucalyptus sideroxylon*, and *Gledistsia triacanthos.* However, the final perimeter tree selections would be coordinated with the City of Modesto.

The landscaping would be irrigated. Plants having similar needs would be grouped in "hydrozones" so that the irrigation system can efficiently provide water. The system would be designed to minimize over spray onto impervious surfaces and the irrigation system would be programmed to be consistent with the days and hours established by the City of Modesto water conservation program. In addition, rain-sensing override devices would be installed on the irrigation system.

Construction Schedule and Phasing

Construction is estimated to begin early 2007 and to be completed in 2009. Because the existing medical office building would remain in operation while the replacement building is under construction, construction would occur in phases to provide sufficient parking, vehicular access, and pedestrian access. The construction phasing is summarized below and shown in Exhibits 11a through 11c.

Phase 1. New ADA accessible parking stalls would be provided at the existing medical office building front entry and the parking lot at Coffee Road and Locke Road would be restriped for ADA accessible stalls. The water and wastewater pipeline upgrades would be completed in Lucern Avenue and then in Sunnyside Avenue. The sidewalk along Lucern would be upgraded for improved pedestrian access and the entry/exit to the physician's parking lot on Sunnyside (Exhibit 11a, site key "G") would be reconstructed and new signage installed. All of the houses fronting Locke Road along the northern boundary of the project site would be demolished, and a landscape wall and landscaping would be constructed. Approximately 50 parking spaces would be constructed near the existing parking lot at the corner of Coffee Road and Locke Road (Exhibit 11a, site key "E" and "F"). Temporary construction access may be provided from Locke

Road. Finally, a new parking lot would be constructed at the southwest corner of the Lucern Avenue and Sunnyside Avenue intersection (Exhibit 11a, site key "K") to provide an additional 26 spaces.

Phase 2. The area immediately east of the existing medical office building, including the existing parking lot and the demolished housing sites, would be fenced off to prepare for construction of the replacement medical office building. The fenced-off area would be cleared, graded, and the replacement medical office building would be constructed. As the medical office building is being completed, the parking would be constructed in the northeastern corner of the site (Exhibit 11b, site key "S T, U, V, W") and landscaping around the replacement building would be installed.

Phase 3. The fencing around the replacement building would be removed and the building would become operational. For approximately two months, the old building and the replacement building would both be operational as staff transition into the replacement building. Once the transition of all offices is complete, the old building would be demolished, which would take approximately four months to complete. The roadway improvements and bus turn out on Coffee Road would be completed, the new patient parking lot would be constructed, and final landscaping features would be installed. After construction staging is removed (Exhibit 11c, site key "I"), the final parking lot on Sunnyside Avenue would be constructed.

Construction staging would be provided in the lot located east of the Lucern Avenue and Sunnyside Avenue intersection (Exhibit 11c, site key "I"). If necessary, construction staging could also be provided at the northeast corner of the block (near Locke Road and Sunnyside Avenue). Temporary parking for construction workers would be provided in the vacant lot on Coffee Road near Lucern Avenue (Exhibit 11c, site key "R"), which would be graded and graveled.

Typical construction equipment may include backhoes, jackhammers, loaders, excavators, dozers, concrete pumpers, concrete batch trucks, delivery trucks, and haul trucks. No pile drivers would be used during construction.

III. FINDINGS/DETERMINATION (SELECT ONE ON THE BASIS OF THE ANALYSIS IN SECTION IV)

1. _X_ **Within the Scope** - The project is within the scope of the Master EIR and no new environmental document or Public Resources Code Section 21081 findings are required. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

   C. An Initial Study was prepared by the City of Modesto that analyzed whether the proposed subsequent project may cause any significant effect on the environment that was not examined in the Master EIR and it has been determined that the project was described in the Master EIR as being within the scope of the Master EIR.

D. Based on the Initial Study, the City of Modesto finds and determines:

a) The proposed subsequent project will have no additional significant effect as defined in CEQA Section 21158 that was not identified in the Master EIR.

b) No new or additional mitigation measures or alternatives are required.

2. ___ **Mitigated Negative Declaration Required** - On the basis of the above determinations, the project is not within the scope of the Master EIR. A mitigated negative declaration will be prepared for the project. The following items are found to be true:

A. The type of project is described in Chapter II of the Master EIR.

B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

C. The project will have one or more potential new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures are being required of the project that will reduce the effects to a less-than-significant level.

3. ___ **Focused EIR Required** - On the basis of the above determinations, the project is not within the scope of the Master EIR. A Focused EIR will be prepared for the project. The following items are found to be true:

A. The type of project is described in Chapter II of the Master EIR.

B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

C. The project will have one or more new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures or alternatives are required as a result.

Project Manager	Title	Date

4. Within the Scope Analysis of this Document:

The Master EIR permits projects to be found within the scope of the Master EIR if certain criteria are met. Basically, if the following statements are found to be true for all 20 sections of this Initial Study, then the project was covered by the Master EIR analysis and is within the scope of the Master EIR. Any "No" response must be discussed.

	YES	NO
(1) The lead agency for subsequent projects shall be the City of Modesto or a responsible agency identified in the Master EIR.	X	☐

(2)	City policies which reduce, avoid or mitigate environmental effects, will continue to be in effect and therefore would be applied to subsequent projects where appropriate. The policies are described in the list of policies in place and mitigation measures attached to this document.	X	☐
(3)	Federal, State, Regional and Stanislaus County regulations do not change in a manner that is less restrictive on development than current law (i.e., would not offer the same level of protection assumed under the Master EIR).	X	☐
(4)	No specific information concerning the known or potential presence of significant resources is identified in future reports, or through formal or informal input received from responsible or trustee agencies or other qualified sources.	X	☐
(5)	The development will occur within the boundaries of the City's planning area as established in the Modesto Urban Area General Plan.	X	☐
(6)	Development within the project will comply with all applicable mitigation measures identified in the Modesto Urban Area General Plan Master EIR.	X	☐

Discussion:

(1) The City of Modesto was the lead agency for the Master EIR and is the lead agency for this Initial Study. The City is also responsible for the P-D (30) zone amendment and processing the requested land use entitlements (building permits).

(2) As described throughout this Initial Study, all City policies that reduce, avoid, or mitigate environmental effects would be applied to the project where appropriate. Section V of this Initial Study presents the applicable mitigation measures from the Master EIR that will be applied as part of the project.

(3) The Master EIR was last updated in March 2003. Since that update, there have been no changes to Federal, State, Regional and County regulations that have resulted in less restrictive regulations.

(4) As analyzed in the "Project Specific Effects" for each resource area in Section IV, no known or potential presence of significant resources has been identified that would result in new or greater environmental effects than those identified and addressed in the Master EIR. In addition, review by responsible agencies, trustee agencies and the public did not identify significant resources or effects that had not been addressed in the Master EIR.

(5) The project site is located within the Modesto Urban Area General Plan in the Baseline Developed Area, as shown on Figure II-1 on page II-8 in the General Plan.

(6) A list of Modesto Urban Area General Plan policies and Master EIR mitigation measures was reviewed (which is attached to this document). Section V of this Initial Study presents the applicable mitigation measures from the Master EIR that will be applied as part of the project.

IV. ENVIRONMENTAL ANALYSIS

In accordance with Section 21157.1(b) of the Public Resources Code, this section documents that the Sutter Gould Medical Foundation Medical Office Building Expansion and Amendment to Planned Development Zone (P-D [30]) Project is within the scope of the Modesto Urban Area General Plan Final Master Environmental Impact Report (Master EIR) (most recently updated March 2003) and that the project would not result in any project-specific significant effect on the environment that was not examined in the Master EIR. The analysis identifies applicable Master EIR mitigation measures that would be implemented as part of the project and determines that no additional mitigation measures or project alternatives are required. All environmental effects in this Initial Study reflect 2025 build out of the Modesto Urban Area General Plan as identified in the Master EIR.

Project is within the Scope of the Master EIR

Chapter 2, Section C, of the Master EIR, "Anticipated Subsequent Projects," identifies 18 types of projects that are declared to be within the scope of the Master EIR as defined by Public Resources Code 21157.1. Chapter 2, Section C.5, states that, "the City may undertake rezonings at the request of private applicants or on its own initiative for the purpose of implementing the Urban Area General Plan." Chapter III-6, Land Use Polices (a) of the Modesto Urban Area General Plan states that the zoning code and zoning map shall be the primary vehicle to guide future development in the Baseline Developed Area. The project site is within the Baseline Developed Area. The existing medical office building facilities are within an existing planned development zone, P-D (30), which allows for the proposed uses. The medical office building would be relocated within the boundaries of the existing P-D (30) zone. The proposed rezoning of the P-D (30) would change a portion of the R zone, which would be used for surface parking, and incorporate it into the P-D (30) zone for consistency. Parking is allowed in both R and P-D [30]; however, the rezone provides consistency for the entire medical office building facilities within the P-D (30) zone. Therefore, the proposed project rezoning implements the General Plan and it is within the scope of the Master EIR. In addition, Chapter 2, Section C.6, "Miscellaneous Land Use Permits," identifies a variety of City permits that facilitate development. The project would require a building permit from the City before construction could start. The building permit would establish that the project construction must take place in accordance with accepted building codes. Therefore, both the P-D (30) amendment and the construction of a replacement medical office building and associated parking are within the anticipated subsequent projects identified in the Master EIR and are within the declared scope of the Modesto Urban Area General Plan Master EIR.

Consistency Analysis with the Master EIR

The Master EIR impact analysis is organized into 18 resources areas. This Initial Study is organized in the same resource areas to address the project's consistency with each. For cross-reference, the sections are numbered in the same order as Chapter V of the Master EIR. For each resource area, the applicable environmental impacts and associated mitigation measures (if necessary) identified in the Master EIR are listed and an analysis of any potential project-specific effects not identified in the Master EIR is completed. In addition to the 18 subject areas in the Master EIR, this Initial Study addresses land use/planning and aesthetics. These two issues are included to ensure that analysis of all the resources contained in Appendix G of the California Environmental Quality Act (CEQA) Guidelines is completed. The format for the land use/planning and aesthetics sections differs from that of the other 18 resource areas because these were not addressed in the Master EIR. At the end of the consistency analysis, in Section V, a list of all applicable Master EIR mitigation measures required for the project is provided.

1. TRAFFIC AND CIRCULATION

a. Significant Effects Identified in the Master EIR

Section V-1 of the Master EIR provides an analysis of the Traffic and Circulation impacts related to development of the Modesto Urban Area General Plan. The Master EIR identified the following significant and unavoidable traffic and circulation impacts:

Effect: Increased traffic will result in certain roadway segments operating at level of service (LOS) D or worse.

Effect: The substantial increase in traffic relative to the existing load and capacity of the street system will cause violation, either individually or cumulatively, of a LOS standard established by the Stanislaus County Congestion Management Program (CMP) for designated roads and highways.

Effect: Creation of need for capacity-enhancing modifications to existing facilities.

Effect: Increase in energy consumption associated with the operation of highway projects, rail improvements, and aviation facilities.

Effect: Severe contrast with existing neighborhood or area character caused by highway and transit projects.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan traffic and circulation policies that are pertinent to this project are found on pages V-1-15 through V-1-20 of the Master EIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific traffic and circulation effect not previously analyzed in the Master EIR. The project would have a new significant traffic and circulation effect if it would:

		YES	NO
(1)	Contribute more than an additional 100 average daily trips (ADT) to adjoining roads and generate more trips than assumed for the General Plan land use category and zoning in the Master EIR. City Engineering & Transportation staff will review the project to determine whether the project contributes more than 100 ADT. Such projects are presumed to generate more trips than assumed by the Master EIR.	☐	☒
(2)	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment).	☐	☒
(3)	Result in inadequate emergency access.	☐	☒
(4)	Result in inadequate parking capacity.	☐	☒

Discussion:

(1) The traffic analysis conducted for the proposed project is based on information presented in *Transportation Impact Analysis for the Sutter Gould Medical Center* (TIA) prepared by Fehr and Peers (September 1, 2006). Projected daily traffic volumes, both with and without the proposed project, were compared to daily roadway segment capacities. Volume-to-capacity ratios were calculated for "without project" and "with project" conditions to determine if the proposed project would significantly impact daily roadway segment operations in the vicinity of the project site.

The Master EIR traffic model accounted for employment growth in the project area. Traffic Analysis Zones (TAZ) were used in the model to define land uses and their associated traffic growth per the Modesto Urban Area General Plan. The Traffic Analysis Zones in the vicinity of the project site are 286, 290, and 293. The traffic model identified that these three TAZs would generate approximately 6,500 additional daily trips over the base model. Therefore, sufficient growth was assumed in the Master EIR traffic model to account for more than the 1,610 ADT that would be generated by the project (Table 1), and the replacement medical office building would not generate more trips than assumed by the Master EIR (Fehr and Peers 2006).

Table 1
Project Vehicle Trip Generation Summary

Land Use	Size (sf)	Daily	AM Peak Hour			PM Peak Hour		
			In	Out	Total	In	Out	Total
Proposed Medical Office Building	144,000	5,200	282	75	357	145	391	536
Existing Medical Office Building	99,500	(3,590)	(195)	(52)	(247)	(100)	(270)	(370)
Net New Trips		***1,610***	***87***	***23***	***110***	***45***	***121***	***166***

1. Trip generation based on average rates for Medical Office Building (Land Use 720) in the Institute of Transportation Engineers' (ITE)

Trip Generation (7th Edition), as presented below.
Daily Rate: T = 36.13 * (X)
AM Rate: T = 2.48 * (X) (inbound = 79 percent, outbound = 21 percent)
PM Rate: T = 3.72 * (X) (inbound = 27 percent, outbound = 73 percent)
Where: T = trip ends, and X = number of thousand square feet.
Source: Institute of Transportation Engineers, and Fehr and Peers 2006.

Level of Service (LOS)

Study Intersections

The following study intersections were selected as those most likely to experience traffic impacts from the proposed project:

1. Coffee Road/Orangeburg Avenue
2. Coffee Road/Locke Road
3. Coffee Road/Lucern Avenue

4. Coffee Road/East Morris Road
5. Coffee Road/Scenic Drive
6. Scenic Drive/Sunnyside Avenue
7. Scenic Drive/Brighton Avenue
8. Scenic Drive/Rose Avenue
9. Locke Road/Rose Avenue

Existing Conditions

Under existing conditions, during the AM and PM peak hour, all of the study intersections operate at an overall acceptable LOS D or better. The side-street movements at three unsignalized intersections currently operate at LOS E or F during both peak hours: Coffee Road/East Morris Road, Scenic Drive/Sunnyside Avenue, and Scenic Drive/Brighton Avenue. Based on the peak hour volume, a traffic signal could be considered at the Coffee Road/Locke Road and Coffee Road/East Morris Road intersections to address current conditions prior to the addition of project traffic (Fehr and Peers 2006).

Near-Term (2011) without Project Conditions

Under near-term conditions (2011) without the project during the AM and PM peak hour, all study intersections are projected to continue operating at an overall acceptable LOS D or better. However, the side-street movement at one additional intersection, Coffee Road/ Locke Road, would degrade to LOS E during the AM peak hour, primarily due to traffic growth on Coffee Road. The side-street movements at the Coffee Road/East Morris Road, Scenic Drive/Sunnyside Avenue, and Scenic Drive/Brighton Avenue are projected to continue operating at a deficient service level during both peak hours. Based on the peak hour volume, a traffic signal could be considered at the Coffee Road/Locke Road and Coffee Road/East Morris Road intersections prior to the addition of project traffic (Fehr and Peers 2006).

Near-Term (2011) with Project Conditions

As shown in Table 2 below, the addition of project traffic would not result in any unacceptable operations at any study intersection, nor would it cause the need to consider a traffic signal at any of the unsignalized intersections. Therefore, project impacts are less than significant in the near-term condition (Fehr and Peers 2006).

Although no project-specific off-site intersection impacts were identified in the near-term condition, the project applicant shall be responsible for payment of the applicable Capital Facilities Fee (CFF) (Fehr and Peers 2006).

Cumulative (2025) without Project Conditions

Daily traffic volume forecasts for the roadways surrounding the project site were calculated based on information contained in the TIA. A comparison of existing daily to PM peak hour traffic on roadways surrounding the project site indicate that in the study area, the PM peak hour volume accounts for approximately 8.5% of daily traffic. The Cumulative PM peak hour turning movement forecasts as presented in the TIA were used to calculate Cumulative Daily roadway segment volumes based on the existing ratio of PM to daily traffic. The resulting traffic volumes under "without project" conditions are shown in Table 3 below.

Table 2
Near-Term (2011) Peak Hour Intersection Levels of Service

Intersection	Traffic Control	Peak Hour	Near-Term Without Project		Near-Term With Project		Significant Impact
			Delay (in seconds)	LOS[2]	Delay (in seconds)	LOS[2]	
1. Coffee Road/ Orangeburg Avenue	Traffic Signal	AM PM	50 53	D D	52 54	D D	No[3] No[3]

1 For side-street stop-controlled intersections, delays for worst movement and average intersection delay are shown as follows: intersection average (worst movement).

2 Intersections operating at unacceptable levels (LOS E/LOS F) are shown in bold.

3 At a signalized intersection, project increases delay by more than 5.0 seconds or increases traffic by more than 5 percent at an intersection operating at LOS E or F.

4 At an unsignalized intersection, project traffic deteriorates a controlled movement to LOS F and volumes meet at least one of the traffic signal warrants.

Fehr & Peers, 2006

Fehr & Peers, 2006		

Roadway Segment Operations

Operation of roadway segments was evaluated by comparing roadway segment volumes to capacities to develop volume-to-capacity (v/c) ratios. The capacity of each roadway segment was based on the type of facility (i.e., expressway, arterial, collector), number of lanes, type of traffic control at the downstream intersection, and maximum per-lane capacities provide in the Modesto General Plan. The Modesto General Plan defines arterials and collectors as major or minor according to the number of travel lanes, design speed, and right-of-way width. Roadway segment capacities remain constant within classes for each roadway facility and do not take into consideration the added capacity of turning lanes at intersections.

All roadway segments would operate at LOS D or better in the cumulative condition without the project. In cumulative conditions with the project, all roadway segments would continue to operate at the same LOS (LOS D or better) and the project would not cause a change in v/c ratio greater than 0.08 (Fehr and Peers 2006).

Intersection Operations

The Coffee Road/Orangeburg Avenue intersection is projected to degrade to an overall LOS E during the PM peak hour and the Scenic Drive/Rose Avenue intersection is projected to degrade to an overall LOS E during the AM peak hour in the cumulative condition without the addition of project traffic. All unsignalized intersections are projected to operate at an overall acceptable service level; although the side-street movements at the following intersections would operate at an unacceptable service level during both peak hours:

- Coffee Road/Locke Road
- Coffee Road/East Morris Road
- Scenic Drive/Sunnyside Avenue
- Scenic Drive/Brighton Avenue

Based on the peak hour volume, a traffic signal could be considered at the Coffee Road/Locke Road and Coffee Road/East Morris Road intersections under the cumulative condition without the project (Fehr and Peers, 2006).

Cumulative (2025) with Project Conditions

The addition of project traffic, indicated in Table 3, above, would not result in unacceptable operations along any study roadway segments, nor would it increase a v/c ratio by more than 0.08 along any roadway segment. In addition, the addition of project traffic would not result in unacceptable operations at any of the signalized study intersections, nor would it increase delay by more than five seconds at any signalized intersection projected to operate at an unacceptable service level prior to the addition of project traffic (Fehr and Peers, 2006).

Cumulative Traffic Impact 1: The addition of project traffic to the cumulative (2025) condition would result in an overall LOS E at the Coffee Road/East Morris Road intersection. This is potentially significant as the addition of project traffic degrades the

overall operation of an intersection projected to operate at an acceptable service level prior to the addition of project traffic. However, the Master EIR (Section V-1) addressed the General Plan increase in traffic on roadway segments operating at LOS D or worse and determined the impact to be significant and unavoidable. The Master EIR (Section V-1) also addressed possible violations of a LOS standard established by the Stanislaus County Congestion Management Program and also found that General Plan growth would result in a significant and unavoidable impact.

Due to the close spacing of the East Morris Road/Coffee Road intersection with the currently signalized Lucern Avenue/Coffee Road intersection, signalization of the East Morris Road/Coffee Road intersection is not recommended. Connections to Lucern Avenue and Scenic Drive can be made from East Morris Road, where signalized left-turn access to Coffee Road is provided. Therefore, because alternative access to Coffee Road is available, this impact is considered less than significant and no improvements are recommended. The project applicant shall be responsible for payment of the applicable Capital Facilities Fee (CFF) (Fehr and Peers, 2006).

Cumulative Traffic Impact 2: The addition of project traffic would degrade the westbound controlled movement at the Locke Road/Coffee Road intersection from LOS E to LOS F. Peak hour volume traffic signal warrants would be satisfied prior to the addition of project traffic. This is a potentially significant impact. However, the Master EIR (Section V-1) addressed the General Plan increase in traffic on roadway segments operating at LOS D or worse and determined the impact to be significant and unavoidable. The Master EIR (Section V-1) also addressed possible violations of a LOS standard established by the Stanislaus County Congestion Management Program and also found that General Plan growth would result in a significant and unavoidable impact.

Due to the close spacing of the Locke Road/Coffee Road intersection with the currently signalized Lucern Avenue/Coffee Road intersection, signalization of the Locke Road/Coffee Road intersection is not recommended. Connections to Lucern Avenue and Scenic Drive via Sunnyside Avenue can be made from Locke Road, where signalized access to Coffee Road is provided. Therefore, as alternative access to Coffee Road is available, this impact is considered less than significant and no improvements are recommended. The project applicant shall be responsible for payment of the applicable Capital Facilities Fee (CFF) (Fehr and Peers, 2006).

(2) Vehicle Access and On-site Circulation

The new main parking area adjacent to the replacement medical office building would provide 260 parking spaces, which would be designated for patient/visitor use. Vehicle access to the current parking area is provided by three driveways: two on Sunnyside Avenue, and one on Lucern Avenue. With the expansion of the medical office building and reconfiguration of the site, an existing driveway on Sunnyside Avenue would be eliminated and a new driveway would be constructed on Coffee Road at the existing alley, approximately 150 feet south of Locke Road. This meets the minimum spacing for driveways on minor collector roadways. This driveway would be restricted to right-in/right-out operation, through signage and striping, due to the through volumes on Coffee Road and the proximity of the Locke Road/Coffee Road intersection. The remaining driveway on Sunnyside Avenue would be relocated to the existing alley intersection and would act as a service entry. The existing driveway on Lucern Avenue would remain, although it would be modified to provide improved access. Adequate

clearance would be provided at all the driveways serving the main parking area to prevent vehicles from stacking up on the property and out onto the public streets. Vehicular circulation through the main parking area would not result in misaligned or dead-end drive aisles. The designated patient drop-off area would be located on the western side of the replacement medical center within the main parking lot. This includes a circular drive aisle around a fountain plaza. To reduce conflicts, this would be striped for one-way vehicle traffic. In addition, sufficient width to accommodate two vehicles would be provided.

Access to the northern employee parking lot located on the east side of Sunnyside Avenue would be modified to eliminate an existing driveway and reconfigure the parking layout for greater efficiency. Angled parking is currently provided in this area with one-way circulation. Signage and pavement markings would be installed to indicate the travel way.

A new parking area is proposed for the east side of Sunnyside Avenue, containing 135 parking spaces. Access to this parking area is proposed from two driveways, one off-set to the north side of Lucern Avenue, proposed to be exit only, and one off-set to the south side of Lucern Avenue, proposed to be entry only. This off-set would preserve an existing oak tree that would need to be removed should access be aligned with Lucern Avenue. This configuration would operate acceptably due to low traffic volumes on Sunnyside Avenue.

The existing parking lots at the southwest corner of Lucern Avenue/Sunnyside Avenue, on the south side of Lucern Avenue, and at the southwest corner of the Lucern Avenue/Coffee Road intersection would remain unchanged from their current configurations, which operate acceptably.

Pedestrian, Bicycle, and Transit Access

The project proposes to construct a bus pullout on the east side of Coffee Road, connecting to a pedestrian path that connects Coffee Road to the main entry of the replacement medical office building. This bus pullout would serve passengers on northbound buses. Southbound buses would continue to stop at the northwest corner of the Coffee Road/Lucern Avenue intersection. Crosswalks are provided on all legs of this intersection to facilitate pedestrian crossings from the southbound bus stop to the medical center. The transportation consultant recommends that a bus shelter and other transit amenities be provided at the new pullout to make transit usage a more appealing form of transportation to the medical office building (Fehr and Peers, 2006).

Bicyclists traveling to the medical office building can use either the Class II bike lanes on Coffee Road or the Class III bike route on Lucern Avenue to access the site. The proposed project is consistent with the City's Non-Motorized Transportation Plan. The proposed project would not disrupt any existing bicycle facilities nor would any proposed bicycle facilities be precluded with construction of the proposed project.

Sidewalks currently exist along all of the streets adjacent to the project site. The project proposes to provide pedestrian walkways along the Coffee Road, Lucern Avenue, and Sunnyside Avenue project frontages, with connections from Coffee Road through the parking lot to the patient drop-off area and main patient entry; and from Lucern Avenue and Sunnyside Avenue from the employee parking areas to the employee entrance.

Pedestrian crossing enhancements, such as directional curb ramps and crosswalks, would be provided at the Lucern Avenue/Sunnyside Avenue intersection.

The project would not substantially increase hazards or incompatible uses for vehicle, pedestrian, bicycle, or transit access.

(3) As described under (2), above, the project would provide adequate and safe vehicular, pedestrian, bicycle, and transit access to/from the replacement medical office building and the associated parking lots (Fehr and Peers, 2006). Sufficient access and parking would be maintained through all phases of construction. Therefore, the project would not result in inadequate emergency access.

(4) Construction Period Parking

Based on the size of the existing and proposed medical office building and Institute of Transportation Engineers (2004) peak parking demand rates, the proposed parking supply during each construction phase would satisfy peak parking demands, and would actually provide surplus parking, as shown on Table 4.

Table 4
Construction Period Parking Demand Analysis

Phase	Size (square feet [sf])	85th Percentile Peak Parking Demand Rate[1]	Peak Demand Parking	Proposed Supply	Surplus
Phase I	99,500 sf	4.30	428	755	327
Phase II	99,500 sf	4.30	428	554	126
Phase III	144,000 sf	4.30	619	651	32

[1] Per 1,000 sf gross floor area. 85th Percentile parking demand rate was selected to provide a conservative assessment of potential parking demand.

Source: *Parking Generation* (3rd Edition) (Institute of Transportation Engineers, 2004), and Fehr and Peers, 2006

Operational Parking

The project would result in a total of 938 parking spaces for the replacement medical office building, as shown in Exhibit 5. This proposed parking supply was compared to both City Code parking requirements and Institute of Transportation Engineers parking demand rates, as explained below.

The City of Modesto requires one space for every 200 sf of medical office building. As shown in Table 5, based on this requirement, the project must provide 720 parking spaces. The proposed supply is 208 spaces greater than the City Code requirement (Fehr and Peers, 2006).

Table 5
City of Modesto Code Automobile Parking Requirements

Land Use	Size	Parking Code Requirement	Parking Spaces Required
Medical Office Building	144,000 sf	1/200 sf	720
		Total Provided	938
		Surplus	218

Source: City of Modesto Municipal Code 10-2.2002, and Fehr and Peers, 2006

Parking demand rates as presented in Institute of Transportation Engineers Parking Generation (3rd Edition), as shown on Table 6, were used to estimate peak parking demands for the project. Weekday parking demand rates were selected, as opposed to weekend rates when medical office building parking demand is minimal. Based on this assessment, a peak parking demand of 619 parking spaces can be expected at project buildout. This demand would be accommodated by the proposed supply of 938 parking spaces. Because this would result in a surplus of 319 spaces, the new 135-space parking lot on the eastside of Sunnyside Avenue would not be needed to satisfy City Code requirements or accommodate anticipated peak parking demands based on Institute of Transportation Engineers rates (Fehr and Peers, 2006).

Table 6
Weekday Parking Demand Analysis

Land Use	Size	85th Percentile Peak Parking Demand Rate[1]	Peak Parking Demand	Proposed Supply	Surplus
Medical Office	144,000 sf	4.30	619	938	319

[1] Per 1,000 sf gross floor area. 85th Percentile parking demand rate was selected to provide a conservative assessment of potential project demand.

Source: Parking Generation (3rd Edition) (Institute of Transportation Engineers, 2004), and Fehr & Peers, 2006.

Americans with Disabilities Act (ADA) Accessible Parking

Based on City Code requirements, two percent of the total parking supply (equal to 18 spaces) must be ADA accessible spaces. One in eight ADA accessible spaces (equal to two spaces) should also be van accessible. The site plan (Exhibit 5) shows 18 ADA accessible spaces, two of which are for vans. Ten of these (including the two van spaces) are located west of the replacement medical office building near the patient drop-off, four are located in the parking aisle to the west of the drop-off area, and four are located in the employee lot on the southwest corner of the Coffee Road/Lucern Avenue intersection.

All ADA accessible spaces in the main parking lot have direct access to pedestrian ramps and walkways to the medical center. However, the transportation consultant recommends that the four ADA accessible spaces on the southwest corner of the Coffee Road/Lucern Avenue be relocated to the main parking area, adjacent to the medical office building, so that handicapped patients are not required to cross the Coffee Road/Lucern Avenue intersection to access the medical office building (Fehr and Peers, 2006).

Bicycle Parking

Although no formal bicycle parking requirement exists, the transportation consultant recommends that short term bicycle parking (i.e., bicycle racks) be provided near the main building entrance and the employee entrance, and long-term bicycle parking (i.e., a covered, secure parking area) be provided either in the building or in a parking lot to accommodate cyclists and encourage use of alternative modes (Fehr and Peers, 2006).

The Modesto Urban Area General Plan policies V-5 5.B and V-6 5.C encourage measures that support alternative modes of transportation, and the installation of bicycle parking would be consistent with these General Plan policies.

The project would not result in any new significant traffic or circulation effects and no new mitigation measures or alternatives are required for the project.

2. AIR QUALITY

a. Significant Effects Identified in the Master EIR

Section V-2 of the Master EIR provides analysis of Air Quality impacts resulting from development projects envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following significant and unavoidable environmental impacts relative to air quality:

Effect: Projected traffic levels will result in increased ambient carbon monoxide (CO) levels in the project area. This is a significant and unavoidable impact.

Effect: Projected traffic levels will result in increased reactive organic gases (ROG) and oxides of nitrogen (NO_X) levels in the project area. This is a significant and unavoidable impact.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan air quality policies pertinent to this project are found on pages V-2-11 through V-2-18 of the Master EIR. In addition, construction-related air quality impacts would be less than significant with implementation of Master EIR Mitigation Measures Air-1 and Air-2 (pages V-2-24 through V-2-25 of the Master EIR). The applicable Master EIR measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific air quality effect not previously analyzed in the Master EIR. The project would have a new significant air quality effect if it would:

		YES	NO
(1)	Exceed the emissions thresholds established for CO and NO_X by the San Joaquin Valley Unified Air Pollution Control District's (SJVUAPCD) adopted CEQA Guidelines.	☐	☒
(2)	Not incorporate the best management practices (BMPs) for suspended particulate matter (PM_{10}) reduction established by the SJVUAPCD.	☐	☒
(3)	Not comply with the air quality policies of the Modesto Urban Area General Plan.	☐	☒
(4)	Expose sensitive receptors to substantial pollutant concentrations.	☐	☒
(5)	Create objectionable odors affecting a substantial number of people.	☐	☒

Discussion:

(1, 3) The project site is located in San Joaquin Valley and in the jurisdiction of the SJVUAPCD, which administers local, state, and federal air quality management programs for San Joaquin Valley. The SJVUAPCD is in nonattainment for federal and state carbon monoxide (CO) standards and federal and state standards for particulate matter less than 10 microns in diameter (PM_{10}).

As is typical of construction projects, movement of equipment and wind over bare soils could generate airbourne dust. Construction equipment would emit exhaust, including ozone precursors, particulate matter, and air toxics. In addition, although the project results in only a minor increase in visitors and would take advantage of transit and bicycle lanes on Coffee Road, the project is expected to result in 1,610 additional daily vehicle trips (see Table 1, in Section IV.1).

One of the primary reasons for air quality regulations and standards is the protection of those members of the population who are the most sensitive to adverse health effects of air pollution, or "sensitive receptors." The term "sensitive receptors" refers both to specific population groups and to the land uses where they would be located for long periods. Commonly identified sensitive population groups include children, the elderly, the acutely ill, and the chronically ill. Commonly identified sensitive land uses include residences, schools, playgrounds, child care centers, retirement or convalescent homes, hospitals, and clinics.

The project site is an existing medical office building. Nearby sensitive receptors include adjacent residential housing and the John Muir School. The project would result in short-term and long-term increases in mobile, stationary, and area source emissions.

Short-term Construction-Generated Emissions

Emissions produced during site preparation and construction are "short-term" because they occur only during the construction phase. Dust generation is normally the primary concern during demolition and initial site preparation. Because such emissions are not amenable to collection and discharge through a controlled source, they are called "fugitive emissions." Fugitive dust emissions typically include emissions from on-site grading and excavation activities and from off-site truck and passenger car travel on unpaved roadways. Fugitive dust emission rates are affected by a variety of factors, including amount and type of exposed soil, amount of soil moisture, wind speed, number of vehicles and pieces of equipment operating at one time, depth of disturbance or excavation, and the number of vehicle miles traveled. Fugitive dust emissions are measured as PM_{10}. Emissions of reactive organic gases (ROG) and nitrogen oxides (NO_X) are generated primarily by the operation of gasoline- and diesel-powered motor vehicles. Construction-generated emissions vary from day to day, depending on the specific activities being conducted, the type of equipment, duration of equipment use, and the number of transport trips for construction workers and material.

Actual pollutant concentrations depend on various factors, including the location and type of activities performed, meteorological conditions, distances to nearby receptors, and the effectiveness of the mitigation measures employed. As shown in Table 7 below, the short-term construction generated emissions have been modeled based on the proposed demolition of the existing medical office building and single family houses on Locke Road, the site grading, and the construction of the new medical office building

and associated parking and site improvements. The short-term construction generated emissions for ROG, NO_X, and PM_{10} would be less than the SJVUAPCD's established significance threshold of 10 tons/year and would not pose a significant effect on sensitive receptors or contribute to air quality violations. Nonetheless, per SJVUAPCD Rule 9510, Indirect Source Review (ISR), the applicant must reduce exhaust emissions for construction equipment greater than 50 horsepower by achieving a project-wide fleet average 20 percent NO_X reduction and 45 percent PM_{10} reduction compared to the most recent Air Resources Board (ARB) fleet average. This requirement can be met through a combination of on-site emission reduction measures or payment of off-site fees.

Table 7
Summary of Modeled Short-Term Construction-Generated Emissions

Source	Emissions (tons/year)[1]		
	ROG	NO_X	PM_{10}
Fugitive Dust	-	-	0.9
Off-Road Diesel	0.5	3.6	0.2
On-Road Diesel	<.1	<.1	-
Worker Trips	<.1	<.1	-
Total Unmitigated	0.5	3.6	1.1
Indirect Source Rule Reductions	No ISR requirement	2.9	0.6
SJVAPCD Significance Threshold:	10	10	–

[1] Emissions (from demolition, site grading, and building) modeled using the Urbemis2002 (v8.7) computer model and represent worst-case yearly conditions.
Source: Data modeled by EDAW 2006.

Long-term Operational Emissions

No stationary source emissions are anticipated from operation of the medical office building. Therefore, long-term increases in regional emissions of criteria pollutants would be associated primarily with motor vehicle trips following completion of the replacement medical office building. "Criteria" pollutants are those pollutants (or their precursors) for which the U.S. Environmental Protection Agency (EPA) has established national ambient air quality standards (NAAQS). California has established its own ambient air quality standards, which are at least as stringent as the NAAQS. Although the proposed project includes various elements designed to reduce mobile source emissions (e.g., located along a transit line and Class II bike lane, and proposing an improved bus turn-out), implementation of the proposed project would result in the generation of mobile source emissions, including ROG and NO_X, which are both precursors to ozone.

As shown in Table 8 below, the long-term operational emissions have been modeled based on the increase in vehicle trips associated with the replacement medical office building (see Table 1 in Section IV.1). The long-term operational emissions for ROG, NO_X, and PM_{10} would be less than SJVUAPCD's established significance threshold of 10 tons/year and would not pose a significant effect on sensitive receptors or contribute to air quality violations. Nonetheless, per the Indirect Source Rule (ISR), the applicant shall reduce the project's operational baseline NO_X emissions by 33.3 percent and PM_{10}

emissions by 50 percent. This requirement can be met through a combination of on-site emission reduction measures or payment of off-site fees.

Table 8
Summary of Modeled Net Increase in Long-Term Operational Emissions

Source	Emissions (tons/year)[1]		
	ROG	NO_X	PM_{10}
Area Source	0.2	0.2	0
Mobile Source	2.1	2.4	1.1
Total Unmitigated	2.3	2.6	1.1
Indirect Source Rule Reductions	No ISR requirement	1.7	0.6
SJVAPCD Significance Threshold:	10	10	–

[1] Emissions modeled using the Urbemis2002 (v8.7) computer model, based on the net increase in daily trips and 2009 conditions.

Source: Data modeled by EDAW 2006.

Carbon monoxide (CO) concentration is a direct function of vehicle idling time and, thus, traffic flow conditions. Under specific meteorological conditions, CO concentrations near congested roadways and/or intersections may reach unhealthy levels with respect to local sensitive land-uses such as residential areas, schools, and hospitals. As a result, the SJVAPCD recommends analysis of CO emissions at a local rather than a regional level.

The Transportation Project-Level Carbon Monoxide Protocol (Garza et al. 1997) states that signalized intersections at level of service (LOS) E or F represent a potential for a CO violation, also known as a "hot spot." Thus, modeling of CO concentrations is typically recommended for receptors located near signalized roadway intersections that are projected to operate at LOS E or F.

According to the traffic analysis prepared for the proposed project (Fehr and Peers 2006), during the AM and PM peak hour under near-term conditions (2011), all signalized study intersections are projected to continue operating at an overall acceptable LOS D or better. Further, under near-term conditions, the addition of project traffic would not result in unacceptable operations at any unsignalized study intersection projected to operate at acceptable levels without the project, nor does it cause the need to consider traffic signals at any of the unsignalized intersections.

Thus, the proposed project is not anticipated to result in or contribute to local CO concentrations that exceed the California 1-hour or 8-hour ambient air quality standards of 20 parts per million (ppm) or 9 ppm, respectively. As a result, the impact of long-term operational emissions of local CO associated with the proposed project is considered less than significant.

(2) The project would incorporate the best management practices (BMPs) for the reduction of suspended PM_{10} established by the SJVUAPCD PM_{10} Control Measure Candidate List. Applicable measures are described in Section V of this document under AQ-18, New Master EIR Mitigation Measure Air-1: PM_{10} Control Measures. In addition, per the Indirect Source Rule (ISR), the applicant shall reduce the project's operational baseline

NO_X emissions by 33.3 percent and PM_{10} emissions by 50 percent. This requirement can be met through a combination of on-site emission reduction measures or payment of off-site fees.

(4) Construction of the proposed project would result in short-term diesel exhaust emissions from on-site heavy duty equipment. Particulate exhaust emissions from diesel-fueled engines (diesel PM) were identified as a toxic air contaminant (TAC) by the ARB in 1998. Construction of the project would result in the generation of diesel PM emissions from the use of off-road diesel equipment required for demolition, site grading and excavation, and other construction activities. According to the ARB, the potential cancer risk from the inhalation of diesel PM, as discussed below, outweighs the potential non-cancer health impacts. The dose to which receptors are exposed (a function of concentration and duration of exposure) is the primary factor used to determine health risk (i.e., potential exposure to TAC emission levels that exceed applicable standards). Dose is positively correlated with time, meaning that a longer exposure period would result in a higher exposure level for the maximally exposed individual. Thus, the risks estimated for a maximally exposed individual are higher if a fixed exposure occurs over a longer period of time.

According to the Office of Environmental Health Hazard Assessment (OEHHA), health risk assessments, which determine the exposure of sensitive receptors to TAC emissions, should be based on a 70-year exposure period; however, such assessments should be limited to the period/duration of activities associated with the project (Salinas, pers. comm., 2004). Thus, because the use of mobilized equipment would be temporary in combination with the dispersive properties of diesel PM (Zhu and Hinds 2002), and the fact that the project would only require the use of a few pieces of equipment and not involve atypical construction activities (e.g., large amount of soil import/export with heavy-duty trucks, deep excavation), short-term construction activities would not expose sensitive receptors to substantial pollutant concentrations.

Before any demolition or renovation activities occur, SJVUAPCD Rule 4002, which is based on the National Emissions Standards for Hazardous Air Pollutants (NESHAP) for asbestos, requires that a thorough inspection for asbestos be conducted before any facility is demolished or renovated (SJVUAPCD 2006). Asbestos Inspection Reports (Bovee Environmental Management, Inc., 2005 and 2006) for the existing Sutter Gould medical office building as well as six houses located on the northern boundary of the project site on Locke Road identified the presence of asbestos-containing building materials. Asbestos poses health hazards only when inhaled; therefore, friable (easily crumbled) asbestos is potentially hazardous if not encapsulated. Non-friable asbestos or encapsulated asbestos does not pose substantial health risks. During building demolition, asbestos fibers could be disturbed, released into the air, and inhaled by construction workers or the public unless proper precautions are taken. In addition, given the age of the structures (approximately 50 years old), there is a likelihood that lead-based paint may be present on-site as well, which could also become friable when the buildings are demolished. The Asbestos Inspection Reports (Bovee Environmental Management, Inc., 2005 and 2006) are available for review at the City of Modesto Community and Economic Development Planning Division.

Sutter Gould shall coordinate with all appropriate agencies, including the Stanislaus County Department of Environmental Resources Hazardous Materials Division (Stanislaus County HMD), the Central Valley Regional Water Quality Control Board (Central Valley RWQCB), the SJVUAPCD, Department of Toxic Substances Control

(DTSC), the EPA, California Occupational Safety and Health Administration (Cal/OSHA), and any other applicable federal, State, or local regulatory agencies, regarding appropriate methods to address asbestos and lead-based materials during demolition of the medical office building and single family houses. Methods for containment/removal of asbestos- and lead-containing materials would follow all regulatory standards. All contaminated asbestos- and lead-containing materials removed from the project site shall be disposed of in a manner consistent with applicable regulations at an appropriate off-site disposal facility. This would ensure that no improper handling of asbestos would occur and, thus, no receptors would be exposed to asbestos.

(5) The occurrence and severity of odor impacts depend on numerous factors, including the nature, frequency, and intensity of the source, wind speed and direction, and the sensitivity of the receptors. Although offensive odors rarely cause any physical harm, they can still lead to considerable distress among the public and often generate citizen complaints to local governments and regulatory agencies.

Construction activities for the project could potentially include the application of architectural coatings and asphalt paving materials that could generate localized temporary odors. The use of diesel-powered construction equipment could also generate localized temporary odors. However, no heavy industrial features, wastewater treatment facilities, or other large odor emitters are proposed. Therefore, the project would not be expected to create objectionable odors affecting a substantial number of people.

The project would not result in any new air quality effects and no new mitigation measures or alternatives are required for the project.

3. NOISE

a. Significant Effects Identified in the Master EIR

Section V-3 of the Master EIR provides analysis of noise impacts associated with development of the General Plan. The Master EIR identified the following significant and unavoidable noise impacts:

Effect: Traffic noise levels under future conditions in the plan area have the potential to result in exceedances of the City's Noise Significance Standards (see Table 3-3 Master EIR).

Effect: Projected future traffic noise levels, based on increased vehicular traffic anticipated in the Modesto Urban Area General Plan, will exceed the City's General Plan and noise ordinance standards.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan Noise policies pertinent to this project are found on pages V-3-11 through V-3-15 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-level noise effect not previously analyzed in the Master EIR. The project would have a new significant noise effect if it would:

		YES	NO
(1)	Exceed the standards for noise level and hours of operation established by the Modesto noise ordinance.	☐	☒
(2)	Exceed the noise policies of or otherwise be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(3)	Result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☒
(4)	Result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project.	☐	☒

Discussion:

(1-4) Implementation of the proposed project would introduce temporary and permanent noise sources to the project area, including construction equipment, stationary sources, and increased traffic.

Short-term Noise

Depending on the activities being performed, as well as the duration and hours during which construction activity would occur, noise associated with demolition and construction activities could result in a temporary substantial increase in average daily ambient noise levels at on-site and nearby noise-sensitive receptors. The City of Modesto Noise Policy (N-5) limits the loud and raucous operation of equipment or any construction, demolition, excavation, erection, alteration, or repair activity to the hours between 7:00 AM and 9:00 PM on weekdays or between 9:00 AM and 9:00 PM on Saturday, Sunday, and State or federal holidays. All project construction activities will be restricted to these daytime hours. Further, because construction activities will not include pile driving or blasting, the proposed project is not expected to generate substantial amounts of groundborne vibration.

Long-term Operational Noise

Operational noise generated by the project would predominantly consist of traffic noise on area streets associated with vehicle trips generated by operation of the replacement medical office building. Long-term operation of the new facility would result in approximately 1,610 daily additional vehicle trips distributed on the local roadway system. Typically, traffic volumes have to double before there is an associated increase in noise levels that is considered noticeable (i.e., three A-weighted decibels or greater). However, as shown in Table 9, the addition of project-related daily trips on the local roadway system would be minor in comparison to existing, near-term, and cumulative volumes. None of the traffic volumes on local roadways, including Coffee Road, Locke

Road, Sunnyside Avenue, or Lucern Avenue, would double. Consequently, operation of the project would not result in a noticeable change in the traffic noise contours of area roadways.

Table 9
Daily Traffic Volumes

Segment	Existing	Near-term		Cumulative	
		Without Project	With Project	Without Project	With Project
E Orangeburg west of Coffee	18,230	19,690	19,800	22,770	22,890
E Orangeburg, east of Coffee	12,150	12,730	12,770	14,730	14,770

Locke, west of Rose	1,840	1,930	2,110	2,240	2,420
Rose, north of Locke	6,960	7,310	7,460	8,500	8,650

Source: Fehr and Peers 2006

The other operational noise source associated with the replacement medical office building that may affect the houses along Locke Road and other surrounding residences

would be parking lot activity. Noise associated with parking lot activity typically consists of occasional slamming doors, car radios, and car alarms. The applicant has proposed to construct a masonry wall and landscaping around the parking area adjacent to Locke Road that would serve to buffer this parking area from the neighboring residences. Because the facility would operate during less-sensitive daylight hours and because a wall and landscaping would provide a buffer, noise generated by parking lot activity is not expected to impact nearby sensitive receptors.

Thus, the project would not result in any new noise effects and no new mitigation measures or alternatives are required for the project.

4. AGRICULTURAL LANDS

a. Significant Effects Identified in the Master EIR

Section V-4 of the Master EIR provides analysis of impacts to Agricultural Lands resulting from development projects envisioned in the General Plan. The Master EIR identified the following environmental impacts related to agricultural lands:

Effect: Development within the urbanized Baseline Developed Area and Redevelopment Area will have a less-than-significant impact on agricultural lands.

Effect: Conversion of agricultural land will occur as available developable land is occupied within the City. This is a significant and unavoidable impact.

Effect: Growth within Modesto's planning area would contribute considerably to the loss of agricultural land within Stanislaus County. This is a significant and unavoidable cumulative impact.

b. Master EIR Measures Pertinent to the Project

Modesto Urban Area General Plan agricultural land policies pertinent to the project are found on pages V-4-4 through V-4-8 in the Master EIR. The project site is in an area identified as an urbanized area by the California Department of Conservation and identified as Baseline Developed Area, as shown on Figure V-4-1 of the Master EIR. Policy AL-17 (Master EIR, page V-4-7, General Plan Chapter VII, Section D.2) states that if a subsequent project is within the Baseline Developed Area, the project is considered to have a minimal effect on the conversion of agricultural land and no mitigation is required.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific agricultural effect not previously analyzed in the Master EIR. The project would have a new significant agricultural lands effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Directly result in the development of land outside the March 2003 planning area boundaries.	☐	☒

		YES	NO
(3)	Conflict with existing zoning for agricultural use, or a Williamson Act contract.	☐	☒
(4)	Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland to non-agricultural use.	☐	☒

Discussion:

(1-5) The Modesto Urban Area General Plan designates the site as mixed use (MU) and residential (R) and the site is designated as an urbanized area by the California Department of Conservation. The site is also identified as Baseline Developed Area, as shown on Figure V-4-1 of the Master EIR. The site is currently developed with a medical office building, surface parking lots and single family houses. Construction of the proposed project would result in redevelopment of the existing urban use on the project site. There are no agricultural operations on the project site and there are no Williamson Act contracts on the project site. Therefore, the project would not result in conversion of farmland, conflict with agricultural zoning or Williamson Act contracts, nor result in other changes that could result in conversion or impacts to agriculture operations.

The project would not result in any new significant agricultural effects and no new mitigation measures or alternatives are required for the project.

5. WATER SUPPLY

a. Significant Effects Identified in the Master EIR

Section V-5 of the Master EIR analyzes Water Supply impacts resulting from development projects envisioned in the General Plan. The Master EIR identified the following environmental impacts relative to water supply:

Effect: Modesto Urban Area General Plan policies are established to limit groundwater extractions to the safe yield of the aquifer and thereby avoid aquifer overdraft. In addition, the Urban Water Management Plan (UWMP) requires that new urban development would proceed in conjunction with the availability of water supplies and distribution facilities. It is assumed that any increased entitlement of surface water supplies such as a water transfer from another water purveyor would undergo independent environmental review pursuant to CEQA. This is a less-than-significant impact.

Effect: Development to the future projected City population would require expansion of the Modesto Regional Water Treatment Plant (MRWTP) to its full 60 million gallons per day (mgd) capacity, development of additional groundwater wells, and construction of additional water distribution and treatment facilities. Construction of some of the required facilities would most likely require site-specific environmental impact assessments to be conducted under CEQA. Consequently, the potential environmental impacts of the Modesto Urban Area General Plan are considered less than significant.

Effect: During drought years, despite available options, significant water shortages are forecast for the San Joaquin River basin by 2020. Modesto will have a cumulatively considerable contribution to the cumulative impact on water supply under drought conditions. This is a significant and unavoidable cumulative impact.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan water supply policies pertinent to the project are found on pages V-5-7 through V-5-8 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific water supply effect not previously analyzed in the Master EIR. The project would have a new significant water supply effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Require new or expanded water entitlements because sufficient water supplies are not available to serve the project from existing entitlements and resources.	☐	☒

Discussion:

(1-2) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section C, of the General Plan.

The existing water use for the medical office building, based on City of Modesto water meter readings, is 353,000 gallons per year and 13,100 gallons per day (0.02 cubic feet per second). The replacement medical office building would increase in square footage (approximately 44,500 sf) and the number of fixtures would increase. There would be 29 more faucets, 17 more toilets, and six more urinals, while water fountains would decrease by five. The new fixtures in the replacement building would be more efficient than the current fixtures. For example, the toilets are currently 3.5 gallon flush and would become 1.6 gallon flush in accordance with current code requirements. However, it is anticipated that the increase in building size and number water fixtures in the replacement building would increase the annual average water use by approximately 50 percent. Therefore, the average water use for the replacement medical office building is anticipated to increase by 6,550 gallons per day (0.01 cubic feet per second) to 19,650 gallons per day. The total anticipated water usage of the proposed project (including

demolition of seven single family houses) corresponds to the water usage of 25 equivalent dwelling units.

The City currently has sufficient water supply to serve the existing building and could therefore continue to serve the replacement medical office building (Jakab 2006). No new or expanded water entitlements would be necessary to serve the project. Prior to issuance of the building permit, all applicable water fees must be paid.

All recommended system improvements, as required by the City of Modesto Public Works must be installed by the applicant. The project would include the upgrade of the water supply pipeline in Lucern Avenue from a 6-inch line to an 8-inch line and the water supply pipeline in Sunnyside Avenue would be upgraded from a 4-inch line to an 8-inch line. The water line replacements are consistent with the City's design criteria for such facilities and the replacements are being implemented to address existing water pressure problems.

The project would not result in any new significant effects on water supply and no new or additional mitigation measures or alternatives are required for the project.

6. SANITARY SEWER SERVICES

a. Significant Effects Identified in the Master EIR

Section V-6 of the Master EIR analyzes Sanitary Sewer Service impacts resulting from development projects envisioned in the General Plan. The Master EIR identified the following environmental impacts relative to sanitary sewer services:

Effect: The City has already begun to implement the provisions of the Wastewater Master Plan (WMP) to meet future demand for sanitary sewer services. As City wastewater treatment facilities are expanded to meet the needs of the Baseline Developed, Redevelopment, and Planned Urbanizing Areas, the City will obtain the necessary wastewater discharge and National Pollution Discharge Elimination System (NPDES) permits from the Central Valley Regional Water Quality Control Board (RWQCB), as required under Urban Area General Plan Policy V-D.2(a)(Master EIR mitigation SS-1, page V-6-2). Implementing the WMP, requiring the implementation of best management practices (BMPs) for post-construction activities, and Urban Area General Plan policy V-D.2(a), will avoid violation of wastewater discharge requirements. As a result, this impact would be less than significant.

Effect: The City has adopted the WMP specifically to ensure that sewer capacity will match the level of growth projected by the Modesto Urban Area General Plan. Development within the Baseline Developed and Planned Urbanizing Areas that is consistent with the Urban Area General Plan will not have a significant effect on capacity. Urban Area General Plan Policy III-D.1(d) will ensure that development in the Planned Urbanizing Area will fund the necessary improvements. This is a less-than-significant impact.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan sewer service policies pertinent to the project are found on pages V-6-4 and V-6-5 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific sewer service effect not previously analyzed in the Master EIR. The project would have a new significant sewer service effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Result in a determination by the wastewater treatment provider which serves or may serve the project that it has inadequate capacity to serve the project's projected demand in addition to the provider's existing commitments.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section D, of the General Plan.

(2) Based on the existing water use for the medical office building, 353,000 gallons per year and 13,100 gallons per day (0.02 cubic feet per second), the existing wastewater is 13,100 gallons per day. Because the replacement medical office building is anticipated to increase the annual average water use by approximately 50 percent, the associated wastewater is also anticipated to increase by 6,550 gallons per day (0.01 cubic feet per second) to 19,650 gallons per day. This would result in a flow increase of approximately 0.8 percent of the full sewer main capacity in Coffee Road, approximately 0.7 percent of the sanitary peak flow, and 0.57 percent of the peak wet weather flow in this main pipeline.

The medical office building is located in sewer service tributary Area 5. The project would include upgrading the water supply pipeline in Lucern Avenue from a 6-inch line to an 8-inch line and the water supply pipeline in Sunnyside Avenue would be upgraded from a 4-inch line to an 8-inch line. The wastewater line replacements are consistent with the City's design criteria for such facilities and the replacements are being implemented to mitigate existing water pressure problems. The main sewer line under Coffee Road changes in size from 10-inches to 15-inches just south of Locke Road. The City of Modesto Public Works recommends that the new sewer connection be made directly into this 15-inch sewer main. This sewer main becomes full under existing conditions at peak wet weather conditions, which is not consistent with the City's design criteria. However, as described above, the proposed replacement building would contribute less than one percent to the sewer flow in this main.

The replacement medical office building was considered in the City of Modesto Wastewater Collection System near term capacity study for sewer treatment and

disposal under the 1,016 equivalent dwelling units (EDU) of miscellaneous commercial, expected to develop in the near term (based on a five year average). The additional wastewater flows from the replacement medical office building could be served by the existing wastewater treatment plants and no plant upgrades would be necessary. Therefore, at project completion, there would be sufficient conveyance and treatment capacity to service the replacement medical office building (Jakab 2006). In addition, prior to issuance of a building permit, the applicant will be required to pay their fair-share contribution for required wastewater collection, treatment, and disposal.

The project would not result in any new significant effects on wastewater services and no new or additional mitigation measures or alternatives are required for the project.

7. SENSITIVE WILDLIFE AND PLANT HABITAT

a. Significant Effects Identified in the Master EIR

Section V-7 of the Master EIR analyzes wildlife and plant habitat impacts resulting from development project envisioned in the General Plan. The Master EIR identified the following environmental impacts relative to sensitive wildlife and plant habitat:

Effect: Although many sensitive species live in riparian habitats within the planning area, the policies of the plan will ensure that impacts of the Urban Area General Plan will be less than significant.

Effect: Requiring higher residential density than the suburban norm and a compact pattern of growth within the designated planning area to 2025 will minimize the City's contribution to the cumulative loss of habitat. Nonetheless, this is a significant and unavoidable impact.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan wildlife and plant habitat policies pertinent to the project are found on page V-7-15 through V-7-21 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study. The project site lies outside the Biological Resource Study Area, shown on Figure V-7-1d of the Master EIR. Policy SWPH-20 (Master EIR, page V-7-19) states that proposed development consistent with the General Plan in the Baseline Developed Area does not require further biological study unless specific information concerning the known presence of significant biological resources is identified by future California Natural Diversity Database (CNDDB), consultation, or other qualified sources.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific effect not previously analyzed in the Master EIR. The project would have a new significant biological resources effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Per consultation with the California Department of Fish and Game or the U.S. Fish and Wildlife Service, have a significant effect on special status species.	☐	☒
(3)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter VII, Section E, of the General Plan.

(2) The project site is developed and paved, and has been for nearly 50 years. The only vegetation is ornamental trees, shrubs, and ground-cover. A search of the California Native Plant Society (CNPS) Inventory of Rare and Endangered Plants resulted in no occurrences of rare or endangered plants for the following quadrangles that cover or surround the project site: Salida, Riverbank, Ceres, and Brush Lake (California Department of Fish and Game, 2006). However, the California Natural Diversity Database (CNDDB) RareFind 3 database search resulted in the occurrence of six Federal or State listed species within a five-mile radius (Department of Fish and Game, 2006). Some of these occurrences may be due to the presence of the Dry Creek riparian corridor located less than half a mile from the project site. The CNDDB species occurrences included:

- federally threatened California tiger salamander (*Ambystoma californiense*)
- federally endangered vernal pool tadpole shrimp (*Lepidurus packardi*)
- federally threatened vernal pool fairy shrimp (*Branchinecta lynchi*)
- state threatened Swainson's hawk (*Buteo swainsoni*)
- federally threatened valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*)
- federally endangered and state threatened San Joaquin kit fox (*Vulpes macrotis mutica*)

However, the project site, which is developed and surrounded by urban development, does not provide appropriate habitat to support the presence of any of these special status wildlife species. The site does not support any ground squirrel burrows, wetlands

or vernal pools and could therefore not support California tiger salamander, vernal pool tadpole shrimp or vernal pool fairy shrimp. Although there are mature ornamental trees on the project site, Swainson's hawks require adjacent foraging areas (such as grasslands or grain fields) and there are no adjacent fields to support such foraging habitat for this species. There are no elderberry shrubs on the project site to support the valley elderberry longhorn beetle. Finally, San Joaquin kit fox requires open grasslands and loose-textured soils for burrowing, neither of which exists on or near the project site.

(3) The project site lies outside the Biological Resource Study Area, shown on Figure V-7-1d of the Master EIR.

There are 123 mature trees on the project site. These trees are located within an urban area and are not protected by a tree preservation policy or ordinance. However, the approximately 50 street trees that would be removed for street improvements would be replaced at a one to one ratio and the City has recommended planting 24-inch box trees if possible (Exhibit 9).

The project would not result in any new significant biological resource effects. No further study is required and no new or additional mitigation measures or alternatives are required for the project.

8. ARCHAEOLOGICAL OR HISTORICAL SITES

a. Significant Effects Identified in the Master EIR

Section V-8 of the Master EIR provides analysis of Archaeological and Historical impacts resulting from development projects envisioned in the General Plan. The Master EIR identified the following environmental impacts relative to archaeological or historical sites:

Effect: If a site-specific project involves the modification or demolition of a qualifying structure more than 50 years in age, then the impact will be significant.

Effect: Areas of high probability for archaeological resources are located within the riparian corridors along the Tuolumne River, Dry Creek, and the Stanislaus River. There, the potential impact comes from earthmoving activities that could result in disturbance of resources or human remains. There is a low probability that archaeological resources will be uncovered in areas outside of the riparian corridors. However, should this occur, it would have a significant effect.

Effect: The City Zoning Ordinance requires that when substantial changes to a structure are proposed, the development will be required to comply with other Zoning Ordinance provisions such as parking or landscaping requirements. This could result in modifications to the structure, which substantially reduce its historical significance. No impact would be expected to occur, since the buildings to be removed or demolished are not considered to have historical significance. This would be a less-than-significant impact with implementation of Master EIR mitigation measure Cultural-1.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan archaeological or historic policies pertinent to the project are found on pages V-8-11 through V-8-14 of the Master EIR. The applicable measures will be

incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific archaeological or historical resource effect not previously analyzed in the Master EIR. The project would have a new significant archeological or historical resources effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Adversely affect a cultural resource that is either listed or eligible for listing in the California Register of Historical Resources, or that is listed by the City of Modesto as a Designated Landmark Preservation Site.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter VII, Section F, of the General Plan.

(2) In compliance with CEQA and City of Modesto Policies AH-3 through AH-5 and AH-13, EDAW conducted a cultural resources survey of the proposed project area (EDAW, 2006, Appendix B). According to the files maintained by the CCIC, no prehistoric or historic resources have been identified within the project area. One isolated pestle (P-50-001835) has been recorded within a ½ mile radius of the project site. Although no historic resources within a ½ mile radius have been reported to the CCIC, their files indicate that historic resources in the immediate area may include: a cemetery complex, three monuments, the Downey High and John Muir Schools, and the Kewin and Thousand Oaks Parks. Each of these sites and objects were established more than 50 years ago, and could be considered cultural resources.

A field visit was made to the project area by EDAW cultural resource specialist Angel Tomes on August 4, 2006. The purpose of the visit was to conduct an assessment of the area to be impacted by construction activities during the proposed project. Vacant lots on Lucern and Sunnyside Avenues were surveyed for the presence of archaeological material. Trucks and machinery were parked on the lot fronting Sunnyside Avenue. Ground surface visibility on both parcels was generally greater than 90 percent. No archaeological resources were observed.

During the field visit, six historic-era residences on Locke Road, and the existing Sutter Gould medical building were recorded. Each of these buildings was constructed more than 45 years ago, and thus requires an assessment of their potential for listing on the California Register of Historical Resources (CRHR). These resources were

photographed and documented on the appropriate California Department of Parks and Recreation forms.

Locke Avenue Residences

Research did not indicate that any of the residences within the study area are associated with events or persons considered important in local history (CRHR criteria 1 and 2). The buildings themselves are typical examples of a common type of architecture, and do not embody distinguishing architectural characteristics, or represent the work of a master (CRHR Criterion 3). This type of architecture is well represented in both written and visual sources; therefore, these buildings do not appear likely to yield important new information on historic construction techniques or technologies (Criterion 4). Therefore, these residences are not eligible for listing on the CRHR.

Sutter Gould Medical Foundation Building

This building does not appear to be eligible for listing on the CRHR. Although it has no known important association to events or persons considered significant in local or statewide history (criterion 1 and 2), the primary reason for its ineligibility is its loss of historic integrity. This building was originally three-stories when it was first constructed. A fourth floor was added in the late 1970s, changing the configuration and the scale of the building. Over the years different physician groups utilizing the facility undertook various tenant modifications (Darci Hernandez, Pers. Comm. 2006). The most significant factor pertaining to the integrity issue is the addition of the fourth floor and the overall change it effected in the building's appearance.

As outlined in the California Code of Regulations, Section 4852 (c), a resource must retain sufficient integrity to its original historical appearance. The changes to the subject property have affected its integrity of design, materials and workmanship, changing the original appearance of the structure. The modifications made to the building were undertaken less than 50 years ago and do not represent historical or architectural value.

The cultural resource investigation did not reveal the presence of archaeological material and determined that the residences and the medical office building are not eligible for listing on the CRHR. Therefore, the project would not result in any new significant archaeological or historical resource effects and no new or additional mitigation measures or alternatives are required for the project.

9. STORM DRAINAGE

a. Significant Effects Identified in the Master EIR

Section V-9 of the Master EIR provides analysis of storm drainage impacts of development of the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to storm drainage:

Effect: The potential impacts on stormwater drainage that could occur from the Modesto Urban Area General Plan were qualitatively evaluated with respect to several factors including: extent of the projected increase in urban surface area compared to undeveloped ground; magnitude of projected changes to hydrologic and physical site characteristics of the study area compared to existing conditions; regulatory criteria and guidelines; and professional judgment. Because the Modesto Urban Area General Plan includes policies that require new development in all three

sections of the planning area to install approved drainage facilities, the potential impacts of the Modesto Urban Area General Plan on stormwater drainage are considered less than significant.

Effect: The population of Stanislaus County is projected to increase in a fashion similar to that of Modesto, resulting in additional urban development and associated increases in impervious areas and associated urban stormwater drainage. Cumulative hydrologic impacts of stormwater flows from Modesto urban areas and other areas of the County could occur due to the fixed capacity of Modesto Irrigation District (MID) and Turlock Irrigation District (TID) irrigation canals to convey drainage west to the San Joaquin River. If drainage channels in some areas prove insufficient to handle the increased drainage discharges, existing stormwater runoff from urban and agricultural areas during large storm events would have to be interrupted until water levels receded to a point allowing the resumption of discharges to the channel. Ceasing discharges to drainage channels could cause inundation in and around the drainage conveyance pipeline systems, surface drainage channels, detention basins, and other urban areas. This cumulative impact is considered significant and unavoidable.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan storm drainage policies pertinent to the project are found on page V-9-4 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific storm drainage effect not previously analyzed in the Master EIR. The project would have a new significant storm drainage effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Substantially increase the rate or amount of surface runoff in a manner that would result in flooding on or off site.	☐	☒
(3)	Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section E, of the General Plan.

(2-3) Due to the conversion of single family houses and two vacant lots to paved surface parking for the medical office building, the total impervious surfaces on the project site would increase over existing coverage. However, in accordance with the City's requirements, all stormwater would be retained and infiltrated on-site. All on-site stormwater would be collected in drainage inlets and would drain to a City-approved media filtration box (stormfilter by Contech), which would treat the stormwater and allow it to percolate into the ground. Therefore, the project would not contribute runoff that would exceed the capacity of the stormwater drainage system nor provide substantial additional sources of polluted runoff.

During project construction, best management practices would be implemented per the *California Stormwater Quality Association Best Management Practices Handbook for Construction* (January 2003). The Construction Handbook provides general guidance for selecting and implementing best management practices (BMPs) that will eliminate or reduce the discharge of pollutants from construction sites to waters of the state and developing and implementing stormwater pollution prevention plans (SWPPPs) that document the selection and implementation of BMPs for a particular construction project. The SWPPP would all potential sources of pollution which may reasonably be expected to affect the quality of storm water discharges from the construction site; describe BMPs to be used to reduce pollutants in storm water discharges from the construction site; and help assure compliance with the terms and conditions of the stormwater permit.

The project would not result in any new significant storm drainage effects and no new or additional mitigation measures or alternatives are required for the project.

10. FLOODING AND WATER QUALITY

a. Significant Effects Identified in the Master EIR

Section V-10 of the Master EIR analyzes flooding and water quality impacts of development projects envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to flooding and water quality:

Effect: Increased runoff can accelerate soil erosion, stream channel scouring and sedimentation of channels, and also increase pollutant transport to waterways. The potential impacts of the General Plan on flooding are considered less than significant because the Modesto Urban Area General Plan Update includes policies to restrict development in the floodplain and therefore would avoid exposing persons and property to flood hazards. In addition, new development under the Urban Area General Plan is required to install stormwater drainage facilities that restrict the amount of post-development runoff from exceeding pre-development conditions.

Effect: The potential impacts of the General Plan on surface water quality are considered less than significant because the City policies and capital improvement projects for stormwater drainage facilities would minimize discharges of urban pollutants to natural waterways. The City drainage program policies require new development to prepare drainage plans and implement urban runoff control measures; larger Specific Plan developments must have storm drainage systems designed to control pollutant runoff. The City's implementation policies for the municipal NPDES stormwater permit require new development to implement an appropriate selection of permanent pollution control measures. Permanent erosion control measures such as seeding and planting vegetation for new cut-and-fill slopes, directing runoff through

vegetation, or otherwise reducing the off-site discharge of particulates and sediment are the most effective method of controlling off-site discharges of urban pollutants.

Effect: The City's future development will contribute to cumulative water quality effects. The Environmental Protection Agency (EPA) regulations for NPDES stormwater permits and new proposed regulatory additions to the rules have become much more comprehensive in recent years and are being implemented to reduce pollutant runoff from both large- and small-scale activities. Implementation of NPDES-permitting programs throughout the County will reduce potential water quality impacts to a less-than-significant level.

b. Master EIR Mitigation Measures Applied to the Project

As shown on Figure V-10-1c of the Master EIR, the project site is not located in an area with the potential for flooding. Modesto Urban Area General Plan flooding and water quality policies pertinent to the project are found on pages V-10-7 through V-10-10 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific flooding or water quality effect not previously analyzed in the Master EIR. The project would have a new significant flooding or water quality effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Not comply with the regulatory requirements of the federal Clean Water Act or the State Porter-Cologne Act.	☐	☒
(3)	Not comply with Modesto's Guidance Manual for New Development Stormwater Quality Control Measures.	☐	☒
(4)	Create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, as shown on Figure V-10-1c of the Master EIR, the project site is not located in an area with the potential for flooding and the project would be consistent with the policies of Chapter VI, Section C, of the General Plan.

(2) Redevelopment of the project site would be required to comply with the Clean Water Act and the Porter-Cologne Act. The City will require adherence to any Clean Water Act requirements it deems appropriate.

(3) Redevelopment and expansion of the existing medical office building and surface parking lots on the project site must comply with the City's Guidance Manual for New Development Stormwater Quality Control Measures. Compliance would be ensured through City review of building plans and building inspection.

(4) Please refer to Section IV.9, "Storm Drainage," responses to questions two and three, of this Initial Study.

The project would not result in any new significant flooding or water quality effects and no new or additional mitigation measures or alternatives are required for the project.

11. PARKS AND OPEN SPACE

a. Significant Effects Identified in the Master EIR

Section V-11 of the Master EIR analyzes parks and recreation impacts of development projects envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to parks and open space:

Effect: Within the Baseline Developed and Redevelopment Areas, the Urban Area General Plan does not propose any elimination of existing park and/or open space land. Impacts on parks and open space will be less than significant.

Effect: The projected population of the Planned Urbanizing Area is 148,600, requiring 149 acres of neighborhood parks and 298 acres of community parks. The required minimum acreages can be met through the application of existing policies and regulations, including Government Code Section 66474, which require developers to pay Parks Capital Facilities Fees to fund the acquisition of appropriate parkland acreage. This impact is less than significant.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan parks and open space policies pertinent to the project are found on pages V-11-4 through V-11-8 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific effect not previously analyzed in the Master EIR. The project would have a new significant parks and open space effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section G, and Chapter VII, Section B, of the General Plan.

The project site does not contain any parks or open space, nor would the project site after redevelopment of the replacement medical office building. The project would not affect parks or open space. In addition, appropriate Capital Facility Fees, including parks fees, must be paid before any building permits can be issued. Fees applied to new development on the project site would be those fees in effect at the time the building permit is issued.

The project would not result in any new significant parks and open space effects and no new or additional mitigation measures or alternatives are required for the project.

12. SCHOOLS

a. Significant Effects Identified in the Master EIR

Section V-12 of the Master EIR provides analysis of school impacts resulting from development envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to schools:

Effect: The estimated increase in population over 1994/1995 would generate an additional 29,200 elementary school students, 7,330 middle school students, and 14,640 high school students above those enrollments. Assuming that existing facilities cannot sufficiently accommodate this increase and that all of the new students would require new school facilities, build out of the General Plan would result in the need for approximately 37 elementary schools, eight middle schools, and seven high schools beyond 1994/1995 levels. This would result in a significant impact on schools in that increased enrollment would exceed current capacity. By statute, this impact is considered to be mitigated below a level of significance by payment of school impact fees and exercise of any or all of the financing options set out in Government Code Section 65997.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan schools policies pertinent to the project are found in pages V-12-4 and V-12-5 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a new project-specific significant schools effect not previously analyzed in the Master EIR. The project would have a new significant effect on schools if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Not comply with SB 50/Proposition 1A funding provisions, or succeeding measures which provide that compliance results in less-than-significant impacts on schools.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section H, of the General Plan.

(2) The project site does not contain, nor would it contain, any school facilities and would not change or generate any new population in the City of Modesto. Therefore, the project would not have a direct impact on schools. However, redevelopment of the project site would be required to comply with the provisions of SB 50/Proposition 1A. The project applicant would be required to pay schools fees in effect at the time the building permit is issued. Payment of school impact fees and compliance with SB 50 is statutorily deemed to be full mitigation of school impacts (Government Code Section 65995).

The project would not result in any new significant schools effects and no new or additional mitigation measures or alternatives are required for the project.

13. POLICE SERVICES

a. Significant Effects Identified in the Master EIR

Section V-13 of the Master EIR analyzes police service impacts resulting from development envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to police services:

Effect: The 1995 Master EIR identified two impacts on the demand for police services; however, it concluded that no significant impact, based on the mitigation measures identified in the 1995 Master EIR, would occur. Those mitigation measures are now policies of the Urban Area General Plan. The impact is less than significant.

Effect: Within the Planned Urbanizing Area, complying with the Urban Area General Plan policies, particularly the policy that requires a long-range financing strategy for each Comprehensive Plan Area, will allow the City to provide the resources necessary to extend service to the newly growing Planned Urbanizing areas. These policies reduce the impact to a less-than-significant level.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan police services policies pertinent to the project are found on pages V-13-3 and V-13-4 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific police services effect not previously analyzed in the Master EIR. The project would have a new significant effect on police services if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section J, of the General Plan.

(2) The Modesto Police Department's current officers-to-residents ratio is approximately 1.3 per 1,000. The project would result in an increase in the size of the medical office building (approximately 44,500 sf increase). The estimated increase in the number of patients at any given time is from 94 to 109. Sutter Gould currently does not anticipate an increase in the number of staff. The project would also result in the removal of seven single family houses on Locke Road, which could result in a reduction in demand for police services. The Modesto Police Department stated that the new medical office building would not impact their ability to provide police services (pers. comm., Rhea 2006).

The project would not result in any new significant police service effects and no new or additional mitigation measures or alternatives are required for the project.

14. FIRE SERVICES

a. Significant Effects Identified in the Master EIR

Section V-14 of the Master EIR analyzes fire service impacts resulting from development envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to fire services:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. Impacts on fire services of development in these areas will be less than significant.

Effect: In the Planned Urbanizing Area, the Urban Area General Plan would result in the need for additional fire protection services due to increases in the number of employees, permanent population, and associated improvements. City policy requires that fire protection be in place concurrent with construction in the Planned Urbanizing Area. This policy will be implemented with the adoption of future Comprehensive Plans in the Planned Urbanizing Area. This impact would be less than significant.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan fire services policies pertinent to the project are found on pages V-14-3 through V-14-5 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific fire services effect not previously analyzed in the Master EIR. The project would have a new significant effect on fire services if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section K, of the General Plan.

(2) The project would result in a replacement medical office building that is the same height as the existing building, but approximately 44,500 sf larger. The replacement medical office building would be located directly adjacent to the existing building, which would be demolished, and would be constructed according to the Modesto Fire Department's code requirements. In addition, the project would result in the removal of seven single family houses on Locke Road, which could result in a reduction in demand for fire services. The Modesto Fire Department stated that they will be able to serve the proposed building, at its proposed location (pers. comm., Payton 2006).

The project would not result in any new significant fire services effects and no new or additional mitigation measures or alternatives are required for the project.

15. SOLID WASTE

a. Significant Effects Identified in the Master EIR

Section V-15 of the Master EIR analyzes solid waste impacts of development envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to solid waste:

Effect: Since Modesto Urban Area General Plan would exceed available landfill capacity, it is identified as a significant impact. The Fink Road Landfill may be closed by the time the City reaches build out, unless an expansion is approved by the County and the Integrated Waste Management Board. As the waste stream generated increases with population, additional landfills and methods for diversion would have to be utilized. The project will also generate the need for additional collection and transfer facilities. This impact is significant and unavoidable. The impact would be less than significant at such time as the Fink Road Landfill expansion is approved.

Effect: The Modesto Urban Area General Plan makes a considerable contribution to the cumulative impact on landfill capacity of development in Stanislaus County. This impact is significant and unavoidable.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan solid waste policies pertinent to the project are found on pages V-15-5 and V-15-6 of the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific solid waste effect not previously analyzed in the Master EIR. The project would have a new significant solid waste effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Result in waste stream levels that exceed disposal capacity and the County is unable to expand its solid waste disposal capacity.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section L, of the General Plan.

(2) Expansion of the medical facility would result in an increase of approximately 44,500 sf of building space. However, Sutter Gould anticipates that the expansion would not increase the number of staff and that there would be only a slight increase in the number of patients at any given time (from 94 to 109). The replacement medical office building would be constructed with the required recycling and garbage enclosures per the City of Modesto Garbage Enclosure Guidelines (as adopted by Resolution #2005-404). The expansion of the medical office building is not anticipated to result in a substantial increase in the generation of solid wastes. Therefore, the project would not create the need for expansion of solid waste disposal capacities. The City has stated that it can and will continue to provide solid waste services to the medical office building (pers. comm., Rodriguez 2006). As is currently the case, there would be medical waste bins (for materials such as syringes) on site adjacent to the trash enclosures. The medical waste bins would be locked and the medical waste would be picked up on a weekly basis by a medical waste company.

The project would not result in any new significant solid waste effects and no new or additional mitigation measures or alternatives are required for the project.

16. HAZARDOUS MATERIALS

a. Significant Effects Identified in the Master EIR

Section V-16 of the Master EIR analyzes hazardous material impacts resulting from development envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to hazardous materials:

Effect: The impacts of the Modesto Urban Area General Plan relative to hazardous materials are less than significant, based on the existing regulatory framework. New development will be required to comply with regulations monitoring and controlling the handling and use of hazardous and toxic materials.

b. Master EIR Mitigation Measures Applied to the Project

Federal, State, County, and Modesto Urban Area General Plan hazardous materials policies pertinent to the project are found on pages V-16-5 through V-16-12 in the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific hazardous materials effect not previously analyzed in the Master EIR. The project would have a new significant hazardous materials effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Not comply with all applicable Federal, State, and County standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes.	☐	☒
(3)	Contains a contaminated site not identified as of March 2003.	☐	☒
(4)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.	☐	☒
(5)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and as a result, would create a significant hazard to the public or the environment.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section M, of the General Plan.

(2-5) The Master EIR lists hazardous materials sites located in the City. The project site is not located near any listed hazardous materials or contaminated sites. The project site is located within ¼-mile of John Muir Elementary School.

According to the Phase I Environmental Site Assessment (Bovee Environmental Management, Inc., March 2006) prepared for the project site, no environmental conditions were observed that would warrant further investigation. The federal, state, and local agencies environmental database review identified the project site six times. The six listings relate to the generation and disposal of medical and laboratory waste chemicals, previously closed emergency response cases and hazardous waste manifests relating to off-site asbestos disposal. However, none of the six listings warrants further investigation. In addition, the site history and land use review did not identify any environmental concerns with previous owners/tenants. The Phase I Environmental Site Assessment (Bovee Environmental Management, Inc., March 2006) is available for review at the City of Modesto Community and Economic Development Planning Division.

Asbestos Inspection Reports (Bovee Environmental Management, Inc., 2005 and 2006) for the existing Sutter Gould medical office building as well as six houses located on the northern boundary of the project site on Locke Road identified the presence of asbestos-containing building materials. Asbestos poses health hazards only when inhaled; therefore, friable (easily crumbled) asbestos is potentially hazardous if not encapsulated. Non-friable asbestos or encapsulated asbestos does not pose substantial health risks. During building demolition, asbestos fibers could be disturbed, released into the air, and inhaled by construction workers or the public unless proper precautions are taken. In addition, given the age of the structures (approximately 50 years old), there is a likelihood that lead-based paint may be present on-site as well, which could also become friable when the buildings are demolished. The Asbestos Inspection Reports (Bovee Environmental Management, Inc., 2005 and 2006) are available for review at the City of Modesto Community and Economic Development Planning Division.

Sutter Gould shall coordinate with all appropriate agencies, including the Stanislaus County Department of Environmental Resources Hazardous Materials Division (Stanislaus County HMD), the Central Valley Regional Water Quality Control Board (Central Valley RWQCB), the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD), Department of Toxic Substances Control (DTSC), the Environmental Protection Agency (EPA), California Occupational Safety and Health Administration (Cal/OSHA), and any other applicable federal, State, or local regulatory agencies, regarding appropriate methods to address asbestos and lead-based materials during demolition of the medical office building and single family houses. Methods for containment/removal of asbestos- and lead-containing materials would follow all regulatory standards. All contaminated asbestos- and lead-containing materials removed from the project site shall be disposed of in a manner consistent with applicable regulations at an appropriate off-site disposal facility.

In addition, the Stanislaus County HMD shall be notified if evidence of previously undiscovered soil or groundwater contamination (e.g., stained soil, odorous groundwater) is encountered during excavation activities. Any contaminated areas shall be remediated in accordance with recommendations made by the Stanislaus County HMD, Central Valley RWQCB, DTSC, or other appropriate federal, State, or local regulatory agencies. Compliance with these regulations would prevent the project from resulting in a significant risk to construction workers or the public from exposure to hazardous materials currently present on the site.

During the course of patient care and facility maintenance operations, the facility uses various materials, some of which pose potential hazards. Hazardous materials used or generated on-site include: refrigerant, elevator hydraulic oil, fire extinguisher charge (dry chemicals), and infectious wastes (sharps, biohazards). The medical office building does not handle, store, or use any acutely hazardous materials. The project would result in a minor increase hazardous materials storage and handling at the medical office building due to the increase in building square footage. However, the continued use of the hazardous materials listed above would not increase risks of human and environmental exposure to hazardous materials. In addition, although the medical office building uses and stores only a small amount of hazardous substances, it still has a Hazardous Materials Business Plan (HMBP) on file with the Department of Environmental Resources.

The project would follow all applicable federal, state, and local regulations during construction and operation of the medical office building and would not result in any new

significant hazardous materials effects and no new or additional mitigation measures or alternatives are required for the project.

17. LANDSLIDES AND SEISMIC ACTIVITY

a. Significant Effects Identified in the Master EIR

Section V-17 of the Master EIR analyzes landslides and seismic impacts of development envisioned in the Modesto Urban Area General Plan. The Master EIR identified the following environmental impacts relative to landslides and seismic activity:

Effect: There are areas of known sand and gravel resources within the Baseline Developed Area and Redevelopment Area. Future development will be subject to Surface Mining and Reclamation Act (SMARA) requirements; therefore, the Modesto Urban Area General Plan impact will be less than significant.

Effect: There are areas of known sand and gravel resources within the Planned Urbanizing Area. Future development will be subject to SMARA requirements; therefore, the Modesto Urban Area General Plan impact will be less than significant.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan policies pertinent to the project are found on pages V-17-6 and V-17-7 in the Master EIR. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific seismic effect not previously analyzed in the Master EIR. The project would have a new significant seismic effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Be located on soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter VI, Sections B and E, of the General Plan.

(2) According to the Master EIR's description of the General Plan study area, the project site is not located in area subject to landslide, lateral spreading, subsidence, liquefaction, or collapse.

According to the project-specific geotechnical engineering investigation, there are no active fault traces in the project vicinity, the project site is not within an Earthquake Fault Zone (Special Studies Zone), and the site is located in Seismic Zone 3 (Krazan & Associates, Inc. 2005). (The earthquake hazard potential for the U.S., determined through a national program, has been generalized into four seismic zones, numbered Zone 1 through Zone 4. Zone 1 has the lowest earthquake danger and Zone 4 has the highest earthquake danger.)

Secondary hazards from earthquakes include rupture, seiche, landslides, liquefaction, and subsidence. Since there are no known faults in the project area, there is no risk of ground rupture from surface faulting. There is no risk of seiche because there is no large body of water in the vicinity of the project site. There is also no risk of landslides at the project site because the site and its surroundings are relatively level with no major changes in grade. Liquefaction potential (the sudden loss of shear strength in a saturated cohesionless soil) is low because ground shaking intensities are not strong enough to generate this type of failure. Finally, deep subsidence problems may be low to moderate; however, there are no known occurrences of structural or architectural damage due to deep subsidence in the Modesto area (Krazan & Associates, Inc. 2005).

The project would not result in any new significant seismic effects and no new or additional mitigation measures or alternatives are required for the project.

18. ENERGY

a. Significant Effects Identified in the Master EIR

Section V-18 of the Master EIR analyzes energy impacts of development envisioned in the General Plan. The Master EIR identified the following environmental impacts relative to energy:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. New development within the Redevelopment Area will comply with Title 24 standards as well as City Urban Area General Plan policies. Impacts on energy by development in these areas (i.e., changes in levels of use above the current baseline) will be less than significant.

Effect: Build out under the Urban Area General Plan will utilize an estimated 1,400 million cubic feet per month of natural gas, 1,300 million kilowatt hours (kwh) of electricity per year and 650,000 gallons of gasoline per day. PG&E has indicated that they have at the current time sufficient supplies of natural gas to serve the increased natural gas demands of the project. At present, gasoline supplies are apparently sufficient to serve the gasoline demands of the Modesto Urban Area General Plan. Title 24 of the California Code of Regulation ensures that the project will not exceed local, state, and federal energy standards. The impact is less than significant.

b. Master EIR Mitigation Measures Applied to the Project

Modesto Urban Area General Plan Energy Conservation Policies 1.a through 1.c are pertinent to the project and are found on pages V-16-5 through V-16-12 in the Master EIR. These policies would reduce direct impacts to less than significant by, among other measures,

promoting pedestrian-oriented development, the use of shade trees, and utilities coordination. The applicable measures will be incorporated into or made conditions of approval of this project and are listed in Section V, "Mitigation Measures Applied to Project," of this Initial Study.

c. Project-Specific Effects

This section analyzes whether the project would result in a significant project-specific energy effect not previously analyzed in the Master EIR. The project would have a new significant energy effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would comply with Title 24 standards and would be consistent with the energy policies in the Modesto Urban Area General Plan, Chapter VII, Section I.

The project would not result in any new significant energy effects and no new or additional mitigation measures or alternatives are required for the project.

19. PLANNING AND LAND USE

The certified Modesto Urban Area General Plan Master EIR addressed significant effects in 18 resource areas. The analysis in the Master EIR is based on the planning policies and diagrams adopted as part of the General Plan. Planning and land use were not among the 18 subject areas analyzed in the Master EIR because they essentially defined the project being evaluated in the EIR. Therefore, this section examines only the potential for project-specific planning and land use effects.

a. Project-Specific Effects

The project would have a significant planning and land use effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Include a substantive amendment to the Modesto Urban Area General Plan.	☐	☒
(3)	Physically divide an established community.	☐	☒

Discussion:

(1) Chapter 2, Section C, of the Master EIR, "Anticipated Subsequent Projects," identifies 18 types of projects that are declared to be within the scope of the Master EIR as defined by Public Resources Code 21157.1. Chapter 2, Section C.5, states that, "the City may undertake rezonings at the request of private applicants or on its own initiative for the purpose of implementing the Urban Area General Plan." Chapter III-6, Land Use Polices (a) of the Modesto Urban Area General Plan states that the zoning code and zoning map shall be the primary vehicle to guide future development in the Baseline Developed Area. The project site is within the Baseline Developed Area. The existing medical office building facilities are within an existing planned development zone, P-D (30), which allows for the proposed uses. The medical office building would be relocated within the boundaries of the existing P-D (30) zone. The proposed rezoning of the P-D (30) would change a portion of the R zone, which would be used for surface parking, and incorporate it into the P-D (30) zone for consistency. Parking is allowed in both R and P-D [30]; however, the rezone provides consistency for the entire medical office building facilities within the P-D (30) zone. Therefore, the proposed project rezoning implements the General Plan and it is within the scope of the Master EIR. In addition, Chapter 2, Section C.6, "Miscellaneous Land Use Permits," identifies a variety of City permits that facilitate development. The project would require a building permit from the City before construction could start. The building permit would establish that the project construction must take place in accordance with accepted building codes. Therefore, both the P-D (30) amendment and the construction of a replacement medical office building and associated parking are within the anticipated subsequent projects identified in the Master EIR and are within the declared scope of the Modesto Urban Area General Plan Master EIR.

(2) The project is consistent with the Modesto Urban Area General Plan designation for the project site; therefore, no General Plan amendment is necessary.

(3) Development of an expanded replacement medical office building and associated surface parking would occur on the site of the existing medical office building. Additional surface parking would be developed on adjacent lots owned by Sutter Gould that are either vacant or are currently occupied by single family houses (Exhibits 4 and 5). The proposed amendment to P-D (30) from R-1 and R-2 would allow for the demolition of seven single family houses along the northern border of the project site and redevelopment of those parcels, as well as parcels at Sunnyside Avenue and Lucern Avenue, as surface parking. Although it would be allowed by the P-D (30) amendment, the removal of houses and redevelopment of parcels with surface parking would result in an intrusion on the existing neighborhood and eliminate houses that contribute to the residential community. Houses on Locke Road that currently have views across to other single family houses would end up with views of surface parking lots for the new medical office building. In addition, although there is a medical office building parking lot currently near Sunnyside Avenue and Lucern Avenue, the increase in surface parking lots at this intersection would also bring the medical facilities closer to the residential houses in this area.

The medical office building has been part of the neighborhood since the mid-1950s. Although the removal of homes would result in the intrusion of additional medical office facilities on the neighborhood, adjacent residences are already isolated and the project would not create a division in the neighborhood that does not already exist due to the existing medical office building. The additional parking lots would remain clustered at

the current site and the surrounding neighborhood would not be rezoned; it would remain as R-1 or R-2. Therefore, project would not divide an established community.

20. AESTHETICS

The certified Modesto Urban Area General Plan Master EIR addressed significant impacts in 18 resource areas. The analysis in the Master EIR is based on the planning policies and diagrams adopted as part of the General Plan. At that level of detail, no effects on aesthetics were identified. Therefore, this section examines only the potential for project-specific aesthetic effects.

a. Project-Specific Effects

The project would have a significant aesthetic effect if it would:

		YES	NO
(1)	Be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Have a substantial adverse effect on a scenic vista.	☐	☒
(3)	Substantially degrade the existing visual character or quality of the project site and its surroundings.	☐	☒
(4)	Create a new source of substantial light and glare, which would adversely affect day or nighttime views in the area.	☐	☒

Discussion:

(1) The project site is designated as mixed use (MU) and residential (R) in the Modesto Urban Area General Plan and is located in an area currently developed with urban land uses. The existing medical office building, parking, and single family houses that occupy the project site are consistent with the General Plan and the P-D (30), R-1 and R-2 zones. The proposed amendment to the existing P-D (30) zone would be consistent with the General Plan as would the replacement medical office building and associated parking. Furthermore, the project would be consistent with the policies of Chapter V, Section M, of the General Plan.

(2) The project site is surrounded by urban development such as single family housing and a school; the site is not located within a scenic vista. Therefore, redevelopment of the site with a replacement medical office building, additional surface parking, and the demolition of the existing medical office building and single family houses would not alter a scenic vista.

(3) The replacement medical office building would be constructed on the same site as the existing facility, which is illustrated in Exhibit 3. The replacement building would be a similar scale and size as the current building. It would have the same height, four stories (approximately 60 feet), but would have a larger total square footage (44,500 sf larger) (Exhibit 5). The replacement building would be located on the eastern portion of the block, next to where the current building is located (Exhibit 5). The current building would be demolished and surface parking would be constructed on the western portion

of the site (Exhibit 5). The architectural rendering and building elevations of the replacement medical office building are provided in Exhibits 6, 7, and 8.

Views of the project site would change due to the redevelopment. From Coffee Road, the view of the medical office building would become less prominent and viewers would see surface parking in the foreground and the replacement medical office building in the background. Views from Sunnyside Avenue would change from viewing the surface parking lot to a prominent view of the replacement medical office building. The view from the south on Lucern Avenue would remain similar to existing conditions, but the medical office building would switch to the eastern portion of the site and the surface parking to the western portion. The view from the north on Locke Road would change due to the removal of the single family houses on the northern boundary of the project site; the view would change from single family houses to surface parking in the foreground and the medical office building in the background.

Although the redevelopment would change the surrounding views of the project site, the overall visual qualities of the project site would be retained. The overall scale, size, and form of the development would be similar to existing conditions, which include a medical office building and surface parking.

The project would result in the removal of all of the trees on the interior of the site for construction of the replacement medical office building and approximately 50 street trees along the perimeter of the project site for street improvements (Exhibit 9). The street trees that would remain are located in the northeastern portion of the project site nearest the intersection of Locke Road and Sunnyside Avenue. The approximately 50 street trees that would be removed would be replaced tree for tree, and the City has recommended planting 24-inch box trees. In addition, the project would include landscaping around the replacement building and throughout the parking lots as required in the Modesto Urban Area General Plan and the City's Municipal Code. The landscaping is described in Section II, "Project Description," of this Initial Study.

Although landscaping requirements of the City would require replanting of trees as part of new landscaping (Exhibits 9 and 10), for a number of years the new trees planted on-site would not be fully grown, would not provide the same amount of shade, and would not be as visually appealing as compared to the existing trees growing on the project site. The trees are expected to mature within ten years and the shrubs would mature in three to five years. Although the trees would be different species than the existing trees, they would provide similar canopy and shade at maturity as currently exists. Because the loss of visual quality and shade would be temporary and the newly planted trees would over time grow to fully replace the existing trees on the project site, the removal of existing on-site trees is not considered significant.

(4) Glare is caused by light reflections from pavement, vehicles, and building materials, such as reflective glass and polished surfaces. During daylight hours, the amount of glare depends on the intensity and direction of sunlight. Glare can create hazards to motorists and nuisances for pedestrians, bicyclists, and surrounding land uses. At night, artificial lighting can cause problems similar to those described for daylight glare, and disturb nearby residents in their homes.

The exterior of the new medical office building would be stucco, curtain wall, and glazing and the colors would incorporate aspects of the natural materials in the surrounding areas (Exhibits 6 through 8). The stucco and curtain wall would not induce glare. The

proposed glazing would be an insulated glazing (Class 2), which is tinted, heat absorbing, and light reducing. The visible reflectance from the glazing would range from approximately eight percent to ten percent.

As with the existing facility, lighting would be required to promote safety and security. Because the medical office building would expand by approximately 44,500 sf, and because new parking lots would be constructed, lighting associated within the new building and exterior light fixtures would increase the amount of ambient light emanating from the site. However, exterior lighting would be limited to safety lighting placed on the buildings to light doorways and walkways, and lighting fixtures mounted on 20-foot poles in parking areas. More decorative fixtures would be used around the building. All exterior lighting would be shielded, focused downward, and focused away from the adjacent residential areas. In addition, all exterior lighting would be limited to non-sodium-vapor lighting.

Because the project would avoid the use of highly reflective architectural materials for exterior building finishes and because the exterior lighting would be limited and shielded, project implementation would not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area. This impact is considered less than significant.

V. MITIGATION MEASURES APPLIED TO THE PROJECT

A. Master EIR Mitigation Measures Applied to the Project

Pursuant to CEQA Section 21157.1 (c), in order for a Finding of Conformance to be made, all feasible measures from the Master EIR appropriate to the project shall be incorporated into the project. As referenced in the resource sections, above, the complete list of Modesto Urban Area General Plan policies and Master EIR mitigation measures are provided in the Master EIR. Based on the project description and this consistency analysis, the following Modesto Urban Area General Plan policies and Master EIR mitigation measures are those that are directly applicable to the project and shall be made part of the project prior to approval by means of conditions of project approval or incorporation into the appropriate document or plan.

Traffic and Circulation Measures:

City of Modesto Policies

Redevelopment Area and Baseline Developed Area

TC-41: Designated City staff will review future development project proposals within the Baseline Developed Area, on a case-by-case basis. The following criteria will be applied to each proposal, and a determination made by the Public Works and Transportation [now, Engineering and Transportation] Director, regarding the acceptable or appropriate level of project impact on the circulation network.

(1) For proposed development projects that conform to the General Plan-approved land use for the site, it is assumed that the adopted performance standards for the circulation system within the area of impact will be maintained. For such projects, the designated City staff will establish and appropriate scope of study for a "Site Access Study", which may address project impacts to adjacent or nearby intersections, as described in Policies 6-a through 6-c.

(2) The "Site Access Study" shall, at a minimum, analyze, and resolve the following:

(a) Impacts to roadway intersections that are adjacent to the project site.

(b) Impacts to other intersections considered to have a key role in regulating access to the project site or substantial traffic flow between the project site and a key arterial roadway.

(c) Impacts to and design needs for access between internal and off-site vehicular circulation, and linkages to off-site bicycle/pedestrian circulation systems, and transit services.

(d) On site parking needs and impacts to off-site parking, when applicable.

(e) Other operational or safety-related concerns and issues, including site access.

(3) The proposed development project will be designed to incorporate all recommendations of the "Site Access Study".

(4) If implementation of the definitive recommendations of the Site Access Study is impractical or infeasible, a Focused Environmental Impact Report, including a Comprehensive Traffic Study will be required. That study shall include appropriate measures to update the General Plan Traffic Analysis for all subsequent Comprehensive Plans, and for development within the affected Baseline Developed Area and Redevelopment Area.

(5) For projects which do not conform to the General Plan-approved land use, further, supplemental environmental review may be necessary, in accordance with Section 21157.5(d) of the Public Resources Code. (General Plan Policy V-4.B.6[d])

TC-42: Data from the General Plan Traffic analysis, described in the Traffic Appendix of the Master EIR, shall be utilized to evaluate the effectiveness of the Policies presented above. (General Plan Policy V-4.B.6[e])

Air Quality Measures:

City of Modesto Policies

AQ-16: The City of Modesto should implement measures to reduce the temporary, yet potentially significant, local air quality impacts from construction activities. Potential measures to be implemented may include those measures listed in Table 2-6 in the Master Environmental Impact Report. (General Plan Policy VII-H.2[l])

AQ-17: **Table 2-6.** Air Quality Measures to Reduce Construction Impacts

(Note: In order to maintain consistency with the General Plan reference, this table does not follow the nomenclature used for tables elsewhere in this Master EIR.)

1. The following mitigation measures shall be implemented by the City of Modesto, and incorporated into development plans and public facility plans as appropriate:

   a. The City of Modesto shall work with the SJVUAPCD to reduce particulate matter emissions from construction, grading, excavation, and demolition to the maximum extent feasible.

   b. If required by Regulation VIII (Fugitive Dust Rules) of the San Joaquin Valley Unified Air Pollution Control District, the City of Modesto shall require all access roads, driveways, and parking areas serving new commercial and industrial development to be constructed with materials that minimize particulate emissions and are appropriate to the scale and intensity of use.

2. The following measures should be strongly encouraged, and incorporated into development plans and public facility plans, when it is shown to be appropriate and feasible

   a. The City of Modesto should reduce PM_{10} emissions from City-maintained roads to the maximum extent feasible

   b. The City of Modesto should adopt a standard set of construction-related mitigation measures that can be adapted to all new, non-emergency construction projects in the City.

AQ-18: The City of Modesto shall require residential development projects and projects categorized as sensitive receptors (hospitals, schools, convalescent homes, etc.) to be located an adequate distance from existing and potential sources of toxic and/or odorous emissions such as freeways, major arterials, industrial sites, refuse transfer or disposal sites and hazardous material locations. (General Plan Policy VII-H.2[m])

New Master EIR Mitigation Measure Air-1: PM10 Control Measures

a. SJVUAPCD Regulation VIII Control Measures for Construction Emissions of PM_{10}. The following controls are required to be implemented at all construction sites:

   1. All disturbed areas, including storage piles, which are not being actively utilized for construction purposes, shall be effectively stabilized of dust emissions using water, chemical stabilizer/suppressant, covered with a tarp or other suitable cover or vegetative ground cover

   2. All on-site unpaved roads and off-site unpaved access roads shall be effectively stabilized of dust emissions using water or chemical stabilizer/suppressant.

   3. All land clearing, grubbing, scraping, excavation, land leveling, grading, cut & fill, and demolition activities shall be effectively controlled of fugitive dust emissions utilizing application of water or by presoaking.

   4. With the demolition of buildings up to six stories in height, all exterior surfaces of the building shall be wetted during demolition.

5. When materials are transported off-site, all material shall be covered, or effectively wetted to limit visible dust emissions, and at least six inches of freeboard space from the top of the container shall be maintained.

6. All operations shall limit or expeditiously remove the accumulation of mud or dirt from adjacent public streets at the end of each workday. *(The use of dry rotary brushes is expressly prohibited except where preceded or accompanied by sufficient wetting to limit the visible dust emissions.) (Use of blower devices is expressly forbidden.)*

7. Following the addition of materials to, or the removal of materials from, the surface of outdoor storage piles, said piles shall be effectively stabilized of fugitive dust emissions utilizing sufficient water or chemical stabilizer/suppressant.

8. Within urban areas, trackout shall be immediately removed when it extends 50 or more feet from the site and at the end of each workday.

9. Any site with 150 or more vehicle trips per day shall prevent carryout and trackout.

b. Enhanced Control Measures. The following measures should be implemented at construction sites when required to mitigate significant PM10 impacts (note, the applicable measures are to be implemented in addition to Regulation VIII requirements):

1. Limit traffic speeds on unpaved roads to 15 mph; and

2. Install sandbags or other erosion control measures to prevent silt runoff to public roadways from sites with a slope greater than one percent (1 percent).

New Mitigation Measure Air-2: Additional PM_{10} Control Measures.

The following measures are strongly encouraged at construction sites that are large in area, located near sensitive receptors, or which for any other reason warrant additional emissions reductions:

1. Install wheel washers for all exiting trucks, or wash off all trucks and equipment leaving the site;

2. Install wind breaks at windward side(s) of construction areas;

3. Suspend excavation and grading activity when winds exceed 20 mph; and

4. Limit the area subject to excavation, grading and other construction activity at any one time.

(Regardless of windspeed, an owner/operator must comply with Regulation VIII's 20 percent (20 percent) opacity limitation.)

Noise Measures:

City of Modesto Policies

N-5: The noise ordinance prohibits the loud and raucous operation or use of any of the following before 7:00 AM or after 9:00 PM daily (except Saturday and Sunday and State or federal holidays, when the prohibited time shall be before 9:00 AM and after 9:00 PM):

1. A hammer, or any other device or implement used to pound or strike an object.

2. An impact wrench, or other tool or equipment powered by compressed air.

3. A hand-powered saw.

4. Any tool or piece of equipment powered by an internal-combustion engine such as, but not limited to, chain saw, backpack blower, and lawn mower.

5. Any electrically powered (whether by alternating current electricity or by direct current electricity) tool or piece of equipment used for cutting, drilling, or shaping wood, plastic, metal, or other materials or objects, such as, but not limited to, a saw, drill, lathe, or router.

6. Any of the following: heavy equipment (such as but not limited to bulldozer, steam shovel, road grader, back hoe), ground drilling and boring equipment (such as but not limited to derrick or dredge), hydraulic crane and boom equipment, portable power generator or pump, pavement equipment (such as but not limited to pneumatic hammer, pavement breaker, tamper, compacting equipment), pile-driving equipment, vibrating roller, sand blaster, gunite machine, trencher, concrete truck, and hot kettle pump.

7. Any construction, demolition, excavation, erection, alteration, or repair activity. In the case of urgent necessity and in the interest of public health and safety, the Chief Building Official may issue a permit for exemption from these. Such period shall not exceed three (3) working days in length while the emergency continues but may be renewed for successive periods of three (3) days or less while the emergency continues. The Chief Building Official may limit such permit as to time of use and/or permitted action, depending upon the nature of the emergency and the type of action requested.

All development projects located within the Baseline Developed Area (and Redevelopment Area) are required to incorporate the policies listed below into the project.

N-6: The City of Modesto shall require noise-reducing construction practices to be implemented as conditions of approval for development projects where substantial construction-related noise impacts would be likely to occur (e.g., where construction would include extended periods of pile driving, where construction would occur over an unusually long period, or where noise-sensitive uses like homes and schools would be in the immediate vicinity, etc.). The city should consider potential mitigation measures, including, but not limited to, the following;

1. Construction equipment and vehicles should be equipped with properly operating mufflers according to the manufacturers' recommendations. Air compressors and pneumatic equipment should be equipped with mufflers, and impact tools should be equipped with shrouds or shields.

2. Other proposed uses: the noise/land use compatibility guidelines (i.e., those noise levels which are "conditionally acceptable," "normally Unacceptable," or "clearly unacceptable,") shown in Table 1 and the most recent noise contours for the City shown in Figure VII-1 [of the City's Urban Area General Plan]. (General Plan Policy VII-G.3[a])

N-7: During City review of a proposed project consistent with the updated General Plan, the City of Modesto shall use the following guidelines to decide whether to require additional study and/or mitigation:

1. Single family Residential uses: the Ldn 65 contour, as depicted on the most recent noise contours for the City, shown in Figure VII-1 [of the City's Urban Area General Plan].

2. Other proposed uses: the noise/land use compatibility guidelines (i.e., those noise levels which are "conditionally acceptable," "normally unacceptable," or "clearly unacceptable,") shown in Table 1 and the most recent noise contours for the City shown in Figure VII-1 [of the City's Urban Area General Plan]. (General Plan Policy VII-G.3[b])

N-9: The City of Modesto shall use the most recent noise contour map to implement the requirements of Noise Insulation Standards contained in Title 24 of the California Code of Regulations. (Title 24 applies to multi-family housing, not single family.) Title 24 also specifies minimum values for the sound insulation afforded by interior partitions separating different dwelling units from each other and from interior common space. (General Plan Policy VII-G.3[d])

N-10: For proposed non-residential uses, where noise mitigation is deemed necessary for new developments to meet the exterior noise land use compatibility guidelines (Figure VII-2 [of the General Plan]), the City of Modesto shall require developers to demonstrate that the proposed development will incorporate measures to reduce noise impacts to a less-than-significant level, as follows:

1. Where feasible and consistent with General Plan policy, incorporate setbacks and/or locate less-sensitive uses between a noise source and noise-sensitive uses.

2. Provide (to the extent feasible and consistent with General Plan policy) berms, barriers, or other techniques to shield nose-sensitive uses from noise sources.

3. Incorporate construction techniques to achieve an interior noise limits. One source that can be used for such specifications is the "recommended Maximum Interior Noise Level Criteria for Intermittent Noise," (Table 2, Noise Insulation Problems in Buildings, Paul S. Veneklasen & Associates, January 1973). (General Plan Policy VII-G.3[e])

N-12: In recognition of the conservative methodology used to develop the noise contours shown on Figure VII-1 [of the City's Urban Area General Plan], builders, developers (for private development projects) and the City (for Capital projects) shall be allowed to demonstrate that detailed noise studies and/or mitigation are not necessary because future noise levels would be substantially less than depicted on Figure VII-1 due to, for example, natural shielding (e.g., from intervening topographical features or man-made structures) of a site or inapplicability of assumptions (shown on Table 3-3 of the Master Environmental Impact Report) used to develop the noise contours. (General Plan Policy VII-G.3[g])

Agricultural Land Measures:

None

Water Supply Measures:

City of Modesto Policies

WS-6: Each Comprehensive Plan should include a long-term financing strategy which provides reasonable estimates of costs of on- and off-site infrastructure to support the proposed development pattern. The strategy should generally address public-facility funding, including schools, for any development project which serves to implement the subject Comprehensive Plan. If new public facilities are required which will also serve the broader community, the Comprehensive Plan should include options for broad-based funding mechanisms. (Policy III-D.1[d])

Baseline Developed Area

WS-7: During review of all proposed development, the City shall require, as a condition of approval, that all developments reduce their potable water demand. The City should refer to Table V5-1 in the Final Master EIR for potential techniques to reduce potable water demand. (Policy V-C.2[a])

WS-8: The City of Modesto will encourage the optimum beneficial use of water resources within the City. The City shall strive to maintain an adequate supply of high-quality water for urban uses. (Policy V-C.2[b])

WS-9: The City of Modesto will strive to stabilize groundwater levels and eliminate groundwater overdraft, as part of a conjunctive groundwater-surface water management program. The City shall view regional water resources, such as groundwater, surface water, and recycled wastewater, as an integrated hydrologic system when developing water management programs. (Policy V-C.2[c])

WS-10: The City of Modesto will be the sole provider of municipal and industrial water services to the area within the City's Sphere of Influence. The City will cooperate with the overlying agricultural water providers, MID and TID, and with adjacent municipal and industrial providers for the mutually beneficial management of the limited water resources. The City will also take into consideration its public trust duty with regard to environmental uses of water resources. (Policy V-C.2[d])

WS-11: Water facilities will be constructed, operated, maintained, and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike. (Policy V-C.2[e])

WS-12: The City will continue to establish guidelines, policies, and programs to implement water conservation to the maximum extent feasible. The City shall strive to maximize the utilization of water resources when developing and implementing its Economic Development Strategy. (Policy V-C.2[f])

WS-13: The City supports the local management of groundwater resources, rather than state regulation or adjudication. The City will adopt a Groundwater Management Plan in accordance with AB 3030 and in cooperation with the adjacent and overlying water providers within the groundwater basins the City occupies. (Policy V-C.2[g])

Sanitary Sewer Service Measures:

City of Modesto Policies

SS-4: Under its NPDES permit, Modesto is required to develop, administer, implement, and enforce a Comprehensive Stormwater Management Program to reduce pollutants carried in urban runoff to the maximum extent practicable. The City has adopted a guidance manual specifically to control post-construction urban runoff pollutants from newly developed and redeveloped areas. The manual describes Best Management Practices for source control and treatment control measures for commercial/industrial and multifamily residential sources.

Baseline Developed Area and Redevelopment Area

SS-5: To protect public health and the environment, the City of Modesto will maintain the standards for effluent water and biosolids, from Modesto's wastewater treatment facilities, as established by the Central Valley RWQCB, in compliance with the Federal Clean Water Act, the State Porter-Cologne Act, and their implementing regulations, current and future. (Policy V-D.2[a])

SS-6: Wastewater facilities will be constructed, operated, maintained and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike. In developing implementation plans, considerations shall be given to rehabilitation of essential existing facilities, expansion for current excess demand, and the timely expansion for future demand. (Policy V-D.2[b])

SS-7: The City's wastewater system capacity will be allocated to existing and future residential, commercial and industrial customers. Discharges from environmental cleanup sites may be issued conditional discharges permits subject to the availability of excess treatment capacity. In accordance with federal and state regulations, all discharges to the wastewater system may not, or may not threaten to, upset, interfere, or pass through the wastewater system. (Policy V-D.2[c])

SS-8: Subject to the approval of the Stanislaus County LAFCO, the City of Modesto and the Salida Sanitary District will be the sole providers of wastewater services to the area within the City's Sphere of Influence and sewer service area. (Policy V-D.2[d])

SS-9: The City will encourage the regional beneficial reuse of reclaimed water. The City is committed to development of a full reclamation program in the long term. (Policy V-D.2[e])

SS-10: The City should strive to use land application of biosolids as the most environmentally beneficial reuse of this resource, rather than the disposal options of landfilling or incineration. (Policy V-D.2[f])

SS-11: The City should establish odor buffer zones around primary and secondary wastewater plant, thereby minimizing the likelihood of odors impacting new residential or commercial development. (Policy V-D.2[g])

SS-12: The City should utilize source control and demand management among its tools for accomplishing the most cost-effective wastewater management, protective of public health and the environment. (Policy V-D.2[h])

Sensitive Wildlife and Plant Habitat Measures:

None

Archaeological or Historic Sites Measures:

City of Modesto Policies

Baseline Developed Area

AH-9: For proposed development outside an identified archaeological resource study area (as depicted on Figure 8-1 in the 1995 Master EIR), no further research for prehistoric deposits is warranted unless specific information concerning the known or potential presence of significant cultural resources is identified in future updates at the applicable cultural resource information repository or through formal or informal input received from a qualified source. If previously unknown subsurface cultural resources are discovered during excavation activities, excavation would be temporarily halted and an archaeologist consulted as to the importance of the resources. Should the archaeologist determine that the resources are important, the project sponsor would follow the procedure described in Policy 2(a), above. (General Plan Policy VII-F.2[b])

AH-12: If archaeological resources are discovered at any time during construction, all activity shall cease until the site is surveyed by a qualified archaeologist. The survey shall include mitigation measures, which shall be implemented before construction resumes. The survey shall follow the criteria presented in Appendix K of the State CEQA Guidelines. (General Plan Policy VII-F.2[e])

AH-13: When structures or areas of historical significance more than 50 years old are proposed for demolition or alteration or where construction is proposed within 100 feet of that structure, the applicant shall submit to the City data regarding the structure's history or locations and prepared by a qualified architectural historian. The City shall evaluate the historical significance of the proposal and require measures be implemented to preserve all structures and places it deems historically significant. (General Plan Policy VII-F.2[g])

Mitigation Measure Cultural-1: The Modesto Urban Area General Plan shall be amended to include the following policy VII.F.2[g]:

As an ongoing measure, the City of Modesto shall maintain professional standard inventories of historic resources, such as those conducted by Carey and Company in 1997, with the findings of those inventories concurred by the SHPO and kept on file with the State Office of Historic Preservation. The records will provide a preliminary assessment of eligibility at the initial study stage to indicate whether CEQA protections would apply in the case of a project application or whether the resource has previously been determined ineligible. When no previous survey has been conducted, buildings and structures older than 50 years must be evaluated by a professional historian or architectural historian prior to project approval to determine whether the resource is a historically significant resource, for purposes of CEQA.

When CEQA does apply, the character-defining elements of resources that will be affected should be identified by an architectural historian, city staff member, or other professional qualified under Secretary of Interior Standards to review such projects. It is these elements that are a crucial part of the ability of the resource to convey its historic significance. Projects that would alter character-defining elements would cause a compromise in historic integrity and would constitute a significant impact. Projects that follow Secretary of Interior Standards, in consultation with SHPO, can be considered mitigated to a level of less than significant.

The modification of historic structures and places can be mitigated through the application of existing regulations and consultation with the State Historic Preservation Officer, an interim procedure whereby the City evaluates proposals to modify historic structures and develops a program to reduce the impacts on an individual basis.

Storm Drainage Measures:

City of Modesto Policies

SD-4: Plans and specifications for new stormwater facilities within the City of Modesto are reviewed and approved by the Engineering and Transportation Department. Development of stormwater drainage facilities must be in compliance with the requirements for the installation of Best Management Practices (BMPs) as defined in the City's Comprehensive Stormwater Management Program (CSMP) and as outlined in the City of Modesto Design Standards for Dual Use Flood Control/Recreation Facilities, adopted December 12, 2000.

Baseline Developed Area

SD-5: Two-thirds of the Baseline Developed Area is served by underground injection of urban runoff, commonly termed "rockwells". New rockwells will be discouraged within the Baseline Developed Area. Instead, new storm drainage in the Baseline Developed Area shall be by means of positive storm drainage systems unless the proposed service area is so isolated from surface waters that it is infeasible to provide positive drainage.

The new storm drainage facilities shall consider the drainage facility requirements presented in Table 9-1 of the Master EIR. This policy applies to both positive storm

drainage systems and to new rockwells (which are generally discouraged) in the Baseline Developed Area. (General Plan Policy V-E.2[a])

SD-6: The Modesto Irrigation District shall be consulted during the preparation of drainage studies required by the Urban Area General Plan. (General Plan Policy V-E.2[b])

SD-7: The City of Modesto shall prevent water pollution from urban storm runoff as established by the Central Valley Regional Water Quality Control Board for surface discharges and Environmental Protection Agency for underground injection. (General Plan Policy V-E.2[c])

SD-8: Stormwater drainage facilities shall be constructed, operated, maintained, and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike. In developing implementation plans, consideration shall be given to rehabilitation of existing facilities, remediation of developed areas with inadequate levels of drainage service, and the timely expansion of the system for future development. (General Plan Policy V-E.2[d])

Flooding and Water Quality Measures:

City of Modesto Policies

Flooding – None

Water Quality

FWQ-13: The City is authorized to discharge wastewater and municipal stormwater under a municipal NPDES stormwater permit issued by the Central Valley RWQCB. The NPDES program requires the City to implement BMPs for construction activities, stormwater drainage systems, and municipal operations that effectively reduce pollutant transport in stormwater such as erosion control measures, preventive maintenance procedures, public education, and other, more complex, water quality treatment systems.

The City has developed a Comprehensive Stormwater Management Program (CSWMP) to reduce pollutants in stormwater to the maximum extent practicable with requirements for the appropriate use of BMPs. The program includes public awareness and participation, source control, regulatory restrictions, water quality monitoring, and treatment control. The City recently prepared a guidance manual for the New Development Management Program element of the CSWMP that includes design guidelines for source-control measures and treatment-control measures to specifically control urban-runoff pollutants from new development and redeveloped areas (City of Modesto 2000b).

The New Development Management Program includes BMP requirements based on four types of land use developments (i.e., single family residential, multi-family residential, commercial, and industrial), size of the lot (less than or greater than one acre), and whether the development is in an area served by rockwells and/or City treatment control basins (i.e., stormwater retention/detention basins). Source control measures are generally required for all new development and are defined as operational and/or structural practices that prevent or reduce pollutants at their source.

Source control measures typically consist of good housekeeping practices (spill prevention, proper storage methods, and proper waste cleanup procedures).

Treatment control measures are required when necessary to augment source control measures in preventing stormwater pollution. Treatment control measures capture and treat stormwater runoff through settling, filtration, adsorption, and/or biodegradation. Treated runoff is then either discharged to a surface channel or infiltrated into the groundwater. Several treatment control measures suited for the Modesto area include vegetated swales, vegetated filter strips, media sand filters, infiltration devices (e.g., basins, trenches, porous paving), and detention/retention basins. In addition, all new connections to rockwells must use improved catch basins for treatment control. Detention/retention basins are typically required for large developments and large regional facilities.

FWQ-14: The City requires that new development comply with the Guidance Manual for New Development Stormwater Quality Control Measures. These include the following:

1. Single-family Residential: Source control measures and modified catch basins in rockwell areas; source control measures in areas with treatment control basins; source control measures in areas with less than one acre of direct discharge to the city's storm drainage system or surface waters; and source control measures and treatment control basin in areas with more than one acre of direct discharge.

2. Multi-family Residential: Source and treatment control measures and modified catch basins in rockwell areas; source control measures in areas with treatment control basins; source control measures in areas with less than one acre of direct discharge; and source control measures and treatment control basin in areas with more than one acre of direct discharge.

3. Commercial: Source and treatment control measures and modified catch basins in rockwell areas; source control measures in areas with treatment control basins; and source and treatment control measures in areas of direct discharge.

4. Industrial: Source and treatment control measures and modified catch basins in rockwell areas; source control measures in areas with treatment control basins; and source and treatment control measures in areas of direct discharge.

Baseline Developed Area, Redevelopment Area, and Planned Urbanizing Area

FWQ-16: The City of Modesto shall prevent water pollution from urban storm runoff as established by the Central Valley Regional Water Quality Control Board for surface discharges and the Environmental Protection Agency for underground injection. (General Plan Policy.V.E.2.C)

Parks and Open Space Measures:

None

Schools Measures:

City of Modesto Policies

Public Schools Policies—Baseline Developed Area

S-7: The City shall continue to require that the developer pay, prior to issuance of any building permits, the maximum residential, commercial, and industrial development school fees in effect at the time building takes place. This requirement is in accordance with the provisions of Assembly Bill 2926. (General Plan Policy V-H.2[e])

Police Services:

None

Fire Services:

City of Modesto Policies

Baseline Developed Area, Redevelopment Area and Planned Urbanizing Area

FS-16: Peak Load Water Supply. The City shall ensure that adequate water fire flows are maintained throughout the City and shall regularly monitor fire flows to ensure adequacy. New development shall comply with the minimum fire-flow rates, as presented in Appendix III-A of the Uniform Fire Code. The Fire Chief is allowed by the Uniform Fire Code to alter any published standards. (General Plan Policy IV-D.1[a])

FS-17: Minimum Road Widths and Clearances around Structures. Minimum road widths and clearances around structures shall conform to Section 10.204(a) of the Uniform Fire Code. The Fire Chief is allowed by the Uniform Fire Code to alter any published standards. (General Plan Policy IV-D.1[b])

Generation of Solid Waste

None

Generation of Hazardous Materials

City of Modesto Policies

HM-13: The City shall comply with all existing federal and state laws, which regulate the generation, transportation, storage, and disposal of hazardous materials (General Plan Policy V-M.2 [a]).

HM-14: The City of Modesto should require that businesses and industries using hazardous material provide mitigation measures commensurate with the hazards they bring to the community, in accordance with the applicable Articles and Sections of the most current adopted edition of the Uniform Fire Code (General Plan Policy V-M.2 [b]).

HM-15: In the event that site inspection or construction activities uncover chemical contamination, underground storage tanks, abandoned drums, or other hazardous materials or wastes at a parcel, the inspection report preparer shall so notify the City.

The City shall notify the County Health Services Department. Under the direction of these agencies, a site remediation plan shall be prepared by the project applicant (General Plan Policy V-M.2 [c]).

The plan would (1) specify measures to be taken to protect workers and the public from exposure to potential site hazards and (2) certify that the proposed remediation measures would clean up the wastes, dispose the wastes, and protect public health in accordance with federal, state, and local requirements. Permitting or work in the areas of potential hazard shall not proceed until the site remediation plan is on file with the City.

If a parcel is contaminated to a level that prohibits the proposed use, the potential for reduction of the hazard should be evaluated. Site remediation is theoretically capable of removing hazards to levels sufficiently low enough to allow any use at the site. In practice, the technical feasibility of locating a specific use on a specific site may require restriction to industrial use or a use that involves complete paving and covering of the parcel.

In accordance with OSHA requirements, any activity performed at a contaminated site shall be preceded by preparation of a separate site health and safety plan (prepared by the project applicant and filed with the City) for the protection of workers and the public. All reports, plans, and other documentation shall be added to the administrative record (General Plan Policy V-M.2 [c]).

HM-16: For each specific project that would generate hazardous waste the City shall require, as a condition of building permit and/or business license approval, that the project sponsor prepare a hazardous material transportation program. The transportation program shall identify the location of the new facility or use and designate either (1) specific routes to be used for transport of hazardous materials and wastes to and from the facility, or (2) specific routes to be avoided during transport of hazardous materials and wastes to and from the facility. Routes would be selected to minimize proximity to sensitive receptors to the greatest practical degree. Passage through residential streets should be minimized and parking of waste haulers on residential streets should be prohibited. The City Fire Department shall review and approve the applicant's hazardous material transportation program or, working with the applicant, modify it to the satisfaction of both parties (General Plan Policy V-M.2 [d]).

HM-17: The City shall continue to participate in the existing Household Hazardous Waste Programs, including support of the drop-off facility, continued public information, and participation in the oil and battery collection programs.

HM-18: The City shall comply with Stanislaus County's Hazardous Waste Management Plan, to ensure proper treatment of possible contamination that could spread over City boundaries.

HM-19: Prior to the issuance of all building permits, the City shall identify the site in relation to all CERCLIS sites and to known or suspected uncontrolled or abandoned hazardous waste sites. All projects within 2,000 feet of these facilities shall conduct hazardous materials studies as necessary to identify the type and extent of contamination, if any, and the extent of risk to human health and public safety. If necessary, a remedial action program would be developed and implemented (General Plan Policy V-M.2 [e]).

Stormwater Drainage Policies—Baseline Developed Area

HM-20: Two-thirds of the Baseline Developed Area is served by underground injection of urban runoff, commonly termed "rockwells". New rockwells will be discouraged within the Baseline Developed Area. Instead, new storm drainage in the Baseline Developed Area shall be by means of positive storm drainage systems, unless the proposed service area is so isolated from surface waters that it is infeasible to provide positive drainage.

The new storm drainage facilities shall consider the drainage facility requirements presented in Table 9-1 of the Final Master Environmental Impact Report. This policy applies to both positive storm drainage systems, and to new rockwells (which are generally discouraged) in the Baseline Developed Area, and is subject to the standards listed in the City of Modesto Design Standards for Dual Use Flood Control/Recreation Facilities, adopted December 12, 2000, where applicable.

HM-21: The Modesto Irrigation District shall be consulted during the preparation of drainage studies required by this General Plan.

HM-22: The City of Modesto shall prevent water pollution from urban storm runoff as established by the CVRWCB for surface discharges and Environmental Protection agency for underground injection.

HM-23: Stormwater drainage facilities shall be constructed, operated, maintained and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike. In developing implementation plans, consideration shall be given to rehabilitation of existing facilities, remediation of developed areas with inadequate levels of drainage service, and the timely expansion of the system for future development.

Potential for Landslides and Seismic Activity

City of Modesto Policies

Baseline Developed Area and Planned Urbanizing Area

LSA-8: The City shall continue to use building codes as the primary tool for reducing seismic risk in structures. The Uniform Building Code, which has been adopted by Modesto, Stanislaus County, and other cities in the County, is intended to ensure that buildings resist major earthquakes of the intensity or severity of the strongest experience in California, without collapse, but with some structural as well as nonstructural damage. In most structures, it is expected that structural damage could be limited to repairable damage, even in a major earthquake. (General Plan Policy VI-B.2[a])

LSA-9: The City shall continue to require all new buildings in the City to be built under the seismic requirements of the Uniform Building Code, 1979 (or subsequent) edition. (General Plan Policy VI-B.2[b])

LSA-10: The City shall continue to explore measures to induce building owners to upgrade and retrofit structures to render them seismically safe. (General Plan Policy VI-B.2[c])

LSA-11: Any construction which occurs as a result of the Urban Area General Plan must conform to the current UBC regulations, which address seismic safety of new structures and slope requirements. As appropriate, the City will require a geotechnical analysis prior to tentative map review in order to ascertain site-specific subsurface information necessary to estimate foundation conditions. These geotechnical studies should reference and make use of the most recent regional geologic maps available from the California Department of Conservation Division of Mines and Geology. (General Plan Policy VI-E.1[a.])

LSA-12: Fluvial erosion during construction shall be controlled by a construction erosion control program which shall be filed with the City Public Works & Transportation Department and kept current throughout any site development phase. (General Plan Policy VI-E.2[a])

LSA-13: The erosion control program shall include "best management practices" as appropriate, given the specific circumstances of the site and/or project. Table 9-2 in the Master Environmental Impact Report presents examples of best management practices. (General Plan Policy VI-E.2[b])

LSA-14: Sediment control basins to capture eroded sediments and contain them on the project sites shall be designed to take into consideration appropriate criteria as outlined in Table 9-3 in the Master Environmental Impact Report. (General Plan Policy VI-E.2[c])

Energy

City of Modesto Policies

E-6: The City of Modesto shall require shade trees, where feasible and appropriate, in landscape plans for all new development proposals. The City shall develop shade-tree specifications for different land uses (residential, commercial, parking lots, etc.) including appropriate types of trees (size, deciduous or evergreen, absence of lower branches, etc.), locations (e.g., distance from structures), density (i.e., within a subdivision or parking lot), and orientation (trees on the west side of a building generally provide the most benefit) for use in landscape plans. (Energy Conservation, Policy 1.a)

Planning and Land Use

None

Aesthetics

None

VI. MANDATORY FINDINGS OF SIGNIFICANCE

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, rare, or threatened species, or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☒	☐
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	☐	☐	☒	☐
c) Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☒	☐

Authority: Public Resources Code Sections 21083 and 21087.
Reference: Public Resources Code Sections 21080(c), 21080.1, 21080.3, 21082.1, 21083, 21083.3, 21093, 21094, 21151; *Sundstrom v. County of Mendocino*, 202 Cal.App.3d 296 (1988); *Leonoff v. Monterey Board of Supervisors*, 222 Cal.App.3d 1337 (1990).

Discussion

a) **Less-than-Significant Impact.** As evaluated in this Initial Study, the proposed project would not substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, rare, or threatened species, or eliminate important examples of the major periods of California history or prehistory. However, the proposed project is consistent with the Master EIR impact analysis and the project would not result in any project-specific environmental effects that would substantially affect wildlife habitats or cultural resources beyond those previously described and considered in the Master EIR.

b) **Less-than-Significant Impact.** The proposed project would relocate and expand an existing medical office building through amendment of the project site land use designation to P-D (30). The proposed land use amendment is consistent within the scope of the Master EIR for the purpose of implementing the Urban Area General Plan because the proposed project is an anticipated subsequent project identified in the Master EIR and within the scope of the Modesto Urban Area General Plan Master EIR. All environmental impacts associated with implementation of the proposed project have been adequately and sufficiently analyzed in the Master EIR, including cumulatively considerable impacts (e.g., traffic, air quality). Therefore, the proposed project would

not add considerably to any cumulative impacts as discussed in each of the Environmental Checklist sections contained in this Initial Study.

c) **Less-than-Significant Impact.** The project would not result in environmental effects that would cause substantial adverse direct or indirect effects on human beings. The project would result in similar land uses for the project site. However, removal of existing houses for construction of parking areas would place vehicles in close proximity to existing residences, which are considered sensitive receptors, could degrade air quality, and increase safety hazards that could directly and indirectly effect human beings. However, the proposed project is consistent with the Master EIR impact analysis and the project would not result in any project-specific environmental effects that would substantially affect, directly or indirectly, human beings beyond the analysis of the Master EIR.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-065

A RESOLUTION FINDING THAT THE PROPOSED AMENDMENT TO THE URBAN AREA GENERAL PLAN AND THE 2006 NON-MOTORIZED TRANSPORTATION PLAN ARE WITHIN THE SCOPE OF THE PREVIOUSLY CERTIFIED URBAN AREA GENERAL PLAN MASTER ENVIRONMENTAL IMPACT REPORT (SCH NO. 19990820) AND THAT, PURSUANT TO SECTIONS 15168(C) AND 15182 OF THE CEQA GUIDELINES, NO NEW ENVIRONMENTAL REVIEW IS REQUIRED.

WHEREAS, a General Plan for the City of Modesto entitled "City of Modesto Urban Area General Plan", was adopted by the City Council by Resolution No. 95-409, on August 15, 1995, and as amended by Resolution No. 2003-122 on March 4, 2003, in accordance with Section 65300 of the Government Code; and

WHEREAS, on March 4, 2003, the City Council of the City of Modesto recertified the Final Master Environmental Impact Report ("Master EIR") (SCH No. 1999082041) for the Modesto Urban Area General Plan by Resolution No. 2003-123; and

WHEREAS, Government Code Section 65358 permits the amendment of a General Plan up to four (4) times per calendar year; and

WHEREAS, the Modesto Urban Area General Plan has been further amended by Modesto City Council Resolution Nos. 95-584, 96-20, 96-338, 96-639, 97-3, 97-137, 97-158, 98-293, 99-162, 99-564, 2000-303, 2000-633, 2001-47, 2001-476, 2002-154, 2002-526, 2003-101, and 2003-122, copies of which are on file in the office of the City Clerk; and

WHEREAS, the General Plan has not been amended this calendar year; and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a Master EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact

report and whether the subsequent project was described in the master environmental impact report as being within the scope of the project, and

WHEREAS, the City Council of the City of Modesto has considered an Initial Study, Environmental Assessment No. EA/C&ED No. 2006-44, as described in **Exhibit "1"**, attached hereto and incorporated herein by reference. which concluded that the proposed Amendment to the Urban Area General Plan is within the scope of the previously certified Urban Area General Plan Master Environmental Impact Report (SCH No. 19990820) and that, pursuant to Sections 15168(c) and 15182 of the CEQA Guidelines, no new environmental review is required, and

WHEREAS, by an agenda report to the City Council from the Parks, Recreation and Neighborhoods Department dated December 21, 2006, City staff recommended finding that the proposed Amendment to the Urban Area General Plan and the 2006 Non-Motorized Transportation Plan are within the scope of the previously certified Urban Area General Plan Master Environmental Impact Report (SCH No. 19990820) and that, pursuant to Sections 15168(c) and 15182 of the CEQA Guidelines, no new environmental review is required, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on January 9, 2007, in the Tenth Street Place Chambers located at r1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing of the Council was held for the purpose of receiving public comment on the proposed finding, and

WHEREAS, on January 9, 2007, the City Council of the City of Modesto held a duly noticed public hearing in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California, at which hearing evidence both oral and documentary relating to the finding that the proposed Amendment to the Urban Area General Plan and the 2006 Non-Motorized Transportation Plan are within the scope of the previously certified Urban Area General Plan

Master Environmental Impact Report (SCH No. 19990820) and that, pursuant to Sections 15168(c) and 15182 of the CEQA Guidelines, no new environmental review is required,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby finds and determines as follows:

1. The proposed General Plan Amendment and Non-Motorized Transportation Master Plan are consistent with the Modesto Urban Area General Plan because they will further a goal of the Urban Area General Plan to promote alternative transportation.

2. A General Plan Amendment is needed to add the roadway designation of "Principal Arterial with Bike Lanes" so as to provide a more comprehensive and better-functioning bicycle transportation system within Modesto.

3. A 45-day public review period for the proposed General Plan Amendment was completed and ended November 8, 2006, pursuant to Government Code Section 65352.

4. The proposed General Plan Amendment and Non-Motorized Transportation Master Plan will help promote bicycling and walking as transportation modes in Modesto.

5. The proposed General Plan amendment and Non-Motorized Transportation Master Plan will reduce traffic by promoting bicycling and walking for transportation and by increasing convenience and safety for people who choose to bicycle and walk.

6. The proposed General Plan amendment and Non-Motorized Transportation Master Plan will improve air quality by increasing convenience and safety for people who choose to bicycle and walk within Modesto.

7. The Project is compatible with surrounding, existing and planned land uses; will reduce traffic impact as compared to the Master EIR; will improve air quality; will have no significant effect on existing and planned open space; and will have no significant effect on existing and planned public facilities and public services.

8. In accordance with Sections 15168(c) and 15182 of the California Environmental Quality Act ("CEQA") Guidelines, this Project is within the scope of the projects covered by the Modesto Urban Area General Plan, as amended, and no new environmental document or findings are required by CEQA.

9. There are no substantial changes proposed by the Project which will result in new significant environmental effects or a substantial increase in the severity of previously identified significant effects and, therefore, no major revisions to the Master EIR are required.

10. No substantial changes have occurred with respect to the circumstances under which the Project is undertaken which will result in new significant environmental effects or a substantial increase in the severity of previously identified significant effects and, therefore, no major revisions to the Master EIR are required.

11. There is no new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence when the Master EIR was adopted, which shows any of the following:
    a. One or more significant effects which is not discussed in the Master EIR; or,
    b. Significant effects which were previously examined will be substantially more severe than previously shown; or,

    c. Previously infeasible mitigation measures or alternatives are now feasible and would substantially reduce one or more significant effects of the Project, but the Project proponents decline to adopt the mitigation measure or alternative; or,

    d. Mitigation measures or alternatives which are considerably different from those analyzed in the Master EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

12. The Initial Study, Environmental Assessment EA/C&ED No. 2006-44 provides the substantial evidence to support findings 3-11, noted above.

The foregoing resolution was introduced at the regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

Ayes:	Councilmemebers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
Noes:	Councilmembers:	None
Absent:	Councilmembers:	None

ATTEST: Jean Morris
JEAN MORRIS, City Clerk

APPROVED AS TO FORM

By: _____
SUSANA ALCALA WOOD, City Attorney

City of Modesto

Finding of Conformance to General Plan Master EIR:

Initial Study EA/C&ED No. 2006-44

For the proposed:

Amendment to the Modesto Urban Area General Plan to Add the Roadway Designation of "Principal Arterial with Bike Lanes" and Adopt the 2006 Updated Non-Motorized Transportation Master Plan

Prepared by:
City of Modesto
Parks, Recreation and Neighborhoods Department
September 21, 2006

City of Modesto
Master EIR Initial Study Checklist

I. PURPOSE

CEQA allows for the limited environmental review of subsequent projects under the City's Master EIR. This Initial Study Checklist is used in determining whether the Amendment to the Modesto Urban Area General Plan to Add the Roadway Designation of "Principal Arterial with Bike Lanes" and 2006 Updated Non-Motorized Transportation Master Plan is "within the scope" of the project analyzed in the Modesto Urban Area General Plan Master EIR (SCH# 1999082041) (Public Resources Code section 21157.1). When the Initial Study supports this conclusion, the City will issue a finding of conformity.

A subsequent project is "within the scope" of the Master EIR when:

1. it will have no additional significant effects on the environment that were not addressed as significant effects in the Master EIR; and

2. no new or additional mitigation measures or alternatives are required.

"Additional significant effects" means a project-specific effect that was not addressed as a significant effect in the Master EIR. (Public Resources Code Section 21158(d))

The determination must be based on substantial evidence in the record. "Substantial evidence" means facts, reasonable assumptions predicated upon facts, or expert opinion based on facts. It does not include speculation or unsubstantiated opinion. (CEQA Guidelines Section 15384)

This analysis relies upon the City of Modesto's Final Master Environmental Impact Report for the Urban Area General Plan and related amendments to the Urban Area General Plan, certified March 4, 2003 (SCH #1999082041).

II. PROJECT DESCRIPTION

A. Title: Amendment to the Modesto Urban Area General Plan to Add the Roadway Designation of "Principal Arterial with Bike Lanes" and adopt the 2005 Updated Non-Motorized Transportation Master Plan

B. Address or Location: This project is located within the City of Modesto

C. Applicant: City of Modesto Parks, Recreation and Neighborhoods Department

D. City Contact Person: Doug Critchfield, Manager, Parks Planning and Development

Project Manager: Robert Ford, Project Coordinator
Department: Parks, Recreation and Neighborhoods Department
Phone Number: 209.577.5437
E-mail address: bford@modestogov.com

E. Current General Plan Designation(s): Not applicable

F. Current Zoning Classification(s): Various Zones

G. Surrounding Land Uses: North: Existing urban and rural areas
South: Existing urban and rural areas
East: Existing urban and rural areas
West: Existing urban and rural areas

H. Project Description, including the project type listed in Section II.C (Anticipated Future Projects) of the Master EIR (Attach additional maps/support materials as needed for complete record):

This project will consist of amending the Modesto Urban Area General Plan to add the roadway designation of "Principal Arterial with Bike Lanes" and adopt the 2006 updated Non-Motorized Transportation Master Plan. A Bike Lane is defined as a Class II Bikeway, which provides a striped and stenciled lane for one-way travel on a street or highway. Currently, the General Plan allows bike lanes on Collector and Minor Arterial streets but does not allow bike lanes on Principal Arterial Streets. An amendment to the General Plan is needed to provide a roadway designation that allows bike lanes on Principal Arterial Streets where bicycle facilities will be developed. **The text of the General Plan Amendment is included as Exhibit "A" and is attached at the end of this document.** The General Plan Amendment includes revisions to Chapter V, Section B: Circulation and Transportation, and includes revisions to Figure V-1 Circulation and Transportation Diagram.
An update is needed to the 1996 Non-Motorized Transportation Master Plan in order to provide current information about existing conditions and needs. The updated plan will serve as a blue print to be used by City staff and the development community with regard to the type and location of new bicycle and pedestrian facilities in Modesto. **The 2006 Non-Motorized Transportation Master Plan is included as Exhibit "B" and is attached at the end of this document.**

I. Other Public Agencies Whose Approval is Required:

None.

III. FINDINGS/DETERMINATION (SELECT ONE ON THE BASIS OF THE ANALYSIS IN SECTION IV)

1. ☒ **Within the Scope** - The project is within the scope of the Master EIR and no new environmental document or Public Resources Code Section 21081 findings are required. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

   C. An Initial Study was prepared by the City of Modesto that analyzed whether the proposed subsequent project may cause any significant effect on the environment that was not examined in the MEIR and it has been determined that the project was described in the MEIR as being within the scope of the MEIR.

   D. Based on the Initial Study, the City of Modesto finds and determines:
      a) The proposed subsequent project will have no additional significant effect as defined in CEQA Section 21158 that was not identified in the MEIR.
      b) No new or additional mitigation measures or alternatives are required.

   E. The criteria for currency of the Master EIR were reviewed (section 5 below) and it was determined that the Master EIR is current for all areas of the Initial Study.

2. ___ **Mitigated Negative Declaration Required** - On the basis of the above determinations, the project is not within the scope of the Master EIR. A mitigated negative declaration will be prepared for the project. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

   C. The project will have one or more potential new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures are being required of the project that will reduce the effects to a less-than-significant level.

3. ___ **Focused EIR Required-** On the basis of the above determinations, the project is not within the scope of the Master EIR. A Focused EIR will be prepared for the project. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

C. The project will have one or more new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures or alternatives are required as a result.

Project Manager	Title	Date

4. Within the Scope Analysis of this Document:

The Master EIR permits projects to be found within the scope of the MEIR if certain criteria are met, Basically, if the following statements are found to be true for all 20 sections of this Initial Study, then the project was covered by the MEIR analysis and is within the scope of the MEIR. Any "No" response must be discussed.

		YES	NO
(1)	The lead agency for subsequent projects shall be the City of Modesto or a responsible agency identified in the Master EIR.	☒	☐
(2)	City policies which reduce, avoid or mitigate environmental effects, will continue to be in effect and therefore would be applied to subsequent projects where appropriate. The policies are described in the list of policies in place and mitigation measures attached to the Initial Study template.	☒	☐
(3)	Federal, State, Regional and Stanislaus County regulations do not change in a manner that is less restrictive on development than current law (i.e., would not offer the same level of protection assumed under the Master EIR).	☒	☐
(4)	No specific information concerning the known or potential presence of significant resources is identified in future reports, or through formal or informal input received from responsible or trustee agencies or other qualified sources.	☒	☐
(5)	The development will occur within the boundaries of the City's planning area as established in this Urban Area General Plan.	☒	☐
(6)	Development within the project will comply with all mitigation measures identified in the General Plan Master EIR.	☒	☐

5. Currency of the Master EIR Document

The MEIR should be reviewed on a regular basis to determine its currency, and whether additional analysis/mitigation should be incorporated into the MEIR via a Supplemental or Subsequent EIR (CEQA Section 21157.6). Staff has reviewed sections 1 through 20 of this document in light of the criteria listed below to determine whether the MEIR is current. The analysis contained within the Master EIR is current as long as the following circumstances have not changed. Any no response must be discussed.

		YES	NO
(1)	Certification of the General Plan Master EIR occurred less than five years prior to the filing of the application for this subsequent project.	☒	☐
(2)	This project was described in the Master EIR and its approval will not affect the adequacy of the Master EIR for any subsequent project because the City can make the following findings: .	☒	☐
(3)	No substantial changes have occurred with respect to the circumstances under which the Master EIR was certified.	☒	☐
(4)	No new information, which was not known and could not have been known at the time the Master EIR was certified as complete, has become available.	☒	☐
(5)	Policies remain in place that require site-specific mitigation, and avoidance or other mitigation of impacts as a prerequisite to future development.	☒	☐

IV. ENVIRONMENTAL ANALYSIS

This Initial Study, in accordance with Section 21157.1(b) of the Public Resources Code, analyzes whether this project may cause any project-specific significant effect on the environment that was not examined in the Final Master EIR (MEIR) for the General Plan and whether new or additional mitigation measures or alternatives may be required as a result. The Initial Study thereby documents whether or not the project is "within the scope" of the Master EIR.

Pursuant to Public Resources Code Section 21157.1, no new environmental document or findings are necessary for projects that are determined to be within the scope of the MEIR. Adoption of a notice of conformity after completion of the Initial Study fulfills the City's obligation in that situation.

All environmental effects cited reflect year 2025 build-out of the Urban Area General Plan as identified in the MEIR.

The Master EIR for the General Plan organizes its analysis of environmental impacts into eighteen subject areas. The following analysis is based on the impact analyses contained in Chapter V of the Master EIR. For ease of cross-reference, the sections are numbered in the same order as the analyses in Chapter V.

In addition to the 18 Master EIR subject areas, the Initial Study checklist addresses the issues of land use/planning and aesthetics. The reason for including these additional issues is to ensure that consideration is being given to the full range of subjects of importance contained in Appendix G of the CEQA Guidelines. The format for the land use/planning and aesthetics sections differs from that of the other 18 subject areas since these two subjects were not addressed as distinct subjects in the Master EIR.

1. TRAFFIC AND CIRCULATION

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant and unavoidable traffic and circulation impacts:

Effect: Increased traffic will result in certain roadway segments operating at LOS D or worse.

Effect: The Substantial increase in traffic relative to the existing load and capacity of the street system will cause, violation, either individually or cumulatively, of an LOS standard established by the County CMP for designated roads and highways.

Effect: Creation of need for Capacity-enhancing modifications to existing facilities.

Effect: Increase in energy consumption associated with the operation of highway projects, rail improvements, and aviation facilities.

Effect: Severe contrast with existing neighborhood or area character caused by highway and transit projects.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Traffic and Circulation mitigation measures that are pertinent to this project are found on MEIR pages V-1-15 through V-1-21. All feasible measures appropriate to the project – including any new measures - will be incorporated into or made conditions of approval of this project and will be listed in Section V, Mitigation Measures Applied to Project.

Discussion:

The appropriate mitigation to be applied to this project includes: The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-1.B of the MEIR provides analysis of Traffic and Circulation impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Significance Criteria: A subsequent development project will have a new significant effect on the environment if it would exceed the following criteria:

	YES	NO
(1) The project exceeds the Master EIRs traffic generation assumptions for this site and City Engineering and Transportation staff has determined that the project would have additional project-specific effects that are not avoided or reduced by the Master EIRs program of mitigation measures.	☐	☒

(2)	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).	☐	☒
(3)	Result in inadequate emergency access.	☐	☒
(4)	Result in inadequate parking capacity.	☐	☒

Discussion:

General Plan Amendment (GPA):

(1) The City Public Works Department, Traffic Division has reviewed the project and determined that the project is within the scope of the Master EIR and no further traffic study is required. The design standard for Principal Arterial with Bike Lanes, as shown in Exhibit 1, provides for six travel lanes with a right-of-way width of 127 feet and a design speed of 45 mph. The design standard for Principal Arterial without bike lanes provides for six travel lanes with a right-of-way width of 114 feet and a design speed of 45 mph. This design standard for Principal Arterials with Bike Lanes follows the guidelines within Caltrans' Highway Design Manual (Chapter 1000) for high-speed, high-volume roads, with a five-foot-wide bike lane shown on either side of the roadway. AASHTO's "Guide for the Development of Bicycle Facilities" also recommends this bike lane width as a design standard for roadways that have the vehicle speeds and volumes. The amendment to the Modesto Urban Area General Plan to add the roadway designation of "Principal Arterial with Bike Lanes" will allow for a more complete bicycle transportation grid system, and is necessary and in line with the intent of the California State Legislature (Streets and Highway Code, Sec. 890) "to establish a bicycle transportation system designed and developed to achieve the functional commuting needs of the employee, student, business person, and shopper as the foremost consideration in route selection, to have the physical safety of the bicyclist and the bicyclist's property as a major planning component, and to have the capacity to accommodate bicyclists of all ages and skills. The capacity and efficiency of the Principal Arterial will not be degraded as a result of implementing this policy under the standards proposed.

(2) The project will not substantially increase hazards due to a design feature. However, it is assumed that the project will facilitate more bicycle traffic, and so, would require both drivers and bicyclists to share the road in a safe manner.

(3 & 4) The project would have not affect emergency access nor vehicle parking.

Updated 2006 Non-Motorized Transportation Master Plan (NMTMP):

(1) Adopting the updated NMTMP will continue the intent of the 1996 Non-Motorized Transportation Master Plan to designate certain existing and planned roadways as Class I, II or III bicycle facilities. The proposed adoption of this NMTMP has the potential to impact automobile traffic operations and with implementation, is intended to decrease the amount of automobile traffic by encouraging more pedestrian and bicycle trips within the City of Modesto The proposed NMTMP will impact drivers in that greater attention will be required to accommodate a higher volume of bicycle riders on surface streets.

(2) The project will not substantially increase hazards due to a design feature. However, it is assumed that the project will facilitate more bicycle and pedestrian traffic, and so, would require drivers, pedestrians and bicyclists to share the road in a safe manner.

(3 & 4) The project would not affect emergency access nor vehicle parking.

The general plan amendment to provide for a new design standard for Principal Arterial with Bike Lanes and the proposed adoption of the NMTMP are consistent with the Traffic and Circulation needs section of the MEIR. The Existing Conditions, Impacts Analysis and Mitigation Measures listed in the MEIR for Traffic and Circulation Needs (pages IV-1-1 through IV-1-37) are, therefore, still valid.

2. AIR QUALITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to air quality:

Effect: Projected traffic levels will result in increased ambient carbon monoxide (CO) levels in the project area. This is a significant and unavoidable impact.

Effect: Projected traffic levels will result in increased ROG and NOX levels in the project area. This is a significant and unavoidable impact.

These are also cumulative impacts on air quality.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Air Quality mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-2-11 through V-2-18 of the MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project and are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-2.B of the MEIR provides analysis of Air Quality impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project exceeds the emissions thresholds established for CO and NO_x by the San Joaquin Valley Unified Air Pollution Control District's (SJVUAPCD) adopted CEQA Guidelines.	☐	☒

(2) The project does not incorporate the best management practices for PM_{10} reduction established by the SJVUAPCD. ☐ ☒

(3) The project does not comply with the air quality policies of the Modesto Urban Area General Plan. ☐ ☒

(4) The project would expose sensitive receptors to substantial pollutant concentrations. ☐ ☒

(5) The project would create objectionable odors affecting a substantial number of people. ☐ ☒

Discussion:

GPA:
(1) Based on the City Traffic Engineer's analysis of the proposed General Plan Amendment's effect on Principal Arterials and other roadways level of service and capacity, the proposed project will not increase vehicular volume or speed, will have minimal impact on vehicular traffic operations and will not cause additional traffic-related impacts to air quality beyond those described within the Degradation of Air Quality section of the MEIR.

(2) The project is intended to reduce vehicular traffic and resultant pollutant emissions. One-time impacts to air quality would occur during construction of facilities, and regulations for control of fugitive dust as dictated by the San Joaquin valley unified Air Pollution control District would be adhered to by the contractor.

(3, 4, 5)The project will not negatively affect air-quality policies of the Modesto Urban Area General Plan, will not create any objectionable odors or create any substantial pollutant concentrations. Instead, the project is intended to reduce pollutant concentrations

NMTMP:
(1) The proposed NMTMP has the potential to facilitate more non-motorized modes such as walking and biking, and therefore, would reduce auto trips and improve air quality.

(2) One-time impacts to air quality during construction would be mitigated as described in the paragraph, above.

(3, 4, 5)The project will not negatively affect air-quality policies of the Modesto Urban Area General Plan, will not create any objectionable odors or create any substantial pollutant concentrations. Instead, the project is intended to reduce pollutant concentrations

The existing Conditions, Impacts Analysis and Mitigation Measures listed in the MEIR for Degradation of Air Quality (pages IV-2-1 through IV-2-5) are, therefore, still valid.

3. NOISE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant and unavoidable environmental impacts relative to noise:

Effect: Traffic noise levels for future conditions in the plan area have the potential to result in exceedances of the City's Noise Significance Standards (see Table 3-3 of the MEIR).

Effect: Noise level projections based on the traffic levels anticipated in the General Plan indicate that noise will exceed the City's General Plan and noise ordinance standards.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Noise policies and mitigation measures pertinent to the project being analyzed in this Initial Study are found on pages V-3-10 through V-3-15 of the MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. and any new measures are listed in Section V, Mitigation Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-3.B of the MEIR provides analysis of noise impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project will exceed the standards for noise level and hours of operation established by the Modesto noise ordinance.	☐	☒
(2)	The project will exceed the noise policies of or otherwise be inconsistent with the Modesto Urban Area General Plan.	☐	☒
(3)	The project will result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☒
(4)	The project will result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project.	☐	☒

Discussion:

GPA:
(1) The project will facilitate additional bicycle trips, resulting in lowering noise levels due to a reduction in automobile trips. The Modesto noise ordinance and its standards for noise level and hours of operation will not be exceeded due to this project.

(2) The project has the potential to reduce auto traffic noise and not contribute to any significant increase in noise. The Modesto noise ordinance and its standards for noise level and hours of operation will not be exceeded due to this project.

(3) The project will put more bicycles onto Principal Arterial streets, removing some vehicle trips from the same streets. There will be no increase in ambient noise levels in the project vicinity.

(4) Construction activity associated with bike lanes will result in a temporary increase in ambient noise levels in the project vicinity, but will be mitigated with controlled hours of construction, exhaust mufflers on equipment.

NMTMP:
(1) The project will result in lowering noise levels in that there will be a reduction in automobile trips because of the alternate trips taken by bicycle or by walking. The Modesto noise ordinance and its standards for noise level and hours of operation will not be exceeded due to this project.

(2) Since this is a master plan for non-motorized transportation, the net effect of the project will be to reduce auto traffic noise by a very small amount. With approval of the GPA, the NMTMP will be consistent with the Modesto Urban Area General Plan.

(3) The project will improve modes of transportation involving bicycling and walking. Therefore, there will not be a significant increase in ambient noise levels to the project vicinity above the existing levels.

(4) Construction activity associated with bike lanes will result in a temporary increase in ambient noise levels in the project vicinity, but will be mitigated with controlled hours of construction, exhaust mufflers on equipment.

Because the City's Traffic Engineer has determined that there would not be a significant increase in traffic impacts, the proposed amendment to the General Plan and adoption of the 2006 NMTMP will not cause an increase in the projected generation of traffic-related noise for this area. Therefore, the project will not create additional significant effects and the Mitigation Measures listed in the MEIR for Generation of Noise (pages IV-3-1 through IV-3-33) are still valid.

4. AGRICULTURAL LANDS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to agricultural lands:

Effect: Development within the urbanized Baseline Developed Area and Redevelopment Area will have a less-than-significant impact on agricultural lands.

Effect: Conversion of agricultural land will occur as available developable land is occupied within the City. This is a significant and unavoidable impact.

Effect: Growth within Modesto's planning area would contribute considerably to the loss of agricultural land within Stanislaus County. This is a significant and unavoidable cumulative impact.

b. Master EIR and/or New Mitigation Measures Pertinent to the Project

Agricultural Land mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-4-7 and V-4-8 of the MEIR. All feasible measures appropriate to the project and any new mitigation to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-4.B of the MEIR provides analysis of Agricultural Lands impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project will directly result in the development of land outside the March 2003 planning area boundaries.	☐	☒
(3)	The project will conflict with existing zoning for agricultural use, or a Williamson Act contract.	☐	☒
(4)	The project will Involve other changes in the existing environment which, due to their location or nature, could result in conversion of farmland, to non-agricultural use.	☐	☒

Discussion:

GPA:
(1) The project will allow the installation of bike lanes to Principal Arterial streets within new or expanding areas of the Modesto Urban Area.

(2-3) The project will not result in development of land outside the March 2003 planning area boundaries and will not conflict with existing agricultural use or Williamson Act contract, due to project not being considered growth-inducing.

(4) The project will accompany the construction of paved roadways in planned growth areas, and will not directly result in conversion of farmland to non-farm uses.

NMTMP:
(1) The project will be consistent with the Modesto Urban Area General Plan, but could result in a small increase in development density, if adjacent densities remain consistent with current development densities, and additional roadway is required to be dedicated toward bike lanes or bike paths.

(2-4) The project will not directly result in any land development outside the March 2003 planning area boundaries and will not conflict with existing zoning or Williamson Act contracts. The project could involve the conversion of additional roadway area to non-motorized use, as compared with roadway, only.

The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP will not substantially change the size or configuration of roadway facilities, and will not remove any additional agricultural lands from production not already analyzed by General Plan Master EIR. Therefore, the Existing Conditions, Impacts Analysis, and Mitigation Measures listed in the MEIR for Loss of Productive Agricultural Land (pages V-4-1 through V-4-16) are still valid.

5. WATER SUPPLY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to water supply:

Effect: Urban Area General Plan policies are established to limit groundwater extractions to the safe yield of the aquifer and thereby avoid aquifer over drafting. In addition, the UWMP requires that new urban development would proceed in conjunction with the availability of water supplies and distribution facilities. It is assumed that increased entitlement of surface water supplies such as a water transfer from another water purveyor would undergo independent environmental review pursuant to CEQA. This is a less-than-significant impact.

Effect: Development to the future projected City population would require expansion of the MRWTP to its full 60 mgd capacity, development of additional groundwater wells, and construction of additional water distribution and treatment facilities. Construction of some of the required facilities would most likely require site-specific environmental impact assessments to be conducted under CEQA. Consequently, the potential environmental impacts of the Urban Area General Plan are considered less than significant.

Effect: During drought years, despite available options, significant water shortages are forecast for the San Joaquin River basin by the year 2020. Modesto would make a cumulatively considerable contribution to the cumulative impact on water supply under drought conditions. This is a significant and unavoidable cumulative impact.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Water Supply mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-5-7 through V-5-8 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-5.B of the MEIR provides analysis of Water Supply impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Sufficient water supplies are not available to serve the project from existing entitlements and resources, new or expanded entitlements are needed.	☐	☒

Discussion:

GPA & NMTMP:
(1 & 2) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP would not result in any demand on existing water supplies. Thus the project would not require additional water supplies beyond that identified in the Increased Demand for Water Supplies section of the MEIR for the General Plan. The Existing Conditions, Impacts Analysis and Mitigation Measures listed in the MEIR for Increased Demand for Water Supplies (pages V-5-1 through V-5-13) are, therefore, still valid.

6. SANITARY SEWER SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to sanitary sewer services:

Effect: The City has already begun to implement the provisions of the Wastewater Master Plan (WMP) to meet future demand for sanitary sewer services. As City wastewater treatment facilities are expanded to meet the needs of the Baseline Developed, Redevelopment, and Planned Urbanizing Areas, the City will obtain the necessary wastewater discharge and NPDES permits from the Central Valley RWQCB, as required under Urban Area General Plan Policy V-D.2(a). Implementing the WMP, requirement of Best Management Practices for post-construction activities, as well as the Urban Area General Plan policy cited above, will avoid violation of wastewater discharge requirements. As a result, this impact would be less than significant.

Effect: The City has adopted the WMP specifically to ensure that sewer capacity will match the level of growth projected by the Urban Area General Plan. Development within the Baseline Developed and the Planned Urbanizing Areas that is consistent with the Urban Area General Plan will not have a significant effect on capacity. Urban Area General Plan Policy III-D.1(d) will ensure that development in the Planned Urbanizing Area will fund the necessary improvements. This is a less-than-significant impact.

Note on the WMP Master EIR. The WMP Master EIR identified a number of impacts and mitigation measures. Its mitigation measures have been adopted by the City and are being implemented by the City under the WMP. Those impacts are being independently addressed under that Master EIR and do not need to be considered under this Initial Study. Refer to the WMP Master EIR for details.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Sewer Service mitigation measure(s) pertinent to the project being analyzed in this Initial Study. are found on pages V-6-4 through V-6-7 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-6.B of the MEIR provides analysis of Sanitary Sewer Service impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

	YES	NO
(1) The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒

(2) The project will result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments. ☐ ☒

Discussion:

GPA & NMTMP:
(1 & 2) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP will not increase the City population. Thus, the project will not create any increase in demand for sewer capacity not identified in the MEIR. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for Increased Demand for Sanitary Sewer Services (pages V-6-1 through V-6-12) are, therefore, still valid.

7. SENSITIVE WILDLIFE AND PLANT HABITAT

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to sensitive wildlife and plant habitat:

Effect: Although many sensitive species live in riparian habitats within the planning area, the policies of the plan will ensure that impacts of the Urban Area General Plan will be less than significant.

Effect: Requiring higher residential density than the suburban norm and a compact pattern of growth within the designated planning area to the year 2025 will minimize the City's contribution to the cumulative loss of habitat. Nonetheless, this is a significant and unavoidable impact.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Wildlife and Plant Habitat mitigation measure pertinent to the project being analyzed in this Initial Study are found on pages V-7-19 through V-7-21. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-7.B of the MEIR provides analysis of Wildlife and Plant Habitat impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	Consultation with the California Department of Fish and Game or the U.S. Fish and Wildlife Service determines that the project would have a significant effect on special status species.	☐	☒
(3)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.	☐	☒

Discussion:

GPA:
(1) The improvements proposed by the amendment to the General Plan will not result in expansion of urban development. The proposed amendment will result in the roadway designation of Principal Arterial roadways with bike lanes being consistent with the General Plan.

(2 & 3) The project will not have a significant effect on special status species, nor conflict with any local policy or ordinance such as the General Plan Policy that protects riparian areas.

NMTMP:
(1) The project will provide for Class II and III bicycle improvements within new or expanded roadways, and will provide for off-roadway Class I Bike Pathways. The net result of these improvements may tend to decrease urban densities if Class I pathways and associated parks and green belts accompany the development. However, these improvements will tend to follow urban development and will be consistent with the Modesto Urban Area General Plan

(2 & 3) The project would have no impact to sensitive wildlife or any plant habitat beyond that which was identified in the Loss of Sensitive Wildlife and Plant Habitat section of the MEIR. The Existing Conditions, Impact Analysis, and the Mitigation Measures listed in this section of the MEIR (pages V-7-1 through V-7-29) are, therefore, still valid.

8. ARCHAEOLOGICAL OR HISTORICAL SITES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to archaeological or historical sites:

Effect: If a site-specific project involves the modification or demolition of a qualifying structure more than 50 years in age, then the impact will be significant.

Effect: Areas of high probability for archaeological resources are located within the riparian corridors along the Tuolumne River, Dry Creek, and the Stanislaus River. There, the potential impact comes from earthmoving activities that could result in disturbance of resources or human remains. There is a low probability that archaeological resources will be uncovered in areas outside of the riparian corridors.

Effect: The City Zoning Ordinance requires that when substantial changes to a structure are proposed, the development will be required to comply with other Zoning Ordinance provisions such as parking or landscaping requirements. This could result in modifications to the structure, which substantially reduce its historical significance.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Archaeological or Historic mitigation measures pertinent to the project being analyzed in this Initial Study are found on page V-8-13 and V-8-14 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-8.B of the MEIR provides analysis of Archaeological/Historical impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project would adversely affect a cultural resource that is either listed or eligible for listing in the California Register of Historical Resources, or that is listed by the City of Modesto as a Designated Landmark Preservation Site.	☐	☒

Discussion:

GPA:
(1) & (2): The improvements proposed by the GPA are consistent with the General Plan policy to protect riparian areas along the Dry Creek and Tuolumne River Corridors. The project will not disturb any archaeological sites that have been identified in the Disturbance of

Archaeological and Historic Sites section of the MEIR. The project does not propose to involve the modification or demolition of any qualifying structure over 50 years in age.

NMTMP:
(1) & (2): The improvements proposed by the NMTMP include bike and hiking trails along the creek and river corridors within the city. All improvements will be consistent with the General Plan policy to protect riparian areas along the Dry Creek and Tuolumne River Corridors. The project will not disturb any archaeological sites that have been identified in the Disturbance of Archaeological and Historic Sites section of the MEIR. The project is not expected to involve the modification or demolition of any qualifying structure over 50 years in age.

The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for Disturbance of Archaeological and Historic Sites (pages V-8-1 through V-8-22) are, therefore, still valid.

9. STORM DRAINAGE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to storm drainage:

Effect: The potential impacts on storm water drainage that could occur from the project were qualitatively evaluated with respect to several factors including: extent of the projected increase in urban surface area compared to undeveloped ground; magnitude of projected changes to hydrologic and physical site characteristics of the study area compared to existing conditions; regulatory criteria and guidelines; and professional judgment. Because the Urban Area General Plan includes policies that require new development in all three sections of the planning area to install approved drainage facilities, the potential impacts of the Urban Area General Plan on storm water drainage are considered less than significant.

Effect: The population of Stanislaus County is projected to increase in a fashion similar to that of Modesto, resulting in additional urban development and associated increases in impervious areas and associated urban storm water drainage. Cumulative hydrologic impacts of storm water flows from Modesto urban areas and other areas of the County could occur due to the fixed capacity of MID and TID irrigation canals to convey drainage west to the San Joaquin River. If drainage channels in some areas prove insufficient to handle the increased drainage discharges, existing storm water runoff from urban and agricultural areas during large storm events would have to be interrupted until water levels receded to a point allowing the resumption of discharges to the channel. Ceasing discharges to drainage channels could cause inundation in and around the drainage conveyance pipeline systems, surface drainage channels, detention basins, and other urban areas. This cumulative impact is considered significant and unavoidable.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Storm Drainage mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-9-4 through V-9-8. All feasible measures appropriate to the

project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-9.B of the MEIR provides analysis of Storm Drainage impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project would substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site.	☐	☒
(3)	Create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.	☐	☒

Discussion:

GPA:
(1) The improvements proposed by the GPA would not significantly increase the demand on the storm water drainage system, which is expected to accommodate the small increase in run-off associated with additional pavement.

(2& 3) All projects associated with the GPA will be required to meet local standards for storm drainage and will not result in an increase in the rate or amount of surface runoff in a manner that would result in flooding on- or off-site.

NMTMP:
(1) The improvements proposed by the NMTMP would not significantly increase the demand on the storm water drainage system. Storm water drainage facilities are designed to accommodate run-off, based upon required improvements.

(2) All projects associated with the NMTMP will be required to meet local standards for storm drainage and will not result in a significant increase in the rate or amount of surface runoff that would result in flooding on- or off-site.

(3) Projects associated with the 2006 NMTMP that involve paving for Class II or Class I facilities will result in a small increase in storm runoff, but new storm drainage facilities will be designed to accommodate run-off, based upon required improvements.

Improvement proposed by the GPA and the NMTMP would cause no significant increase in demand for storm drainage that was not already addressed in the MEIR. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for the Increased Demand for Storm Drainage (pages V-9-1 through V-9-13) are, therefore, still valid.

10. FLOODING AND WATER QUALITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to flooding and water quality:

Effect: Increased runoff can accelerate soil erosion, stream channel scouring, and sedimentation of channels, and also increase pollutant transport to waterways. The potential impacts of the project on flooding are considered less than significant because the Urban Area General Plan Update includes policies to restrict development in the floodplain and therefore would avoid exposing persons and property to flood hazards. In addition, new development under the Urban Area General Plan is required to install storm water drainage facilities that restrict the amount of post-development runoff from exceeding pre-development conditions.

Effect: The potential impacts of the project on surface-water quality are considered less than significant because the City policies and capital improvement projects for storm water drainage facilities would minimize discharges of urban pollutants to natural waterways. The City drainage program policies require new development to prepare drainage plans and implement urban runoff control measures; larger Specific Plan developments must have storm drainage systems designed to control pollutant runoff. The City's implementation policies for the municipal NPDES storm water permit require new development to implement an appropriate selection of permanent pollution control measures. Permanent erosion control measures such as seeding and planting vegetation for new cut-and-fill slopes, directing runoff through vegetation, or otherwise reducing the offsite discharge of particulates and sediment are the most effective method of controlling offsite discharges of urban pollutants.

Effect: The City's future development will contribute to cumulative water quality effects. EPA regulations for NPDES storm water permits and new proposed regulatory additions to the rules have become much more comprehensive in recent years and are being implemented to reduce pollutant runoff from both large- and small-scale activities. Implementation of NPDES-permitting programs throughout the county will reduce potential water-quality impacts to a less-than-significant level.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Flooding and Water Quality mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-10-7 through V-10-10 of the MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-10.B of the MEIR provides analysis of Flooding and Water Quality impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project does not comply with the regulatory requirements of the federal Clean Water Act or the State Porter-Cologne Act.	☐	☒
(3)	The project does not comply with Modesto's Guidance Manual for New Development Storm water Quality Control Measures.	☐	☒
(4)	The project would create or contribute runoff water, which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.	☐	☒

Discussion:

GPA:
(1, 2) All projects associated with the GPA will be required to meet local standards for storm drainage and will not result in an increase in the rate or amount of surface runoff in a manner that would result in flooding on- or off-site. The project complies with the requirements of the federal Clean Water Act.

(3) The GPA will comply with the City of Modesto's Guidance Manual for New Development Storm Water Quality Control Measures and with the General Plan policies for handling storm water in Planned Urbanizing Areas, including Section 3.b. on page V-16, which requires positive storm drainage system for new development, and Section 3.c., which requires storm water recharge to groundwater of 80 percent of average annual runoff.

(4) Runoff from paved areas carries some pollution from the pavement, none expected from bike and pedestrian traffic. The small increase is not expected to exceed the capacity of existing drainage facilities, and new facilities would be designed to accommodate expected run-off volumes.

NMTMP:
(1, 2) All projects associated with the NMTMP will be required to meet local standards for storm drainage and will not result in an increase in the rate or amount of surface runoff in a manner that would result in flooding on- or off-site. The project complies with the requirements of the federal Clean Water Act.

(3) The NMTMP will comply with the City of Modesto's Guidance Manual for New Development Storm Water Quality Control Measures and with the General Plan policies for handling storm water in Planned Urbanizing Areas, including Section 3.b. on page V-16, which requires positive storm drainage system for new development, and Section 3.c., which requires storm water recharge to groundwater of 80 percent of average annual runoff.

(4) Run-off from paved areas carries some pollution from the pavement, none expected from bike and pedestrian traffic. The small increase is not expected to exceed the capacity of existing drainage facilities, and new facilities would be designed to accommodate expected run-off volumes.

11. PARKS AND OPEN SPACE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to parks and open space:

Effect: Within the Baseline Developed and Redevelopment Areas, the Urban Area General Plan does not propose any elimination of existing park and/or open space land. Impacts on parks and open space will be less than significant.

Effect: The projected population of the Planned Urbanizing Area is 148,600, requiring 149 acres of neighborhood parks and 298 acres of community parks. The required minimum acreages can be met through the application of existing policies and regulations, including Government Code Section 66474, which require developers to pay Parks Capital Facilities Fees to fund the acquisition of appropriate parkland acreage. This impact is less than significant.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Parks and Open Space Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-11-4 through V-11-19 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to the Project.

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-11.B of the MEIR provides analysis of Parks and Recreation impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

	YES	NO
(1) The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒

Discussion:

GPA:
(1) The improvements proposed by the amendment to the General Plan would improve non-motorized access to the City's parks and parkways, possibly resulting in an increase in park use. Impacts on parks and open space will be less than significant. The project is consistent with the Modesto Urban Area General Plan

NMTMP:
(1) Class I facilities would contribute to recreational opportunities within the city. The project is consistent with the Modesto Urban Area General Plan.

12. SCHOOLS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to schools:

Effect: The estimated increase in population over 1994/1995 would generate an additional 29,200 elementary school students, 7,330 middle school students, and 14,640 high school students above those enrollments. Assuming that existing facilities cannot sufficiently accommodate this increase and that all of the new students would require new school facilities, build out of the General Plan would result in the need for approximately 37 elementary schools, 8 middle schools, and 7 high schools beyond 1994/1995 levels. This would result in a significant impact on schools in that it would exceed current capacity. By statute, this impact is considered to be mitigated below a level of significance by payment of school impact fees and exercise of any or all of the financing options set out in Government Code Section 65997.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan.). As

long as all anticipated subsequent projects apply these policies, no new mitigation is necessary. Further, payment of school impact fees and compliance with SB 50 is statutorily deemed to be full mitigation of school impacts (Government Code Section 65995). The proposed additional school policy will address the situation that would arise should AB 50 be repealed. It will authorize impact fees or other methods to finance additional school facilities.

The following schools mitigation measure(s) are pertinent to the project being analyzed in this Initial Study. See pages V-12-4 through V-12-7 of the MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. Those measures will be listed in Section V, Mitigation Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-12.B of the MEIR provides analysis of. Schools impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant; project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project does not comply with SB 50/Proposition 1A funding provisions, or succeeding measures which provide that compliance results in less-than-significant impacts on schools.	☐	☒

Discussion:

GPA:
(1, 2) Improvements shown on Figure V-1, would be developed in conjunction with new development proposals, but would not result in new development.

NMTMP:
(1, 2) Construction of any of the projects mentioned within the 2006 NMTMP within new development areas would generally be associated with the generation of new population that would increase demand for use of school facilities. The project improvements would not increase population, nor result in any significant increase to demand on school facilities. Thus the Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for the Increased Demand for Schools (pages V-12-1 through V-12-11) are, therefore, still valid.

13. POLICE SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to police services:

Effect: The 1995 Master EIR identified two impacts on the demand for police services; however, it concluded that no significant impact, based on the mitigation measures identified in the 1995 Master EIR, would occur. Those mitigation measures are now policies of the Urban Area General Plan. The impact is less than significant.

Effect: Within the Planned Urbanizing Area, complying with the Urban Area General Plan policies, particularly the policy that requires a long-range financing strategy for each Comprehensive Plan Area, will allow the City to provide the resources necessary to extend service to the newly growing Planned Urbanizing areas. These policies reduce the impact to a less-than-significant level.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Police Services mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-13-3 and V-13-4 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-13.B of the MEIR provides analysis of police services impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project would result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	☒

Discussion:

GPA & NMTMP:

(1) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP project are all within the current City boundaries and would not change

the gross acreage, land use designations or infrastructure of the General Plan. . There will be a small increase to service demand for policing, due to the increase in trail and bike lane rider-ship, walking and other non-motorized means of transportation.

(2) The project will result in a small increase in demand for police services, associated with new growth areas. The Urban Area General Plan policy requiring a long-range financing strategy for each Comprehensive Plan Area will allow the City to provide for the resources and funding necessary to extend Police services. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for the Increased Demand for Police Services (pages V-13-1 through V-13-7) are, therefore, still valid.

14. FIRE SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to fire services:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. Impacts on fire services of development in these areas will be less than significant.

Effect: In the Planned Urbanizing Area, the Urban Area General Plan would result in the need for additional fire protection services due to increases in the number of employees, permanent population, and associated improvements. City policy requires that fire protection be in place concurrent with construction in the Planned Urbanizing Area. This policy will be implemented with the adoption of future Comprehensive Plans in the Planned Urbanizing Area. This impact would be less than significant.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Fire Services mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-14-3 through V-14-5 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project. are listed in Section V, Mitigation Measures Applied to Project:

Discussion:
The project will add no significant impacts beyond those identified in the Master EIR, therefore no mitigation is required.

c. Project-Specific Effects

Section V-14.B of the MEIR provides analysis of fire services impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project would result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	☒

Discussion:

GPA & NMTMP:
(1) City policy requires that fire protection be in place concurrent with construction in the Planned Urbanizing Area. This policy will be implemented with the adoption of future Comprehensive Plans in the Planned Urbanizing Area. This impact would be less than significant.

(2) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP will result in a small increase in demand for Fire Protection services, associated with new growth areas. The Urban Area General Plan policy requiring a long-range financing strategy for each Comprehensive Plan Area will allow the City to provide for the resources and funding necessary to extend Fire Protection services. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for the Increased Demand for Police Services (pages V-13-1 through V-13-7) are, therefore, still valid.

15. SOLID WASTE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to solid waste:

Effect: Since the project would exceed available landfill capacity, it is identified as a significant impact. The Fink Road Landfill may be closed by the time the City reaches build out, unless an expansion is approved by the County and the Integrated Waste Management Board. As the waste stream generated increases with population, additional landfills and methods for diversion would have to be utilized. The project will also generate the need for additional collection and transfer facilities. This impact is significant and unavoidable. The impact would be less than significant at such time as the Fink Road Landfill expansion is approved.

Effect: The project makes a considerable contribution to the cumulative impact on landfill capacity of development in Stanislaus County. This impact is significant and unavoidable.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Solid Waste Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study. are found on pages V-15-5 and V-15-6 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Applied to Project:

Discussion:

The appropriate mitigation to be applied to this project includes: None.

c. Project-Specific Effects

Section V-15.B of the MEIR provides analysis of solid waste impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The County is unable to expand its solid waste disposal capacity and the project would result in waste stream levels that exceed disposal capacity.	☐	☒

Discussion:

GPA & NMTMP:
(1 & 2) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP project are all within the current City boundaries and would not change the gross acreage, land use designations, infrastructure or circulation system of the General Plan, and would not cause any increase in generation of solid waste. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for the Generation of Solid Waste (pages V-15-1 through V-15-10) are, therefore, still valid.

16. HAZARDOUS MATERIALS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to hazardous materials:

Effect: The impacts of the project relative to hazardous materials are less than significant, based on the existing regulatory framework. New development will be required to comply with regulations monitoring and controlling the handling and use of hazardous and toxic materials.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under federal, state and county policies and regulations, and the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Hazardous Materials Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-16-9 through V-16-12 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The appropriate mitigation to be applied to this project includes: None.

c. Project-Specific Effects

Section V-16.B of the MEIR provides analysis of hazardous materials impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project does not comply with all applicable federal, state, and county standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes.	☐	☒
(3)	The project contains a contaminated site not identified as of March 2003.	☐	☒
(4)	The project would emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.	☐	☒
(5)	The project would be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and as a result, would create a significant hazard to the public or the environment.	☐	☒

Discussion:

GPA & NMTMP:

(1) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP project are all within the current City boundaries and would not cause a significant increase in generation of Hazardous Materials. The Existing Conditions, Impacts analysis and the Mitigation Measures listed in the MEIR for the Generation of Hazardous Materials (pages V-16-1 through V-16-14) are, therefore, still valid.

(2) Since any new development will be required to implement the policies in place under federal, state and county policies and regulations, and the Modesto Urban Area General Plan, the project does comply with all applicable federal, state and county standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes.

(3) The project does not contain a contaminated site as of May, 2006.

(4) The project will include construction with asphalt and asphaltic emulsion materials, typical with road paving activities, near residential, commercial and school facilities. Best practices will be employed by all paving contractors for the handling, storage, and disposal of these materials, as per City of Modesto Standard Specifications and the California Dept. of Transportation (Caltrans).

(5) The improvements proposed by the GPA and the adoption of the NMTMP project are all within the current City boundaries. The project will not be located on a site, which is included on a list of hazardous materials sites complied pursuant to Government Code Section 65962.5 and as a result, will not create a significant hazard to the public or the environment.

17. LANDSLIDES AND SEISMIC ACTIVITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to landslides and seismic activity:

Effect: There are areas of known sand and gravel resources within the Baseline Developed Area and Redevelopment Area. Future development will be subject to SMARA requirements, therefore, the project impact will be less than significant.

Effect: There are areas of known sand and gravel resources within the Planned Urbanizing Area. Future development will be subject to SMARA requirements, therefore, the project impact will be less than significant.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan. These

are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Landslide and Seismic Activity Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-17-6 and V-17-7 of the MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section V, Mitigation Measures Applied to Project:

Discussion:

The appropriate mitigation to be applied to this project includes: None.

c. Project-Specific Effects

Section V-17.B of the MEIR provides analysis of landslides and seismic impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project would be located on soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.	☐	☒

Discussion:

GPA & NMTMP:
(1 & 2) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP project are all within the current City boundaries and would not change the gross acreage, land use designations, infrastructure or circulation system of the General Plan. The MEIR analysis shows that because the land is essentially flat, Uniform Building Code requirements have been addressed, and the nearest earthquake fault line is over 15 miles west of the Modesto Urban Area, there will be no additional potential for exposing people to landslides or earthquake related hazards such as liquefaction. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the MEIR for Landslide and Seismic Activity (pages V-17-1 through V-17-12) are, therefore, still valid.

18. ENERGY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to energy:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. New development within the Redevelopment Area will comply with Title 24 standards as well as City Urban Area General Plan policies. Impacts on energy by development in these areas (i.e., changes in levels of use above the current baseline) will be less than significant.

Effect: Build out under the Urban Area General Plan will utilize an estimated 1,400 million cubic feet per month of natural gas, 1,300 million kilowatt hours (kwh) of electricity per year and 650,000 gallons of gasoline per day. PG&E has indicated that they have at the current time sufficient supplies of natural gas to serve the increased natural gas demands of the project. At present, gasoline supplies are apparently sufficient to serve the gasoline demands of the project. Title 24 of the California Code of Regulation, which ensures that the project will not exceed local, state, and federal energy standards. The impact is less than significant.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The following energy mitigation measure(s) are pertinent to the project being analyzed in this Initial Study. See page V-18-3 of the MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. Those measures will be listed in Section V, Mitigation Applied to Project:

Discussion:

The appropriate mitigation to be applied to this project includes: None.

c. Project-Specific Effects

Section V-18.B of the MEIR provides analysis of energy impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less than significant unless:

	YES	NO
(1) The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒

Discussion:

GPA & NMTMP:
(1) The improvements proposed by the amendment to the General Plan and by the adoption of the 2006 NMTMP project are all within the current City boundaries and would not change the gross acreage, land use designations, infrastructure or circulation system of the General Plan. Thus, the project is consistent with the analysis in the General Plan MEIR. Utility companies serving the Modesto Urban Area indicated, during MEIR preparation, have stated that development of the urban area would result in a less than significant impact on demands for energy. The Existing Conditions, Impacts Analysis and the Mitigation Measures listed in the

MEIR for Energy (pages V-18-1 through V-18-7) are, therefore, still valid. Mitigation Measures for air quality and traffic would also help to mitigate energy impacts.

19. PLANNING AND LAND USE

The Master EIR was certified for the Modesto Urban Area General Plan. The significant effects described in the 18 subject areas contained in the Master EIR are based on the planning policies and diagrams adopted as part of the General Plan. Planning and land use were not among the 18 subject areas analyzed in the Master EIR because they essentially defined the project being evaluated in the EIR.

a. Project-Specific Effects

Determination of project effects will be based on the following threshold. A project-specific effect is less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒
(2)	The project includes a substantive amendment to the Modesto Urban Area General Plan.	☐	☒
(3)	The project would physically divide an established community	☐	☒

Discussion:

GPA & NMTMP:

(1-3) The proposed project is consistent with the General Plan and does require a minor amendment to the General Plan to add a road designation of 'Principal Arterial with Bike Lanes'. The project would not divide an established community.

20. AESTHETICS

The Master EIR was certified for the Modesto Urban Area General Plan. The significant effects described in the 18 subject areas contained in the Master EIR, are based on the planning policies and diagrams adopted as part of the General Plan. At that level of detail, no significant effects on aesthetics were identified.

a. Project-Specific Effects

Determination of project effects will be based on the following threshold. A project-specific effect is less than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	☒

(2) The project would have a substantial adverse effect on a scenic vista. ☐ ☒

(3) The project would substantially degrade the existing visual character or quality of the project site and its surroundings. ☐ ☒

(4) The project would create a new source of substantial light and glare, which would adversely affect day or nighttime views in the area. ☐ ☒

Discussion:

GPA:

(1) The improvements proposed by the GPA are all within the current City boundaries and would be consistent with the Modesto Urban Area General Plan. The addition of bicycle lanes is consistent with the General Plan as a non-motorized form of transportation.

(2) The improvements proposed by the GPA may be adjacent to an existing scenic vista. Bike lanes would add bike riders to a roadway and would have minimal adverse impact to one's visual experience of a scenic vista.

(3) The project will not substantially degrade the existing visual character or quality of the City of Modesto. Non-motorized transportation bike lanes are essentially flat surfaces, with occasional directional and informational signage above grade.

(4) Although the GPA will construct some additional paving associated with bicycle lanes, there will be no additional source of lighting beyond that of typical street lighting.

NMTMP:

(1) The improvements proposed by the NMTMP are all within the current City boundaries and would be consistent with the Modesto Urban Area General Plan. The addition of bicycle lanes and is consistent with the General Plan as a non-motorized form of transportation.

(2) The improvements proposed by the NMTMP may pass through (bike path) or be adjacent to (bike lane) an existing scenic vista. The impact of a bike path within a scenic corridor, where a scenic vista may be enjoyed, would be considered a minimal adverse effect due to lack of many above-ground facilities associated with the path.

(3) The project will not substantially degrade the existing visual character or quality of the City of Modesto. Class I and Class II bike facilities are essentially flat surfaces, with occasional directional and informational signage above grade

(4) The NMTMP will construct some additional paving for Class I and Class II bike facilities, street and pathway lighting. Pathway lighting would be under 12-feet in height, shielded and designed to prevent glare into surrounding neighborhoods. Street lighting would typically be mounted on 25-foot poles, would primarily serve the street and neighborhood, and would be equipped to prevent glare into the neighborhoods. Therefore, the project will not create substantial light and glare which could adversely affect day or nighttime views in the area.

V. MITIGATION MEASURES APPLIED TO THE PROJECT

If the Initial Study results in the determination that a Finding of Conformance can be adopted for the proposed project Section A below applies. If the Initial Study results in the determination that a Finding of Conformance cannot be adopted and a Mitigated Negative Declaration/EIR must be prepared for the project then Section B, below applies.

A. Master EIR Mitigation Measures Applied to the Project

Pursuant to CEQA Section 21157.1(c), in order for a Finding of Conformance to be made, all feasible measures from the Master EIR appropriate to the project shall be incorporated into the project. The following adopted General Plan Policies and Master EIR Mitigation Measures shall be made part of the project prior to approval by means of conditions of project approval or incorporation into the appropriate document or plan:

All applicable and appropriate mitigation measures have been applied to the project (see mitigation measures listed below).

B. New or Additional Mitigation Measures or Alternatives Required

Where the project's effects would exceed the specific thresholds defined for each environmental category, a mitigated negative declaration or Focused EIR must be prepared. Staff has reviewed the project against those thresholds set forth in the Master EIR for all applicable categories in this Initial Study.

A Mitigated Negative Declaration/EIR shall be prepared for the project and the following additional project-specific mitigation measures listed below are necessary to reduce the identified new significant effect:

Traffic and Circulation Measures:

None.

Air Quality Measures:

None.

Noise Measures:

None.

Agricultural Land Measures:

None.

Water Supply Measures:

None.

Sanitary Sewer Service Measures:

None.

Sensitive Wildlife and Plant Habitat Measures:

None.

Archaeological or Historic Sites Measures:

None.

Storm Drainage Measures:

None.

Flooding and Water Quality Measures:

None.

Parks and Open Space Measures:

None.

Schools Measures:

None.

Police Services:

None.

Fire Services:

None.

Generation of Solid Waste

None.

Generation of Hazardous Materials

None.

Potential for Landslides and Seismic Activity

None.

Energy

None.

Planning and Land Use

None.

Aesthetics

None.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-066

A RESOLUTION APPROVING AN AMENDMENT TO CHAPTER V OF THE MODESTO URBAN AREA GENERAL PLAN TO ADOPT CHANGES TO THE CIRCULATION AND TRANSPORTATION ELEMENT AND DIAGRAM.

WHEREAS, a General Plan for the City of Modesto entitled "City of Modesto Urban Area General Plan", was adopted by the City Council by Resolution No. 95-409, on August 15, 1995, and as amended by Resolution No. 2003-122 on March 4, 2003, in accordance with Section 65300 of the Government Code; and

WHEREAS, on March 4, 2003, the City Council of the City of Modesto recertified the Final Master Environmental Impact Report ("Master EIR") (SCH No. 1999082041) for the Modesto Urban Area General Plan by Resolution No. 2003-123; and

WHEREAS, Government Code Section 65358 permits the amendment of a General Plan up to four (4) times per calendar year; and

WHEREAS, the Modesto Urban Area General Plan has been further amended by Modesto City Council Resolution Nos. 95-584, 96-20, 96-338, 96-639, 97-3, 97-137, 97-158, 98-293, 99-162, 99-564, 2000-303, 2000-633, 2001-47, 2001-476, 2002-154, 2002-526, 2003-101, and 2003-122, copies of which are on file in the office of the City Clerk; and

WHEREAS, the General Plan has not been amended this calendar year; and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a Master EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the project, and

WHEREAS, on January 9, 2007, by Resolution No. 2007-065, the City Council of the City of Modesto considered an Initial Study, Environmental Assessment No. EA/C&ED No. 2006-44, which concluded that the proposed Amendment to the Urban Area General Plan (the "Project") is within the scope of the previously certified Urban Area General Plan Master Environmental Impact Report (SCH No. 19990820) and that, pursuant to Sections 15168(c) and 15182 of the CEQA Guidelines, no new environmental review is required, and

WHEREAS, by an agenda report to the City Council from the Parks, Recreation and Neighborhoods Department dated December 21, 2006, City staff recommended approval of the proposed amendment to the Modesto Urban Area General Plan, as described in **Exhibit "1",** attached hereto and incorporated herein by reference, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on January 9, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing of the Council was held for the purpose of receiving public comment on the proposed amendment to the Modesto Urban Area General Plan, and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby adopts the proposed Amendment to the Urban Area General Plan as described in Exhibit "1", attached hereto and incorporated herein by reference.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the it hereby finds and determines as follows:

1. The proposed General Plan Amendment is consistent with the Modesto Urban Area General Plan because it will further a goal of the Urban Area General Plan to promote alternative transportation.

2. A General Plan Amendment is needed to add the roadway designation of "Principal Arterial with Bike Lanes" so as to provide a more comprehensive and better-functioning bicycle transportation system within Modesto.

3. The proposed General Plan Amendment will help promote bicycling and walking as transportation modes in Modesto.

4. The proposed General Plan amendment will reduce traffic by promoting bicycling and walking for transportation and by increasing convenience and safety for people who choose to bicycle and walk.

5. The proposed General Plan amendment will improve air quality by increasing convenience and safety for people who choose to bicycle and walk within Modesto.

6. The Project is compatible with surrounding, existing and planned land uses; will reduce traffic impact as compared to the Master EIR; will improve air quality; will have no significant effect on existing and planned open space; and will have no significant effect on existing and planned public facilities and public services.

The foregoing resolution was introduced at the regular meeting of the Council of the City of Modesto held on 9th day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

Councilmembers:	Ayes:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
Councilmembers:	Noes:	None
Councilmembers:	Absent:	None

ATTEST: Jean Morris
JEAN MORRIS, City Clerk

APPROVED AS TO FORM

By: _____
SUSANA ALCALA WOOD, City Attorney

CHAPTER V

COMMUNITY SERVICES AND FACILITIES

A. INTRODUCTION

Chapter V, Community Facilities and Services, describes the community services and infrastructure needed to support the physical community developed through Chapter III.

The policies in this Chapter provide guidance for conformance with Article 7 of the Government Code (Administration of General Plans), particularly Section 65401 (Review of Public Works Projects for conformity with the Plan) and Section 65402 (Acquisition and Disposal of Real Property).

The distinctions between Community Services and Community Facilities are not critically important; they are distinguished in this Chapter for categorical purposes only. The important issue is that both Services and Facilities, as Community Infrastructure, are provided concurrent with need, to support the physical development, and ongoing maintenance, of the community. For this reason each of the Sections below are tailored for use in either the Baseline Developed Area, or the Planned Urbanizing Area, as those concepts are defined in Chapter II, Community Growth Strategy.

B. CIRCULATION AND TRANSPORTATION

1. Overview

The Circulation Element was first required by state law in 1955 (Government Code Section 65302(b)). Its purpose was to develop a balanced, multi-modal transportation system, within local jurisdictions. Modesto has discussed circulation in the early General Plans of 1959 and 1965. In 1974 a combined Land Use and Circulation Elements to the Modesto Urban Area General Plan was adopted. In 1986, the Circulation Element updated the circulation portion of the 1974 Land Use and Circulation Elements.

This Section presents, as required by Section 65302(b) of the Government Code, "the general location and extent of existing and proposed major thoroughfares, transportation routes, terminals, and other local public utilities and facilities, all correlated with the land use element of the plan [Chapter III of this General Plan]."

2. Circulation and Transportation Diagram

Figure V-1 presents the Circulation and Transportation Diagram which describes the proposed general location and extent of existing and proposed major thoroughfares, transportation routes, terminals, and other local public facilities within the Modesto Urban Area. The Diagram conforms to Section 65302(b) of the Government Code, and is hereby adopted and incorporated into the Modesto Urban Area General Plan.

Street designations outside the General Plan boundary shown in Figure V-1 are illustrative only, and subject to the other jurisdictions.

The word "Diagram" is distinguished from "Map" in the context of a California Attorney General Opinion (67 OPS.CAL.ATTY.GEN.75 (3/7/84)), to provide a certain limited degree of flexibility in applying the Circulation and Transportation Designations to specific streets.

3. Circulation and Transportation Designations (shown on Diagram)

With the exception of local streets, the following Designations, along with typical right-of-way requirements, are presented on the Circulation and Transportation Diagram. These Designations conform to Section 65302(b) of the Government Code, and are hereby adopted and incorporated into the Modesto Urban Area General Plan.

a. Freeway - This classification defines the highest volume, total access-control highways with high design speeds (55-65 mph). Freeways are an important part of the transportation network for urban, inter-city, and inter-regional movement of people and goods.

b. Expressways - This classification defines high volume, access-controlled roadways which do not allow for pedestrian or bicycle movements in the traveled way. The location, class, and number of lanes for expressway alignments are shown in the Circulation and Transportation Diagram, Figure V-1. In addition, Figure V-2 presents expressway design features which should be incorporated into the construction of future expressways.

(1) "Class A" Expressway is an access-controlled roadway with design speeds of 50-55 mph. The typical right-of-way is 110 or 135 feet (4 or 6 lanes, respectively) between intersections and 175 or 300 feet at interchanges (4 or 6 lanes, respectively).

(2) "Class B" Expressway is defined as a partial access-controlled roadway with signalized intersections at major streets and right-turn-only access to collector streets. The design speed will be 45-50 mph. The typical right-of-way is 110 or 135 feet (4 or 6 lanes, respectively) between intersections and 134 or 159 feet at intersections (4 or 6 lanes, respectively).

State Highway 219 (Kiernan Avenue, between Highway 99 and McHenry Avenue) will be a Class B expressway, with a right-of-way of 181 feet as specified by Caltrans.

(3) "Class C" Expressway is defined as a limited access-controlled roadway. The design speed is 40-45 mph. The typical right-of-way is 110 or 135 feet between intersections (4 or 6 lanes, respectively) and 134 or 159 feet Note: Class B or C Expressways on limited rights-of-way may be 100 feet for four lanes and 124 feet for six lanes, respectively.

c. Arterial Streets - This classification defines moderate-to high-volume streets with a primary function of providing mobility and a secondary function of land access. Arterial streets serve the major centers of activity of the urban area and provide mobility of people and goods. There are two classes of arterial streets:

(1) ~~(1)~~ Principal Arterial streets have six travel lanes with no bicycle lanes. The design speed is 45 mph. The typical right-of-way is 114 feet.

(2) Principal Arterial With Bike Lane streets have six lanes with bicycle lanes. The design speed is 45 mph. The typical right-of-way is 127 feet.

(~~3~~2) Minor Arterial streets have four travel lanes. Minor arterials can provide for bicycle lanes. The design speed is the same as principal arterials. The typical right-of-way is 100 feet.

d. Collector Streets - This classification defines low-traffic-volume streets which can also serve pedestrian and bicycle traffic. Collector streets provide traffic circulation within residential neighborhoods, and commercial and industrial areas.

Collector streets distribute trips from the arterials through the area to their ultimate destination and collect traffic from local streets and channel it into the arterial streets. There are two classes of collector streets:

(1) A major collector street is a four-lane facility, with a design speed of 25-35 mph on a typical right-of-way of 84 feet without bicycle lanes or 96 feet with two, 6-foot bicycle lanes.

(2) A minor collector street is a two-lane facility, with a design speed of 25-30 mph on a typical right-of-way of 60 feet without bicycle lanes or 72 feet with two, 6-foot bicycle lanes.

e. Local Streets - This classification applies to low-volume streets which are two-lane roadways. Local streets primarily permit direct access to abutting land uses and connections to the higher order roadways. Local streets offer the lowest level of mobility and usually contains no bus routes. The right-of-way should be narrow enough, and design speeds low enough, to discourage through traffic.

4. Policies Relating to Street Designations

a. State Highway - This classification defines any street which is acquired, laid-out, constructed, improved or maintained as a state highway pursuant to constitutional or legislative authorization. The street can be a freeway, expressway, arterial or other roadway classification. The right-of-way, design and construction on a State Highway should follow state standards. The improvement and addition of freeway interchanges should be made when required by future traffic demands.

b. Streets in Comprehensive Plans - Any Comprehensive Plan may experiment with differing rights-of-way and cross sections for the five Circulation and Transportation Designations.

c. Expressways – The City's General Plan provides for a system of expressways throughout the City. The City will continue to include these expressways in its Circulation and Transportation plan and to implement them in cooperation with the development community according to applicable design standards.

1. The City shall regulate and limit the number and design of expressway access locations in order to ensure the overall operational viability of expressways in the community.

2. Any consideration of access to expressways shall be contingent on the ability of an applicant to provide a properly designed solution consistent with the adopted City standard specifications for access to Class B or Class C expressways. The City Engineer may approve variations and deviations from adopted standard specifications pursuant to section 7-1.701(I)(2) of the Municipal Code. Consideration of a variation and/or deviation from adopted standard specifications shall be subject to environmental review pursuant to the California Environmental Quality Act (CEQA).

3. Any access to expressways from private parcels shall be at the sole expense of the private party, including any reconstruction of the expressway which may be necessitated.

4. The City may allow expressway access along either Class B or Class C expressways to non-residential uses on a case-by-case basis when conditions A and B are met, or condition C is met or condition D is met as noted below:

A. When an applicant demonstrates to the City Council's satisfaction that economic purposes are clearly restricted by denial of access to a particular parcel.

B. When an applicant demonstrates to the City Council's satisfaction that there are either no or only highly restrictive alternative access solutions available to a particular parcel under consideration.

C. For infill site developments, when an applicant demonstrates to the City Council's satisfaction that the economic benefits derived from development of the remnant parcel overrides the need to limit access to that parcel.

D. It is recognized that City of Modesto emergency facilities, such as police and fire stations, will be located from time to time on expressways, and further, that direct access is desirable. In these cases, direct access is allowed and shall be designed in cooperation with the Engineering and Transportation Department. Said design shall have City Council approval prior to implementation.

5. The City shall adopt access management guidelines and design standards for expressway access. The purpose of the guidelines and design standards is to provide safe ingress and egress to adjacent parcels while at the same time not degrading the carrying capacity, flow and efficiency of the expressway. Such access management guidelines and design standards conform to design criteria and standards as set forth by the American Association of State Highway and Transportation Officials (AASHTO).

5. Circulation and Transportation Policies - Overall

a. The streets and highways system should be coordinated with Caltrans', the County's, and other jurisdictions' existing facilities and plans. The adoption of a regional expressway system by Stanislaus Council of Governments (StanCOG) should be supported, and the components of the regional system which lie within the City's Sphere Of Influence should be incorporated into the City's Circulation and Transportation Diagram. The expressway system should be designed to accommodate mass transit.

b. Transportation Control Measures (TCMs) should be implemented where feasible or mandated by other agencies, to reduce vehicle miles traveled, vehicle idling, or traffic congestion. Alternatives to the drive-alone auto mode, such as mass transit, ride sharing, non-motorized transportation, and telecommuting should be encouraged. In addition, the City should encourage innovative means to reduce traffic congestion and enhance air quality, such as teleconferencing centers, fiber optic communication networks, development of the Non-Motorized Transportation System as outlined in the 2006 Non-Motorized Transportation Plan figures 5.1 and 5.2 and trip reduction programs.

c. Transportation Demand Management (TDM) measures will be encouraged to directly affect trip makers' choice of travel mode and the routes and time of day for trips. Transportation Demand Management has as its purpose the reduction in the number of vehicle trips being made on the street network. Typical types of TDM measures would be promotion of transit, car pooling or van pooling, non-motorized transportation, and pricing of parking to make these alternative modes of transportation more attractive and cost competitive.

~~d.~~ The City hereby defines and authorizes the use of a "Plan Line." The Plan Line is a ~~process which~~process that specifically defines the location of center lines, alignments, rights-of-way, cross-sections and intersections for future or proposed ~~roadways~~roadways and non-motorized transportation right-of-ways. The purpose of a Plan Line is to provide adequate right-of-way for future growth needs and to protect the right-of-way from encroachment. Adopted Plan Lines shall be incorporated into development plans to define specific requirements for dedicating the right-of-way for street purposes and to implement Circulation and Transportation Policies of the General Plan.

e. The highest possible levels of traffic service should be maintained on City roadways, consistent with the financial resources reasonably available to the City and without unreasonably burdening property owners or developers with excessive roadway improvement costs.

GPA 01-02 (09/11/01)

Data from the General Plan Traffic Analysis, described in The Traffic Appendix of the Master Environmental Impact Report, as updated from time-to-time, shall be utilized to evaluate the effectiveness of traffic mitigation measures adopted by the City Council.

f. Where safety and traffic operations are not compromised, in-fill and redevelopment projects will be exempted from the City's street width and right-of-way standards if those standards exceed the original standards under which the adjacent streets were constructed. This exemption shall not apply to other street improvement standards, such as, but not limited to, drainage, structural requirements, curbs, gutters, sidewalks, and lighting. This exemption shall not apply on State Highways or where Plan Lines have been adopted.

g. The City's circulation system should facilitate a rapid response by emergency vehicles and should accommodate school buses. Factors should include adequate road widths and corner radii in street designs to ensure that the appropriate fire equipment and school buses can negotiate City streets.

h. Development should be designed in a way that will encourage walking as an alternative mode to the automobile for transportation. Safe and convenient pedestrian facilities should be provided in residential, commercial and other areas when necessary.

i. ~~The use of the bicycle~~Non-motorized transportation, such as the bicycle, shall be promoted as an alternative mode of transportation. An adequate and safe ~~bicycle~~ non-motorized transportation system ~~should~~ shall be provided to connect residential areas with shopping and employment areas in and adjacent to the City for present and future transportation needs. Right-of-way for ~~bicycle~~non-motorized usage ~~should~~ shall be considered in the planning of new streets and in street improvements. Facilities for mode transfer from ~~bicycle~~ non-motorized to park-and-ride lots, transit, and rail ~~should~~ shall be considered and provided when necessary.

j The City should encourage the effort to make a safe, efficient and effective rail service possible by increasing the frequency, speed, and comfort of its passengers. The City recognizes and encourages a safe and convenient interface among rail, bus, automobile and non-motorized traffic. The following forms of rail service are particularly encouraged:

k. "In the case of a conflict between motorized and non-motorized transportation modes, roadway and right-of-way features will be added or altered to protect pedestrians and bicyclists, as well as provide for improved safety for motorized traffic consistent with Urban Area General Plan goals."

(1) Amtrak. The City supports the relocation of the Riverbank Station to Modesto on the north side of Parker Road.

(2) Inter-regional Rail Service. The City supports the rerouting of the San Joaquin's rail service to serve the downtown area and the intermodal facilities and creation of passenger commute rail service from Modesto to San Joaquin County, then to Sacramento and over the Altamont Pass to the Bay Area.

(3) Light Rail Transit. The City should support a light rail transit system when the urban form warrants it and where it is feasible. Mass transit, including light rail, should be considered for the Virginia Avenue corridor of the Union Pacific rail lines, to connect downtown with future commercial and industrial development in the northern portion of the Modesto Urban Area.

(4) Freight Rail. The City encourages the extended and increased use of rail as an alternative transportation mode for the movement of goods. In addition, the City supports the intermodal linkage of "truck on rail" as a technique for reducing through-truck traffic on highway corridors.

(5) Any necessary crossings of the Santa Fe Railroad corridor shall be closely coordinated with the Atchison, Topeka and Santa Fe Railway Company. In 1995, the AT&SF Company indicated that it would oppose at-grade crossings, but would cooperate fully with the construction of any grade separations over or under Santa Fe's rail line.

k. Neighborhood street networks will be provided in new development, which permit local trips to be completed as much as possible without the use of collector streets and arterial streets.

l. The City should carry out a citywide transportation improvement plan to accommodate peak hour traffic flow on arterial streets and major collector streets. This plan may include additional lanes, striping, and turning pockets.

m. The City will work with Caltrans to promote the application of advanced technology to help manage congestion, and enhance roadway capacity and safety. Known as "Intelligent Transportation Systems" (ITS), the program includes the following components:

(1) Advanced Traffic Management Systems (ATMS), which maximize capacity of the transportation system, and involves using technology to manager traffic

flow, disseminate real-time travel information to travelers, improving emergency response, and coordinate inter-agency traffic management.

(2) Advanced Traveler Information Systems (ATIS), which provides on-board navigation that can provide congestion and accident information and alternative travel routes.

(3) Commercial Vehicle Operation (CVO), which restricts commercial vehicles from operating during commute peak hours, and helps transportation companies track their vehicles.

(4) Advanced Vehicle Control Systems (AVCS), which use on-board and in-road guidance systems to optimize vehicle speed and movement.

n. The City shall develop guidelines for private property access to the expressway, arterial and collector street system. These guidelines will provide for reasonable, safe and coordinated driveway access while maintaining smooth and safe traffic flow along the City's major streets. These guidelines will address the number, location, design and operation of driveways for each class of roadway.

o. The City shall provide a balanced, feasible and well-maintained system of transportation for motorized and non-motorized modes.

p. The City of Modesto Non-Motorized Transportation Master Plan (updated 2006) provides guidelines and policies that pertain to the development of the non-motorized transportation system, and is a critical reference document which should be relied upon in the development of the City's circulation system. The City of Modesto Non-Motorized Transportation Master Plan (updated 2006) figures 5.1 and 5.2 are hereby adopted and incorporated into the Modesto Urban Area General Plan as sheet numbers 3 & 4 of Figure V-1, Circulation and Transportation Diagram.

6. Circulation and Transportation Policies - Redevelopment Area and Baseline Developed Area

a. Individual development projects that could affect conditions on traffic facilities predicted by the General Plan Traffic Analysis to achieve LOS "D" or better in the year 2025 (as shown in the Traffic Appendix of the Master EIR) cannot cause, without further study, conditions to be worse than LOS "D" at any time prior to the year 2025. If implementation of this Level of Service is impractical or infeasible, subsequent environmental review, including a Comprehensive Traffic Study, will be required.

The subsequent environmental review may take the form of:

(1) A mitigated negative declaration, if feasible mitigation measures or alternatives will be incorporated to avoid the worsening of the LOS standards

presented in the Traffic Appendix of the Master EIR. (Section 21157.5(a) of CEQA.)

(2) A Focused EIR, if mitigation measures cannot avoid the worsening of the LOS Standards presented in the Traffic Appendix of the Master EIR. (Section 21157.5(b) of CEQA.)

The Comprehensive Traffic Study shall include appropriate measures to update the General Plan Traffic Analysis for all subsequent Comprehensive Plans, and for development within the affected Baseline Developed Area and Redevelopment Area.

b. Individual development projects that could affect conditions on traffic facilities predicted by the General Plan Traffic Analysis to achieve LOS "E" (as shown in the Traffic Appendix of the Master EIR) shall not, without further study, cause conditions on those facilities to exceed LOS "E" at any time prior to the year 2025. If implementation of this Level of Service is impractical or infeasible, subsequent environmental review, including a Comprehensive Traffic Study, will be required.

The subsequent environmental review may take the form of:

(1) A mitigated negative declaration, if feasible mitigation measures or alternatives will be incorporated to avoid the worsening of the LOS standards presented in the Traffic Appendix of the Master EIR. (Section 21157.5(a) of CEQA.)

(2) A Focused EIR, if mitigation measures cannot avoid the worsening of the LOS Standards presented in the Traffic Appendix of the Master EIR. (Section 21157.5(b) of CEQA.)

The Comprehensive Traffic Study shall include appropriate measures to update the General Plan Traffic Analysis for all subsequent Comprehensive Plans, and for development within the affected Baseline Developed Area and Redevelopment Area.

c. Individual development projects that could affect conditions on traffic facilities predicted by the General Plan Traffic Analysis to achieve LOS "F" (as shown in the Traffic Appendix of the Master EIR) shall not, without further study, cause further substantial degradation of conditions. Further substantial degradation shall be defined as an increase in the peak hour vehicle/capacity (v/C) ratio of 0.05 or greater for roadway segments or intersections whose v/C ratio is estimated to be 1.00 or higher in 2025 by the traffic model. If implementation of this Level of Service is impractical or infeasible, subsequent environmental review, including a Comprehensive Traffic Study, will be required.

The subsequent environmental review may take the form of:

(1) A mitigated negative declaration, if feasible mitigation measures or alternatives will be incorporated to avoid the worsening of the LOS standards presented in the Traffic Appendix of the Master EIR. (Section 21157.5(a) of CEQA.)

(2) A Focused EIR, if mitigation measures cannot avoid the worsening of the LOS Standards presented in the Traffic Appendix of the Master EIR. (Section 21157.5(b) of CEQA.)

The Comprehensive Traffic Study shall include appropriate measures to update the General Plan Traffic Analysis for all subsequent Comprehensive Plans, and for development within the affected Baseline Developed Area and Redevelopment Area.

d. Designated City staff will review future development project proposals within the Baseline Developed Area, on a case-by-case basis. The following criteria will be applied to each proposal, and a determination made by the Engineering and Transportation Director, regarding the acceptable or appropriate level of project impact on the circulation network.

(1) For proposed development projects that conform to the General Plan-approved land use for the site, it is assumed that the adopted performance standards for the circulation system within the area of impact will be maintained. For such projects, the designated City staff will establish an appropriate scope of study for a "Site Access Study" which may address project impacts to adjacent or nearby intersections, as described in Policies 6-a through 6-c.

(2) The "Site Access Study" shall, at a minimum, analyze, and resolve the following:

(a) impacts to roadway intersection that are adjacent to the project site.

(b) impacts to other intersections considered to have a key role in regulating access to the project site or substantial traffic flow between the project site and a key arterial roadway.

(c) impacts to and design needs for access between internal and off-site vehicular circulation, and linkages to off-site bicycle/pedestrian circulation systems, and transit services.

(d) on-site parking needs and impacts to off-site parking, when applicable.

(e) other operational or safety-related concerns and issues, including site access.

(3) The proposed development project will be designed to incorporate all recommendations of the "Site Access Study."

(4) If implementation of the definitive recommendations of the Site Access Study is impractical or infeasible, a Focused Environmental Impact Report, including a Comprehensive Traffic Study will be required. That Study shall include appropriate measures to update the General Plan Traffic Analysis for all subsequent Comprehensive Plans, and for development within the affected Baseline Developed Area and Redevelopment Area.

(5) For projects which do not conform to the General Plan-approved land use, further, supplemental environmental review may be necessary, in accordance with Section 22157.1(d) of the Public Resources Code.

e. Data from the General Plan Traffic Analysis, described in the Traffic Appendix of the Master EIR, shall be utilized to evaluate the effectiveness of the Policies presented above.

7. Circulation and Transportation Policies - Planned Urbanizing Area

a. Prior to the adoption of each Comprehensive Plan, a "Comprehensive Traffic Study" shall be prepared, to the satisfaction of the Engineering and Transportation Director, and be included in a Focused EIR for each respective Comprehensive Plan.

b. The Comprehensive Traffic Study shall include the following components:

(1) Sufficient analysis and mitigation measures to ensure that the Level of Service "D" Standard is maintained on all Comprehensive Plan area roadways and intersections. A determination of which external links and intersections require study and impact assessment shall be made by the Engineering and Transportation Director.

(2) If the identified mitigation measures cannot feasibly achieve the traffic performance standard for internal and external roadways in the opinion of the Engineering and Transportation Director, then the Comprehensive Traffic Study shall include appropriate measures to update the General Plan Traffic Analysis and findings for all subsequent Comprehensive Plans, and for development within the Baseline Developed Area and Redevelopment Area.

c. For individual proposed projects that conform to a Comprehensive Plan's land use designations (for amount and type of land use) a subsequent, Site Access Study may be prepared. Each Site Access Study should, at a minimum, focus on the following issues:

(1) Impacts to roadway intersections that are adjacent to the project site.

(2) Impacts to and design needs for access between internal and off-site vehicular circulation, and linkages to bicycle/pedestrian circulation systems and transit services.

(3) On-site parking needs.

(4) Other safety-related concerns.

Conceivably, the Comprehensive Traffic Study may contain sufficient detail to obviate some or all portions of a "Site Access Study."

d. Data from the General Plan Traffic Analysis, described in the Traffic Appendix of the Master EIR, shall be utilized to evaluate the effectiveness of the Policies presented above.

e. For projects which do not conform to the General Plan-approved land use, further, supplemental environmental review may be necessary, in accordance with Section 21157.1(d) of the Public Resources Code.

8. Implementation

a. From time to time, the City may adopt subsequent master plans, short-range transit plans, or other policy documents to implement some or all of the policies listed above. These subsequent policy documents, such as the Capital Improvement Program and individual street construction projects, will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

C. COMMUNITY FACILITIES - WATER

1. Overview

Water is probably the most critical natural resource in California. The City of Modesto has teamed up with the Modesto Irrigation District (MID) and Del Este Water Company to develop a new surface water supply, ultimately a 60 million-gallon-per-day (MGD) water treatment plant. This will be used to stabilize the groundwater overdraft the City was experiencing. This conjunctive groundwater-surface water management plan will allow Modesto to continue to serve current customers and plan for future expansion. A similar strategy is being developed with Turlock Irrigation District (TID) for the Modesto Urban Area south of the Tuolumne River.

The City is also participating in the drafting of a Regional Groundwater Management Plan for the two groundwater basins it straddles. The municipal and irrigation water purveyors are developing the groundwater management plans for the mutual beneficial management of the limited groundwater resources.

This Section addresses the requirements of Government Code Section 65302(d) pertaining to the "conservation, development, and utilization of ... water."

2. Water Policies - Baseline Developed Area

a. During review of all proposed development, the City shall require, as a condition of approval, that all developments reduce their potable water demand. The City should refer to Table 5-1 in the Final Master Environmental Impact Report for potential techniques to reduce potable water demand.

b. The City of Modesto will encourage the optimum beneficial use of water resources within the City. The City shall strive to maintain an adequate supply of high quality water for urban uses.

c. The City of Modesto will strive to stabilize groundwater levels and eliminate groundwater overdraft, as part of a conjunctive groundwater-surface water management program. The City shall view regional water resources, such as groundwater, surface water and recycled wastewater, as an integrated hydrologic system when developing water management programs.

d. The City of Modesto will be the sole provider of municipal and industrial water services to the area within the City's Sphere of Influence. The City will cooperate with the overlying agricultural water providers, MID and TID, and with adjacent municipal and industrial providers for the mutually beneficial management of the limited water resources. The City will also take into consideration its public trust duty with regard to environmental uses of water resources.

e. Water facilities will be constructed, operated, maintained and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike.

f. The City will continue to establish guidelines, policies and programs to implement water conservation to the maximum extent feasible. The City shall strive to maximize the utilization of water resources when developing and implementing its Economic Development Strategy.

g. The City supports the local management of groundwater resources, rather than state regulation or adjudication. The City will adopt a Groundwater Management Plan in accordance with AB 3030, and in cooperation with the adjacent and overlying water providers within the groundwater basins the City occupies.

3. Water Policies - Planned Urbanizing Area

a. All of the Water Policies for the Baseline Developed Area apply within the Planned Urbanizing Area.

b. The City of Modesto shall coordinate land development projects with the expansion of water treatment and supply facilities.

4. Implementation

From time to time, the City may adopt subsequent plans or policy documents such as a Groundwater Management Plan or a Water Master Plan to implement some or all of the policies listed above. These subsequent policy documents will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

D. COMMUNITY FACILITIES - WASTEWATER

1. Overview

Wastewater collection and treatment is an essential community service to protect the public health and environment and to foster economic vitality. The objective of the City's wastewater system is to meet increasingly strict wastewater regulations in a cost-effective manner. As water becomes increasingly scarce in California, reclaiming wastewater will create opportunities to optimize the region's water resources. Similar opportunities exist for the beneficial reuse of biosolids and methane, and other residuals of wastewater treatment.

This Section addresses the requirements of Government Code Sections 65302(a), relating to liquid waste disposal facilities and 65302(d), relating to the reclamation of water and the "prevention and control of the pollution of streams and other waters." Wastewater will be considered as one part of integrated regional water resource management.

2. Wastewater Policies - Baseline Developed Area

a. To protect public health and the environment, the City of Modesto will maintain the standards for effluent water and biosolids, from Modesto's wastewater treatment facilities, as established by the Central Valley Regional Water Quality Control Board, in compliance with the Federal Clean Water Act, the State Porter-Cologne Act, and their implementing regulations, current and future.

b. Wastewater facilities will be constructed, operated, maintained and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike. In developing implementation plans, consideration shall be given to rehabilitation of essential existing facilities, expansion for current excess demand, and the timely expansion for future demand.

c. The City's wastewater system capacity will be allocated to existing and future residential, commercial and industrial customers. Discharges from environmental cleanup sites may be issued conditional discharge permits subject to the availability of excess treatment capacity. In accordance with federal and state regulations, all

discharges to the wastewater system may not, or may not threaten to, upset, interfere, or pass through the wastewater system.

d. Subject to the approval of the Stanislaus Local Agency Formation Commission, the City of Modesto and the Salida Sanitary District will be the sole providers of wastewater services to the area within the City's Sphere Of Influence and sewer service area.

e. The City will encourage the regional beneficial reuse of reclaimed water. The City is committed to development of a full reclamation program in the long term.

f. The City should strive to use land application of biosolids as the most environmentally beneficial reuse of this resource, rather than the disposal options of landfilling or incineration.

g. The City should establish odor buffer zones around primary and secondary wastewater plants, thereby minimizing the likelihood of odors impacting new residential or commercial development.

h. The City should utilize source control and demand management among its tools for accomplishing the most cost-effective wastewater management, protective of public health and the environment.

3. Wastewater Policies - Planned Urbanizing Area

a. All of the Wastewater Policies for the Baseline Developed Area apply within the Planned Urbanizing Area.

b. The City of Modesto will require each new development project to be served with public sanitary sewers.

c. The City of Modesto will coordinate land development proposals with the expansion of wastewater facilities.

Figure V-3 presents a diagram that indicates the sanitary sewer trunks necessary to serve each Comprehensive Planning District listed in Chapter III.

4. Implementation

From time to time, the City may adopt subsequent plans or policy documents, such as a Wastewater Master Plan, to implement some or all of the policies listed above. These subsequent policy documents will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

E. COMMUNITY FACILITIES - STORM WATER

1. Overview

Modesto's storm drainage facilities have had a unique history, but changing regulations require a change in how drainage is provided. In 1994, Modesto complied with new federal storm water runoff quality regulations by obtaining its first National Pollutant Discharge Elimination System (NPDES) storm water permit, which requires many new Best Management Practices to be implemented to control runoff quality. Two-thirds of the City is served by rockwells which are regulated by federal underground injection control regulations. Increasingly strict regulations and unacceptable life-cycle costs for rockwells have led the way to a new strategy for storm water management: positive pipe lines, detention and/or retention basins to maximize groundwater recharge and water quality; and limited discharge to surface streams. Rockwells will be allowed only in infill areas isolated from surface discharge routes.

This Section addresses the requirements of Government Code Section 65302(d) pertaining to the "conservation, development and utilization of natural resources, including water and its hydraulic forces..." and the "prevention and control of the pollution of streams and other waters." This section addresses the management of both the storm water quantity and quality as it relates to both surface waters and groundwater. Storm water will be considered as one part of integrated regional water resource management.

2. Storm Water Drainage Policies - Baseline Developed Area

a. Two-thirds of the Baseline Developed Area is served by underground injection of urban runoff, commonly termed "rockwells". New rockwells will be discouraged within the Baseline Developed Area. Instead, new storm drainage in the Baseline Developed Area shall be by means of positive storm drainage systems, unless the proposed service area is so isolated from surface waters that it is infeasible to provide positive drainage.

   The new storm drainage facilities shall consider the drainage facility requirements presented in Table 9-1 of the Final Master Environmental Impact Report. This policy applies to both positive storm drainage systems, and to new rockwells (which are generally discouraged) in the Baseline Developed Area.

b. The Modesto Irrigation District shall be consulted during the preparation of drainage studies required by this General Plan.

c. The City of Modesto shall prevent water pollution from urban storm runoff as established by the Central Valley Regional Water Quality Control Board for surface discharges and Environmental Protection Agency for underground injection.

d. Storm water drainage facilities shall be constructed, operated, maintained and replaced in a manner that will provide the best possible service to the public, given the financial abilities and constraints of the City and of the private sector alike. In developing implementation plans, consideration shall be given to rehabilitation of existing facilities, remediation of developed areas with inadequate levels of drainage service, and the timely expansion of the system for future development.

3. Storm Water Drainage Policies - Planned Urbanizing Area

a. All of the Storm Water Drainage Policies for the Baseline Developed Area apply within the Planned Urbanizing Area.

b. The City of Modesto shall require each new development area to be served with positive storm drainage systems. A positive storm drainage system may be comprised of catch basins, pipe lines, channels, recharge/detention basins and pumping facilities which discharge storm water to surface waters of the state. The positive storm drainage facilities shall consider the requirements presented in Table 9-1 of the Final Master Environmental Impact Report.

c. The City of Modesto shall require positive storm drainage facilities in the Planned Urbanizing Area to accomplish storm water recharge to groundwater of 80% of the average annual runoff. Recharge shall be typically accomplished at recharge/detention basins, designed to be in compliance with applicable federal and state water quality regulations for both groundwater and surface water. The City shall update its Drainage Master Plan to cover the entire area within the City's Sphere of Influence.

d. New areas shall be designed so that runoff in excess of groundwater recharge in Policy 3.c. shall be discharged to waters of the state in a manner not exceeding the undeveloped storm hydrograph.

e. Dual-use flood control/recreation facilities shall be developed (dual-use facilities) as part of the storm drainage system. Dual-use facilities maximize efficient use of land and funds by satisfying needs for water quality, flood control, recreation and aesthetics within a single consolidated facility.

f. Dual-use facilities shall be designed and constructed in accordance with the standards in the "Design Standards for Dual Use Flood control/Recreation Facilities" manual.

g. New developments shall be required to implement an appropriate selection of permanent pollution control measures in accordance with the City's implement-tation policies for the municipal NPDES stormwater permit. Permanent erosion control measures such as seeding and planting vegetation for new cut-and-fill slopes, directing runoff through vegetation, or otherwise reducing the offsite discharge of particulates and sediment are the most effective method of controlling offsite discharges of urban pollutants.

4. Implementation

A storm water management program (SWMP) should be prepared by the City, potentially incorporating those measures listed in Table 9-4 in the Master Environmental Impact Report. The storm water management program will be considered an "anticipated subsequent project" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

F. COMMUNITY FACILITIES - MODESTO CITY-COUNTY AIRPORT

1. Overview

Section 65302.3 of the Government Code requires the City's General Plan to be consistent with the Airport Land Use Plan for the Modesto City-County Airport. This Airport Land Use Plan was adopted by the Airport Land Commission on August 3, 1978, in accordance with Section 21675 of the Public Utilities Code.

2. Modesto City-County Airport Policies - Baseline Developed Area

Since the Airport is located in the Baseline Developed Area, the following policies apply to the Airport and the area surrounding it.

GPA 03-01 (03/04/03)

a. The City encourages aviation services at the Modesto City/County Airport and promotes airline service that meets the present and future needs of the community. The City should pursue greater inter-regional air service to the extent that it is economically viable.

b. Land use around Modesto City-County Airport will be in accordance with the Stanislaus County's Airport Land Use Commission Plan (ALUC) adopted in accordance with Section 21676 of the Public Utilities Code. The ALUC plan provides for the orderly growth of the Airport and the area surrounding the Airport within the jurisdiction of the Airport Land Use Commission, and will safeguard the general welfare of the inhabitants within the boundary of influence and the public in general.

c. Mitigation measures suggested by the Airport Master Plan and related documents should be considered at the implementation of inter-regional air service, including a voluntary noise reduction program for residential units impacted by noise levels that exceed acceptable state standards.

3. Implementation

From time to time, the City may adopt subsequent development plans or policy documents to implement some or all of the policies listed above. These subsequent policy documents,

including revisions to the Airport Land Use Plan, the Airport Master Plan, and various development approvals in or near the Airport, will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

G. COMMUNITY FACILITIES - OPEN SPACE AND PARKS

1. Overview

An Open Space Plan is mandated by Section 65563 of the California Government Code. This mandate recognizes that open space is a limited and valuable resource that must be conserved wherever possible. In Modesto, open space is provided through a comprehensive network of regional, community, and neighborhood parks.

Community facility policies and standards should be considered flexible enough in order to adapt to new trends, take advantage of new or different recreation or open space opportunities, develop special facilities, recycle old parks and fine tune facilities and programs to unique circumstances and conditions. Standards may deviate from minimum when special opportunities or needs arise that would provide enhanced facilities or services to the community.

Regionalization and consolidation of the planning and management of Community Facilities and Services will be continually evaluated as all the communities in Stanislaus County continue to grow and require similar facilities and services.
The "Tuolumne River", "Dry Creek" and " Stanislaus River" Comprehensive Planning Districts described in Chapter III, present focused open space policies applicable in those open space areas. Additional Open Space Policies are presented in Chapter VII.

2. Open Space and Parks Policies - Baseline Developed Area

a) All acreage standards are expressed as net acreage. This means that additional acreage must be added to the net park acreage for off-site requirements, such as street right-of-way, in order to satisfy the minimum standard. Minimum acreage standards will be increased if necessary to accommodate the development standards for the park.

b) Figure V-5 presents Park Planning Areas for the Baseline Developed Area. With regards to acreage, service area, location and street frontage standards, the existing park system shown on Figure V-4 shall be considered adequate and acceptable, as is, with the following exceptions, by Park Planning Area designation:

- Bret Harte
- Shackleford
- Tide Water Industrial
- Burbank
- Maze Wren

- Woodland
- College West
- North East McHenry
- Empire East
- Empire West
- Airport

Within these Park Planning Areas, the open space and parks system is NOT considered adequate and acceptable as is and the City will endeavor to develop facilities in accordance with all of the Open Space and Parks policies and Community and Neighborhood Park standards that apply to the Baseline Developed Area. However, the City recognizes and accepts that it may not be possible to conform precisely to all policies and meet all standards in total because of prior development patterns and policies that were not under the City's control.

c. The City will endeavor to plan, acquire, and develop parks and recreation facilities adjacent to schools in order to maximize the potential for joint use of adjoining City and School District open space and recreation facilities.

d) With the exception of School District open space, only acreage owned or otherwise controlled exclusively by the City in perpetuity and planned to be developed and operated for the express and primary purpose of providing recreation facilities as set forth in the Neighborhood and Community Park standards outlined in the General Plan, will count toward minimum acreage standards. Acreage planned and developed primarily for other purposes such as trails and elements of drainage systems shall not count toward meeting minimum standards for Neighborhood and Community Parks.

e) Baseline Developed Area - Neighborhood Park Standards

The City will endeavor to provide at least one neighborhood park within each Park Planning Area. The park should be centrally located within the Park Planning Area and have a service radius of one half to three quarters of a mile. The park should have one collector street frontage and the remaining sides should front on residential streets.

The minimum size for a neighborhood park shall be **SEVEN ACRES** or the total acreage based on **TWO ACRES OF PARK LAND PER ONE THOUSAND POPULATION** within the Park Planning Area, whichever is greater.

When a public elementary or junior high school or schools are located within a Park Planning Area, up to five acres of open space, at each school which is developed, maintained and is accessible to the public for outdoor recreation activities, may count toward satisfying the Neighborhood Park standard of two acres of Neighborhood Park land per one thousand population within the Park Planning Area. However, regardless of the number of public school open space acres within a Park Planning Area, the City will provide a minimum of one City neighborhood park of seven acres.

f) Baseline Developed Area - Community Park Standards

The Community Park Service Area is that area within a radius of approximately one to one-and-one-half miles of the park site. The park should have major street frontage and the remaining sides should front on residential streets.

The minimum size for a community park should be **TWENTY-FIVE ACRES** or the total acreage based on **ONE ACRE OF PARK LAND PER ONE THOUSAND POPULATION** within the Community Park Service Area, whichever is greater.

When a public high school is located within the same service radius as the community park, up to 15 acres of school open space, which is developed, maintained and is accessible to the public for outdoor recreation activities, may count toward satisfying the overall standard of one acre of Community Park land per one thousand population within the Community Park Service Area. However, regardless of the number of public high school open space acres within the Community Park Service Area, the City will provide a minimum of one City community park of 25 acres.

3. Open Space and Parks Policies - Planned Urbanizing Area

a) The policies and standards for the development of the park system within the Planned Urbanizing Area differ in several respects from those in the Baseline Developed Area. These policies and standards will be implemented through each "Comprehensive Plan", in conjunction of the relevant "Comprehensive Planning District" policies presented in Chapter III.

b) The acreage standards related to Neighborhood and Community Parks are considered minimum. These acreage standards may be enhanced by additional open space to meet unique characteristics of the Specific Plans for each new Village.

c) All acreage standards are expressed as net acreage. This means that additional acreage must be added to the net park acreage for off-site requirements, such as street right-of-way, in order to satisfy the minimum standard. Minimum acreage standards will be increased if necessary to accommodate the development standards for the park.

d) The City will endeavor to plan, acquire, and develop parks and recreation facilities adjacent to schools in order to maximize the potential for joint use of adjoining City and School District open space and recreation facilities.

e) Dual-use flood control/recreation facilities shall be developed wherever feasible. Only acreage owned or otherwise controlled exclusively by the City in perpetuity will count toward minimum acreage standards. Park acreage credit for dual-use facilities shall be calculated in accordance with the standards and criteria contained in the "Design Standards for Dual Use Flood Control/Recreation Facilities" manual. In contrast to the Baseline Developed area, School District open space does NOT count towards minimum park acreage requirements within the Planned Urbanizing Area.

The City recognizes the community benefits of dual use flood control/recreation facilities (dual-use facilities) in that these facilities:

1) Reduce the total acreage purchased for stormwater detention.
2) Allow and encourage maximum recreational uses of detention lands.
3) Allow for periodic stormwater detention storage without significantly disrupting park uses.
4) Augment park facilities available to the local community.
5) Maximize public use of available open space.

f) Dual-use facilities shall be designed and constructed in accordance with the standards and criteria contained in the "Design Standards for Dual use Flood Control/Recreation Facilities" manual.

g) Planned Urbanizing Area - Neighborhood Park Standards

The City will endeavor to provide at least one neighborhood park within each residential neighborhood. The park should be centrally located within the neighborhood and have a service radius of one half to three quarters of a mile.

The park should have one connector street frontage and the remaining sides should front on residential streets.

The minimum size for a neighborhood park shall be **SEVEN ACRES** or the total acreage based on **ONE ACRE OF PARK LAND PER ONE THOUSAND POPULATION** within the neighborhood, whichever is greater.

h) Planned Urbanizing Area - Community Park Standards

The Community Park Service Area is that area within a radius of approximately one to one-and-one-half miles of the park site. The park should have one major street frontage and the remaining sides should front on residential streets. Parks should not back up to residential lots.

The minimum size for a community park should be **FORTY ACRES** or the total acres based on **TWO ACRES OF COMMUNITY PARK LAND PER**

ONE THOUSAND POPULATION within the Community Park Service Area.

4. Implementation

From time to time, the City may adopt subsequent plans or policy documents to implement some or all of the policies listed above. These subsequent policy documents will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Commonly used anticipated subsequent projects are listed and described in Chapter VIII.

H. COMMUNITY FACILITIES - PUBLIC SCHOOLS

1. Overview

Public schools, comprising both Community Facilities as well as Community Services, are a vital component of the City's infrastructure. In addition to their role of educating youth, they provide continuing education opportunities to all ages, prepare young adults for higher education or a vocation, and positively influence the community in many other ways. As of January 1995, the area covered by the Modesto Urban Area General Plan is served by fourteen public school districts.

School grounds are an integral part of the community's open space. Schools are physical focal points in the planned villages. They are also the focal point for recreational and social needs in the neighborhoods that they directly serve.
Parochial and private schools are acknowledged as supplementary providers of education even though policies are not outlined in the General Plan for their facilities.

2. Public Schools Policies - Baseline Developed Area

a. For families in the child-rearing years, the proximity of a public elementary school within easy walking distance is a strong criterion in their evaluation of housing choices. Elementary school closure, a school district prerogative, has significant impacts on the surrounding neighborhood. School districts are encouraged to involve the city in deliberations regarding school closure, early in the process. Consistent with state statutes, school districts are encouraged to include extensive community participation in the process to close any existing schools.

b. Existing schools and proposed school facilities on property owned by any School District on January 1, 1995, are shown on Figure V-6. School districts are encouraged to share their facility plans for new schools with the City.

c. Changes in land use or intensity of development within the Baseline Developed Area may have an impact on school services which necessitate close communication between the City and the school district.

d. There are specific state law prohibitions against certain uses within close proximity to schools, such as hazardous material uses and alcohol sales. Developers should contact the appropriate school district to determine if there are any known constraints to future development.

e. The City shall continue to require that the developer pay, prior to issuance of any building permits, the maximum residential, commercial and industrial development school fees in effect at the time building takes place. This requirement is in accordance with the provisions of Assembly Bill 2926.

3. Public Schools Policies - Planned Urbanizing Area

a. Public School Districts should be directly involved in the lead time for planning of infrastructure. A lead time of 3-5 years is desirable.

b. Neotraditional Planning Principles, prescribed for residential development in the Planned Urbanizing Area, call for public schools as prominent, physical keystones to the connector street network. Schools, placed conveniently to the residents to be served, will maximize opportunities for students to walk and bike to school. Opportunities should be explored for joint school/park development when planning new neighborhoods or villages. The option for joint acquisition and development of school and park sites should be continued. School districts are encouraged to consider these design principles in their facility planning efforts.

c. Land for new school facilities should generally meet the following minimum space requirements:

(1) Elementary schools - 10 acres (net).

(2) Middle schools or junior high schools -20 acres (net).

(3) High schools - 50 acres (net).

d. All of the policies for "Public Schools - Baseline Developed Area" apply equally in the Planned Urbanizing Area.

e. Developers of residential projects that are subject to the following policies (3e through 3k, below) should contact each affected school district prior to submitting an application to the City of Modesto. This early consultation with the school district on such matters as housing mix, timing of development, phasing, etc., will assist both parties in reaching an agreement on the best method of mitigating school impacts, should the project later be found to have the potential for significant effects on school facilities.

f. Once an application for a residential project, which is not exempt from CEQA, has been determined to be complete, it will be referred to the appropriate school

district(s) for "review and comment" in conjunction with the preparation of the required Focused Environmental Impact Report.

g. Each school district will provide the City of Modesto with the information needed to evaluate the impact of the proposed residential project on their facilities, including background data necessary to document the impact that a residential project may have on that district's facilities. Such information shall be provided to the City of Modesto in a timely manner consistent with the City's responsibilities under CEQA.

h. If it is determined that a proposed residential project may have a significant effect on a school district's facilities, the Focused EIR shall analyze this impact. It shall be the responsibility of the project applicant and school district to resolve the appropriate method of mitigation. Mitigation may take several forms, including but not limited to one or more of the following: fees, land dedication, special taxes, etc.

i. The impact on public school capital facilities shall be considered fully mitigated by the City of Modesto when it receives written notification from the appropriate school district(s) that the school district(s) and project applicant have resolved school impacts and by what means.

If the City does not receive said written notification prior to a deadline set by the City, the City Council will review the final mitigation proposals by school district(s) and project applicant. This review will be done in light of the EIR (Focused or otherwise) completed for the project. The City Council may determine whether (a) the project impact on school capital facilities is fully mitigated based on any or all of the proposals, or (b) if specific economic, social, or other considerations make infeasible the mitigation measures or project alternatives identified in the EIR (Focused or otherwise), addressing the impact on public school capital facilities.

j. Policies 3e through 3k shall apply when:

(1) A residential project seeks the approval of a General Plan Amendment, rezoning, prezoning, annexation, Comprehensive Plan, or other legislative act;

(2) The project is located on property classified as Planned Urbanizing Area on the Growth Strategy Diagram;

(3) A school district has imposed school mitigation fees pursuant to Government Code Section 53080; and

(4) A school district has a valid application for the funding of public school capital facilities pending before the State unless it is not eligible for such State funding in which case the school district shall, within thirty (30) days after it has determined in good faith that it is so eligible, initiate a process leading to the filing of a valid application for such funding.

k. The above policies (3e through 3k) shall not apply to residential projects approved in conjunction with a General Plan Amendment, rezoning, prezoning, annexation, or other legislative act that have completed the CEQA process (certification of an environmental impact report, adoption of a negative declaration or adoption of an exemption determination) as of March 5, 1991.

4. Implementation

The construction, maintenance, and day-to-day operations of schools is not governed by the City of Modesto. School districts with elected Boards of Directors are responsible for the actual implementation of School Facilities. Therefore, the City's role in the implementation of the above policies would be limited to: coordination with the affected school districts; determining whether a development project's impacts on school capital facilities is fully mitigated; and making appropriate findings under CEQA if the impacts are not fully mitigated.

5. Proposition 1A and Senate Bill 50

Upon the passage of Proposition 1A on November 3, 1998, the provisions of Senate Bill 50 became effective. Senate Bill 50 alters the method by which school facilities made necessary by development are addressed in the State of California. To the extent that the provisions of the General Plan relating to school facilities do not conflict with Senate Bill 50, they are suspended. The language relating to school facilities will remain unaltered in the General Plan so that a history of school facility development under Senate Bill 50 can exist prior to

any further review and amendment of the General Plan provisions relating to school facilities. Should Senate Bill 50 be repealed , the provisions of the General Plan relating to school facilities which were suspended shall once again become effective.

I. COMMUNITY SERVICES - TRANSIT

1. Overview

In addition to the Circulation policies presented in this Chapter, the City should adopt a goal of improving public transportation that could include increased bus and light rail service. This could help mitigate some issues related to site-specific intersection operations or parking requirements, if combined with other trip reduction measures. The ability to add service may be determined by the availability of public sector funding sources, the extent of private sector participation or subsidy, and the overall feasibility of transit service.

2. Transit Policies - Baseline Developed Area and Planned Urbanizing Area

a. Public transit services shall be provided, using the most cost-effective methods available and based upon professional analysis of alternatives.

b. The City's transit system shall strive to provide a mix of head ways dependent upon actual and anticipated ridership to reach a balance between cost-effectiveness and convenience.

c. The City's transit system shall strive to maintain farebox recovery ratios sufficient to meet state requirements.

d. The City should participate in regional public transit proposals to the extent economically feasible and that such systems benefit Modestans.

e. The City transit system shall strive to provide service on a one-half-mile grid where feasible to make the service as accessible as possible. Newly developing areas should provide a street pattern capable of accommodating transit service on a one-half-mile grid.

f. The City's transit system shall strive to provide two-way service on routes where feasible.

g. The City shall strive to safeguard options for future transit and mass transportation development, such as the Union Pacific railroad right-of-way.

3. Implementation

From time to time, the City may adopt subsequent plans or policy documents to implement some or all of the policies listed above. These subsequent policy documents will be

considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

J. COMMUNITY SERVICES - POLICE

1. Overview

A primary goal of the City of Modesto Police Department is to maintain a sense of personal safety and security. Containing the level of crime at or below levels of other comparable cities will be accomplished through highly visible patrol services, coupled with effective investigations complimented by a very active education and crime prevention program. While maintaining law and order, the Police Department is active in participating in community involvement programs. There is a continuing effort at maintaining a high level of citizen satisfaction and providing high quality police services through caring and competent employees who are given a high level of personal and specialized education and technical training. Demographic and economic conditions will have tremendous influence on the demand for police services. The growing population, additional recreational facilities, increased traffic volumes, expanded City limits, new businesses and new residential areas all increase the importance of maintaining and supporting law enforcement services.

2. Police Policies - Baseline Developed Area and Planned Urbanizing Area

The following Policies apply in the Baseline Developed Area and, where relevant, in the Planned Urbanizing Area. In general, however, the Modesto Police Department is only authorized to provide services within its primary jurisdiction - the incorporated Modesto City limits.

a. The City of Modesto should maintain an adequate personnel level, to organize patrol areas and provide investigative responses to achieve a comfortable and safe community climate conducive to a high quality of life and to maintain an active and growing commercial and business environment. To the maximum economic extent feasible, police operations should include proactive law enforcement and administrative efforts, all to be expanded as the City's population grows.

b. The City of Modesto Police Department should strive to reduce the level of crime below levels of other progressive departments with comparable populations and demographics.

c. The City of Modesto should strive to provide sworn officers in sufficient numbers to support basic police services consistent with other progressive departments with comparable populations and demographic statistics.

d. The City of Modesto should strive to provide civilian staff in sufficient numbers to support sworn staff and to support continuing civilization of services such as Crime Prevention, Investigative Support, Crime Scene Investigation, Accident Reports, and other documentation of incidents.

e. The City of Modesto should maintain its efforts to educate the public about crime deterrence through programs like the Neighborhood Watch Program within residential neighborhoods, Traffic Watch Program on residential streets, and the Business Watch Program within commercial and industrial areas.

3. Implementation

From time to time, the City may adopt subsequent plans or policy documents to implement some or all of the policies listed above. These subsequent policy documents will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

K. COMMUNITY SERVICES - FIRE PROTECTION

1. Overview

The mission of the Fire Department is to provide efficient and effective fire and life safety protection to the community through control of hostile fire, fire prevention service, emergency medical services, emergency preparedness, and mitigation of hazardous materials

incidents. This commitment is intended to safeguard the general economy and welfare of Modesto.

The policies in this Section conform to Section 65302(g) of the Government Code as that section of the Code relates to urban fires.

2. Fire Protection Policies - Baseline Developed Area and Planned Urbanizing Area

The following policies apply in the Baseline Developed Area and, where relevant, the Planned Urbanizing Area. In general, however, the jurisdiction of the Modesto Fire Department is limited to the incorporated Modesto City limits.

a. The City of Modesto should strive to maintain adequate fire flows in relation to structure size, design, requirements for construction and/or built-in fire protection systems. Maintenance of adequate fire flows includes factors such as adequate storage, system gridding, hydrant spacing, and spacing and sizing of water mains.

b. The City of Modesto should ensure adequate ingress and egress to all structures for fire fighting and rescue purposes.

c. The City of Modesto should provide protection of life and property through the use of engineered fire protection systems and fire resistive roof systems.

d. The City of Modesto should practice timely adoption of the Uniform Fire Code, National Fire code, and State Codes. These codes and ordinances may be amended to suit local conditions.

e. The City of Modesto should strive to ensure that fire stations, apparatus, equipment and personnel are in place concurrent with construction in the Planned Urbanizing Area.

f. Future fire station sites and facilities should be closely coordinated with existing and planned public parks, libraries, and other activity centers in order to encourage maximum efficiency of public facilities.

g. The City of Modesto should promote fire-safe behaviors within the community through public fire education activities and programs.

h. The City should maintain its readiness to mitigate man-made or natural disasters through maintenance and implementation of the Multi-Hazard Functional Plan.

I. The Fire Department should maintain equipment, staffing and facilities to provide Emergency First Response level Emergency Medical Services, Urban Search and Rescue, and Hazardous Materials emergency response capabilities.

j. The City of Modesto should strive to provide adequate Fire Department facilities through the achievement of the following facilities and service standards:

(1) The City of Modesto should maintain an emergency response system capable of achieving the following standards in 95% of all cases.

(a) The first fire emergency response unit arrives within 6 minutes of dispatch.

(b) A full alarm assignment arrives within 10 minutes of dispatch.

(c) A second alarm assignment arrives within 15 minutes of dispatch.

(2) The City should maintain staffing levels adequate to achieve an Insurance Service Office (ISO) rating of Class 2.

3. Implementation

From time to time, the City may adopt subsequent plans or policy documents to implement some or all of the policies listed above. These subsequent policy documents will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

L. COMMUNITY SERVICES - SOLID WASTE

1. Overview

This section addresses the requirements of Government Code Section 65302(a) regarding solid waste disposal facilities.

2. Solid Waste Disposal Policies - Baseline Developed Area

a. The City of Modesto will comply with all the requirements of Assembly Bill 939 which mandates the diversion of solid waste of 25% by 1995 and 50% by 2000, by way of source reduction, recycling, composting, and transformation.

b. Source Reduction and Recycling Element (SRRE)

The state's placement of source reduction at the top of the integrated waste management hierarchy requires that the City implement source reduction programs. Some of the more critical program alternatives which may need to be implemented

include variable can rates, composting at the site of generation, waste efficient yard care, and source reduction education.

New recycling programs may also need to be implemented; these programs include initiating multi-family and commercial/industrial recycling programs; evaluating the current curbside collection method and making recommendations for modifications as necessary; initiating a comprehensive public education and information program; and applying for grant funding for program implementation.

A significant amount of the waste currently being disposed of by the City is potentially compostable. Because of this significant diversion potential, it is essential that yard waste composting (including co-composting yard waste with biosolids) and compost market development be initiated.

The success of the other programs outlined in the SRRE depends upon the cooperation and participation of a public that understands the importance of waste reduction and recycling objectives. The residential and business communities will be targeted for a comprehensive outreach effort, including multi-media campaigns, awards, and point of purchase information.

c. Household Hazardous Waste Policies

The City will continue to participate in the existing Household Hazardous Waste Programs, including support of the drop-off facility, continued public information, and participation in the oil and battery collection programs.

d. County Hazardous Waste Management Plan

The City will comply with Stanislaus County's Hazardous Waste Management Plan.

e. Garbage Service

The City shall provide for the safe collection and disposal of all solid waste generated in the City of Modesto and to provide for the appropriate disposal facilities for the City's long-term needs. Garbage service shall be provided to all residences and business within the City of Modesto.

f. Landfills

To meet the waste disposal demands of the growing population, the City shall support Stanislaus County's efforts to find an additional landfill site, expand capacity of the Fink Road Landfill, or find an alternative waste disposal method for solid waste.

3. Solid Waste Disposal Policies - Planned Urbanizing Area

a. In addition to the Solid Waste Disposal Policies in place for the Baseline Developed Area, as outlined above, the City should also consider implementing local land use incentives and zoning/building code modifications to encourage source reduction, recycling, and composting, and to provide adequate space for containers.

b. In conjunction with the processing of a Comprehensive Plan within the Planned Urbanizing Area, the city shall consult with the firms responsible for solid waste disposal to confirm that adequate capacity exists for solid waste that would be generated by the project.

4. Implementation

From time to time, the City may adopt subsequent plans or policy documents to implement some or all of the policies listed above. These subsequent policy documents, such as the Source Reduction Recycling Element and the Hazardous Waste Management Element, will be considered "anticipated subsequent projects" in the context of Section 21157.7 of CEQA. Chapter VIII of this General Plan presents a variety of other potential implementation tools.

M. COMMUNITY SERVICES - HAZARDOUS MATERIALS MANAGEMENT

1. Overview

The County has prepared a Hazardous Waste Management Plan which is the guideline for managing hazardous waste in Stanislaus County. The goals, objectives, conclusions, recommendations and implementation measures of that plan are hereby incorporated as a part of this document, along with any modifications which may result from state review of the Hazardous Waste Management Plan.

2. Hazardous Materials Management Policies

a. The City shall comply with all existing federal and state laws which regulate the generation, transportation, storage, and disposal of hazardous materials.

b. The City of Modesto should require that businesses and industries using hazardous material provide mitigation measures commensurate with the hazards they bring to the community, in accordance with the applicable Articles and Sections of the most current adopted edition of the Uniform Fire Code.

c. In the event that site inspection or construction activities uncover chemical contamination, underground storage tanks, abandoned drums, or other hazardous materials or wastes at a parcel, the inspection report preparer shall so notify the City. The City shall notify the County Health Services Department. Under the direction of these agencies, a site remediation plan shall be prepared by the project applicant.

The plan would (1) specify measures to be taken to protect workers and the public from exposure to potential site hazards and (2) certify that the proposed remediation measures would clean up the wastes, dispose the wastes, and protect public health in accordance with federal, state, and local requirements. Permitting or work in the areas of potential hazard shall not proceed until the site remediation plan is on file with the City.

If a parcel is found to be contaminated to a level that prohibits the proposed use, the potential for reduction of the hazard should be evaluated. Site remediation is theoretically capable of removing hazards to levels sufficiently low to allow any use at the site. In practice, both the technical feasibility of the remediation and its cost (financial feasibility) should be evaluated in order to determine the overall feasibility of locating a specific use on a specific site. In some cases, it may require restriction to industrial use or a use that involves complete paving and covering of the parcel.

In accordance with OSHA requirements, any activity performed at a contaminated site shall be preceded by preparation of a separate site health and safety plan (prepared by the project applicant and filed with the City) for the protection of workers and the public. All reports, plans, and other documentation shall be added to the administrative record.

d. For each specific project that would generate hazardous waste, the City shall require as a condition of building permit and/or business license approval that the project sponsor prepare a hazardous material transportation program. The transportation program shall identify the location of the new facility or use and designate either (1) specific routes to be used for transport of hazardous materials and wastes to and from the facility, or (2) specific routes to be avoided during transport of hazardous materials and wastes to and from the facility. Routes would be selected to minimize proximity to sensitive receptors to the greatest practical degree. Passage through residential neighborhoods should be minimized, and parking of waste haulers on residential streets should be prohibited. The City Fire Department shall review and approve the applicant's hazardous materials transportation program or, working with the applicant, modify it to the satisfaction of both parties.

e. Prior to the issuance of all building permits, the City shall identify the site in relation to all CERCLIS sites and to known or suspected uncontrolled or abandoned hazardous waste sites. All projects within 2,000 feet of these facilities (generally depicted on Figure 16-1 of the Master Environmental Impact Report) shall conduct hazardous materials studies as necessary to identify the type and extent of contamination, if any, and the extent of risk to human health and public safety. If necessary, a remedial action program would be developed and implemented as in Policy 2-c.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-067

A RESOLUTION ADOPTING THE 2006 NON-MOTORIZED TRANSPORTATION MASTER PLAN

WHEREAS, the City Council last adopted a Non-Motorized Transportation Master Plan in 1996, and

WHEREAS, a current non-motorized plan is required to be maintained by the City in order to qualify and compete for grant funding from state and federal sources, and

WHEREAS, staff has prepared the 2006 Non-Motorized Transportation Master Plan (the "Project"), a copy of which is attached hereto as **Exhibit "1"** and incorporated herein by reference, and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a Master EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the project, and

WHEREAS, on January 9, 2007, by Resolution No. 2007-065, the City Council of the City of Modesto considered an Initial Study, Environmental Assessment No. EA/C&ED No. 2006-44, which concluded that the proposed 2006 Non-Motorized Transportation Master Plan (the "Project") is within the scope of the previously certified Urban Area General Plan Master Environmental Impact Report (SCH No. 19990820) and that, pursuant to Sections 15168(c) and 15182 of the CEQA Guidelines, no new environmental review is required, and

WHEREAS, by an agenda report to the City Council from the Parks, Recreation and Neighborhoods Department dated December 21, 2006, City staff recommended approval of the proposed 2006 Non-Motorized Transportation Master Plan, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on January 9, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing of the Council was held for the purpose of receiving public comment on the proposed 2006 Non-Motorized Transportation Master Plan,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby adopts the 2006 Non-Motorized Transportation Master Plan, as described in Exhibit "1", attached hereto and incorporated herein by reference.

BE IT FURTHER RESOLVED that the Council finds and determines as follows:

1. The proposed 2006 Non-Motorized Transportation Master Plan is consistent with the Modesto Urban Area General Plan because it will further a goal of the Urban Area General Plan to promote alternative transportation.

2. The proposed 2006 Non-Motorized Transportation Master Plan will help promote bicycling and walking as transportation modes in Modesto.

3. The proposed 2006 Non-Motorized Transportation Master Plan will reduce traffic by promoting bicycling and walking for transportation and by increasing convenience and safety for people who choose to bicycle and walk.

4. The proposed 2006 Non-Motorized Transportation Master Plan will improve air quality by increasing convenience and safety for people who choose to bicycle and walk within Modesto.

5. The Project is compatible with surrounding, existing and planned land uses; will reduce traffic impact as compared to the Master EIR; will improve air quality; will have no significant effect on existing and planned open space; and will have no significant effect on existing and planned public facilities and public services.

BE IT FURTHER RESOVED that the Council hereby directs staff to return to the City Council with a plan for a Citizens Advisory Committee.

The foregoing resolution was introduced at the regular meeting of the Council of the City of Modesto held on the 9th day of January, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

Ayes:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
Noes:	Councilmembers:	None
Absent:	Councilmembers:	None

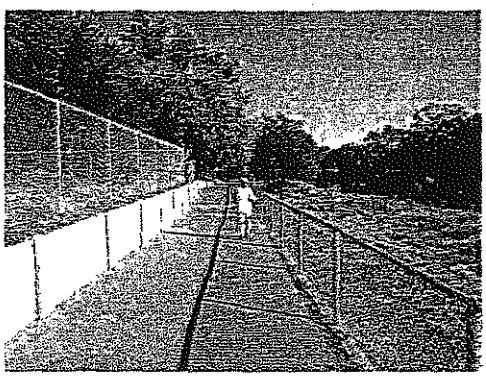
1. INTRODUCTION

The Modesto Non-Motorized Transportation Master Plan provides a blueprint for developing a citywide system of trails, bikeways, and other transportation and recreation facilities for non-motorized users. This document provides an Update to the 1996 Modesto Non-Motorized Transportation Master Plan. As with the 1996 Plan, this Update covers the full range of modes of travel in Modesto without a motor vehicle, including:

- Commute bicycling
- Recreational on-road bicycling
- Recreational off-road bicycling
- Walking
- Running
- Motorized and non-motorized wheelchairs
- Roller and in-line skating
- Skateboarding; and
- Other forms of non-motorized, wheeled transportation



The Dry Creek Regional Park Path, above, is an existing multi-use trail used by joggers, pedestrians, bicyclists and others, in Modesto, the City of Trees and Trails.

Bicycling is seen as an alternative transportation mode and considered one of the most cost-effective ways to reduce air pollution, traffic congestion, wear on local roads, petroleum consumption, and demand for additional roads. This Plan is intended to provide a blueprint towards making bicycling an integral part of daily life in Modesto.

NON-MOTORIZED IMPROVEMENTS

Although this Plan covers all forms of non-motorized transportation, the discussion of facilities throughout this plan will focus on the two major forms of non-motorized transportation: bicycling and walking.

BICYCLES

Like many communities around the United States, Modesto is experiencing a resurgence in interest in bicycling as a means of transportation. The bicycle is a low-cost and effective means of transportation that is quiet, non-polluting, extremely energy-efficient, versatile, healthy, and fun. Bicycles also offer low-cost mobility to the non-driving public, especially the young.

Bicycling as a means of transportation has been growing in popularity as many communities work to create more balanced transportation systems and reclaim streets from auto dominance. In addition, recent national and local surveys find that bicycling remains an important mode of transportation and recreation, and that more people are willing to cycle more frequently if better bicycle facilities are provided.[1]

Modesto stands poised to make major gains in increasing bicycle use, thanks to several factors:

First, Modesto has many of the attributes needed to become bicycle-friendly. This includes a moderate climate, flat terrain, a well-connected downtown street grid, numerous local parks and recreational attractions, geographic proximity to employment and school centers, as well as a population interested in health, environment, and livable neighborhoods. The popularity of recreational bicycling in Modesto can be seen on any weekend with families enjoying the Dry Creek or Hetchy Hetchy bike paths, or with the large bicycle club rides that head out of town to explore Stanislaus County's rural roads.

This plan addresses bicycles as a transportation mode of travel, defined as any trip that replaces a vehicle trip whether it be for commuting, shopping, traveling to and from school, or to reach a recreational destination.

Second, there is a history of bicycle planning in Modesto, as shown by the 1983 Modesto Bicycle Plan and 1996 Non-Motorized Transportation Master Plan. As bicycle facilities have been developed and more residents have been cycling for recreation, more have been commuting as well. Consequently, more have been advocating for improved cycling facilities. Groups such as the Stanislaus County Bicycle Club have been important advocates of bicycle facilities for both recreation and commuting.

Third, policy support and additional funding have recently been made available for bicycle transportation improvements. This has been true on the local and state level thanks to the 1994 California Bicycle Transportation Act and the 2000 Safe Routes to Schools programs. This has also been the case on the federal level through:

- 1990 Clean Air Act;
- 1991 Inter-Modal Surface Transportation Efficiency Act (ISTEA);
- 1998 Transportation Equity Act for the 21st Century (TEA21); and
- 2003 Safe, Accountable, Flexible, Efficient Transportation Equity Act (SAFETEA)

These laws have provided for increased spending on bicycle travel and allow communities more flexibility in spending highway funding on alternative modes, such as bicycling, walking, and transit.

[1] *2002 National Survey of Bicycle and Pedestrian Attitudes and Behaviors*, U.S. Department of Transportation's National Highway Traffic Safety Administration and the Bureau of Transportation Statistics; Bureau of Transportation Statistics *Omnibus Household Survey*, February 2003; *National Survey on Recreation and the Environment (NSRE)*: 2000-2002. The Interagency National Survey Consortium, Coordinated by the USDA Forest Service, Recreation, Wilderness, and Demographics Trends Research Group, Athens, GA and the Human Dimensions Research Laboratory, University of Tennessee, Knoxville, TN; April 1991 *Lou Harris Poll* Commissioned by Rodale Press.

Already, these laws have led to over a billion dollars in bicycle, trail, and pedestrian projects nationwide, and thousands of miles in new bicycle lanes, sidewalks, multi-use trails and other non-motorized enhancements.

The increased ridership, resulting advocacy, and increased policy and financial support from all government levels have resulted in a desire for significant bicycle transportation improvements. The following Bicycle Transportation Plan is a direct result of these changes and is intended to set a proactive course toward making bicycling an integral part of daily life in Modesto.

PEDESTRIANS

Walking is the oldest and most basic form of human transportation. It is non-polluting, requires little infrastructure, and is integral to the health of individuals and their communities. People who walk know their neighbors and their neighborhood. A community that is designed to support walking is livable and attractive.

Although pedestrians have been valued for their contribution to urban vitality, walking, like bicycling, has not until recently been considered a serious means of transportation. Thanks in part to the passage of the 1991 ISTEA legislation and its companion funding opportunities, this is beginning to change. Communities are beginning to recognize the need and value of developing pedestrian facilities, whether it is to enhance safety, health, or for commuting.

Many of Modesto's neighborhoods provide a pleasant walking environment. But getting from housing areas to employment of transit by foot can be challenging. Routes that require walking on or crossing multi-lane arterials can discourage pedestrian activity. Opportunities certainly exist for improving the pedestrian system in Modesto, offering residents the option of walking to school, shop, or recreation.

PURPOSE OF THE PLAN UPDATE

Maximize Funding Sources for Implementation. A key reason for Updating the Non-Motorized Transportation Master Plan is to satisfy requirements of the California Bicycle Transportation Account, and other state and federal funding programs for bicycle transportation projects for which Caltrans plays an oversight and review role. In order to qualify for available funding, the State of California requires that applicants have an adopted master plan that includes the following specific elements:

- Estimated number of existing and future bicycle commuters
- Land use identification
- Existing and proposed bikeways
- Existing and proposed bicycle parking facilities
- Existing and proposed multi-modal connections
- Existing and proposed facilities for changing and storing clothes and equipment

- Bicycle safety and education programs
- Citizen and community participation
- Consistency with transportation, air quality, and energy plans
- Project descriptions and priority listings
- Past expenditures and future financial needs
- A description of public input used to develop the Bicycle Transportation Plan

Save lives. Reduce the accident and fatality rate for bicyclists and pedestrians through design standards and guidelines, education, and enforcement.

Provide needed facilities and services. Meet the demand and increased use of bicycles and other non-motorized transportation modes as a means of travel around the City. With the Federal Highway Administration's national goal of doubling bicycling by 2010, the bicycle commute share would increase from 558 adult commuters (2000 census) –approximately 0.75% mode share–to 1,116 adult commuters. Factoring in the potential for children bicycling to school, bicycle-to-transit trips, and other utilitarian trips, Modesto has the potential to increase the bicycle mode share to above one percent, beyond the state and national average.

Improve the quality of life in Modesto. Design and build people-friendly streets, sidewalks, paths, trails, and activity centers available to everyone, and support sustainable community development. Reduce traffic congestion, vehicle exhaust emissions, noise, and energy consumption by encouraging healthier and more active forms of travel. Encourage visitors to stop and enjoy Modesto on bicycle and foot.

Update Existing Plan and Set New Priorities. Identify existing network needs and recommend projects that will further enhance and improve bicycling and pedestrian conditions in Modesto. Projects identified in the 1996 plan are to be re-evaluated according to priority criteria including connectivity and network needs. New priorities emphasize providing designated bikeways to significant destinations such as downtown and the Amtrak train station, while encouraging increased commuter and recreational usage of safe and direct bikeways.

Become the "City of Trees and Trails." Modesto's quality of life derives from its rural and agricultural character. While Modesto becomes increasingly urbanized as population and development occur, the presence of tree groves and extensive recreational areas enhance the potential of Modesto ability to grow without threatening the environmental and recreational character that makes Modesto an attractive place to live. The greenway corridors provided of the Dry Creek and Tuolumne River parks provide vital recreational facilities that should be enhanced and expanded.

GOALS AND POLICIES OF PLAN UPDATE

Goals provide the context for the specific objectives and policy actions discussed in the Non-Motorized Transportation Plan Update. The goals provide the long-term vision and serve as the foundation of the plan. Goals are broad statements of purpose that do not provide specific descriptions of the objective, while policy actions provide a bridge between general policies and actual implementation guidelines, which are provided in the following sections.

Goals and Policy Actions of the Updated Non-Motorized Transportation Master Plan are as follows:

Goal 1: Expand and Improve Modesto's Non-Motorized Transportation Network

Policy 1.1. Complete a network of bikeways, walkways, trails and paths that serve all non-motorized user groups, including commuting, recreation, and utilitarian trips.

Policy 1.2. Seek funding for non-motorized transportation funding through current regional, state and federal funding programs, private funding opportunities such as endowments, corporate sponsorships and benevolent giving, and encourage multi-jurisdictional funding applications.

Policy 1.3. Monitor and evaluate information on collisions involving bicyclists and pedestrians and use this information to assist in remedying existing problem locations.

Policy 1.4. Develop and implement a signed and numbered route system for cross town commuter bicycle routes that serve major employment centers, schools, commercial districts, transit stations and institutions.

Goal 2: Plan for the Needs of Non-Motorized Users

Policy 2.1. Accommodate bicyclists, pedestrians, and other non-motorized users when planning, designing, and developing transportation improvements.

Policy 2.2. Review capital improvement projects to ensure that needs of non-motorized users (including pedestrians, bicyclists, and persons with disabilities) are considered in programming, planning, maintenance, construction, operations, and project development activities.

Policy 2.3. Encourage traffic calming, intersection improvements, or other similar actions that improve safety for pedestrians and bicyclists.

Policy 2.4. Require developers to adhere to the roadway design standards, signage and cross-sections identified in this Non-Motorized Transportation Master Plan

Goal 3: Provide for Regular Maintenance of the Non-Motorized Network

Policy 3.1. Develop a program for routine maintenance of bikeway and walkway network facilities including regular sweeping of bikeways and shared use pathways.

Policy 3.2. Include the costs of major maintenance needs of bicycle and pedestrian facilities when calculating the maintenance needs of streets and roadways generally.

Policy 3.3. Require that maintenance funding plan be in place at the time of project construction.

Policy 3.3. Require that repair and construction of transportation facilities minimize disruption to the bicycle and pedestrian environment, or provide alternate routes.

Goal 4. Encourage and Educate Residents of Modesto on Bicycling, Walking and other Non-Motorized Modes

Policy 4.1. Enforcement of pedestrian- and bicycle-related laws by the Modesto Police Department.

Policy 4.2. Develop adult and youth bicycle and pedestrian education and safety programs.

Policy 4.3. Develop and distribute a Trails Map illustrating the citywide non-motorized network and containing tips on bicycling and walking safety.

Policy 4.4. Support programs such as "safe routes to school" maps and "bike trains" or "walking school buses" for elementary students that would encourage more students to walk or bicycle to school

Goal 5: Implement the Non-Motorized Transportation Plan

Policy 5.1. Incorporate the Non-Motorized Transportation Master Plan into the Community Facilities Element of the Modesto Urban Area General Plan

Policy 5.2. Maximize coordination between Stanislaus County, adjacent municipalities, school districts and community organizations to review and comment on bicycle and pedestrian issues of mutual concern

Policy 5.3. Update the Plan periodically as required by Caltrans to reflect new policies and/or requirements for bicycle and pedestrian funding

PLAN CONTENTS

The Modesto Non-Motorized Transportation Master Plan Update is organized as follows:

- Chapter 2, Existing Conditions, provides a description of the existing bicycle and pedestrian conditions in Modesto. The conditions presented include the existing bicycle and trail network and support facilities and programs.

- Chapter 3, Planning and Policy Context, provides an overview of the relevant plan documents from Modesto and Stanislaus County.

- Chapter 3, Needs Analysis, documents the need for bicycle and pedestrian transportation in Modesto, including an overview of existing user groups, commuting statistics, accident data, and opportunities and constraints.

- Chapter 5, Bicycle Improvements, outlines the recommended Class I, II and III bikeway network, as well as bicycle-specific support facilities such as bike lockers. Chapter 5 also includes individual priority project sheets that provide additional data and cross-sections for key projects in the non-motorized transportation system.

- Chapter 6, Pedestrian Improvements, introduces the elements and actions necessary to create a safe, well-designed system of pedestrian facilities in Modesto.

- Chapter 7, Bicycle and Pedestrian Programs, outlines safety, educational and encouragement programs that apply to both bicyclists and pedestrians, as well as all forms of non-motorized transportation.

- Chapter 8, Implementation, provides an overview of the recommended non-motorized system costs, and presents a guide to construction and maintenance funding sources.

- Appendices:

    - Appendix A: Bikeway Planning and Design
    - Appendix B: Projects Identified in Existing Modesto and StanCOG Bicycle Plans
    - Appendix C: Non-Motorized Transportation Master Plan Survey Form
    - Appendix D: Non-Motorized Transportation Master Plan Public Meeting Notice
    - Appendix E: Sample Bicycle Parking Code Language
    - Appendix F: Construction Zone Treatments
    - Appendix G: Bicycle Commute and Air Quality Calculations

2. EXISTING CONDITIONS

This chapter provides a description of existing conditions within the City of Modesto. Information is based on field visits, existing planning documents, aerial photographs, maps, and conversations with City of Modesto, Stanislaus County, and other agency staff.

SETTING

Modesto is located along Highway 99 in the center of the San Joaquin Valley, an agricultural region that extends 300 miles through central California. The city has diverse development, consisting of low- to medium-density residential, commercial and office space, and some industrial land uses. Outside of the urbanized area, agricultural land uses dominate; some of the region's top commodities include dairy products, almonds, apricots, melons, tomatoes, wine grapes, peaches, walnuts and poultry products. Due to its location on the valley floor, the topography in Modesto is generally flat. The Tuolumne River, a major Sierra drainage that extends from Yosemite National Park before dropping to the valley, passes south of downtown Modesto, and the Stanislaus River extends just north of the city.

With the exception of downtown, the city's northwest corner, and the commercial and industrial area south of Yosemite Boulevard, Modesto is a city of residential neighborhoods, and the places where people live are dispersed almost evenly throughout the City. Planning for the non-motorized transportation system needs to acknowledge that people live everywhere within the developed fabric of Modesto, and that the non-motorized transportation system should provide equal access to and from all areas of the City.

Since 1996, when the first Non-Motorized Transportation Master Plan was adopted, substantial growth and development has occurred in Modesto. Planning areas of the City that have been developed or are in the process of being developed include Village One, North Beyer, Enterprise Business Park, Carver-Bangs, Pelandale-Snyder, Coffee-Claratina, Northpointe, Hetch-Hetchy, Fairview, Mable, and Empire West. Much of this development has occurred on the north and west sides of the city.

AFFECTED JURISDICTIONS AND AGENCIES

Implementation of the non-motorized network will require cooperation from a number of jurisdictions and agencies that have control over land use decisions within and adjacent to Modesto, including the Stanislaus Council of Governments, Stanislaus County, cities of Ceres, Ripon, Riverbank, Salida and Empire.

City of Modesto

The City of Modesto encompasses a land area of approximately 36 square miles and a population of approximately 203,000. Modesto is the largest city and the seat of Stanislaus County. Modesto is surrounded primarily by unincorporated Stanislaus County lands that are in agricultural use. Modesto is bordered on the south by the City of Ceres, and a portion of the Riverbank Sphere of Influence borders Modesto to the north. Modesto's sphere of influence extends to Kiernan Avenue on the north.

City of Ceres

The City of Ceres is situated along Highway 99, on the south side of the Tuolumne River. Ceres is a growing community with a population of about 40,000 and a land area of about 7 square miles, surrounded primarily by the agricultural lands of Stanislaus County. Ceres borders the southern edge of Modesto's urban area.

City of Riverbank

The City of Riverbank is located northeast of Modesto, along the State Highway 108 on the south side of the Stanislaus River. Riverbank is a growing community with a population of about 17,500 and a land area of 3 square miles. Riverbank is surrounded primarily by the agricultural lands of Stanislaus County (on the south side of the river) and San Joaquin County (on the north side of the river). While Riverbank's street network does not abut Modesto's urban area, the Modesto planning area does border Riverbank's sphere of influence along the Stanislaus River.

County of Stanislaus

The County of Stanislaus encompasses a land area of approximately 1,500 square miles and a population of about 500,000. The County has nine incorporated cities: Ceres, Hughson, Modesto, Newman, Oakdale, Patterson, Riverbank, Turlock, and Waterford. Stanislaus County is responsible for land use decisions for all unincorporated areas, which includes several communities such as Salida, La Grange, Knights Ferry, Grayson, and Westley.

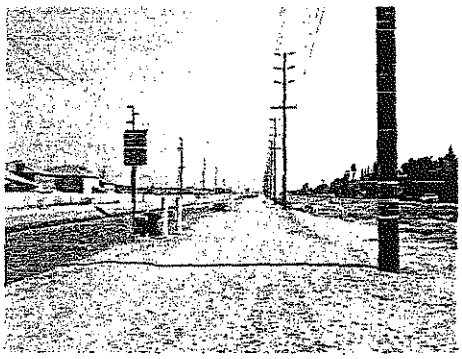
Stanislaus Council of Governments

The Stanislaus Council of Governments (StanCOG) is the designated Metropolitan Planning Organization and Regional Transportation Planning Agency for the Stanislaus County area. StanCOG is responsible for the preparation of the area's Regional Transportation Plan and Federal Transportation Improvement Program, as well as other regional planning activities such as collection of census and demographic information, and regional bicycle and pedestrian planning. The StanCOG Policy Board has the ultimate decision making responsibility and authority for StanCOG. It is comprised of sixteen voting members and one advisory member (Caltrans). Voting members include five representatives from the Stanislaus County Board of Supervisors, three council representatives from the City of Modesto, and one council representative from each of the other eight cities in the County.

Modesto Irrigation District

MID is a multi-purpose public utility district supplying electricity, irrigation and domestic water. Its primary customers are the residents and businesses in California's Central Valley. MID serves approximately 3,200 irrigation water customers and 64,000 irrigated acres. MID entered the domestic water business in 1994, when it began operations at its Modesto Regional Water Treatment

Plant, which treats and delivers up to 40 million gallons of surface water each day. Treated water is sold to the City of Modesto for distribution.



Portions of the MID lateral that runs parallel to Briggsmore Avenue, as shown in the photo above, may provide an ideal east-west corridor for a multi-use trail.

Turlock Irrigation District

The Turlock Irrigation District (TID) operates a number of irrigation canals in the southern portion of Modesto. The district owns and operates more than 250 miles of canals stretching from La Grange Dam on the Tuolumne River to the San Joaquin River and serves over 5,800 irrigation customers covering approximately 150,000 acres of farmland. TID also provides retail electricity to customers within its service area. The Tuolumne River is the source of most of the district's water.

San Francisco Public Utilities Commission

The San Francisco Public Utilities Commission (SFPUC) manages and operates the Hetch Hetchy water system. The Hetch Hetchy system is a 167-mile, gravity-driven network of dams, reservoirs, tunnels, pump stations, aqueducts and pipelines that collects Tuolumne River runoff in the Hetch Hetchy reservoir in Yosemite and transports it to the San Francisco Bay Area. The Hetch Hetchy water line extends through the northwestern quadrant of Modesto as an underground aqueduct within an approximately 100-foot wide easement. Overhead power lines extend along the Hetch Hetchy right-of-way. In addition, a 3-mile paved multi-use path has been constructed within the Hetch Hetchy right-of-way between Sisk Road and Semallon Drive.

Utilities

Various utility lines run above and below ground within Modesto, both along the developed roadway network and in separate easement corridors. These include Pacific Gas & Electric (electricity and natural gas), SBC (telephone and communications lines), Comcast (cable), and others. Installation or maintenance of these utilities, particularly along the roadway network, can cause inconveniences or create hazards for bicyclists and pedestrians.

Union Pacific Railroad

Rail corridors owned by the Union Pacific include the former Southern Pacific main line that parallels SR-99, as well as the former Tidewater Southern rail line that is being converted into the Virginia Corridor trail.

Atcheson, Topeka and Santa Fe Railroad

The Atcheson, Topeka and Santa Fe Railroad owns the rail corridor the runs along the eastern edge of Modesto. Amtrak passenger services operate within the ATSF rail corridor.

California Department of Transportation

The California Department of Transportation (Caltrans) has jurisdiction of the California State Highway system. Designated State Highways within Modesto include State Route 99, a major north-south freeway through the Central Valley, as well as State Routes 108 (McHenry Avenue and connecting streets) and 132 (Yosemite Avenue and Maze Boulevard).

Local Schools

Primary and Secondary Schools

Modesto has four primary school districts: the Modesto City Schools District in the central part of the city, Sylvan School District in the north, Empire School District in the southeast and Stanislaus Union School District in northwest Modesto. Approximately 20 to 25 percent of local traffic during the morning commute hour is now attributable to school-related trips.

Modesto Junior College

The Yosemite Community College District includes Modesto Junior College and Columbia College. Modesto Junior College is located in central Modesto, with facilities located on two sites, known as East Campus and West Campus, three miles apart. MJC has an enrollment of approximately 16,000 students.

EXISTING BICYCLE FACILITIES

DEFINITION OF BIKEWAYS

The three types of bikeways identified by Caltrans in Chapter 1000 of the Highway Design Manual are as follows. Detailed design guidelines for all three types of bikeways are provided in Chapter 5.

Class I Bikeway Typically called a "bike path," a Class I bikeway provides bicycle travel on a paved right-of-way completely separated from any street or highway.

Class II Bikeway. Often referred to as a "bike lane," a Class II bikeway provides a striped and stenciled lane for one-way travel on a street or highway.

Class III Bikeway. Generally referred to as a "bike route," a Class III bikeway provides for shared use with pedestrian or motor vehicle traffic and is identified only by signing.

One of the greatest divergences of opinion lies between those who feel paved bike paths, separated from roadways, should be constructed wherever physically possible, versus those who feel more comfortable riding on streets on lanes or routes. This preference is usually based on personal feeling regarding comfort and safety. There are also people who argue whether Class II bike lanes are effective, or conversely, that bike lanes should be installed wherever possible. Bike lanes provide an additional buffer between traffic and sidewalks, aiding pedestrians. When properly designed, bike lanes help improve the visibility of bicyclists. On streets with low traffic volumes and speeds (under 5,000 vehicles per day, 30 mph), bike lanes may not be needed at all. This is based on the potential for serious conflicts being so low that the cost of installing bike lanes is not warranted.

Modesto's existing bicycle network is shown in **Figure 2-1**. The network consists of both on- and off-street facilities. **Table 2-1** shows the limits and lengths of all existing Class I, II, and III bikeway segments in the city.

EXISTING OFF-STREET BIKE PATHS

Hetch-Hetchy Path

The Hetch-Hetchy bike path is a 3.0 mile path that extends along the Hetch-Hetchy power and water right-of way between Sisk Road and Semallon Drive.

Dry Creek Bike Path

The Dry Creek bike path is a 5.5 mile path that extends through Dry Creek Regional Park on the south side of the creek between La Loma Avenue and Claus Road.

Tuolumne River Path

A 2.5 mile segment of bike path has been constructed on the north side of the river in Tuolumne River Regional Park in the vicinity of Modesto City-County Airport.

EXISTING ON-STREET BIKE LANES AND ROUTES

Modesto has a partially completed network of on-street bike lanes and routes, as shown in Figure 2-1. Currently there are approximately 14 miles of bike lanes, 37 miles of bike routes. Several key Class II segments exist, notably on Prescott Road, Tully Road, and Coffee Road. However, other primary north-south and east-west streets have only short Class II segments (such as Claus and Scenic) or lack bike lanes altogether (such as Oakdale). A number of existing Class III cross-town routes exist, connecting neighborhood schools and parks in many places (although the lack of destination signage, noted below, limits the functionality of these routes). The existing network is not evenly distributed geographically, as the entire southwestern quadrant of the city has only one short Class III segment.

SIGNAGE

Implementing a well-designed, attractive, and functional system of network signage greatly enhances bikeway facilities by promoting their presence to both potential and existing users. Currently, Modesto has only a few standard bike route signs. Many local street connections and continuous routes are not identified. Major destinations are not identified. The lack of good directional signage is considered to be a constraint to bicycling in the City. Particularly for Class III bike routes, which may follow curving neighborhood streets and occasionally shift a block or two in either direction, the lack of clear directional signage can be confusing for inexperienced cyclists. Destination signage can further help to clarify routes, particularly in locations where two routes cross. In addition, multi-use paths require additional standardized signs and stencils in order to help manage the multiple user groups.

BICYCLE DETECTOR LOOPS

Bicycle detector loops are sensors that activate traffic signals when a bicyclist positions his/herself where a loop detector is installed, in bicycle or auto travel lanes at signalized intersections. While bicycle detector loops facilitate faster and more convenient bicycle trips, if they are not calibrated properly or stop functioning they can frustrate cyclists waiting for the signal to change, unaware that the loop is not working. The City of Modesto has no bicycle-specific detector loops installed at this time.

BICYCLE PARKING

Bicycle parking is an important component in planning bicycle facilities and encouraging people to use their bicycles for everyday transportation. Bicycles are one of the top stolen items in most communities, with components often being stolen even when the bicycle frame is securely locked to a rack. Because today's bicycles are often high-cost and valuable items, many people won't use a bicycle unless they are sure that there is secure parking available at their destination(s). In California, parking facilities are classified as follows:

Class I Parking - Long Term

Class I bicycle parking facilities accommodate bicycles of employees, students, residents, and others expected to park more than two hours. This parking is provided in a secure, weather-protected manner and location. Class I bicycle parking includes a bicycle locker or a secure area like a 'bike corral' that may be accessed only by bicyclists. The new "day locker" (bike lid, eLocker, etc.) is a new bicycle locker concept that has gained recent popularity because it requires minimal program administration. These lockers allow for multiple users in the same day, therefore allowing these lockers to function similar to racks.

Class II Parking - Short Term

Class II bicycle parking facilities are best used to accommodate bicycles of visitors, customers, messengers, and others expected to depart within two hours. This parking is provided by bicycle racks, which provide support for the bicycle but do not have locking mechanisms. Racks are relatively low-cost devices that typically hold between two and eight bicycles, allow bicyclists to securely lock their frames and wheels, are secured to the ground, and are located in highly visible areas. Racks should not be designed to damage the wheels by causing them to bend. Bike racks

should be located at schools, commercial locations, and activity centers such as parks, libraries, retail locations, and civic centers, or anywhere personal or professional business takes place. .

Modesto Bicycle Parking Facilities

Many private employers provide bicycle parking facilities, and both the City of Modesto and Stanislaus County offices in downtown Modesto provide bicycle parking. Most public schools provide bicycle parking facilities, as do both the East and West campuses of Modesto Junior College. Street bicycle racks are installed at various locations in the downtown area, and in other commercial areas. Bicycle racks are also available at the Downtown Transit Center, and at the Amtrak Station.

There are no bicycle parking requirements in the Modesto Municipal Code, and it is up to individual businesses to provide racks for their employees or customers. Merchants can put in a request to the City to have bicycle racks installed outside their business free of charge. Modesto has an unspecified number of bicycle racks available to be installed upon request.

In addition to parking, a number of major employers also provide shower facilities for use by bicyclists and other non-motorized commuters. **Table 2-2** contains a list of Modesto's largest employers, and a summary of whether they provide bicycle racks and showers for their employees.

BIKEWAY SUPPORT FACILITIES

For the purposes of this Plan, bicycle support facilities refer to end-of-trip facilities that would encourage bicyclists to commute to work or other activities that require one to "clean up" after a ride. Typically, these amenities include showers and clothing locker facilities and can be located at places of employment. Such facilities are most often provided by building owners or tenants for use by those that work in the building. Although health clubs provide showers and clothing lockers, they are only available to their members.

Bicycle shops are important for bicyclists making trips between urban areas in the event they suffer an equipment failure and need repair parts or service. Parks and rest stops offer cyclists water, a place to sit or rest, and restroom facilities. Transit transfer stations extend the range cyclist can commute. Locations to shower and change clothes make commuting a more viable alternative.

Table 2-2
Bicycle Racks and Showers

Employer Name	Racks?	Showers?	Number of Employees
Modesto City Schools	Yes	No	4,950
ConAgra Foods, Inc.	Yes	Yes	1,000

EXISTING PEDESTRIAN FACILITIES

A safe and functional pedestrian environment – one that encourages people to walk – is composed of numerous features that require careful planning, design, and maintenance. Sidewalks and pathways, the most basic elements, need to form a connected network. They need to be wide enough to comfortably accommodate the expected pedestrian volume. Surfaces should be kept as

smooth as possible. Intersections should have well-designed curb ramps on all corners. Marked crosswalks should remain highly visible. Traffic signal phasing should allow adequate time for pedestrians to cross. Finally, the connected network must provide access to destinations that attract pedestrian travel, such as schools and parks, neighborhood shopping, transit stops, libraries, and post offices.

The state of pedestrian facilities in Modesto is variable. Some places have good facilities and some places do not. In many neighborhoods, especially neighborhoods that were not developed as part of more formal subdivisions, or those that are located on the rural periphery, sidewalks are missing altogether. These more incrementally developed areas are often served by narrow roadways with neither shoulders nor sidewalks. Most of the rural roads on the periphery of Modesto have narrow travel lanes and no sidewalks. Adding sidewalks after the fact is difficult: adequate right-of-way is often un-available and many residents feel that sidewalks would not be in keeping with the area's "rural" character.

Downtown Modesto has a well-developed pedestrian system with wide sidewalks, clearly marked crosswalks, and slower vehicle speeds. Other "strip mall" commercial areas in Modesto often have narrow or discontinuous sidewalks or none at all. Many of these areas were developed along wide arterial streets to accommodate automobile access. The width of these streets requires considerable time for pedestrians to cross, especially younger and older citizens. While nearly all major arterial streets within the urban portions of Modesto have sidewalks, many of these roadways have sidewalks built directly adjacent to travel lanes. High vehicles speeds and the lack of a buffer can make walking on these roadways unpleasant.

FACILITIES FOR THE DISABLED

Persons with disabilities are particularly aware of design features that contribute to improved walking or rolling conditions. The Americans with Disabilities Act (ADA) of 1990 made the country realize the particular needs of physically and mentally impaired individuals. This civil rights act prohibits public entities from designing new facilities or altering existing facilities that are not accessible to people with disabilities. As a result of ADA, curb ramps are a basic component of all new sidewalk construction.

Sidewalk construction, curb ramp design, and other accessibility standards have been developed on a federal level in two documents, the Uniform Federal Accessibility Standards (UFAS) and the Americans with Disabilities Act Accessibility Guidelines (ADAAG). States are given the option to adhere to one of these, but may also adopt more stringent standards than the Federal minimum guidelines. Caltrans conforms to the policies of UFAS and Title 24 of the California Code of Regulations. Title 24, developed by the Division of the State Architect, has some stricter accessibility requirements than UFAS.

Designing pedestrian facilities to accommodate persons with disabilities improves the walking experience for all users. Curb ramps are helpful to parents pushing strollers, delivery persons pulling dollies or carts, and small children on bicycles. Wide sidewalks invite people to stroll side-by-side and enable wheelchairs, bicycles, strollers, and scooters to pass one another without conflict. Smooth surfaces reduce the risk of elderly pedestrians and small children tripping. Therefore,

whenever one is analyzing, planning, or designing pedestrian facilities, accommodating persons with disabilities must be of utmost concern.

As noted above, sidewalk conditions are mixed in Modesto. Newer sidewalks developed since passage of the Americans with Disabilities Act are required to have curb ramps that provide for the safe crossing of persons in wheelchairs. Many older neighborhoods constructed before passage of this law do not have curb ramps. In downtown Modesto, curb cuts have been installed at all intersections. Modesto currently has a program to install curb ramps on older sidewalks within the neighborhoods; the City installs approximately 80 curb ramps per year.

MULTI-MODAL CONNECTIONS

Multi-modal refers to the use of two of more modes of transportation in a single trip (i.e., bicycling and riding the bus or train). Improving the bicycle-transit link is an important part of making bicycling a part of daily life in Modesto. Linking bicycles with mass transit, including buses and community shuttle services, overcomes such barriers as lengthy trips, personal security concerns, and riding at night or in poor weather.

Making the multi-modal connection consists of two key elements: providing bicycle parking facilities at bus stops and bike racks on buses. Two other components include improving bikeways that link with transit facilities and stops and encouraging the use of multi-modal programs. Bicycling to transit in lieu of driving benefits the community by reducing air pollution, reducing the demand for parking, reducing energy consumption, and reducing traffic congestion with relatively low investment costs.

Existing multi-modal connections in Modesto are especially important when considering regional trip opportunities. Modesto is increasingly becoming a bedroom community for people who work west of the Altamont, in the Tri-Valley Area (Livermore, Dublin, Pleasanton, San Ramon), the San Jose area, the East Bay, or even San Francisco. While no direct commuter rail connection exists between Modesto and the Bay Area, bus connections are available to the Altamont Commuter Express Train (ACE) and to the Dublin-Pleasanton BART station. Ensuring bicycle access on these bus connections will extend the range of individuals at both ends of the trip.

Local bus service within Modesto is provided by Modesto Area Express (MAX). MAX services operates along major corridors in Modesto, the downtown area, the Amtrak station, Vintage Faire Mall, and to the adjoining cities of Ceres and Salida. All MAX buses are equipped with bicycle racks.

Regional bus service is provided by Stanislaus Regional Transit (START). START buses provide service from Modesto to surrounding cities and towns, including Riverbank, Oakdale, and Turlock. Bus service to Turlock includes a stop at California State University Stanislaus. All START buses are equipped with bicycle racks.

MAX operates the Modesto ACE Express bus providing direct service from northwest Modesto at the Stanislaus County Library satellite to the Lathrop/Manteca ACE train station. ACE (Altamont Commuter Express) provides rail service between Stockton and San Jose via the Altamont Pass, with intermediate stops including Livermore and Pleasanton. Service to and from the ACE station is provided only on weekdays during the morning and evening commute periods.

MAX also operates the Modesto BART Express bus providing direct service from the library satellite to the Dublin/Pleasanton BART station. Service to and from BART is provided only on weekdays during the morning and afternoon/evening commute periods.

Modesto's main Transportation Center is located downtown at 1001 9th Street (at J Street). The ACE Express and BART Express bus stops are located at the Park and Ride lot at the library satellite. Local bus service in Modesto is provided by Modesto Area Express (MAX). Bicycle racks are available on all MAX buses.

The Modesto Amtrak Station is located at Held Drive and Briggsmore Road in northeastern Modesto. This is a full service Amtrak station, with ticket and baggage handling and package express service available. From the Modesto station, service is provided on Amtrak's San Joaquin Corridor to cities including Bakersfield, Fresno, Merced, Stockton, Emeryville and Vallejo. Connecting buses provide service into the Los Angeles area.

Greyhound inter-city bus service is also available at the downtown Modesto Transportation Center.

ENCOURAGEMENT AND EDUCATION PROGRAMS

Coordinated bicycle safety events can have a positive affect on bicycle ridership because they address and appease safety concerns of potential riders and teach good riding habits. Without these programs, a forum does not exist to address safety concerns that are real or perceived.

The City of Modesto sponsors two community events in May to promote bicycle safety, bicycle commuting, and demonstrate how bicycling can become a viable form of transportation in decreasing traffic and parking congestion, and help improve air quality. Bike to Work Day is intended to promote safe bicycle commuting with the City. The event includes three Police escorted routes, where bicycle police officers will lead commuters from designated locations toward the downtown area and discuss the rules of the road.

The Family Cycling Festival includes a number of events to promote cycling. Activities include a bicycle safety check, bicycle rodeo/safety course, bicycle licensing. Bicycle stunt shows and an amateur criterium race are also being held to attract people to the event.

3. PLANNING AND POLICY CONTEXT

This chapter provides an overview of planning and policy documents of the City of Modesto, Stanislaus County and adjacent jurisdictions and agencies that are relevant to the Non-Motorized Transportation Master Plan. These include the existing City of Modesto Non-Motorized Transportation Master Plan (1996), the Modesto Urban Area General Plan, and the Stanislaus County Regional Bicycle Action Plan.

CITY OF MODESTO

MODESTO NON-MOTORIZED TRANSPORTATION MASTER PLAN (1996)

The City of Modesto adopted a Non-Motorized Transportation Master Plan in July 1996 (1996 Plan). This Non-Motorized Transportation Master Plan Update document serves to formally update the 1996 Plan, in accordance with Caltrans requirements. The stated purpose of the 1996 plan, and by extension this Plan, was to achieve the following goals:

- Address the concerns and interests of the residents of Modesto;
- Increase both commuting and recreational use of bicycles;
- Increase the number if people who choose to commute to work using other than motor vehicles;
- Coordinate the City's non-motorized transportation plan with those of neighboring cities and Stanislaus County; and
- Address recent State requirements for bicycle and non-motorized transportation planning.

The 1996 Plan discussed existing conditions related to non-motorized travel in Modesto, identified a comprehensive non-motorized transportation network, discussed non-motorized facility types and standards, identified goals, policies and programs for implementation, and identified potential funding sources. The 1996 Modesto Non-Motorized Transportation Master Plan identified the following 10 goals:

1. Continue developing a Citywide non-motorized transportation system that serves the following uses as alternatives to motorized transportation:
    - Commuter Bicyclists
    - Recreational On-Road Bicyclists
    - Recreational Off-Road Bicyclists
    - Walkers
    - Runners

- Wheelchairs
- Skateboarders; and
- Skaters

2. Coordinate Modesto's non-motorized transportation system with the systems of neighboring cities and the County.
3. Link the City's non-motorized transportation users to major destinations.
4. Establish a regular maintenance and hazard removal program to ensure safe and well-maintained non-motorized transportation facilities.
5. Continue and expand programs that provide and encourage support facilities for non-motorized transportation users.
6. Continue to establish policies encouraging new development patterns that support non-motorized transportation, such as the village concept.
7. Establish strong transit connections for those who use non-motorized transportation, and to accommodate their particular needs on public transit (i.e. bicycle racks on buses).
8. Work with irrigation districts, railroads and other owners of linear right-of-way that have the potential to accommodate non-motorized transportation facilities and thereby to strengthen the City's non-motorized transportation system.
9. Establish a comprehensive program of community education and feedback related to non-motorized ways of getting about.
10. Seek regular, dedicated local funding for developing the Modesto Non-Motorized Transportation Master Plan, and establish a program to seek regular State and other public development and maintenance funding as available.

To date, the 1996 Non-Motorized Plan has been only partially implemented. Some on-street bike lanes have been striped, and the development of several off-street bike path segments has moved forward since adoption of the 1996 Plan. However, much of the Recommended Long-Term Non-Motorized Transportation System remains to be implemented. Modesto's existing non-motorized transportation network is discussed in detail in the Existing Conditions section of this Plan Update.

As part of this Updated planning effort, the Long-Term system recommended in the 1996 Plan will be revisited in the context of the development that has occurred in Modesto over the past nine years. The non-motorized network, goals, policies and recommendations of this Updated Non-Motorized Transportation Master Plan, once adopted, will supersede those in the 1996 Plan.

MODESTO URBAN AREA GENERAL PLAN

The Modesto Urban Area General Plan, adopted in August 1995 and most recently amended in March 2003, serves as the city's "blueprint" for future growth. The General Plan is intended to guide the physical development of Modesto to the year 2025. The General Plan contains goals, policies and objectives intended to preserve Modesto's quality of life while providing direction for the growth of business and industry to meet the needs of future generations. Issues addressed in the General Plan include employment opportunities, defining Modesto's character, maintaining older

neighborhoods and upgrading unsafe neighborhoods, integrating new neighborhoods into the urban land pattern, reducing automobile traffic impacts, preserving agricultural lands, and environmental concerns. The Modesto General Plan includes eight chapters: Introduction, Community Growth Strategy, Community Development Policies, Housing, Community Services and Facilities, Public Safety Issues, Environmental Resources and Open Space, and General Plan Implementation.

The General Plan provides a set of directives and guidelines regarding bicycle and pedestrian guidelines. **Figure 3-1** shows the Adopted Land Use Diagram from the City of Modesto's General Plan.

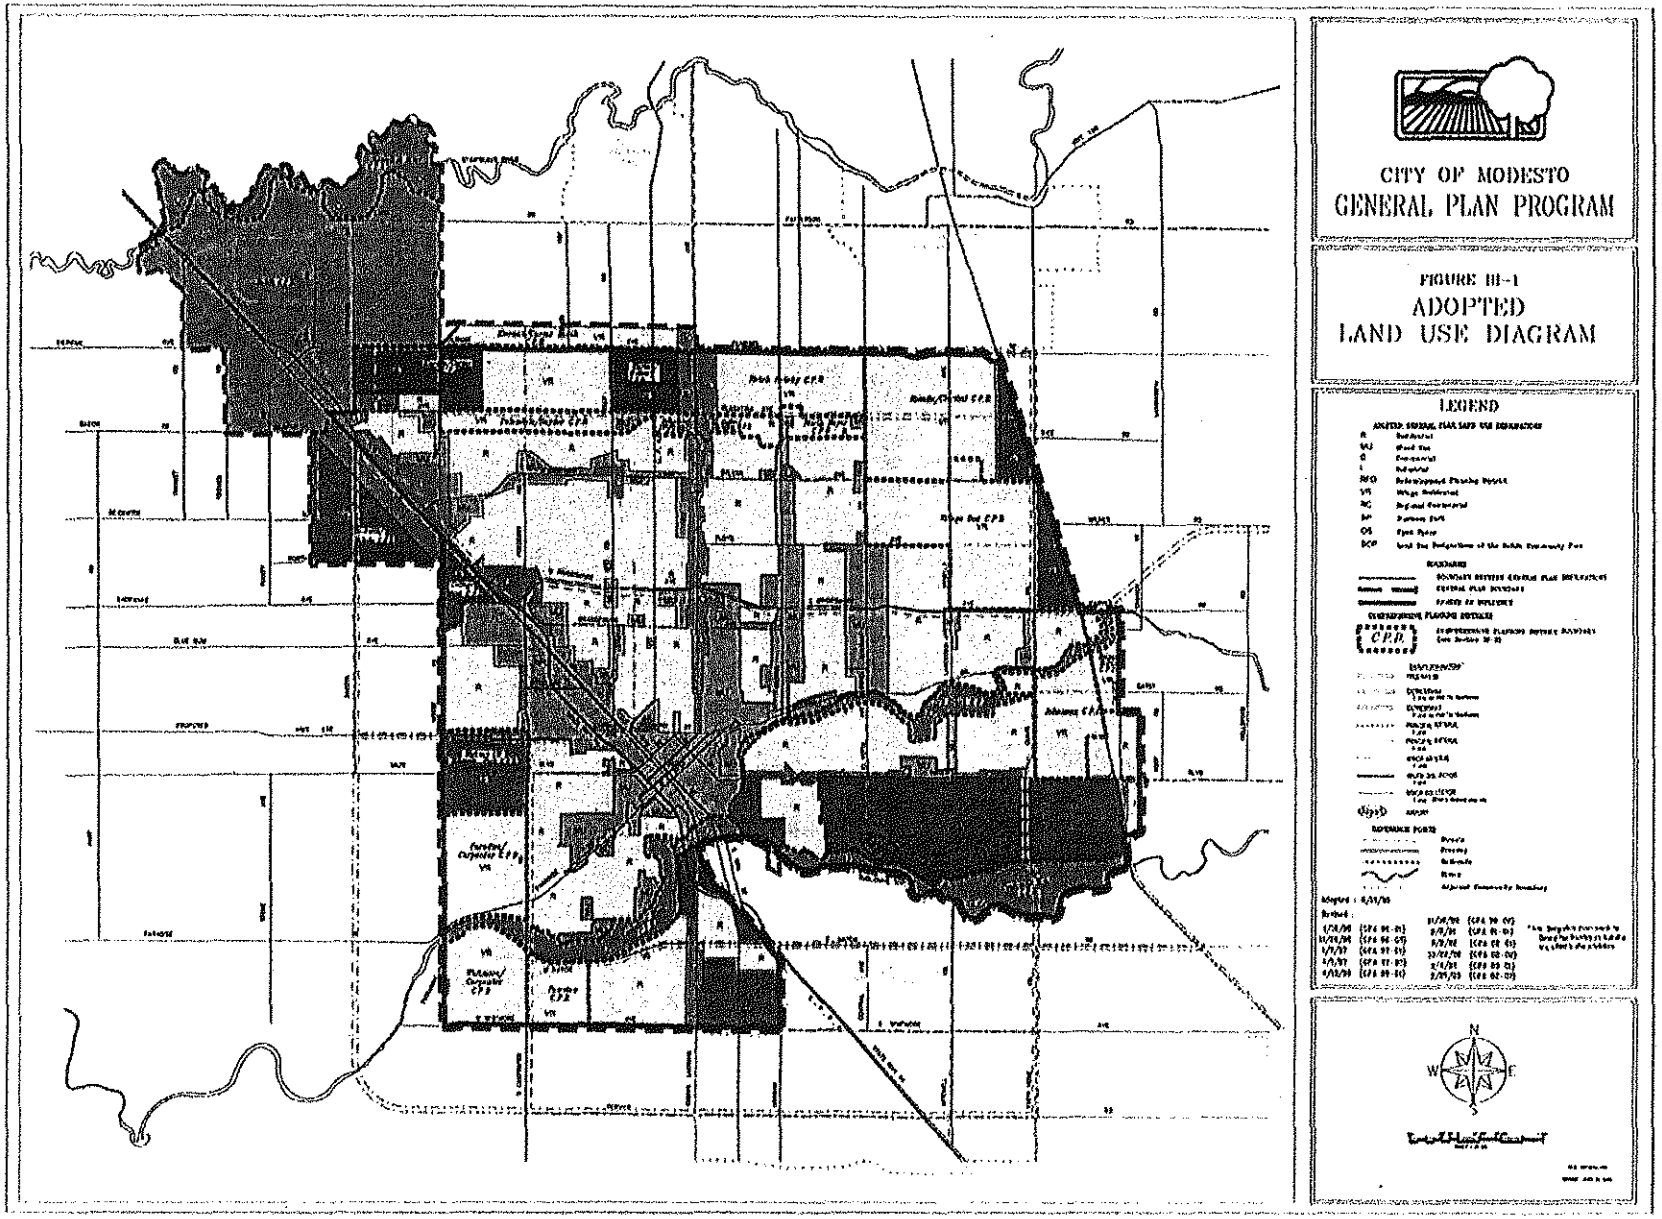
Within the introduction, the following is identified under "Overall Goals" of the General Plan:

> Transportation and Circulation systems that adequately provide for intra-city and regional transportation needs should be provided. Alternatives to the drive-alone auto mode, such as light rail, mass transit, ride sharing, bicycling, trail systems, and telecommuting should be encouraged to reduce traffic congestion and enhance air quality. The City's transportation planning should be coordinated with regional transportation planning efforts, wherever possible.

Chapter V., Community Services and Facilities, of the General Plan, include the Circulation and Transportation element of the Plan. This element includes the City's transportation diagram, provides for definitions of various roadway classifications, and includes policies related to the development of the transportation network.

Bicycle facilities are noted in the definition of several roadway classifications.

> Expressways - This classification defines high volume, access-controlled roadways which do not allow for pedestrian or bicycle movements in the traveled way.
>
> (1) Principal Arterial streets have six travel lanes with no bicycle lanes. The design speed is 45 mph. The typical right-of-way is 114 feet.
>
> (2) Minor Arterial streets have four travel lanes. Minor arterials can provide for bicycle lanes. The design speed is the same as principal arterials. The typical right-of-way is 100 feet.
>
> d. Collector Streets - This classification defines low-traffic-volume streets which can also serve pedestrian and bicycle traffic. Collector streets provide traffic circulation within residential neighborhoods, and commercial and industrial areas. Collector streets distribute trips from the arterials through the area to their ultimate destination and collect traffic from local streets and channel it into the arterial streets. There are two classes of collector streets:
>
> (1) A major collector street is a four-lane facility, with a design speed of 25-35 mph on a typical right-of-way of 84 feet without bicycle lanes or 96feet with two, 6-foot bicycle lanes.



CITY OF MODESTO
GENERAL PLAN PROGRAM
FIGURE III-1
ADOPTED
LAND USE DIAGRAM
LEGEND

(2) A minor collector street is a two-lane facility, with a design speed of 25-30 mph on a typical right-of-way of 60 feet without bicycle lanes or 72 feet with two, 6-foot bicycle lanes.

It is important to note that some of the Class II Bike Lane facilities recommended in Chapter 5 of this plan may not be feasible within the roadway buildout cross-sections identified in the Circulation Element of the General Plan. Future feasibility analysis of the ability of specific roadway segments to accommodate bike lanes, given anticipated buildout traffic volumes and lane configurations, will be required for a number of projects. Implementation of these Class II segments will require close coordination between the City's Community &Economic Development, Parks, Recreation & Neighborhoods, and Public Works Departments.

Policies related to non-motorized transportation facilities within the Circulation and Transportation element include the following:

Policy H. Development should be designed in a way that will encourage walking as an alternative mode to the automobile for transportation. Safe and convenient pedestrian facilities should be provided in residential, commercial and other areas when necessary.

Policy I. The use of the bicycle shall be promoted as an alternative mode of transportation. An adequate and safe bicycle system should be provided to connect residential areas with shopping and employment areas in and adjacent to the City for present and future transportation needs. Right-of-way for bicycle usage should be considered in the planning of new streets and in street improvements. Facilities for mode transfer from bicycle to park-and-ride lots, transit, and rail should be considered and provided when necessary.

Chapter V., Community Services and Facilities, of the General Plan, also include the Parks and Open Space element of the General Plan. This element provides policies and standards for development of the park and open space system. Policies related to non-motorized transportation facilities within the Circulation and Transportation element include the following:

Policy E. Dual-use flood control/recreation facilities shall be developed wherever feasible…

Policy F. Dual-use facilities shall be designed and constructed in accordance with the standards and criteria contained in the "Design Standards for Dual Use Flood Control/Recreation Facilities" manual.

City of Modesto Standard Specifications

The City of Modesto Street Standard Specifications set forth standards for design and construction of public and some private infrastructure within the City's sphere of influence. This document includes detailed specifications for roadways, including cross sections, lane widths, curb and gutter detail, intersection configurations, curb ramp detail, and drainage features.

Bike lanes are shown on specifications for Minor Arterials and Major and Minor Collectors. According to the specification notes for these roadway types, "striping for bike lanes shall be installed unless directed otherwise by the City Traffic Engineer." Bike lanes are shown to be 6 feet wide in all street specifications. Bike lanes are not shown on specifications for Principal Arterials or Expressways. Some Expressway specifications (e.g. Pelandale) show an 8 foot bike path parallel to the roadway shoulder.

Modesto Zoning Ordinance

The City of Modesto Zoning Ordinance contains the following language related to operation of a bicycle:

> No person shall propel a bicycle within any sidewalk area in any business district as defined by Section 235 of the Vehicle Code of the State of California. (Modesto Municipal Code 3-2.807)
>
> A bicycle which is licensed pursuant to this chapter may be operated upon all the streets, alleys and public ways of the city, except that no bicycle shall be operated on the sidewalk area in any business district as defined in the California Vehicle Code. (Modesto Municipal Code 3-3.12)

No other bicycle-related language is contained in the zoning ordinance.

STANISLAUS COUNTY

Stanislaus Council of Governments Regional Bicycle Action Plan

The Stanislaus County Regional Bicycle Action Plan was adopted by the Stanislaus Council of Governments (StanCOG) in July 2001. The plan develops goals, objectives and policies which are intended to implement the Regional Bicycle Transportation Master Plan adopted in 1996. The Bicycle Action Plan is intended to serve as a guide for planning and implementing regional bicycle facilities for transportation purposes. The Plan covers both incorporated cities such as Modesto as well as unincorporated lands under the jurisdiction of Stanislaus County.

The Plan includes a detailed list of potential bicycle facility improvements in Stanislaus County, along with the estimated costs.

4. NEEDS ANALYSIS

This chapter reviews the relationship between bicycle use, commute patterns, demographics, and land use in the City of Modesto. It identifies major activity centers and public facilities where bicyclists may be destined, along with the needs of recreational and commuter bicyclists. A review of the needs of each bicycle user group will help guide the type and routing of the bikeway system.

One of the primary reasons for creating the Non-Motorized Transportation Master Plan is to maximize the number of bicycle commuters in order to help achieve transportation goals such as minimizing traffic congestion and air pollution. In order to set the framework for these benefits, local and national statistics are used as a basis for determining the benefits of an improved and expanded bikeway network for Modesto.

LAND USE AND DEMAND

The concept of "demand" for bicycle facilities can be difficult to comprehend. Unlike automobile use, where historical trip generation studies for different types of land uses permits an estimate of future "demand" for travel, no such methodology exists for bicycling or walking. Land use patterns can help predict demand and are important to bikeway planning because changes in land use (and particularly employment areas) will affect average commute distance, which in turn affects the attractiveness of bicycling as a commute mode. The Modesto bikeway network will connect the neighborhoods where people live to the places they work, shop, recreate, or go to school. An emphasis will be placed on regional bikeway and transit connections centered around the major activity centers in Modesto, including:

- Downtown
- Civic Buildings and Libraries
- Major Employment Centers
- Commercial Districts
- Regional Shopping Centers
- Modesto Junior College (East and West campuses)
- Amtrak Station
- Downtown Transit Center
- Residential Neighborhoods
- Hospitals

COMMUTE PATTERNS

A central focus of presenting commute information is to identify the current "mode split" of people that live and work in Modesto. Mode split refers to the choice of transportation a person selects to move to destinations, be it walking, bicycling, taking a bus, or driving. One major objective of any bicycle facility improvement is to increase the "split" or percentage of people who choose to bike rather than drive or be driven. Every saved vehicle trip or vehicle mile represents quantifiable reductions in air pollution and can help in lessening traffic congestion.

2000 US CENSUS

Journey to work and travel time to work data was obtained from the 2000 US Census for Modesto, Stanislaus County, California, and the United States. Journey to work data is shown in **Table 4-1**.

Table 4-1
Journey to Work Data

Mode	United States	California	Stanislaus County	Modesto
Bicycle	0.4%	0.8%	0.7%	0.7%
Drove Alone	75.7%	71.8%	76.8%	78.8%
Carpool	12.2%	14.6%	15.0%	13.6%
Public Transit	4.7%	5.1%	1.0%	1.3%
Walked	2.9%	2.9%	2.4%	1.7%
Other	4.1%	4.8%	0.7%	0.5%

Source: U.S. Census 2000

As shown, about 0.7% of all employed Modesto residents commute primarily by bicycle, which is roughly the same as the national average of 0.4% and California average of 0.8%, and identical to the Stanislaus County average of 0.7%. This indicates that Modesto has a typical bicycling mode split for commuting purposes. It should be noted that the Census data does not give an indication of the number of people who bicycle for recreation or for utilitarian purposes such as shopping.

Travel time to work is shown in **Table 4-2**. Travel time is important because it can give an indication of the number of potential new bicycle commuters.

It has been suggested that a reasonable commute time, regardless of mode, is about 30 minutes. Assuming that travel occurs primarily on local roads during peak commute periods, a motor vehicle commute time of 15 minutes or less would be equivalent to about a 30 minute bicycle commute on flat terrain. In other words, converting an under-15 minute motor vehicle commute trip to a bicycle commute trips would still result in a reasonable 30 minute commute time. As shown in Table 4-2, about 36% of Modesto residents have a commute time of 15 minutes or less (most of these trips are drive alone, based on the city's mode split data). Total Modesto bicycle commuters (558) represent only about 1% of the number residents who live within a 30 minute bicycle ride of their workplace (53,155) – this means there is a substantial number of residents who are taking other modes for these short-distance commutes. While some of these people may be carpooling, taking transit, or walking, based on the fact that nearly 80% of all Modesto residents drive alone to work, it can be

assumed that the majority of these short-distance commuters are driving alone to work. Given this data, there is a substantial opportunity to capture some of the short distance (less than 15 minute) motor vehicle commute trips and convert them to bicycle commute trips.

Table 4-2
Travel Time to Work Data

	United States	California	Stanislaus County	Modesto
Less than 15 minutes	29.4%	25.3%	35.1%	36.0%
15 to 29 minutes	36.1%	35.4%	34.9%	36.6%
30 to 44 minutes	19.1%	20.9%	14.2%	12.3%
45 to 59 minutes	7.4%	8.2%	4.7%	4.2%
60 minutes or more	8.0%	10.1%	11.2%	10.4%

TRIP REDUCTION AND POTENTIAL AIR QUALITY BENEFITS

Based on available census data on ridership, a rough projection of future bicycle ridership in Modesto along with the trip reduction and air quality benefits can be made. While these projections are only ambitious estimates, they are important to building an argument for investing in bicycle facilities and programs over time. For example, a traffic model is used to project future roadway improvements over time based on a straight-line assumption about auto use, fuel price, and other factors. The projection on bicycle use and benefits differs only in that it forecasts a minor change in modal choice -- not travel behavior – based on a combination of empirical and theoretical data. Research conducted around the U.S. by the U.S. Department of Transportation shows a definitive link between bicycle use and (a) age and (b) the miles of bicycle facilities provided. It is possible to derive a causal relationship from this information.

Modesto lies within the San Joaquin Valley Air Basin, which is regulated by the San Joaquin Valley Air Pollution Control District (Air District). According to the Air District, the air quality in the San Joaquin Valley Basin is among the poorest in the state. On average the Basin exceeds the Federal health-based standards for ground-level ozone 35 to 40 days per year, and exceeds the more stringent California standards for ozone more than 100 days per year. The Basin exceeds the Federal standards for airborne particles (PM10) less than five times annually, and exceeds the more stringent California standards for PM10 an average of 90 to 100 days per year.

Currently, the Basin is classified as extreme non-attainment for the Federal ground-level ozone and PM10 standards. The Basin is classified as severe non-attainment for the California ozone standard and non-attainment for the State PM10 standard. The Stanislaus County portion of the Basin is in attainment for both Federal and State carbon monoxide (CO) standards.

According to the Air District, motor vehicles account for approximately 57 percent of the air pollution in the Basin. Reducing vehicle miles traveled (VMTs) is a key goal of the Air District, and implementing the non-motorized transportation network will help achieve this goal by providing

Modesto residents safe and functional ways to get to work, school, or shopping without using a motor vehicles. The current number of daily bicycle commuters in Modesto is estimated to be 3,965 riders, making a total of 7,931 daily trips and saving an estimated 15,066 VMTs per weekday. With implementation of the non-motorized transportation network by 2020, it is estimated that bicycle commuting will increase to 11,053 daily bicycle riders making 20,105 daily trips and saving an approximately 41,992 VMTs per weekday.

Table 4-3 quantifies the estimated reduction in VMTs in Modesto following implementation of the non-motorized transportation network, and the estimated reduction in air pollutants based on the best available local and national data. The proposed bikeway system in Modesto will increase the bicycle mode share of trips from less than one percent in 2000 (U.S. Census) to over two percent by 2020. This will result in an estimated decrease of 773 lbs/day of PM10, 2,095 lbs/day of ROG, and 3,048 lbs/day of NOX.

BICYCLE AND PEDESTRIAN SAFETY AND ACCIDENT ANALYSIS

Safety is a major concern of both existing and potential bicyclists. For those who ride, it is typically an on-going concern or even a distraction. For those who don't ride, it is one of the most compelling reasons not to ride. In discussing bicycle safety, it is important to separate out perceived dangers versus actual safety hazards.

Bicycle riding on-street is commonly perceived as unsafe because of the exposure of a lightweight, two-wheeled vehicle to heavier and faster moving automobiles, trucks and buses. Actual accident statistics, however, show that bicyclists face only a marginally higher degree of sustaining an injury than a motorist based on numbers of users and miles traveled. Death rates are essentially the same with bicyclists as with motorists. Bicycle-vehicle accidents are much less likely to happen than bicycle-bicycle, bicycle-pedestrian, or accidents caused by physical conditions. The majority of reported bicycle accidents show the bicyclist to be at fault; generally, these involve younger bicyclists riding on the wrong side of the road or being hit broadside by a vehicle at an intersection or driveway.

Statewide Integrated Traffic Records System (SWITRS) accident data for bicycle and pedestrian collisions was collected for the calendar years 1998, 1999 and 2000 in Modesto, and is presented in **Table 4-4**.

Table 4-3
Bicycle Commute and Air Quality Projections

Current Commuting Statistics		**Source**
Population	189,460	*Source: 2000 US Census*
Number of Employed Persons	74,878	*Source: 2000 US Census*
Number of Bicycle-to-Work Commuters	558	*Source: 2000 US Census*
Bicycle-to-Work Mode Share	0.75%	*Calculated from above*
School Children Grades K-8	30,481	*2000 US Census, population ages 6-14*
Estimated School Bicycle Commuters	1,524	*Calculated based on existing estimates of biking to school*
Number of College Students	11,539	*2000 US Census*
Estimated College Bicycle Commuters	231	*Calculated based on existing estimates of biking to college*
Average Weekday MAX Ridership	11,600	*American Public Transportation Assn.*
Number of Daily Bike-Transit Users	102	*Calculated based on existing surveys of bike transit use*
Utilitarian Bicycle Trips	1,550	
Existing Bicycle Commuters		
Total Number of Bicycle Commuters	3,965	*Total of bike-to-work, transit, school, college and utilitarian bicycle trips. Does not include recreation.*
Total Daily Bicycle Trips	7,931	*Total bicycle commuters x 2 (for round trips)*
Reduced Vehicle Trips per Weekday	5,180	*Assumes 73% of bicycle trips replace vehicle trips for adults/college students and 53% for school children*
Reduced Vehicle Miles per Weekday	15,066	*Assumes average round trip travel length of 8 miles for adults/college students and 1 mile for schoolchildren*
Future Bicycle Commuters		
Number of Future Daily Bicycle Commuters	11,053	*Estimated using increase to 279% of baseline from 2000 Los Angeles County MTA study*
Future Total Daily Bicycle Trips	22,105	*Calculated from above*
Future Reduced Vehicle Trips per Weekday	14,438	*Calculated from above*
Future Reduced Vehicle Miles per Weekday	41,992	*Calculated from above*
Future Reduced Vehicle Miles per Year	3,794,540	*180 days for students, and 256 days for employed persons*
Future Air Quality Benefits		
Reduced PM10 (tons/weekday)	773	*(.0184 tons per reduced mile)*
Reduced NOX (tons/weekday)	2,095	*(.04988 tons per reduced mile)*
Reduced ROG (tons/weekday)	3,048	*(.0726 tons per reduced mile)*
Reduced PM10 (tons/year)	69,820	*(.0184 tons per reduced mile)*
Reduced NOX (tons/year)	189,271	*(.04988 tons per reduced mile)*
Reduced ROG (tons/year)	275,484	*(.0726 tons per reduced mile)*

Notes:
Sources as noted in the table. For detailed calculations, see "Estimation of Existing Bicycle Usage" spreadsheet provided in the Appendix to this Plan.

Table 4-4
Modesto Bicycle and Pedestrian Collision Summary 1998-2000

Number of Bicycle Collisions[1]									
2000		1999		1998		3 Year Total	Annual Average	Avg. Annual Collisions per 1,000 Population[2]	Relative Index[3]
Fatal	Injury	Fatal	Injury	Fatal	Injury				
2	91	1	70	1	110	275	92	0.49	1.4
Number of Pedestrian Collisions[1]									
2000		1999		1998		3 Year Total	Annual Average	Avg. Annual Collisions per 1,000 Population[2]	Relative Index[4]
Fatal	Injury	Fatal	Injury	Fatal	Injury				
2	85	4	79	2	78	250	83	0.44	1.1

Source: 1998-2000 Statewide Integrated Traffic Records System
Notes:
1. Total of both fatal and injury collisions for 1998-2000.
2. 2000 Census population for city of Modesto of 189,460.
3. Relative to California annual average of 0.36 bicycle collisions per 1,000 population for period of 1998-2000.
4. Relative to California annual average of 0.42 pedestrian collisions per 1,000 population for period of 1998-2000.

The Modesto Police Department enforces all traffic laws, for bicycles and motor vehicles as part of their regular duties. They ticket violators as they see them. This includes bicyclists who break traffic laws, as well as motorists who disobey traffic laws and make the cycling environment more dangerous. The level of enforcement depends on the availability of officers. The Police Department also responds to particular needs and problems as they arise.

BICYCLIST NEEDS

The purpose of reviewing the needs of bicyclists is twofold: (a) it is instrumental when planning a system that must serve both commuter and recreational user groups; and (b) it is useful when attempting to quantify future usage and benefits to justify expenditures of resources. According to a nationwide 1991 Lou Harris Poll, it was reported that "...nearly 3 million adults (about one in 60) already commute by bike, and projected the number could rise to 35 million if more bicycle friendly transportation systems existed." In short, there is a large reservoir of potential bicyclists who don't ride (or ride more often) simply because they do not feel comfortable using the existing street system and/or don't have appropriate bicycle facilities at their destination.

Key general observations about bicycling needs in Modesto include:

- Bicyclists are typically separated between experienced and casual riders. The U.S. Department of Transportation identifies thresholds of traffic volumes, speeds, and curb lanes where less experienced bicyclists begin to feel uncomfortable. For example, on an arterial with traffic moving between 30 and 40 miles per hour, less experienced bicyclists require bike lanes while more experienced bicyclists can comfortably use streets with wide curb lanes.

- Casual riders include those who feel less comfortable negotiating traffic. Others such as children and the elderly may have difficulty gauging traffic, responding to changing conditions, or moving rapidly enough to clear intersections. Other bicyclists, experienced or not, may be willing to sacrifice time by avoiding heavily traveled arterials and using quieter side streets. In some cases, casual riders may perceive side streets (or sidewalks) as being safer alternatives than major through routes, when in fact they may be less safe. Other attributes of the casual bicyclist include cycling shorter distances than the experienced rider and unfamiliarity with many of the rules of the road.

- The casual bicyclist will benefit from route markers, bike lanes, wider curb lanes, and educational programs. Casual bicyclists may also benefit from marked routes that lead to parks, museums, historic districts, and other visitor destinations.

- Experienced bicyclists include those who prefer the most direct, through route between origin and destination, and a preference for riding within or near the travel lanes. Experienced bicyclists negotiate streets in much the same manner as motor vehicles, merging across traffic to make left turns, and avoiding bike lanes and shoulders that contain gravel and glass. The experienced bicyclist will benefit from wider curb lanes and loop detectors at signals. The experienced bicyclist who is primarily interested in exercise will benefit from loop routes that lead back to the point of origin.

- Bicycles themselves range in cost from about $200 to over $2,000 for adult models. The most popular bicycle types today are the hybrid or mountain bike. These relatively lightweight bicycles feature wider knobby tires that can handle both on-road and off-road conditions, from 10 to 27 gears, and up-right handlebars. Advanced versions have features such as front and rear shocks to help steady the rider on rough terrain. The "10-speed" bicycles of years past have evolved into a sophisticated ultra-light "road bike" that is used primarily by the serious long distance adult bicyclists. These machines feature very narrow tires that are more susceptible to flats and blowouts from debris on the roadway.

- Who rides bicycles? While the majority of Americans (and Modesto residents) own bicycles, most of these people are recreational riders who ride relatively infrequently. School children between the ages of about 6 and 14 typically make up a large percentage of the bicycle riders today, often riding to school, parks, or other local destinations on a daily basis, weather permitting. The serious adult road bicyclist who may compete in races, "centuries" (100 mile tours) and/or ride for exercise makes up a small but important segment of bikeway users, along with serious off-road mountain bicyclists who enjoy riding on trails and dirt roads. The single biggest adult group of bicyclists is the intermittent recreational rider who generally prefers to ride on pathways or quiet side streets.

RECREATIONAL BICYCLIST NEEDS

The term "recreational" cyclist covers a broad range of skill and fitness levels. Recreational cyclists in Modesto can range from a "roadie" who joins 50 mile group rides on weekends, to a family with young children who occasionally want to ride a couple miles down a quiet bike path, and all levels in between. A cyclist's level of skill, fitness, and comfort on the road will determine what type of facility they are looking for. The needs of recreational bicyclists must be understood prior to developing a system or set of improvements. While it is not possible to serve every neighborhood

and every need, a good plan will integrate recreational needs to the extent possible. The following points summarize recreational needs:

- Recreational users cover all age groups from children to adults to senior citizens. Each group has their own abilities, interests, and needs.
- Directness of route is typically less important than routes with less traffic conflicts, visual interest, shade, and protection from wind, moderate gradients, or other features.
- People exercising or touring often (though not always) prefer a loop route rather than having to backtrack.

In order to characterize the differences in recreational cyclists, this study breaks this category into two subcategories: "Road Cyclists" and "Casual Cyclists," acknowledging that these are generalizations and that the average cyclist may have attributes of both user groups.

Road Cyclists

Road cyclists are those who will bike almost exclusively on street, because roadways are the type of facility that accommodates their desire for higher speeds, longer distances, and few conflicts with other recreational users. Typical trip distances for the road cyclist can range from 10 miles to over 50 miles. While the average road cyclist would likely prefer to ride on roads with little or no traffic, they are generally comfortable riding in traffic if necessary. To this end, a road cyclist will tend to ride in a manner similar to a motor vehicle (e.g. when approaching traffic signals or making left turns). Road cyclists are typically not seeking a recreational destination along the route, as the ride itself is the recreation. In fact, special cycling clothing and shoes and the lack of a bicycle lock, tends to limit the ability of the road cyclist to park and walk around off the bike.

Due to the relatively narrow width and thin casing of standard road bike tires, road cyclists are often susceptible to flat tires. As such, road cyclists are very concerned about glass, rocks, and other debris on the road or in the shoulder. In addition, loose material on the road such as sand or gravel can cause skinny road tires to lose traction and wash out on curves. Since most road debris tends to end up in the shoulder, road cyclists will tend to move into the travel lane if any debris is present in the shoulder that might cause a flat tire or other hazard. This can sometimes lead to conflicts with motor vehicles, as many motorists don't understand why a cyclist is riding in the lane if there is a seemingly good shoulder available.

The Stanislaus County Bicycle Club offers a number of regular group rides for road cyclists in the area. Several of these rides depart from Modesto, and head out on rural roads toward Riverbank, Oakdale, Knights Ferry, and other destinations. These cyclists typically want to get out of the urban area as quickly as possible and onto more scenic, low-traffic rural roads that are not interrupted by as many traffic controls, cross-streets, and other potential conflict points.

Casual Cyclists

Casual recreational cyclists are those who generally want to ride on off-street bike paths, are seeking a more relaxed cycling experience, and cover shorter trip distances at slower speeds. Casual cyclists will tend to do trips of less than 10 miles in length, and often ride more comfort-oriented bikes,

hybrid or mountain bikes. Casual cyclists may ride as a family group, with children, and because they are more likely to ride with others of varying skill and fitness levels, flat topography is generally desired. Casual cyclists are typically not comfortable riding in traffic, and will avoid riding on busy streets when possible, riding on the sidewalk if necessary. Bike routes that extend through low-traffic residential streets are generally acceptable for casual cyclists, even if they are not the most direct route between destinations. Casual cyclists may load their bikes in their cars and drive to a bike path, and are more likely in need of parking areas. Having recreational amenities and features along the route is more important to the casual cyclists, such as drinking fountains, shaded areas, picnic tables, interpretive signs, and scenic vistas. Recreational destinations are also important for casual cyclists, as they provide a place to stop and get off the bike and walk around. To this end, having secure bike parking at destinations is important.

Modesto currently offers several excellent recreational bicycle routes for different types of bicycle riders. These include bike paths for the less experienced rider such as the Dry Creek Bike Path, Hetch-Hetchy Path, and Tuolumne River Park path. Low-traffic farm roads outside the City limits offer longer distance riders options for multi-hour rides; however cyclists that live in Modesto want good routes to access these roads.

Some of the most obvious deficiencies for bicyclists in Modesto are the lack of public awareness of bicycling opportunities and the lack connectivity to regional recreation destinations and facilities such as parks and rest stops. Many roads within the City lack shoulders or sufficient width for bicyclists, inhibiting some of the less adventuresome riders. Finally, there is demonstrated demand for additional bike paths where families, children, and others can ride closer to home without having to worry about traffic.

One common problem on bike paths or multi-use trails is conflicts between bicyclists, pedestrians, roller bladers, and others. As a bike path begins to exceed 200 people per hour, those conflicts become more of a problem unless the path has adequate width (at least 8 feet), unpaved shoulders for walkers, and adequate signing and enforcement. Regardless of the design and operation, many experienced riders choose not to use bike paths because of the unpredictability of other users. Accident studies have shown that most bicycle-related accidents involve other bicyclists or pedestrians, rather than automobiles. As such, bike paths should be designed to separate users as much as possible and the system should not depend on bike paths for critical connections to serve all riders.

With a favorable climate and topography available to meet the needs of the average rider, as well as the most advanced, recreational riders abound in Modesto. Bicycle clubs such as the Stanislaus Bicycle Club provide both the serious and casual recreational rider the opportunity to ride socially and be guided through the maze of country roads to scenic destinations.

These recreational routes will be used as part of the evaluation criteria for selecting connection points to destinations outside Modesto. Recreational bicyclist needs will be met by planning, designing, and implementing a series of bike routes that connect to adjacent cities in Stanislaus County, as well as increase accessibility to routes that lead outside town and cities away from traffic and congestion.

COMMUTER BICYCLIST NEEDS

As this Non-Motorized Transportation Plan, and available state and federal bicycle funding is primarily focused on commuting cyclists – those riding to work or school, or for shopping, errands, and other utilitarian trips -- it is important to understand the specific needs of bicycle commuters.

Commuter bicyclists in Modesto range from employees who ride to work to a child who rides to school to people riding to shops. Millions of dollars have been spent attempting to increase the number of people who ride to work or school, with moderate success. Bicycling requires shorter commutes, which runs counter to our many of our nations past land use and transportation policies, which effectively encouraged people to live further, and further from where they work. Access to transit helps extend the commute range of cyclists, but transit systems also face an increasingly dispersed live-work pattern that is difficult to serve. Despite these facts, Modesto has a great potential to increase the number of people who ride to work or school because of (a) concentrated employment centers such as downtown and the industrial areas, (b) a favorable, flat topography, (c) a moderate climate, and (d) a high percentage of work trips that are less than 20 minutes.

For example, bicycle commuters in the City of Davis have reduced peak hour traffic volumes by over 15 percent -- to the point that many downtown streets that would normally be four lanes of traffic (with no bike lanes) have only two traffic lanes and ample room for bicyclists. While Davis may be an anomaly, national surveys have shown that about 20 percent of the adult population would use a bicycle to ride to work at least occasionally if there were a properly designed bikeway system.

Commuter and student destinations in Modesto include downtown, industrial employment areas, office parks, agricultural processing operations, hospitals, elementary, junior high and high schools, and the Modesto Junior College campuses. Targeting bikeway improvements to commuters is important because most roadway congestion and a significant portion of air contaminants occur during the AM and PM periods.

Key commuter needs are summarized below.

- Commuter walking or bicycling typically falls into one of two categories: (1) adult employees, and (2) younger students.
- Commuter trips range from several blocks to one or more miles.
- Commuters typically seek the most direct and fastest route available, with regular adult commuters often preferring to ride on arterials rather than side streets.
- Commute periods typically coincide with peak traffic volumes and congestion, increasing the exposure to potential conflicts with vehicles.
- Places to safely store bicycles are of paramount importance to all bicycle commuters.
- Major commuter concerns include changes in weather (rain and Tule fog), riding in darkness, personal safety and security.

- Rather than be directed to side streets, most commuting cyclists would prefer to be given bike lanes or wider curb lanes on direct routes.
- Unprotected intersections in general are the primary concerns of all bicycle commuters.
- Many younger students use sidewalks for riding to schools or parks, which is acceptable in areas where pedestrian volumes are low and driveway visibility is high. Where on street parking and/or landscaping obscures visibility, sidewalk riders may be exposed to a higher incidence of accidents. Older students who consistently ride at speeds over 10 mph should be directed to riding on street wherever possible.
- Cyclists riding the wrong-way on-street are common and typically account for many recorded accidents, pointing to the need for education

As noted earlier, Modesto, like most of California and the country, currently has a bicycle commute mode split of less than one percent. The National Bicycling and Walking Study adopted by the U.S. Department of Transportation calls for a five-percent bicycle commute mode split by the year 2005.

Commuters and students follow similar paths, which is typically the most direct possible route from origin to destination. For grammar school students, this may consist of residential or collector streets, with few crossings of major arterials. For junior high and high school students, riders may have to cross up to five or six arterials to reach school. For college students and adult commuters, trips are most often under five miles but may be as long as 10 or 15 miles.

Unfortunately, commuters and students need to travel during periods of peak traffic activity, and to destinations that may have high levels of congestion and traffic volumes/speeds. For example, one of the most dangerous parts of a young student's commute is the drop-off zone in front of their school where dozens of vehicles jockey for position.

Once they have arrived at their destinations, bicycle commuters often find no (or poor) bicycle racks, and no showers or lockers. Rather than providing an incentive for bicyclists, most schools and employers inadvertently discourage bicyclists while continuing to subsidize parking for the automobile.

Commuting bicyclists have very obvious and straightforward needs. They require bike lanes or wider curb lanes along all arterials and collectors, loop detectors at signalized intersections, new signals where school children need to cross busy arterials, adequate maintenance of the pavement, and adequate bicycle storage and showers at their destinations. Any other local or employer based incentive to encourage bicycling to work would help to achieve the five-percent commute goal.

Most commute bicycle trips are under five miles and therefore not regional trips, except for those commuters linking to another mode such as at an Amtrak Station, transit stop, or park and ride lot. Allowing bicycles on other modes such as rail or bus, or providing bicycle lockers at multi-modal stations will help extend the range of the bicycle commuter. Other bicycle commuters will depend on a well-devised local bikeway network produced by a city in its bicycle transportation plan.

These destinations noted above will be used as criteria in the selection of the Updated Non-Motorized Transportation network.

PEDESTRIAN NEEDS

Pedestrians in Modesto can be categorized depending on trip types. Pedestrian trip types include those associated with: traveling to work, transit or other multi-modal facilities, school, recreation and entertainment, health and exercise, shopping, social events, personal errands, appointments, and linked trips (for example, running errands on the way to work). Pedestrian needs for different trip types vary. For example, a commuter may desire a well-connected direct route with efficient signal timing, while a recreational pedestrian may be more concerned about the aesthetics of the surroundings. However, all pedestrians have several needs in common, such as safety, connectivity, and accessibility. These are the primary needs that have been identified in Modesto.

Pedestrians can also be grouped into several user classes based on age. Pedestrian systems should generally be designed to accommodate all age groups. **Table 4-5** identifies and defines these age groupings.

Table 4-5
Age-Based Pedestrian Characteristics

Age Group	Characteristics
Age 0 to 4	• Learning to walk • Developing peripheral vision, depth perception • Requiring constant parental supervision
Age 5 to 12	• Increasing independence but still requiring supervision • Susceptible to "dart out" or intersection dash • Poor depth perception
Age 13 to 18	• Sense of invulnerability • Intersection dash
Age 19 to 40	• Active, fully aware of traffic environment
Age 41 to 65	• May be some slowing of reflexes
Age 65+	• Some street crossing difficulty • Some difficulty hearing vehicles approaching from behind • Poorer vision • High fatality rate

Pedestrian mobility networks should consider persons with disabilities. The Americans with Disabilities Act (ADA) mandates that reasonable accommodation for access should be afforded those who may need such assistance. The specific accommodations needed for West Hollywood are described in more detail in Chapter 6. The City has already incorporated many accommodations, including curb ramps for wheelchair access on sidewalks, audible pedestrian signals for the vision impaired, and smooth surfaces on sidewalks.

Based on field observations and input provided in the public input process, the most critical needs of pedestrians in Modesto include the following.

1. Increase safety and visibility at unsignalized crosswalks
2. Increased enforcement of traffic laws
3. Implementation of a motorist and pedestrian educational campaign
4. Widened sidewalks along some streets
5. Removal of utility poles and other obstacles on sidewalks
6. Improved maintenance of sidewalks and crosswalks

OPPORTUNITIES AND CONSTRAINTS

CANAL RIGHTS-OF-WAY

Modesto has several irrigation canal laterals, linear corridors that provide an opportunity to accommodate off-street non-motorized transportation facilities. The major irrigation laterals within Modesto are under the jurisdiction of the Modesto Irrigation District and the Turlock Irrigation District. These irrigation laterals pass through both urbanized and non-urbanized portions of Modesto. It is within the urbanized areas that the canals provide the greatest opportunity to accommodate bicycle or pedestrian pathways.

A number of irrigation canal rights-of-way were identified in the 1996 Non-Motorized Transportation Master Plan as "Proposed Paths." These include segments of Laterals Number 1, 2, 3, 4, 5, and 6 that pass within the urbanized portion of Modesto. To date, no trail development has occurred along any irrigation canal rights-of-way within Modesto.

Modesto Irrigation District has been reluctant to allow public bikeway development on the canal rights-of-way, primarily due to concerns about liability, safety, trespassing, vandalism, and disruptions in maintenance. Adjacent landowners may also be opposed to developing a trail on a canal right-of-way that borders their property, due to concerns about safety and trespass and loss of privacy. Many homeowners that live adjacent to canal rights-of-way already use the unpaved maintenance roads along the canal as informal recreational trails, and there is often reluctance to develop these as formal trails due to concerns about bringing more people to an area.

HETCH-HETCHY AQUEDUCT RIGHT-OF-WAY

The Hetch-Hetchy water pipeline, which is operated by the San Francisco Public Utilities Commission, extends diagonally east-west through the northwestern portion of Modesto. The water pipeline supplies water from Hetch-Hetchy Reservoir in Yosemite National Park to the City of San Francisco. The pipeline is below ground through the City of Modesto, on a right-of-way that is approximately 100 feet in width. High-tension power lines are located above ground along the right-of-way.

The Hetch-Hetchy right-of-way was identified in the 1996 Non-Motorized Transportation Master Plan as a Proposed Path across the entire City limits. After reaching an agreement with the City and County of San Francisco, the City of Modesto developed a three-mile Class I bike path along the Hetch-Hetchy right-of-way from Sisk Road to Semallon Drive. The next phase of the Hetchy-Hetchy bike path will extend east to McHenry Avenue, and then beyond to Claribel Road

MAIN RAIL LINES

Two main rail lines pass through Modesto: the Union Pacific Line on the western edge of town that parallel SR-99, and the Atcheson, Topeka and Santa Fe lines that extend along the eastern edge of town. Both lines are main freight rail lines between northern and southern California. Amtrak passenger service runs on the ATSF corridor, stopping at the Modesto Amtrak station off Briggsmore Avenue. As with irrigation canals, linear rail line corridors provide an opportunity to accommodate off-street non-motorized transportation facilities.

The 1996 Non-Motorized Transportation Master Plan shows the ATSF corridor as a Proposed Path. The UP right-of-way is not shown as a proposed path; instead a pathway is shown following SR-99 in this corridor.

As with the canal rights-of-way, railroad operators are often reluctant to allow public bikeway development on along active rail corridors, primarily due to concerns about liability, safety, trespass, vandalism, and disruptions in maintenance. However, numerous bicycle paths have been built alongside active rail lines across the United States. With proper design features, these "rail-with-trails" can serve as excellent transportation and recreational corridors for non-motorized uses. Specific rail-with-trail design issues are discussed in the design guidelines chapter of this Master Plan.

VIRGINIA CORRIDOR

The former Tidewater Southern rail corridor, subsequently purchased by Union Pacific railroad, was formally abandoned in 2000. The City of Modesto acquired the corridor, and began planning efforts to develop a recreational trail known as the "Virginia Corridor" trail. Phase II of the Virginia Corridor trail will extend from Roseburg to Orangeburg. In April 2003, the tracks were removed from the Virginia Corridor, and construction of the Phase I is expected to be completed at the end of 2004. Ultimately, the Virginia Corridor trail is expected to extend from Needham Street in downtown Modesto north to Bangs Avenue at the northern City Limit.

STATE ROUTE 99

State Route 99 (SR-99) is a major north-south freeway that extends diagonally southeast to northwest through the western portion of Modesto. SR-99 poses a considerable barrier to east-west non-motorized transportation. It provides few crossing locations, and high-speed traffic at the freeway ramps may make it uncomfortable for bicyclists and pedestrians.

SR-99 crossing locations within the city of Modesto are:

- Pelandale Avenue (overcrossing)
- Standiford Avenue (overcrossing)
- Carpenter Road (overcrossing)
- Coldwell Avenue (overcrossing)
- Kansas Avenue (overcrossing)
- Maze Boulevard (overcrossing)
- K Street (overcrossing)
- I Street (overcrossing)
- H Street (overcrossing)
- G Street (overcrossing)
- Sierra Drive (overcrossing)
- Tuolumne Boulevard (undercrossing)
- Zeff Road (undercrossing)
- Crows Landing Road (overcrossing)
- 9th Street (overcrossing)

TUOLUMNE RIVER, DRY CREEK, AND STANISLAUS RIVER CORRIDORS

The Tuolumne and Stanislaus Rivers and Dry Creek present both opportunities and constraints to the development of the non-motorized transportation system. Both the Tuolumne River and Dry Creek have existing parkland and bicycle paths adjacent to their banks. Extending the Tuolumne River bike path system, and connecting to the existing Dry Creek path presents a tremendous recreational opportunity. The Tuolumne River Regional Park Master Plan calls for this pathway to be extended along the river for the entire length of the Park between Carpenter Road and Mitchell Road for a total distance of approximately 7 miles. A connector path to the Dry Creek Bike Path is planned to extend through Beard Brook Park. Constraints to pathway development include existing development adjacent to the river, limited crossing locations, and potential environmental and flooding issues.

PUBLIC OUTREACH

On May 22, 2003, the City of Modesto convened the first of a series of planned workshops to receive community input for its Non-Motorized Transportation Master Plan Update. Fifteen participants attended the meeting. The meeting was facilitated by Bob Ford, Project Coordinator with the Modesto Parks, Recreation and Neighborhoods Department, and a consulting team consisting of representatives from Alta Planning + Design, Inc. (Alta) and Moore Iacofano Goltsman, Inc. (MIG).

Following an introductory slide show describing the project, the meeting was opened to a guided discussion focusing on planning goals, non-motorized transportation elements that are currently working well and those that are performing poorly, and proposed improvements to the City's non-motorized transportation network and infrastructure. It was emphasized that the scope of the planning be inclusive of multiple modes of non-motorized transit, including pedestrian, bicycle, inline skating, wheelchair and general disability access.

PARTICIPANT DISCUSSION

Comments provided by participants both orally as well as written on comment cards are summarized below.

Goals of the Plan

Participants were asked to describe what their goals were for the Non-Motorized Transportation Master Plan. The following goals were recorded:

- Enhance safety.
- Enhance enforcement and awareness.
- Promote mutual respect between motorized and non-motorized users.
- Improve connectivity of non-motorized routes, both within Modesto and inter-city.
- Establish non-motorized modes as viable transportation/commuting modes.
- Create bike and pedestrian-friendly design for ALL roadways, new and existing.
- Provide adequate improvements.
- Coordinate with regional bike plan.
- Coordinate and cooperate with other planning efforts.
- Integrate non-motorized transportation elements into the City's General Plan.

What's Working?

Participants were asked to describe what aspects of the existing Non-Motorized Transportation network in Modesto are working well. The following comments were recorded:

- Curb ramps
- Good surface condition
- Good maintenance, especially re-painted bike lanes
- Right-turn pockets—Great design standard
- Good citywide infrastructure!
- Great community events, e.g. Bike-to-Work Day
- Good downtown bike parking

What's Not Working?

Participants were then asked to describe what aspects of the existing Non-Motorized Transportation network in Modesto are not working well. The following comments were recorded:

- Lack of coordination and plan implementation—available funds are not being used.
- Lack of bike actuated signals.
- Policy constraints for bikes, especially on arterials—General Plan issue.
- Lack of lane width for cyclists—shoulder space too narrow.
- Lack of safe connections on paths and major routes.
- Inadequate pathway lighting.
- Speeding motorists and an auto-dominated culture.
- Poor safety on major corridors.
- Dangerous linkage points of existing paths, e.g. Benzinger at Scenic.

What Should Be Done?

Finally, participants were asked to describe what aspects of the existing Non-Motorized Transportation network in Modesto are working well. The following comments were recorded:

- Conduct an education campaign.
- Expand access to: 1) parks, 2) schools, 3) downtown/errand-destinations.
- Utilize public utility easements for new trails.
- Capitalize on railroad corridors.
- Develop additional routes and paths, both commuter-oriented and recreational.
- Improve safety at major linkages and intersections.
- Focus on funding strategies for priority projects.
- Recognize and attempt to balance diverse needs.

- Identify pedestrian and bike neighborhood connectors.
- Support citizen advocacy for plan implementation.
- Counterbalance developers' political influence.
- Provide pedestrian-friendly signalization, especially timing.
- Address disability amenities and infrastructure: additional curb cuts and wheelchair access, ensuring wheelchair inclusivity in planning.
- Ensure adequate street lighting.
- Seek funding through Safe Routes to Schools.
- Install better directional signage, especially at linkages.
- Connect southwest, which is currently blocked by Highway 99 and railroad tracks, with greater community.
- Connect Tuolumne River Regional Park to community.
- Connect Salida to Modesto.
- Apply better trail maintenance.

5. BICYCLE IMPROVEMENTS

The recommended bicycle improvements for the City of Modesto consist of a bikeway network and bicycle support facilities. The recommended bikeway network, which includes Class I bike paths, Class II bike lanes, and Class III bike routes, connects residential neighborhoods in Modesto with schools, parks, community centers, libraries, commercial centers, and other destinations. The recommended bicycle support facilities and programs include parking facilities, sidewalk management practices, and signage programs.

RECOMMENDED BIKEWAY NETWORK

A bikeway network is a system of bikeways that, for a variety of reasons, including safety and convenience, provides a superior level of service for bicyclists and/or is targeted for improvements by the City due to existing deficiencies. It is important to recognize that, by law, bicyclists are allowed on all streets and roads regardless of whether they are a part of the bikeway network. **The bikeway network is a tool that allows the City to plan for the future and to focus and prioritize implementation efforts where they will provide the greatest benefit to bicyclists and the community at large.**

The established methodology for selecting a bikeway network for any community begins with the primary effort to receive input from the local bicycling community and local staff familiar with the best routes and existing constraints and opportunities. Input can be received through a variety of means, but it is typically received through the public workshop format. Surveys of bicyclists and community members can also serve a valuable role in this process as well.

The following criteria were used to develop the bicycle network:

- Existing Bicycling Patterns - Public workshop participants identified preferred bicycling patterns.
- Connectivity – System connectivity, providing access from one bikeway corridor to the next, is important.
- Traffic volumes and travel speeds - Higher volume and higher speed roads are typically acceptable to more experienced cyclists; lower volume and lower speed roads are typically preferred by the less experienced cyclists.
- Amount of side friction (driveways, side streets) - Bicyclists prefer roads that minimize potential side street conflicts.
- Curb-to-curb width - Bicyclists prefer roads with wider riding areas.
- Pavement condition - Bicyclists prefer smooth roadways.

- Access from residential areas - Corridors that provide access from residential areas are preferred.
- Number of destinations served - Corridors that maximize the number of destinations served, schools, parks, employment centers, and multi-modal terminals such as the Amtrak Station, are preferred.
- Integration into the regional system - Connectivity to the regional system is preferred.
- Adjacent land use - The compatibility with adjacent land uses is important.
- On-street parking - Bicyclists prefer roads that minimize potential conflicts with parked vehicles.
- Incident data and safety concerns - Corridors that maximize safety are preferred.
- Existing opportunities such as planned roadway improvements - Integrating recommended bike facility improvements into planned roadway improvements is preferred.
- Routes with intersection protection and minimal delay - Bicyclists prefer corridors that minimize stopping requirements for the bicyclists while maximizing stopping requirements for conflicting vehicle traffic.

The recommended Modesto bikeway network shown in **Figure 5-1** and **Figures 5-2** focuses on connecting and extending existing segments of the Virginia, Hetch-Hetchy and Tuolumne River Trails, addressing routes used by bicyclists, and focusing on specific opportunities and constraints. The grid arterial/collector street pattern offers several distinct through corridors which connects residential areas with significant destinations such as Downtown Modesto, the Tuolumne River Regional Park, Dry Creek Regional Park, Modesto Junior College's East and West Campuses, the new Amtrak station near Santa Fe Avenue, schools, and parks. Class III bike routes are proposed on a variety of local routes and regional connecting routes. Bikeway improvements will include intersection enhancement (such as bike lane pockets, loop detectors, and stenciling where needed), wider curb lanes where possible, and enhanced bikeway and directional signage.

New Class I bike paths are proposed to extend the existing Tuolumne River Regional Park Trail, Dry Creek Regional Park Trail, and the Hetch-Hetchy Trail. A new Class I path is proposed along the Union Pacific Railroad line, parallel to 9th Street through downtown. The planned Virginia Corridor Trail along the former Tidewater Southern railroad right-of-way is included as well as a Class I facilities along Briggsmore Avenue, and the Pelandale Extension.

New Class II bike lanes are recommended for Paradise Road, South 9th Street, Crows Landing Road and Needham Avenue Streets to provide access to planned bike routes in Downtown Modesto. Class II bike lanes would also be extended and installed on Scenic Road, Dale Road, Oakdale Road, Carpenter Road and Roselle Avenue. Additional short Class II segments are recommended as necessary.

New Class III bike routes are recommended for nearly all Modesto neighborhoods. These routes increase overall connectivity as well and provide direct connections for local destinations like downtown Modesto, schools and parks.

RECOMMENDED BICYCLE PROJECTS

BICYCLE PARKING PROGRAM

Bicycle parking includes standard bike racks, covered lockers, and corrals. Bicycle parking should be installed on public property, or available to private entities on an at-cost basis. Bike racks are provided at many local schools and various other locations in Modesto, but overall the lack of safe and secure bicycle parking is a concern of bicyclists who may wish to ride to work or to shop. Theft and vandalism of bicycles, especially now that bicycles are often worth in excess of $250 to $2,000, is a major impediment to bicycle riding. Showers and lockers are essential end-of-trip facilities, providing comfort and greater security for commuters, and encourage more people to bicycle to work. A systematic program to improve the quality and increase the quantity of bicycle parking facilities should be implemented in Modesto.

RECOMMENDATIONS

Increase Public Bicycle Parking Facilities

Bike racks and lockers should be provided at public destinations, including park-and-ride lots, major bus stops, community centers, parks, and schools. All bicycle parking should be in a safe, secure, covered area (if possible). Commuter locations should provide secure indoor parking, covered bicycle corrals, or Class I bicycle lockers. Bicycle parking on sidewalks in commercial areas should be provided according to specific design criteria, reviewed by merchants and the public, and installed as demand warrants. As a general rule, 'U' type racks bolted into the sidewalk are preferred on downtown sidewalks, to be located intermittently and/or at specific bicycle destinations (such as bike shops). A program to fund and install these facilities could begin as a joint-agency project between the City of Modesto and the Stanislaus County Transportation Commission.

Adopt a Bicycle Parking Ordinance

Consider adoption of a bicycle parking ordinance, which will require that bicycle parking facilities be included in all new commercial and office development projects in the Modesto. For example, all new commercial development or redevelopment in excess of 40,000 gross leasable square feet should be required to provide one secure indoor bicycle parking space (i.e. in a parking garage or basement) per 10 employees.

The City currently has no requirements for bicycle parking accommodations. This ordinance would be a complement to the public parking program, which would add parking facilities to existing commercial and office locations. A model bicycle parking zoning ordinance is provided in the Appendix to this Plan.

Encourage Provision of Shower and Locker Facilities

Encouraging employers to provide shower and locker facilities for employees should be a component of all commute and traffic demand management programs as those facilities provide for current commuters and may encourage more commuters to ride their bicycles. Several cities have requirements for shower and locker facilities in new and reconstructed developments. For example, the model planning ordinance for the City of San Francisco, provided in the Appendix, requires that new industrial and commercial developments over 10,000 gross square feet in floor area must provide one shower and two clothes lockers.

Construct Bicycle Corrals at Local Schools

A special program to construct bicycle corrals where needed at Modesto area schools should be started. A corral is a fenced-in area at a major destination, such as a school or an event, secured either through lock or by an attendant, where bicycles can be securely parked. These simple enclosed facilities are locked from the beginning to the end of school, and address the theft and vandalism concerns of students.

Provide Valet Bike Parking at Public Events

A new program to provide closed-in secure bicycle corrals at all major special events, such as summer concerts in the park, should be instituted to encourage residents and visitors to bicycle rather than attempt to drive. The appropriate agency or organization should sponsor this corral and seek volunteers (such as from the Stanislaus County Bicycle Club) to staff the corral during the events.

Improve Parking at the Amtrak Station and Other Transit Facilities

A bicycle locker program should be implemented at the Modesto Amtrak Station, downtown transit center, and for all new bike locker installations in the City. Administration procedures should include a program that rents out lockers to an individual for a given period of time for a determined fee. This method of locker administration has been successful in improving safety and preventing people from using the lockers for a purpose other than their intended use.

SIDEWALK MANAGEMENT

The use of sidewalks as bicycle facilities is not encouraged by Caltrans, even as a Class III bike route. There are exceptions to this rule. The California Vehicle Code states: "Local authorities may adopt rules and regulations by ordinance or resolution regarding the...operation of bicycles...on the public sidewalks." (CA VC 21100, Subdiv. H). Caltrans adds in Chapter 1000: "In residential areas, sidewalk riding by young children too inexperienced to ride in the street is common. But it is inappropriate to sign these facilities as bikeways. Bicyclists should not be encouraged (through signing) to ride facilities that are not designed to accommodate bicycle travel." The key problems to be addressed through design and operational improvements are bicyclists riding at high speeds (over 7-8 mph) and in an unsafe manner (particularly riding in the opposite direction of adjacent vehicle traffic) on sidewalks, rather than younger bicyclists using the sidewalks to reach school. The following actions are recommended to address this problem.

RECOMMENDATIONS

Allow Children to Bicycle on Neighborhood Sidewalks

Adopt Caltrans recommendations for sidewalk management and specifically allow school children and adults accompanying them to ride bicycles on sidewalks. Consider the use of stencils and signs (supported by a City-adopted resolution) to prohibit bicycle riding on sidewalks in areas where shop or car doors open directly onto sidewalks (sidewalks located within shopping centers, etc.). Also, consider the use of stencils and signs (supported by a City-adopted resolution) to prohibit bicycle riding on sidewalks in areas where there are numerous driveways. Modification of the existing code on bicycle riding on sidewalks should be made to accommodate children riding bicycles with wheels that are more than 20 inches in diameter. Currently, according to municipal code Section 4-3.22

bicycles with wheels larger than this diameter size are strictly prohibited on sidewalks. The code may be better suited to allow bicycling on the sidewalk paths that exist in the City as well as those that will be built in the future.

Sign and Stencil Potential Conflict Areas as "No Bicycling"

Signing and stenciling should be used at certain locations as appropriate to prohibit or permit bicycle riding on sidewalks, prohibit bicyclists riding in the opposite direction of vehicle traffic, or require bicyclists to walk their bicycle:

a. In high pedestrian activity areas where there has been a documented bicycle-pedestrian collision pattern (and at the City Traffic Engineer's discretion), the City should install stenciling or signing (such as "No Bicycling on Sidewalk"). This signing and stenciling would primarily be recommended for commercial areas where the buildings are located directly on the public sidewalk (no setbacks) and people exiting the building have no opportunity to see bicyclists.

b. An option to completely prohibit bicyclists over 12 years old from using sidewalks is to post signs reading "Bicyclists Yield to Pedestrians" with a symbol of a pedestrian on a sidewalk and a bicyclist walking their bicycle next to that figure. This sign may be posted where there have been conflicts in the past.

c. At locations where there are numerous driveways and documented incidents of bicyclists riding in the opposite direction of adjacent vehicle traffic, the city should install signing and stenciling (such as "No Bicycles, Wrong Way" or "No Bicycling this Direction").

Shared Bicycle and Pedestrian Sidewalk or Path Facilities

In areas where there are right-of-way limitations that limit the ability to provide on-street bicycle facilities, or areas where traffic volumes and speeds may warrant an off-street facility, and it may be desirable to provide for combined off-street bicycle and pedestrian facilities. In general, these facilities should be designed to Class I bikeway standards set forth by Caltrans Chapter 1000. For specific locations, it may be desirable to allow bicycle travel on non-Class I facilities (e.g. sidewalks) for short distances. For any facilities expected to be used by both pedestrians and bicyclists should be signed and stenciled to note the multiple use, post a bicycle speed limit, and consider delineating separate pedestrian and bicycle zones to separate user traffic. This recommendation should not be viewed as an overall policy to encourage bicycling on sidewalks in lieu of providing Class II or III on-street facilities, but is simply a tool that the city can use to provide off-street facilities under certain circumstances.

SIGNING AND STRIPING

All bikeway signing on public roadways in Modesto should conform to the signing identified in the Caltrans Traffic Manual and/or the Manual on Uniform Traffic Control Devices (MUTCD). These documents give specific information on the type and location of signing for bicycle facilities in the Modesto bikeway network.

RECOMMENDATIONS

Designated Bikeway Signs

The installation of bikeway signs on all designated bicycle facilities is important to heighten motorist awareness and help cyclists find their way. Installing signage is something that can be implemented easily compared to major striping revisions or bike path construction and should be implemented as a priority. An example of where this applies is on Existing Class III Bike Routes where installation of several signs will complete a designated route.

Wayfinding Signage

Wayfinding signage can enhance a bikeway network by providing directional assistance to bicycle facilities and significant local and regional destinations. It is recommended that the City of Modesto design bikeway network directional signage for use on the primary network. This signage program would work as a map on the street, identifying designated routes connecting to key destinations in Modesto (and beyond). The signage may also include mileage information.

PROTECT BICYCLE FACILITIES FROM REMOVAL

RECOMMENDATON: Implement a policy that existing bikeway facilities will not be removed. For example, Class II bike lane facilities will not be removed at a future date to increase motor vehicle capacity without a thorough study analyzing the alternatives.

MULTI-MODAL CONNECTIONS

RECOMMENDATION: Modesto Area Express should continue to equip all transit buses operating within Modesto with bicycle racks. Bicycle travel to transit stops and stations should be enhanced in order to make the transfer between bicycle and transit travel as convenient as possible. Bicycle parking facilities should be considered for implementation at key local transit bus stops. Parking facilities already exist at the downtown transit center and Amtrak station. These facilities should be enhanced with the addition of fully enclosed bicycle lockers.

BICYCLE DETECTOR LOOPS

RECOMMENDATON: At appropriate signalized intersections, install and mark traffic detection loops that are responsive to bicycles. Signal detectors and stencils identifying where bicyclists place their bicycles to trigger signals should be reviewed and approved by the City staff prior to implementation. Specific implementation criteria may include sensitivity, impact of overlay projects, cost, and need. Possible alternatives to signal detectors may include the use of push button signal activators that are well-marked and convenient for bicyclists to use. All signal detectors should be checked regularly to ensure that they are functioning correctly.

CONSTRUCTION ACTIVITIES

RECOMMENDATON: Consider impacts on bicycles while performing construction, maintenance and repair work on roadways and trails.

- Provide suitable construction warning signs for any activities that involve work in a designated bikeway.

- Where necessary, provide detour routes around areas undergoing construction.

Detailed guidelines are provided in the Appendix for accommodating bicycles in construction zones.

RURAL ROADS IMPROVEMENT PROGRAM

Bicycle use on the roads outside of the developed portions of Modesto consists of both recreational and commuting use and will grow as population and urban development increase. Rural roads typically are located outside developed areas and have no (or limited) curbs, gutters, or sidewalks. There are also roadways within the developed areas that may be considered rural roads as well. People cite a variety of problems on rural roads throughout the area, which are packaged into one effective set of program recommendations here. This rural roads improvement program would provide a mechanism to address specific problems at locations along Modesto's rural roads, which could be addressed through a combination of any of the following ways:

1. Advisory and warning signs
2. Shoulder widening or new shoulders
3. Travel lane re-striping where excess width available
4. New or improved turnouts
5. Enhanced roadway surface maintenance

Note that bike lanes could be included in this list, but are not commonly used in rural areas due to the large number of required signs and stencils. The City should work with community members, Stanislaus County, and neighboring city staffs to select improvements each year and develop a cost estimate for the appropriate improvements. Some of roadways that would qualify for such improvements may include roadways that extend north from Modesto City Limits to the Stanislaus River, and east of Modesto City Limits.

These improvements should be implemented if deemed feasible, funded and approved by the City of Modesto City Council, Stanislaus County, and the Stanislaus Council of Governments.

OVERVIEW OF PRIORITY PROJECTS

The recommended Modesto bikeway network shown in Figure 5-1 focuses on providing north-south and east-west on-street bikeways and off street paths that facilitate cross-town trips, provide access to major destinations, and provide for regional connectivity.

The section that follows identifies the recommended Priority Projects and provides project sheets that describe the specific elements of each project and some of the primary design and implementation issues. A complete street-by-street listing of the proposed new bikeway facilities with cost estimates is provided in **Chapter 8, Implementation**.

The following Priority Project sheets are broken down by Class I Bike Paths, Class II Bike Lanes, and Class III Bike Routes, and are listed in alphabetical order—no ranking or order of importance within this priority list is implied. The Modesto City Council is free to implement projects in whatever order is most appropriate, as funding opportunities arise, new development occurs, or right-of-way is acquired. This project list should be viewed as flexible, and may change over time as new opportunities arise.

Depending upon ultimate configuration and timing of development, installation of some Priority Projects may require roadway widening, narrowing or elimination of travel lanes, narrowing or elimination of parking lanes, or acquisition of additional right of way. Additional feasibility or traffic analysis may be required on some project segments prior to implementation.

LIST OF PRIORITY PROJECTS

Class I Bike Paths

- Briggsmore Class I
- Carpenter Road Class I (south of Maze)
- Dry Creek Extension to Tuolumne River Regional Park Class I
- Hetch Hetchy Class I
- Kiernan/Claribel Class I
- Maze Boulevard Class I
- MJC East West Campus Off-Street Connector Class I
- Modesto and Turlock Irrigation District Lateral Canals Class I
- Pelandale Expressway Class I
- Tuolumne River Trail Class I
- Veneman Class I Connector
- Virginia Corridor Class I

Class II Bike Lanes

- Carpenter Road Class II (north of Maze)
- Claus Road Class II
- Coffee to Dry Creek Connector Class II
- Crows Landing Road Class II
- Floyd Avenue Class II and III
- Merle Avenue to Grogan Park Class II and III

Class II, continued

- MJC East West Campus On-Street Connector Class II
- Needham Class II
- Oakdale Road Class II
- Paradise Road Class II
- Roselle/Lakewood Class II
- Scenic Class II
- Sylvan Class II Extension
- Whitmore Avenue Class II
- 12th Street/Virginia Connector Class II/III

Class III Bike Routes

- Conant Avenue/Marsala Way Class III
- Crater Avenue Class III Connector
- Downtown G and H Class III
- Downtown 10th and 11th Class III
- E. Union Avenue/Sylvan Meadows Class III
- Emerald Avenue/Panama Drive/Harris Avenue Class III
- Floyd Avenue Class III
- Miller Avenue Class III
- Mariposa Road Class III
- MLK/Sutter Class III
- Orangeburg/Amtrak Class III
- Riverside to Sutton Park Class III
- Rosemore Avenue Class III
- Santa Cruz Avenue/Covena Avenue Class III
- S. Morton Boulevard/Mono Drive Class III
- Sunrise Dragoo Park Class III
- Snyder Class III
- 14th Street Class II Extension

PRIORITY CLASS I BIKE PATH PROJECTS

PRIORITY PROJECT

BRIGGSMORE AVENUE TRAIL CLASS I

The Briggsmore Avenue Trail would be a major addition to Modesto's bicycle and pedestrian commuter network, including a connection to the Memorial Medical Center. The trail would follow Briggsmore Avenue and the Modesto Irrigation District Lateral Canal No. 3, providing a major east-west route connecting with two north-south bike lanes, the Virginia Corridor Trail, and the proposed Claus Road Trail. The Briggsmore Avenue Trail would stretch from the intersection of Briggsmore Avenue and Coffee Road at the western terminus and extend east to the city limits, providing access to the Amtrak Station.

Wayfinding signage should be installed along the path, directing bicyclists to other bicycle facilities and significant destinations like the Amtrak Station.

The Briggsmore Avenue Class I facility would run alongside the M.I.D. Lateral Canal No. 3 from Coffee Road east to the city limits.

PRIORITY PROJECT

CARPENTER ROAD CLASS I

The Carpenter Road Class I path would provide a north-south connection along Carpenter Road between Maze and Whitmore. This facility would connect to the proposed bike path along Maze, to the proposed Tuolumne River bike path, to the proposed irrigation canal path at Whitmore, and to the proposed Class II bike lanes along Whitmore.

Wayfinding signage should be installed along the Carpenter Road Class I path, directing bicyclists to other bicycle facilities and other significant destinations.

PRIORITY PROJECT

CLAUS ROAD CLASS I

The Claus Road Class I path would provide a north-south connection along the eastern edge of Modesto. The path would connect Kiernan Avenue in the north with the Class I facility at East Briggsmore Avenue. A Class I bike path is also proposed for Claus road south of E. Briggsmore and to E. Orange. The Claus road Class I path will enable bicyclists to connect to Grogan Park as well as the Irrigation Canal Class I paths and the Amtrak Station by way of E. Briggsmore. The Claus Class I path is also proposed between Creekwood Drive and Yosemite Boulevard at the southeastern part of the city.

Wayfinding signage should be installed along the Claus Road Class I path, directing bicyclists to other bicycle facilities and other significant destinations.

PRIORITY PROJECT

DRY CREEK EXTENSION TO TUOLUMNE RIVER REGIONAL PARK CLASS I

The Dry Creek Class I trail extension will connect Dry Creek Regional Park and Kewin Park with Downtown Modesto and the Tuolumne River Regional Park. The existing Dry Creek Trail terminates at Kewin Park on the trail's western end. Extending the trail further west will connect Downtown with the recreation areas in the east, along the Tuolumne River. The extension of the Dry Creek Trail will require crossing the river, possibly at La Loma, as well as crossing Yosemite Boulevard. Additional feasibility study may be required to identify the best possible alignment for the trail extension, as well as any segments which may need to be Class II or III.

Wayfinding signage should be installed along the Dry Creek Extension, directing bicyclists to other bicycle facilities, as well as significant destinations like the Tuolumne River Regional Park.

PRIORITY PROJECT

HETCH-HETCHY BICYCLE TRAIL EXTENSION CLASS I

The existing Hetch-Hetchy Class I Bicycle trail travels for approximately 3 miles within the Hetch-Hetchy utility corridor from Sisk Road to Semallon Drive, where it intersects with the proposed Virginia Corridor Trail right-of-way. The next phase of the Hetch-Hetchy Trail would extend another mile northeast, across McHenry Avenue to Claratina Avenue. The extension to Claratina Avenue has been estimated to cost about $500,000. The Hetch-Hetchy Trail could then be extended beyond the current Modesto City Limits to the Modesto "Sphere of Influence" Limits at Claribel Road, just east of Oakdale Road. The Hetch-Hetchy Trail currently connects with existing and proposed bicycle network facilities on Standiford Road, Tully Road and Coffee Road.

Wayfinding signage should be installed along the trail, directing bicyclists to other bicycle facilities and significant destinations.

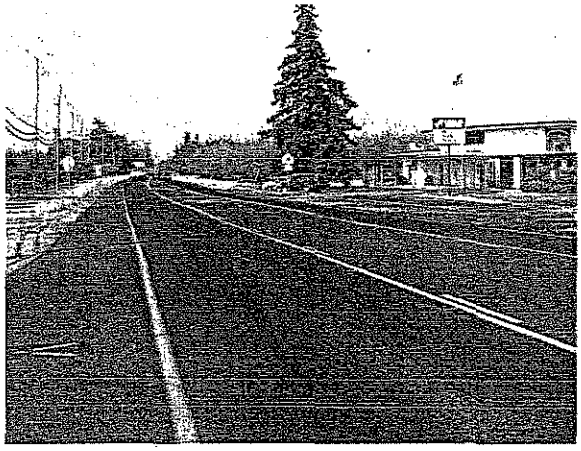
Class I facilities provide safe and enjoyable access for a variety of users that may use the path for both recreation and commute purposes

PRIORITY PROJECT

KIERNAN AVENUE/CLARIBEL ROAD CLASS I

The Kiernan Avenue/Claribel Road Class I facility would form a northern boundary for the City of Modesto's bicycle network. The path would extend from Highway 99 to the west and Claus Road to the east. This project would also connect with proposed facilities where Kiernan Avenue/Claribel Road intersects with the Virginia Corridor Trail, the Hetch-Hetchy Trail, Tully Road, Coffee Road, and Oakdale Road. Because Kiernan Avenue/Claribel Road form State Highway 219, negotiations with Caltrans regarding use of the right-of-way would be necessary.

Wayfinding signage should be installed along the path, directing bicyclists to other bicycle facilities and significant destinations.



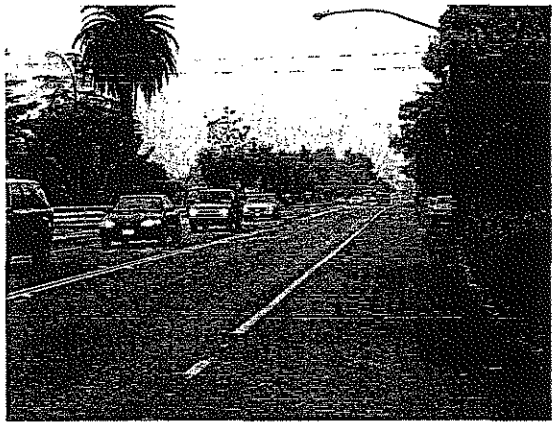
A Class I Trail along Kiernan Avenue would form the northern boundary of the Modesto Bicycle Network, while providing trail that would extend almost the entire east-west length of the City

PRIORITY PROJECT

MAZE BOULEVARD CLASS I

The Maze Boulevard Class I path would run from 6th Street in the east to Dakota Avenue in the west. The path would provide connections from Downtown Modesto to the Rosemore Class III route which feeds into Modesto Junior College West. The Class I path would be located on the north side of Maze Boulevard.

Wayfinding signage should be installed along the Maze Boulevard Class I path, directing bicyclists to other bicycle facilities as well as significant destinations like Downtown Modesto.



Maze Boulevard has a wide existing shoulder that can accommodate the installation of bicycle lanes on most segments of the roadway. This facility will provide a connection to Modesto's westernmost areas

PRIORITY PROJECT

MJC EAST-WEST CAMPUS OFF-STREET CONNECTOR CLASS I

The East and West Modesto Junior College (MJC) Campuses are separated by major roads, SR-99, and the active Union Pacific Railroad line. Classes may be taken at both campuses, and many students and instructors currently drive between campuses, which has led to roadway congestion and parking problems. A designated bicycle facility between the campuses will enhance the safety of bicyclists going between campuses and may encourage bicycle commuter trips instead of auto trips, thus reducing the demand on local roads and parking.

An Off-Street campus connector could be developed utilizing the Union Pacific Railroad right-of-way for a Class I rail-with-trail facility. A campus connection could be made using the rail-with-trail facility by facilitating access from the West Campus to the trail via Brink Avenue. The Class I rail-with-trail would extend along the western portion of the Union Pacific right-of-way from Brink Avenue south to Coldwell Avenue. At Coldwell Avenue, the MJC connector route would transition to on-street bikeways to the East Campus.

Wayfinding signage should be installed along the path, directing bicyclists to other bicycle facilities and destinations like MJC East and West.

The Union Pacific Railroad right-of-way would provide for an excellent Class I facility that would run along 9th Avenue and provide a safe and convenient connection between the two MJC campuses

PRIORITY PROJECT

MODESTO AND TURLOCK IRRIGATION DISTRICT LATERAL CANALS CLASS I

Modesto and Turlock Irrigation District canals traverse Modesto providing potential for Class I paths. The lateral canals are flanked by existing service roads that could provide essential off-street connections running east-west across Modesto. The service roads may be enhanced for multiple uses through paving, or may remain in their existing unpaved state. In order to develop Class I paths along the irrigation canals, the Modesto and Turlock Irrigation Districts must enter into agreements with the City of Modesto permitting access along the service roads. The City may pursue an easement with the Irrigation Districts to ensure the legal use of their canal service roads by the public. The Modesto and Turlock Irrigation District Canals that have been identified as potential Class I paths are:

- Modesto Irrigation District Lateral Canal No. 1
- Modesto Irrigation District Lateral Canal No. 2
- Modesto Irrigation District Lateral Canal No. 3
- Modesto Irrigation District Lateral Canal No. 4
- Modesto Irrigation District Lateral Canal No. 5
- Modesto Irrigation District Lateral Canal No. 6/Modesto Main Canal
- Modesto Irrigation District Lateral Canal No. 7
- Turlock Irrigation District Lateral Canal No. 1

Wayfinding signage should be installed along the canals, directing bicyclists to other bicycle facilities as well as significant destinations.

PRIORITY PROJECT

PELANDALE AVENUE EXPRESSWAY CLASS I

The Pelandale Avenue Expressway Class I facility would provide a bicycle path along the northern Modesto city limits and would connect to the proposed Hetch-Hetchy Aqueduct bicycle trail extension. The Pelandale Avenue Expressway path would also intersect with existing bicycle facilities on Tully Road, Coffee Road and Beyer Park Drive. The Path would span from SR-99 in the west, following the development of Pelandale Avenue Expressway, to eastern Modesto.

Wayfinding signage should be installed along the Pelandale Avenue Expressway Class I path, directing bicyclists to other bicycle facilities and significant destinations.

Segments of this project are recommended in the Stanislaus County Regional Bicycle Action Plan.

PRIORITY PROJECT

TUOLUMNE RIVER TRAIL SYSTEM CLASS I

Tuolumne River Regional Park is one of Modesto's most valuable recreational assets. The Tuolumne River Regional Park includes several developed park sites along the Tuolumne River in southern Modesto. The City developed a Master Plan to provide for connections and additional recreational development within the Park. As part of the Master Plan, a Class I trail system was added. The setting is scenic and removed from traffic, inviting a diverse range of users from all ages and skill levels. An expansion of the facility may even benefit commuters as the trail would stretch from east to west almost the entire width of southern Modesto, connecting the chain of parks along the Tuolumne River. The existing Class I Trail runs within the Tuolumne River Regional Park from Mitchell Road to Tioga Drive. This project proposes to extend the trail westward along the entire north bank of the Tuolumne River within Modesto, from Mitchell Road to Carpenter Road.

Wayfinding signage should be installed along the trail, directing bicyclists and other users to other bicycle and trail facilities as well as significant destinations such as Downtown Modesto.

PRIORITY PROJECT

VENEMAN CLASS I CONNECTOR

The Veneman Class I Connector links Veneman Avenue with the Class II facility along Standiford Avenue in northwest Modesto. This Class I connector also provides a connection with the Lateral Canal No. 7 Class I facility, enabling users of the canal path to transition onto city streets at this point.

Wayfinding signage should be installed along the Veneman Class I Connector, directing bicyclists to other bicycle facilities as well as significant destinations like the Vintage Faire Mall.

PRIORITY PROJECT

VIRGINIA CORRIDOR TRAIL CLASS I

This project would provide for a major 4-mile north-south Class I trail through the heart of Modesto along the former Tidewater Southern rail corridor. The project is to be implemented in seven phases. Phases I-IV include intersection improvements and trail installation from Needham Street to Granger Avenue, and are scheduled to be completed in 2005. From Granger Avenue, the trail will extend north along the former railroad right-of-way to just south of Bangs Avenue in north Modesto. Providing a connection between central and north Modesto to the downtown district and the Tuolumne River and Dry Creek trail system, the Virginia Corridor Trail has the potential of becoming a major commute route for bicyclists and pedestrians. Providing this alternative route may reduce vehicle traffic on the north-south roadways such as McHenry Avenue. The project includes the construction of pedestrian bridges over three major streets: Briggsmore, Standiford, and Pelandale Avenues. The Virginia Corridor Trail proposal is a product of an existing City of Modesto Master Plan.

Wayfinding signage should be installed along the Virginia Corridor Trail, directing bicyclists and other users to other bicycle and trail facilities as well as significant destinations.

The Virginia Corridor, pictured here, where it intersects with Kiernan Avenue will provide a safe and direct trail for commuters and recreational users of all ages

PRIORITY CLASS II BIKE LANE PROJECTS

PRIORITY PROJECT

CARPENTER ROAD CLASS II

Currently Modesto has only one bicycle route west of SR-99. Carpenter Road is a major north-south arterial in the western part of the City, connecting Tuolumne River Regional Park with the West Campus of Modesto Junior College. The Carpenter Road Class II would provide a connection from Maze Boulevard north to the MJC West Campus at Blue Gum (overlapping with a segment of the MJC Campus Connector On-Street Route).

Wayfinding signage should be installed directing bicyclists to the two MJC campuses, as well as other bicycle facilities and significant destinations. "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

There is a short segment of Carpenter Road that features an existing bicycle lane just south of the MJC West campus. The bicycle lane would be extended all the way to Paradise Road.

PRIORITY PROJECT

COFFEE ROAD TO DRY CREEK TRAIL CONNECTOR CLASS II

Currently, the existing bicycle lanes on Coffee Road terminate north of Scenic Drive. On the south side of Scenic Drive there is a vacant lot with a trail entry that connects to the bicycle and pedestrian trail that in Dry Creek Regional Park. The City has plans for a trailhead parking lot in this location. The Coffee Road to Dry Creek Trail Connector would provide a clear, safe and efficient connection from the bike lanes on Coffee Road to the creek crossing. This project would require extending the Class II lanes on Coffee Road to the intersection with Scenic Drive, installing a bike lane pocket between the right and left turn lanes, installing wayfinding signage to direct bicyclists and pedestrians where to cross Scenic Drive from Coffee Road, installing new loop-detector signal actuators in the pavement. There are two existing push-button crossing signal devices (one is shown in lower left corner of photo below), but these are poorly marked and should placed in a more convenient location.

This connector project should also include an effort by the City to work with landowner of the vacant lot to enhance the trail entry by installing signage and landscaping appropriate for a designated trailhead. If right-of-way is available, a small trailhead parking lot should be provided.

Wayfinding signage should be installed along the route, directing cyclists to other bicycle facilities as well as significant destinations. "Bike Lane" signage and stenciling should be installed.

A designated and safe crossing at the intersection of Coffee Road and Scenic Drive is needed. In addition, the vacant lot adjacent to the Dry Creek Trail entry should be designed as a developed as an attractive and formal entry.

PRIORITY PROJECT

CROWS LANDING ROAD CLASS II

The Crows Landing Road Class II Facility project would provide Class II bike lanes on Crows Landing from Whitmore Avenue to SR-99. This project would link to proposed bike lanes on Whitmore, and proposed bike paths along the Tuolumne River and along the Union Pacific Railroad right-of-way.

Wayfinding signage should be installed directing bicyclists other bicycle facilities and significant destinations. "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

PRIORITY PROJECT

FLOYD AVENUE CLASS II AND III

The Floyd Avenue Class II and III route provides an east west connection in the northeastern part of Modesto. The route connects Fine Avenue on the eastern edge of the City with McHenry Avenue (SR 108) at its western terminus. Class II bike lanes are recommended on Floyd Avenue from Fine to Oakdale. From Oakdale to McHenry, a Class III bike route is recommended. The Floyd Avenue Class II/III route provides access to Sylvan Elementary School and Somerset Middle School. Grogan, Ustach and Basin Parks can be access via Floyd Avenue in conjunction with the connecting Class III Merle Avenue to Grogan Park route.

Wayfinding signage should be installed along the route, directing bicyclists to other bicycle facilities and significant destinations, such as the Grogan Park and the Amtrak Station. "Bike Lane" and "Bike Route" signage, as appropriate, should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

MERLE AVENUE TO GROGAN PARK CLASS II AND III

The Merle Avenue to Grogan Park Class II and III route begins as a bike route along Celeste Way at Rose Avenue. The route travels east to Oakdale Road and continues as a Class II bike lane to Fine Avenue where it shifts orientation to travel north to Grogan Park by way of Kodiak Drive and Litt Road. The Merle Avenue route features an additional branch, along Lincoln Oak Drive to Kodiak Drive and Bear Cub Lane, which connects cyclists to Orchard Park and Ustach and Basin Parks. Access is provided to Orchard Elementary School and Elizabeth Ustach Middle School by way of the Route. The Merle Avenue to Grogan Park route connects to proposed Class II routes along Lakewood Avenue and Oakdale Road, as well as existing neighborhood Class III routes at Rose Avenue and Celeste Way. Cyclists may use the Merle Avenue to Grogan Park route to connect to the Amtrak Station via Class II routes and the existing East Orangeburg Class III route with proposed Amtrak connection segment.

Wayfinding signage should be installed along the Merle Avenue to Grogan Park route, directing bicyclists to other bicycle facilities and significant destinations, such as the Grogan Park and the Amtrak Station. "Bike Lane" and "Bike Route" signage, as appropriate, should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

MJC EAST-WEST CAMPUS ON-STREET CONNECTOR CLASS II

The East and West Modesto Junior College Campuses are separated by major roads, SR-99, and the active Union Pacific Railroad line. Classes may be taken at both campuses, and many students and instructors currently drive between campuses, which has led to roadway congestion and parking problems. A designated bicycle facility between the campuses will enhance the safety of current bicyclists going between campuses and may encourage bicycle commutes instead of auto trips, thus reducing the demand on local roads and parking.

The implementation of the MJC Connector route would involve the development of new Class II bike lanes on Coldwell/Woodland extending west from the East Campus, and new Class II bike lanes on Carpenter north from Woodland to the West Campus.

This proposed route is not an ideal campus connector primarily due to the steep and somewhat narrow Woodland Avenue/Highway 99 overpass. It does not appear that sufficient width exists for Class II lanes on the overcrossing; therefore appropriate warning signage will be necessary at this constrained location. Wayfinding signage directing bicyclists to the campuses and other bicycle facilities should be installed as well as "Bike Route" signage (MUTCD D11-1) on every block.

As a long-term project, it is recommended that an Off-Street campus connector be developed utilizing the UP Railroad right-of-way for a Class I rail-with-trail facility. This project is discussed in more detail under MJC East-West Campus Off-Street Connector.

Segments of this project are recommended in the Stanislaus County Regional Bicycle Action Plan.

This railroad crossing is on Woodland Avenue just west of 9th Avenue. Bicyclists currently use Woodland because it is one of the only at-grade crossings of the railroad in the northern part of Modesto.

PRIORITY PROJECT

NEEDHAM CLASS II

Located near the SR-99 corridor in eastern Modesto, the Needham Class II facility connects Downtown Modesto with other areas in the east. The facility also enables bicyclists to access Modesto Junior College East, using the Class II spur along College Avenue. The facility connects to other Class III facilities in the Downtown area at 11th and 12th Streets. Traveling south on 12th Street, bicyclists may rejoin 9th Street after H Street.

"Bike Lane" pavement stencils and signage should be installed at the beginning and end of every block. Wayfinding signage should also be installed directing bicyclists to other bicycle facilities and significant destinations, particularly where the route shifts.

PRIORITY PROJECT

OAKDALE ROAD CLASS II

The Oakdale Road Class II Facility project would provide north-south bicycle lanes from Sylvan Avenue Kiernan Avenue. The Oakdale Road lanes would connect to three proposed east-west bike paths, as well as the existing and proposed facilities on Standiford Avenue. Class II bicycle lanes on Oakdale Road would be installed by removing the outside northbound travel lane for some segments, or removing the midblock left turn lane for other segments. In both instances the bicycle lane would be dropped at the approach to the intersection to accommodate for the turning movement. In the long-term, it is recommended that the road be widened in northern stretches of Oakdale where the unpaved shoulder ranges from 5 – 10 feet wide.

Wayfinding signage directing bicyclists to other bicycle facilities and significant destinations should be installed. In addition, "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

This project is recommended in the Stanislaus County Regional Bicycle Action Plan.

Bicycle lanes on Oakdale would be installed by removing a travel lane or the midblock left turn lane. At intersections, the bike lanes would be dropped to accommodate for right or left turn lanes as needed

PRIORITY PROJECT

PARADISE ROAD CLASS II

Currently Modesto has only one bicycle route west of SR-99. Paradise Road is a major arterial connecting from the southwest corner of the city into Downtown at 1st and H Streets. The Paradise Road Class II would continue the G and H Street bike routes in a southwesterly direction, connecting to Carpenter Road.

Wayfinding signage should be installed directing bicyclists to other bicycle facilities and significant destinations. "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

Segments of this project are recommended in the Stanislaus County Regional Bicycle Action Plan.

Paradise Road features mixed-residential, public and commercial land uses and will provide a vital bicycle facility for southwestern Modesto

PRIORITY PROJECT

ROSELLE/LAKEWOOD CLASS II

There are currently no bicycle facilities provided in a portion of northeastern Modesto. The Roselle/Lakewood Class II lanes would connect the northeastern area of Modesto bounded by Oakdale, Claus, Kiernan, and Scenic. This project would include a Class II route on Roselle Avenue between Scenic and Kiernan. This Class II segment would provide a connection to several east west facilities.

"Bike Lane" pavement stencils and signage should be installed at the beginning and end of every block. Wayfinding signage should also be installed directing bicyclists to other bicycle facilities and significant destinations.

Segments of this project are recommended in the Stanislaus County Regional Bicycle Action Plan.

This section of Lakewood/Roselle could accommodate bicycle lanes by narrowing the northbound auto travel lane. Narrowing the travel lane will also help to reduce speed in this segment, enhancing the safety of school children.

PRIORITY PROJECT

SCENIC DRIVE CLASS II

The Scenic Drive Class II Facility project would provide bicycle lanes from Spring Creek Drive to Claus Road. The Scenic Drive lanes would provide a valuable connection toward downtown for commuters from the central eastern neighborhoods of Modesto. There is an existing Class II bike lane on Scenic Drive that runs between Springcreek Drive and Sonoma Avenue. The Class II Bike lanes on Scenic may be installed by narrowing the two outside lanes in each direction.

Wayfinding signage directing bicyclists to other bicycle facilities and significant destinations should be installed. In addition, "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

This project is recommended in the Stanislaus County Regional Bicycle Action Plan.

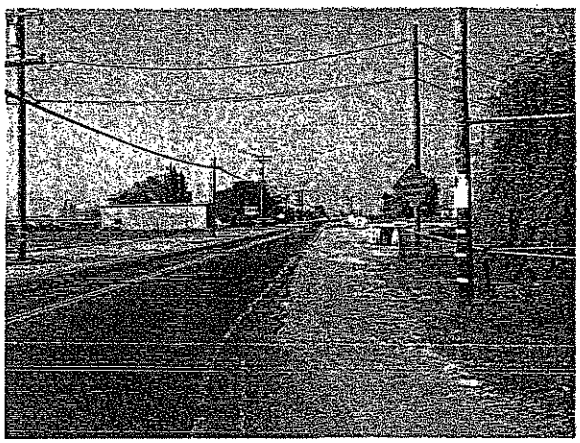
This existing bike lane on Scenic should be widened where possible. In addition, as the above photo illustrates, it is important to keep bicycle facilities clear of debris to maintain effectiveness

PRIORITY PROJECT

SYLVAN AVENUE EXTENSION CLASS II

The Sylvan Avenue Class II Facility project would provide an extension of the existing Class II bike lanes on Sylvan Avenue from Oakdale Road to Claus Road. This project would provide a continuation of one of the major east-west connectors in the northern part of the city, and connect to the proposed Class II facilities on Roselle and Claus.

Wayfinding signage should be installed directing bicyclists other bicycle facilities and significant destinations. "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.



The proposed extension of Class II facilities on Standiford/Sylvan Road would require widening the western segment of Sylvan Road, as shown above, just west of the Sylvan Road and Claus Road intersection.

PRIORITY PROJECT

WHITMORE AVENUE CLASS II

The Whitmore Avenue Class II Facility project would provide Class II bike lanes on Whitmore Avenue from S. Carpenter Road to SR-99. This project would link to a proposed bike path on S. Carpenter, proposed bike lanes on Crows Landing, and a proposed bike route on Ustick and Dallas connecting to a future bike/ped bridge over the Tuolumne River.

Wayfinding signage should be installed directing bicyclists other bicycle facilities and significant destinations. "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

PRIORITY PROJECT

12TH STREET/VIRGINIA CONNECTOR CLASS II AND III

The 12th Street/Virginia Connector Class II facility provides a link to the Class I Virginia Corridor Trail, running north-south in Downtown Modesto. The Class II bike lanes on Virginia Street and Class III bike route on 12th Street would enable bicyclists to travel from northern Modesto to Downtown via the Virginia Corridor Trail. The Connector will provide a link to Downtown and other bicycle facilities from the Class I trail. The 12th Street/Virginia facility would link to east west corridors at Needham, and at H and G Streets via J and 9th Streets.

Wayfinding signage should be installed directing bicyclists other bicycle facilities and significant destinations. "Bike Lane" signage and pavement stencils should be installed at the beginning and end of every block.

PRIORITY CLASS III BIKE ROUTE PROJECTS

PRIORITY PROJECT

CONANT AVENUE/MARSALA WAY CLASS III

The Conant Avenue/Marsala Way Class III route provides a north-south connection between Snyder Avenue and Sisk Road. The route connects from Conant Avenue to Marsala Avenue along Veneman Avenue. This route features numerous connections to existing and proposed neighborhood routes traveling west to Vintage Faire Mall, or east to other destinations in northern Modesto. The Conant Avenue/Marsala Way route also provides access to Josephine Chrysler Elementary School and Prescott Senior Elementary School, via W. Rumble Street.

Wayfinding signage should be installed along the Conant Avenue/Marsala Way route, directing bicyclists to other bicycle facilities and significant destinations, such as neighborhood schools and Vintage Faire Mall. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

CRATER AVENUE CLASS III CONNECTOR

The Crater Avenue Class III connector route features two north-south legs that connect from Whitmore Avenue in the south to the Tuolumne River at the north: Dallas Street and Ustick Road, connected by Crater Avenue running east-west along the Tuolumne River. A proposed connection to the Tuolumne River Regional Park and new bicycle/pedestrian bridge near the intersection of Crater Avenue and Dallas Street will provide residents of this southeastern Modesto neighborhood with an additional connection to downtown, via the Sutter/MLK Class III route.

Wayfinding signage should be installed along the Whitmore Avenue/Crater Avenue route, directing bicyclists to other bicycle facilities and significant destinations, such as the Tuolumne River Regional Park, Downtown Modesto, and the Dryden Park Municipal Golf Course. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

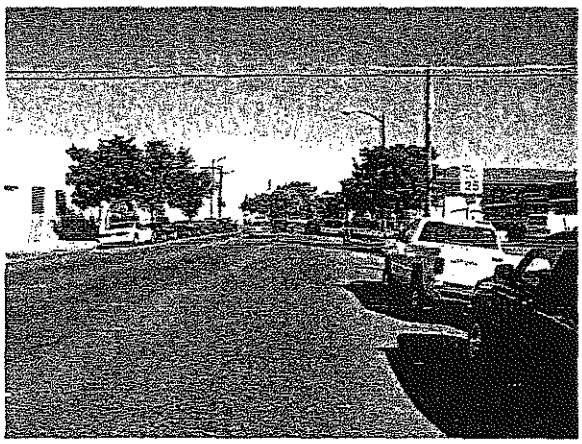
PRIORITY PROJECT

DOWNTOWN G AND H STREETS CLASS III

The Downtown G and H Streets Class III facilities project would provide bicycle routes in downtown Modesto, an area currently lacking in such facilities. The proposed routes would run on G and H Streets from First to Burney Streets. G and H Streets are parallel, one-way couplets that would provide commuter access to the Library, City Hall, Modesto Police station, Employment Development Division building, and the County Office of Education, as well as the nearby Modesto Convention Center. The routes would also connect to the existing bicycle routes on La Loma Avenue and Kimble Street at the northern end of the proposed segment. The southern terminus of the proposed segments would be at the intersections of G and H Streets at First Street, in front of Modesto High School.

"Bike Route" signage should be installed every quarter mile and at signalized intersections. Wayfinding signage should also be installed directing bicyclists to other bicycle facilities and significant destinations.

This project is identified in the Stanislaus County Regional Bicycle Action Plan.



G Street is a one-way roadway with parallel parking on both sides of the street. Bicycle lanes may be accommodated by narrowing the auto travel lanes or removing parking on one side of the street

PRIORITY PROJECT

DOWNTOWN 11TH AND 10TH STREETS CLASS III

The Downtown 11th and 10th Street Class III facility project would provide a north-south bike route facility through downtown Modesto. The proposed routes would begin on 11th Street at Needham, providing a connection to the on-street MJC East-West Campus connector lanes. From Needham, bike routes would extend south along 11th street to J Street. At J Street, the through-route would shift one block west to 10th Street. The bike routes would continue south on 10th Street, connecting to the Tuolumne River Regional Gateway Park.

"Bike Route" signage should be installed every quarter mile and at signalized intersections. Wayfinding signage should also be installed directing bicyclists to other bicycle facilities and significant destinations, particularly where the route shifts from 11th to 10th Streets.

PRIORITY PROJECT

EAST UNION AVENUE/SYLVAN MEADOWS DRIVE CLASS III

Running east-west, the East Union Avenue/Sylvan Meadows Drive Class III route provides a cross-town connection for cyclists in northern Modesto who desire an alternative to existing Class II lanes along Sylvan and Standiford Avenues. The route begins on Palmilla at Tully Drive, heads south on Wesson Ranch Road, turns east along E. Union, south along Dragoon Park and finally east along Sylvan Meadows, terminating at Palmwood Drive. The route provides a connection between Coffee and Tully Roads, on neighborhood streets, and provides access to Stockard Coffee Elementary School and Fred C. Beyer High School. Cyclists can connect with the proposed Snyder Class III route to access destinations in the vicinity of State Route 99.

Wayfinding signage should be installed along the East Union Avenue/Sylvan Meadows Drive route, directing bicyclists to other bicycle facilities and significant destinations, such as Fred C. Beyer High School and Vintage Faire Mall. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

EMERALD AVENUE/PANAMA DRIVE/HARRIS AVENUE CLASS III

The Emerald Avenue/Panama Drive/Harris Avenue Class III route travels north-south from Rouse Avenue to Coldwell Avenue by way of Harris Avenue, Alcamo Avenue, Panama Drive and Emerald Avenue. The route provides connections to the Sutter/MLK Class III route via Rouse Avenue. The Emerald Avenue route will enable north-south travel, via Coldwell and Carpenter, from Modesto Junior College West to Tuolumne River Regional Park and the Dryden Park Municipal Golf Course, via the Sutter/MLK route. The Emerald Avenue route jogs at several points and will require adequate signage to lead cyclists through these intersections. The Emerald Avenue route also meets the proposed Paradise Avenue Class II lanes, providing connections to locations downtown. The Emerald Avenue route also has a branch running east-west along Beverly Drive. Several schools may be accesses via the Emerald Avenue route in conjunction with the Sutter/MLK route. They include: Franklin Elementary School, Mark Twain Junior High School, Peter Johansen High School and Robertson Road Elementary School.

Wayfinding signage should be installed along the Emerald Avenue/Panama Drive/Harris Avenue route, directing bicyclists to other bicycle facilities and significant destinations, such as the Tuolumne River Regional Park, Downtown Modesto, and Modesto Junior College West. "Bike Route" signage (MUTCD D11-1) should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

MILLER AVENUE CLASS III

Beginning at the intersection of Santa Cruz Avenue in the west, Miller Avenue runs east to meet San Ignacio Avenue, Haddon Avenue and Poppypatch Drive, terminating at Melborne Drive. At many points along the route, cyclists may jog north to intersect the existing Riverside Park/Sutton Community Park Class III route, providing connections to both parks and the Creekside Golf Course. The Miller Avenue Class III route provides access to Capistrano Elementary School along Poppypatch Drive.

Wayfinding signage should be installed along the Miller Avenue route, directing bicyclists to other bicycle facilities and significant destinations, such as Dry Creek Regional Park and Sutton Community Park. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

MARIPOSA ROAD CLASS III

The Mariposa Road Class III routes provide connectivity throughout the southeast corner of Modesto. They span from Codoni Avenue in the east to Mitchell Road, abutting the Modesto City-County Airport in the west. The route provides an east west connection along Finch Road, as well as north south links along South Riverside Drive, Mariposa Road and Garner Road. South Riverside Drive connects the Mariposa Road route with destinations like the Creekside Golf Course and Dry Creek Regional Park. The Mariposa Road route also connects with other Class II and III facilities which link bicyclists with Downtown Modesto, like the South Morton/Mono Drive Route and La Loma Avenue.

Wayfinding signage should be installed along the route, directing bicyclists to other bicycle facilities and significant destinations. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

MARTIN LUTHER KING/SUTTER CLASS III

The Martin Luther King/Sutter Class III Facility project would complement the proposed Maze Road and Paradise Avenue facilities in providing north-south connections to southwest Modesto. The Martin Luther King/Sutter bicycle route would run from Maze Boulevard south to Robertson Road, providing access to the Tuolumne River Regional Park. A connection west into Downtown Modesto could be made at California or Paradise to the G and H Street Facilities.

Wayfinding signage should be installed, directing bicyclists to other bicycle facilities and significant destinations, such as Tuolumne River Regional Park. "Bike Route" signage should also be installed, at a minimum, every quarter-mile and at each signalized intersection.

Segments of this project recommended by the Stanislaus Regional Bicycle Action Plan.

A Class III bicycle route on Sutter/MLK would connect the southwestern Modesto neighborhoods and parks

PRIORITY PROJECT

ORANGEBURG ROAD/AMTRAK CONNECTOR CLASS III

The new Amtrak station near Santa Fe Avenue provides a regional transportation link for the commuters and visitors of Modesto. Currently, there are no existing bicycle facilities that extend east of Claus Road. This project would provide a valuable connection to the Amtrak station by extending the existing Class III facility on Orangeburg Road. The existing Orangeburg Road route, which currently ends at Claus Road, would be extended east of Claus Road to Held Drive. The route would then turn north onto Held Drive, and cross Briggsmore Avenue and terminate at the Amtrak station access driveway. This proposed route would also connect to the proposed Class I bicycle facilities on Claus Road as well as the proposed Class I facility on Briggsmore Avenue which would terminate at the Amtrak station as well.

Additional design requirements for this project would include enhancing the crossing of Claus Road, with bicycle crossing warning signage, as well as wayfinding signage directing bicyclists to the Amtrak Station. A bicycle loop-detector or push-button signal activation device would be installed to facilitate the crossing of Briggsmore Avenue.

The Amtrak station in eastern Modesto is currently not connected to the Modesto bicycle network. Both the proposed Class III route on Orangeburg and the proposed Class I trail along Briggsmore would provide a network connection to the station from other parts of Modesto

PRIORITY PROJECT

RIVERSIDE TO SUTTON PARK CLASS III

The Riverside to Sutton Community Park Class III facility would provide a neighborhood route connecting Riverside Park to Sutton Community. The proposed route would begin at the Encina Avenue route that terminates at Riverside Park on Riverside Drive. The route would extend east on El Pasado Drive, Penny lane, Mechalys Way, Creekwood Drive and finally south on Norseman Drive to the park entrance. This facility would connect to three different schools – Capistrano Elementary, Bernard L. Hughes Elementary and Peter Johansen High School, and fills a need for a residential area without an existing facility.

Wayfinding signage should be installed along the route to direct bicyclists to other bicycle facilities as well as significant destinations, such as parks. "Bike Route" signage and stenciling should be installed at least every quarter-mile and at signalized intersections.

PRIORITY PROJECT

ROSEMORE AVENUE CLASS III

The Rosemore Avenue Class III route provides a north-south neighborhood connection to Modesto Junior College West and Stanislaus County Center No. 5. Where Rosemore Avenue meets Modesto Junior College West, cyclists can transition onto Class II lanes along Blue Gum Avenue which connect Modesto Junior College West with the eastern part of Modesto via additional Class II bike lanes.

Wayfinding signage should be installed along the Rosemore Avenue route, directing bicyclists to other bicycle facilities and significant destinations, such as Modesto Junior College West and Stanislaus County Center No. 5. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

SANTA CRUZ AVENUE/COVENA AVENUE CLASS III

Running north-south, Santa Cruz Avenue and Covena Drive connect Dry Creek Regional Park and the Dry Creek Bike Trail to Legion Park. The reach of existing Class III facilities along Covena Drive is extended by linking the route to Santa Cruz Avenue by way of Miller Avenue. The existing bridge over Dry Creek allows cyclists to connect to existing Class II lanes on Coffee Road to the north. A proposed crossing over the Tuolumne River will enable cyclists to access Mancini Park and the City of Ceres to the south. The Santa Cruz Avenue/Covena Avenue route connects the South Morton Boulevard/Mono Drive Route to the Miller Avenue Route, providing east-west Class III connections to Downtown Modesto and the Creekside Golf Course.

Wayfinding signage should be installed along the Santa Cruz Avenue/Covena Avenue route, directing bicyclists to other bicycle facilities and significant destinations, such as the Legion Park, Downtown Modesto, and the Dry Creek Regional Park and Bike Trail. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

SOUTH MORTON BOULEVARD/MONO DRIVE CLASS III

The South Morton Boulevard/Mono Drive Class III route provides an east-west connection, via the Santa Cruz/Covena and Miller Avenue routes, from eastern Modesto to locations downtown. The route abuts Beard Brook Park, home of the Modesto Children's Park, and crosses Dry Creek at Gilmore Avenue.

Wayfinding signage should be installed along South Morton Boulevard/Mono Drive route, directing bicyclists to other bicycle facilities and significant destinations, such as the Tuolumne River Regional Park and Downtown Modesto. "Bike Route" signage should also be installed every quarter-mile and at signalized intersections.

PRIORITY PROJECT

SUNRISE - DRAGOO PARK CLASS III

The Sunrise – Dragoo Park Class III facility project would provide a north-south bicycle route that would fill a north-south residential neighborhood gap in the existing bicycle network. The bike route would run on Sunrise Avenue from the intersection with E. Roseburg Avenue, onto Sheffield Lane, then onto Claremont Drive and then Dragoo Park Drive. The route's northern terminus would be at the end of Dragoo Park Drive, adjacent to the Coralwood Mobile Home Community. This facility would connect to the existing Class III facilities on E. Roseburg, Tokay Avenue, and Rumble Road. The proposed route would also connect to the existing Class II facilities on E. Orangeburg and Sylvan Road.

The proposed route would require the installation of "Bike Route" signage at the beginning and end of each block. In addition, wayfinding signage to significant destinations and other bicycle facilities should be installed.

PRIORITY PROJECT

SNYDER CLASS III

The proposed Snyder Class III route would provide a valuable east-west connection from Tully Road to Sisk Road near the western border of Modesto, adjacent to the Vintage Faire Mall and State Highway 99. This route would provide a designated facility for commuters and would also provide a neighborhood route that would connect residential areas and two neighborhood parks. The route would extend west on Snyder Avenue from Tully Road, past McKinney Colony Park and Mildred Perkins Park, then branch onto Blue Bird Drive. The route on Blue Bird would go north and terminate at Pelandale Avenue, connecting to the proposed Pelandale Avenue Class I facility. The route would also go south on Blue Bird to Setrok Drive. The route would go west onto Setrok Drive, then south onto Gagos Drive, then west onto Vintage Drive and then South onto Sullivan Court to Sisk Road. The proposed facility would also pass by Mildred Perkins Elementary School.

Wayfinding signage should be installed directing bicyclists to other bicycle facilities and significant destinations. "Bike Route" signage should be installed at least every quarter-mile and at signalized intersections.

PRIORITY PROJECT

14TH STREET CLASS III

The proposed 14th Street Class III Bike Route facility would provide a northwest-southeast route through downtown. It would connect from Yosemite at D Street, northwest to Needham Street.

"Bike Route" signage should be installed at the beginning and end of every block. Wayfinding signage should also be installed directing to other bicycle facilities and significant destinations.

This project is recommended in the Stanislaus County Regional Bicycle Action Plan.

6. PEDESTRIAN IMPROVEMENTS

This section introduces the elements and actions necessary to create a safe, well-designed system of pedestrian facilities. The City of Modesto may consider the standards provided here when planning all construction or redevelopment of pedestrian facilities. By following these guidelines and recommendations, the City can implement a cohesive strategy providing facilities that are consistent in terms of safety and design that match the City's pedestrian infrastructure needs and goals.

PEDESTRIAN NEEDS

A safe and functional pedestrian environment – one that may encourage people to walk and accommodates citizens with mobility impairments – is composed of numerous features that require careful planning, design, and maintenance. In addition, it is important to provide access to destinations that attract pedestrian travel, such as schools and parks, neighborhood shopping, transit stops, libraries, post offices, and other public facilities. Features of a safe and functional pedestrian network include:

- Sidewalks and pathways that connect origins and destinations, and are wide enough to comfortably accommodate the expected pedestrian volume
- Surfaces that are as smooth as possible to prevent any difficulties that may confront those using assisted mobility devices;
- Intersections should have well-designed curb ramps on all corners;
- Marked crosswalks should be and remain highly visible through design and maintenance;
- Traffic signal phasing should allow adequate time for pedestrians to cross;
- Streetlights may be needed in some locations to improve visibility of nighttime crossings; and
- Regular maintenance of encroaching vegetation or other obstacles that may impede visibility and mobility.

AMERICANS WITH DISABILITIES ACT OF 1990

Persons with disabilities are particularly sensitive to design features that contribute to improved walking or rolling conditions. The Americans with Disabilities Act (ADA) of 1990 requires recognition of the particular needs of physically and mentally impaired individuals. This civil rights act prohibits public entities from designing new facilities or altering existing facilities that are not accessible to people with disabilities. As a result of ADA, curb ramps, for example, are a basic component of all sidewalk construction.

Sidewalk construction, curb ramp design, and other accessibility standards have been developed on a federal level in two documents, the Uniform Federal Accessibility Standards (UFAS) and the Americans with Disabilities Act Accessibility Guidelines (ADAAG). States are given the option to adhere to one of these, but may also adopt more stringent standards than the Federal minimum guidelines. Caltrans conforms to the policies of UFAS and Title 24 of the California Code of Regulations. Title 24, developed by the Division of the State Architect, has some stricter accessibility requirements than UFAS. In 2001, the Federal Highway Administration released *Designing Sidewalks and Trails for Access, Part II, Best Practices Design Guide* to provide the most up-to-date guidance on the design and construction of accessible pedestrian facilities.

Designing pedestrian facilities to accommodate persons with disabilities improves the walking experience for all users. Whenever one is analyzing, planning, or designing pedestrian facilities, accommodating persons with disabilities should be a priority that sets the standard for design. For example, curb ramps are helpful to parents pushing strollers, delivery persons pulling dollies or carts, and small children on bicycles. Wide sidewalks invite people to stroll side-by-side and enable wheelchairs, bicycles, strollers, and scooters to pass others with minimal conflict. Smooth surfaces reduce the risk of interfering with mobility devices such as walkers, as well as reduce the risk of elderly pedestrians and small children tripping.

EXISTING PEDESTRIAN FACILITIES

The state of pedestrian facilities in Modesto is extremely variable. Some areas of the city have good facilities and some do not. Some residential neighborhoods and parts of downtown have well-connected and well-maintained sidewalks, paths, and crosswalks. However, many of Modesto's commercial and residential subdivisions developed over the last 50 years may have been built without sidewalks or without adequate concern paid to pedestrian needs. These developments were designed for motor vehicle access and sidewalks may have been deemed less important. Other areas may have been developed without sidewalks in an attempt to preserve a "country living" quality at a time when Modesto was less populated.

In many neighborhoods, especially neighborhoods that were not developed as part of more formal subdivisions, sidewalks may be missing altogether. The areas developed incrementally are often served by narrow roadways with neither shoulders nor sidewalks. Adding sidewalks after the fact is difficult: adequate right-of-way is often unavailable or difficult to develop. Residents have often "adopted" undeveloped right-of-way and have incorporated it into their front yards.

RECOMMENDED IMPROVEMENTS

The following actions can help create the safe, direct, and well-connected system of facilities needed to encourage more Modesto residents to walk.

IMPROVE SIDEWALKS

The sidewalk is the most obvious element of the pedestrian network. The sidewalk must have a clear path wide enough to accommodate the widest mobility device as well as the expected volume of pedestrian traffic. This "clear zone" must be free of street furniture, signposts, sandwich boards,

and any other obstructions. In most residential neighborhoods in Modesto, a five-foot sidewalk would provide enough space for two people to walk side by side. Sidewalks along arterial or major streets should have wider sidewalks, especially if the sidewalk abuts the curb, to provide increased distance between pedestrians and vehicles. Where adjoining businesses or other destinations would attract more pedestrians, the sidewalks should be about seven feet wide to accommodate wheelchairs traveling side-by-side, or two people walking together while passing a third. Where even higher pedestrian use is expected, such as downtown, on shared-use paths, or around schools, community centers, and parks, 10 to 12 feet is preferable.

IMPROVE PEDESTRIAN CROSSINGS

Safe and clearly marked street crossings are critical parts of a pedestrian network. Crossings, the most challenging aspect of pedestrian travel, are where nearly all pedestrian/motorist collisions occur. One method to improve pedestrian safety is to shorten the crossing distance. Pedestrian refuge islands, curb extensions, reducing curb return radii, and eliminating a travel lane are popular measures used to reduce the width of the intersection. Another way to increase pedestrian safety is by using devices to warn motorists of the presence of pedestrians, such as signs, signals, lights, and lighted crosswalks. Removing sight obstructions, such as parked cars, trees, and signs also improves visibility.

Traffic signal timing is an important aspect of pedestrian crossing safety. Some pedestrians, especially people with mobility impairments and the elderly, need additional crossing time. Longer crossing times should be considered in areas expected to serve slower pedestrians, such as near retirement homes. However, increased pedestrian crossing time must be balanced with traffic flow operation such that the increased crossing time does not come at the expense of excessively long wait times, which can cause pedestrians to grow impatient and cross during gaps in traffic. Pedestrian actuated signals are an option to respond to pedestrian crossing demand.

Some conditions may require more extreme treatments. For instance, pedestrians are restricted from crossing some intersections due to the complexity of the turning movements or poor visibility. A special bicycle / pedestrian overcrossing or undercrossing may be constructed to overcome such restrictions or to cross a large barrier, such as an interstate highway or major arterial roadway. However, these treatments are generally reserved for unusual situations as they are very expensive.

On long blocks in pedestrian districts or near schools, a mid-block crossing may be justified. These crossings must be well designed and highly visible to avoid conflicts.

PROVIDE SIDEWALK BUFFERS

The level of comfort a pedestrian experiences while walking on a sidewalk can be enhanced with a planting strip or a buffer zone. Extra space between the sidewalk and the curb protects pedestrians from being hit by opening car doors or splashed by water accumulated at the side of the roadway. Sidewalk buffers may also increase the sense of safety while walking beside heavy or fast traffic. Buffer space can be used for streetscape improvements, further enhancing the attractiveness of a corridor for all users, or as space for other corridor amenities such as poles and signs. Buffers should be two to four feet along residential streets and four to six feet along arterial or major streets.

ENSURE CONNECTIVITY

Modern developments, whether commercial and industrial projects or residential subdivisions, can present connectivity challenges for pedestrians. They may be separated from neighboring land uses by barriers like walls, and are typically planned with limited access points. For instance, people must often walk hundreds of feet out of their way to a collector street to reach the entrance of a neighboring subdivision. By including short, direct pedestrian connections between adjoining land uses, jurisdictions can make walking (and bicycling) more attractive. These connections between adjacent land uses along access easements provide "short-cuts" not available to motorists.

IMPROVE THE STREETSCAPE

In some areas, a higher level of attention to the details of the pedestrian environment is justified by expected high pedestrian use and to encourage pedestrian activity. Streets where the elements are scaled to human size rather than vehicle size are attractive to pedestrians. Streetscape improvements such as public art, benches, drinking fountains, trash receptacles, special transit shelters, and pedestrian-scaled lighting fixtures are amenities that help balance the pedestrian-motorist environment.

ALTERNATIVE SIDEWALK MATERIALS

To meet ADA requirements, a walkway must be firm, stable, and slip-resistant. Portland cement concrete is the most widely used sidewalk material for its versatility and durability. When properly maintained, it can last one hundred years. Asphalt is an alternative to concrete that is usually less expensive, but requires more maintenance and lasts only about 40 years. Brick, aggregate, and cobblestone are other materials that are used, often for their decorative properties. These are more costly and may not be as smooth or slip resistant. However, they can be visually appealing and are often used for sidewalk borders or buffer zones. Unpaved trails can still meet ADA requirements with materials like decomposed granite, packed soil, and other natural surfaces with proper base material preparation. Soil stabilizers can also be applied to bind soil or aggregates into a hardened, durable surface.

ILLUMINATION

Good lighting is one key to pedestrian safety, especially at intersections. Lighting pedestrian facilities also increases the comfort and perception of personal security, thereby influencing route choice and their decision whether or not to walk. In commercial areas, local businesses can help by keeping front windows lit, which not only provides lighting to passersby but also encourages after-hours window-shopping. Walnut Creek in Contra Costa County has a lamppost adoption program that grew out of the Downtown Enhancement and Street Lighting Project. Individual contributions help to fund the replacement cobra-style streetlights with "old town" decorative pedestrian lighting. However, in residential areas, the brightness and style must be tailored to the neighborhood experience.

LANDSCAPING AND STREET TREES

Landscaping and street trees enhance the walking experience and provide shade. Upward branching trees and low growing shrubs are ideal selections to provide shade without blocking visibility. Care must be given to selecting trees with root structures that will not damage sidewalks. Also, trees and

shrubs must be trimmed near and above sidewalks to avoid creating hazards for the visually impaired. Trees must also be planted and trimmed so that they do not block pedestrian lighting.

ADJOINING DESIGN

Pedestrian facilities can attract greater use where they are adjoined by buildings and spaces that provide pleasing and interesting views. In downtown areas, vibrant, changing window displays instead of blank walls and covered windows or parking lots create a more engaging, and thus more attractive, environment. Sidewalks that are bordered by a "streetwall" of welcoming storefronts can persuade people to walk from place to place, creating both more pedestrian and economic activity. Limiting the amount of parking along sidewalks or providing buffers between parking and sidewalks can also help define the pedestrian sphere.

APPLY TRAFFIC CALMING

Over the past several years, "traffic calming" has grown in popularity as a technique to improve both bicycle and pedestrian safety, especially in residential areas. Traffic calming devices are installed to slow motorists, increase awareness of bicyclists and pedestrians around them, reduce cut-through traffic, and reduce the impacts of higher speed collisions. Common traffic calming devices are described here.

Traffic circles force motorists approaching an intersection from all directions to slow down. This allows more opportunity for pedestrians to cross the street.

Curb bulb-outs, chokers, and neckdowns reduce the width of the street, thus decreasing the crossing distance for pedestrians and slowing motor vehicular traffic.

Diagonal diverters prohibit through traffic by forcing motorists to turn at intersections. The diverter is typically designed to allow bicycle and pedestrian through movement. A partial diverter can limit traffic access in one direction but allow through traffic in the opposite direction. These diverters also narrow the crossing distance for pedestrians. Street closures are a form of a traffic diverter that should only be utilized in extreme cases.

Speed humps are raised asphalt devices that force automobiles to slow down or risk damage to the vehicle. Well-designed humps work well for bicyclists. Raised intersections and raised crosswalks serve a similar purpose while boosting pedestrian awareness.

Narrower streets affect motorist behavior in a psychological manner. If the driving space is perceived as narrow, motorists will react by driving more carefully. Narrowing the street – or the motorist's field of vision – can be achieved in a number of ways: street trees, striping (bike lanes), contrasting pavement or texture on the roadway edges, and on-street parking.

Many cities around the country have created neighborhood traffic plans that involve residents and city staff working together to find solutions to cut-through traffic, speeding vehicles, and neighborhood safety problems. Traffic calming devices typically are used to accomplish the goals articulated by the neighborhood residents.

IDENTIFY AND IMPROVE PEDESTRIAN DISTRICTS

Pedestrian districts are areas of dense land use and intense, or potentially intense, pedestrian activity. They are often formed and classified in land use plans and come with strict pedestrian-friendly design requirements. Downtowns, neighborhood retail hubs, transit-oriented developments, college campuses and surrounding areas, mixed-use developments, and strip retail centers can all be classified as pedestrian districts. It is recommended that City of Modesto identify pedestrian districts that meet or could meet specified criteria. Once designated, the City should establish specific policies and design guidelines for these districts. The General Plan would provide the basic policy direction and the designation of each district. Specific plans or an area redevelopment plan may serve as a vehicle for outlining detailed improvements to the pedestrian environment as well as improvements that support the health and viability of businesses and other activities within the district. Changes to local zoning and subdivision standards may be made to provide alternative development standards within pedestrian districts. Finally, the City of Modesto can use these plans and policies, as well as surveys of streets within their control, to identify improvements and include them within capital improvements programs.

PEDESTRIAN IMPROVEMENT PROJECTS

While the average bicycle trip is less than two miles in length, pedestrian trips average less than one-half mile. Highly localized improvements such as curb ramps or sidewalk linkages to transit are more important than a regional pedestrian network. Therefore, recommended pedestrian projects and programs consist of improvement packages that can be implemented in specific areas or on specific corridors by local agencies. In some cases, projects listed as a bikeway improvement, specifically bike paths or shared use trails, are pedestrian facilities as well. Two basic pedestrian enhancement types are presented in this plan: Americans with Disabilities Act (ADA) Improvements and Pedestrian Districts.

Pedestrian Districts

Local communities wishing to enhance the pedestrian environment in local commercial areas, employment areas, and downtowns may establish a "pedestrian district." Designating these districts would allow for more innovative treatments of the public right-of-way, focus improvements in targeted areas, and promote walking as the primary mode of transportation. Pedestrian districts should be linked to the city's bicycle network, and include support facilities like bicycle racks to encourage people to bicycle to the district, lock up their bike, and walk around.

Identifying pedestrian districts can occur during the General Plan process, perhaps as part of the Circulation Element, and identified on land use maps. Other possible methods to enhance or create pedestrian districts include the following.

Subdivision requirements for new developments may call for mixed uses, narrower streets, shorter blocks, and additional emphasis on the pedestrian environment.

Overlay districts place requirements and regulations in addition to the base zoning requirements in specific areas to achieve goals. Pedestrian overlay districts could be applied to downtowns, areas surrounding college campuses, and transit centers to require additional pedestrian amenities and

encourage pedestrian activity. These districts may also include exemptions to level of service standards.

Land Use is the most critical aspect of a successful pedestrian district. The area should be zoned to encourage a dense mix of residential and commercial uses and discourage more auto-oriented uses such as fast food restaurants with drive-up windows and auto dealerships or repair shops. This strategy makes it more convenient to walk to many destinations for work, leisure, or running daily errands within a relatively small area. A mix of uses can also instigate round-the-clock activity.

The **Plan Area** must be large enough to promote a relatively substantial amount of development and land use mix but not so large that people may feel compelled to drive to reach destinations within the district. The Portland (OR) Pedestrian Plan recommends an area no less than 600 feet and no more than one mile in any direction.

Specific Plans provide an overall and detailed plan for land uses and development within a more circumscribed part of a community. The specific plan lays out design guidelines and improvements within the public right-of-way, including pedestrian improvements and can be the basis for assessment districts used to finance these improvements.

Design guidelines can be created to ensure new public and private development meets certain design standards and provide necessary pedestrian amenities.

Convenient and frequent **Transit** connections provide attractive alternatives to driving and broaden the realm one can travel without a vehicle. Similarly, a pedestrian district should welcome bicycles by providing ample parking and bikeways throughout the district to encourage non-motorized movement.

Assessment Districts, Community Facilities Districts, and similar funding mechanisms require property owners to pay a fee to cover special improvements such as landscaping, lighting or maintenance. To delineate a pedestrian district, jurisdictions should locate areas that meet, or could meet, most of the following characteristics:

The visual interest of **Building Facades** is important for pedestrians. Every effort should go into avoiding blank walls, plated glass, vacant lots, etc. and encouraging window displays, sidewalk cafes, art work, and interesting architectural design elements that help create a sense of place and welcoming environment.

All **Roadways** within the district should contain safe, convenient and connected facilities so that pedestrians feel welcomed. Wide, unobstructed sidewalks should be built on both sides of each street, and curb extensions, street trees, lighting, and improved crosswalks should be provided. Traffic calming devices, lower speed limits, narrowed travel lanes, traffic signals timed to walking speeds, and similar improvements lessen the conflicts between pedestrians and automobiles.

Parking Lots should not dominate views from the sidewalk. Surface parking should be screened from the right-of-way by walls or fences and landscaping. However, for security reasons, the

screening should be at a height (3 to 4 feet) that permits visibility from the sidewalk. When possible, parking garages should have commercial uses on the ground level for continuity of the district. Parking should be allowed on the street to provide more protection for pedestrians from traffic and to serve as a form of traffic calming. Direct pedestrian connections should be provided to parking lots and walking routes should be well-lit when passing between buildings and along pathways within parking lots.

Pedestrian Accessibility Projects

Title II of the Americans with Disabilities Act (ADA) and the U.S. Access Board have developed guidelines for constructing new and altered "accessible" infrastructure for persons of all abilities. Local agencies that plan and construct pedestrian facilities should be kept informed of the latest recommendations. Several projects and programs can address accessibility needs.

First, agencies are advised to analyze current design standards and policies to ensure they meet or exceed current recommended standards. Sidewalk width, ramp construction (including coloration, tactile warning, and placement), crosswalk markings, pavement materials, driveway approaches, pedestrian signals (including audible signals), and signal timing are among the most basic elements that directly affect pedestrian and wheelchair mobility.

Second, the City of Modesto and other local agencies should prepare assessments of the pedestrian facilities in their jurisdiction and develop a plan to correct deficient facilities. Locations to receive priority for improvements include institutions that serve people with disabilities, hospitals, senior centers, nursing homes and assisted living centers, downtowns, civic centers, public buildings, parks, community facilities, and transit routes and stations. Some cities have developed programs that serve individual requests. For instance, if a child in a wheelchair cannot easily travel to school, gaps in the sidewalk system are closed and curb ramps installed. This demands a great deal of commitment on the part of the City and assorted agencies, but is invaluable to the public. The City of Modesto may identify a lump sum amount in their capital improvement program (CIP) to address these special requests.

7. BICYCLE AND PEDESTRIAN SUPPORT PROGRAMS

Support Programs are an important component of the Non-Motorized Transportation system, as they further improve safety and convenience for bicyclists and pedestrians.

SAFE ROUTES TO SCHOOL

This Plan has identified a number of routes that will benefit schoolchildren that walk or bicycle to school. Identifying and improving school routes is one of the most effective means of reducing AM traffic congestion and addressing existing safety problems. Most effective school commute programs are joint efforts of the school district(s) and City, with parent organizations adding an important element.

RECOMMENDATION

Develop a Safe Routes to School Program

Safe Routes to School (SR2S) programs are growing in popularity nationwide. SR2S programs are often designed to decrease traffic and pollution and increase the health of children and the community at large. The programs promote walking and bicycling to school through educational efforts and incentives that stress safety and fun for the participants. SR2S programs also address the safety concerns of parents by encouraging greater enforcement of traffic laws, educating the public, and exploring ways to create safer streets.

The basic components of a SR2S program include:

- **Encouragement** – school commute events and frequent commuter contests are used to encourage participation.
- **Education** – students are taught safety skills and educational campaigns aimed at drivers are developed.
- **Enforcement** – various techniques are employed to ensure traffic laws are obeyed.
- **Engineering** – infrastructure improvements are constructed to improve the safety of school commute routes.

Why Do We Need SR2S?

The purpose of a SR2S program is to identify and improve school commute routes, to increase the number of students who walk and/or bicycle to school, to lessen traffic congestion, and to improve health. Walking and biking to school can be healthy alternatives to being driven, and can provide a sense of independence for children who may otherwise be restricted by school bus or parents' schedules.

What Are the Benefits of a SR2S Program?

The primary benefit of implementing a SR2S program is the resulting increase in safety for children walking and riding bicycles to school. A comprehensive strategy based on a cooperative effort between school officials, parents, residents and city planning staff will ensure that specific school-related traffic calming projects and pedestrian and bicycle improvements will become priority projects eligible for State, Federal or other grant funding. The involvement of various stakeholders throughout the Safe Routes process increases the likelihood for implementation of needed safety improvements. While the primary focus of a SR2S program is improving safety for children walking and biking to school, these safety benefits can extend to all age and activity groups. In addition to safety enhancements, a SR2S program helps integrate physical activity into the everyday routine of school children. Health concerns related to sedentary lifestyles have become the focus of efforts both statewide and nationally to reduce health risks associated with being overweight. Identifying and improving routes for children to safely walk and bicycle to school is one of the most cost effective means of reducing weekday morning traffic congestion and can help reduce auto-related pollution.

SR2S Program Outline

School commute projects need to be developed in a traditional planning process that includes (a) school administrators and teachers, (b) local PTA's and other groups, (c) neighborhood groups and the public, (d) police departments, and (e) County public works department. The planning process can be accomplished by these groups using the step-by-step process outlined below, or by enlisting professional services.

1. Form a School Commute Task Force composed of representatives from the school district, public works and law enforcement agencies, the local neighborhood, parent-teachers or other similar group, and the school itself.
2. Set objectives and a reasonable schedule for this Task Force to accomplish its goals.
3. Determine the preferred basic school commute routes to the school based on (a) parent and student input, (b) a survey of parent and student community patterns, (c) public works and law enforcement input, and (d) observations of actual commuting patterns.
4. Are there any efforts to guide students who wish to walk or bicycle to school? Does the school provide a map of recommended routes?
5. Does the school wish to encourage more students to walk or bicycle to school? While there is a perception of safety being a concern, statistics show that walking and bicycling are just as safe as driving. Yet many parents insist on driving their children even a few blocks to school--thus contributing to the traffic congestion.
6. Study the parking lot and drop off areas of the school. Is there a pattern where students are walking between cars or through parking lots or drop off areas to reach the school? Are there are management efforts to get parents to follow any specific drop-off protocol?
7. Are there adequate sidewalks and bike lanes on the streets directly serving the school? Are there school access points which encourage students to cross midblock or at other less desirable locations?

8. Where are the first major street crossings on the main school commute routes? Many accidents occur at these intersections. Are they signalized? Is the signal timing adequate even for younger students? Are there crossing guards?

9. Are there any locations where students are crossing major or minor streets at midblock or unprotected locations, i.e., no stop signs or signals? Because children are sometimes hard to see and have difficulty in gauging vehicle speed, these locations can the focus of improvements.

10. Do students have to cross intersections that have very wide turning radii, where vehicles can accelerate and merge while turning? These are problematic because drivers are focused to their left at merging traffic rather than in front at crosswalks.

11. Do all intersections have properly designed crosswalks? The crosswalks should be located so that students can wait safely on the sidewalk prior to seeing if they can cross. Is there adequate visibility and lighting given the speed of traffic? Are there adequate warning signs in advance of the crosswalk?

12. What are the 85th percentile speeds of traffic on the major school commute corridors? Are they significantly above or below the posted speed limits? When was the last speed survey conducted? What is the level of police enforcement, and does it occur only at the beginning of the school year? It is possible to lower speed limits near schools. In other locations, it may be necessary to make physical changes, such as narrowing travel lanes, to slow traffic. It may also be preferable to accept slightly more congestion on a two-lane street, and have slower speeds, than have free flowing high-speed traffic on a four-lane street.

13. School Commute Projects involve numerous often-small incremental changes to sidewalks and roadways, such as adjustments to signal timing or new signing or lighting. In other cases, innovative lighted crosswalk treatments or even grade separation may be warranted. Working with the Task Force will help a school determine the best mix of improvements suitable for each corridor, and compatible with local traffic conditions.

14. A more detailed evaluation methodology, which rate improvements and corridors according to objective criteria, has been developed and is available for use by local schools. However, it may require the services of specialists who understand traffic safety and engineering.

15. Once the improvements have been identified, a preliminary design or plan must be completed which describes the project and its cost. For example, a crosswalk improvement would need to be designed so that it can be reviewed and approved by the appropriate agency. Again, a professional may be engaged for this effort.

16. With a plan and cost estimate, the project still needs a sponsor. Typically this would be the public works department, who are best connected to available funding sources and familiar with the State and Federal procedures necessary to obtain funding. The project sponsor will need an official authorization, and confirmation that (a) the right-of-way is publicly owned, (b) staff have reviewed and approved the project, and (c) no negative impacts have been identified. With this in hand, the project sponsor can seek funding, which usually requires a 10% or greater matching amount.

17. Programs that may be implemented include a "Walking School Bus Program", which involves parents taking turns walking (or bicycling) with groups of children to school. Other innovative programs are identified in Marketing, Education, and Support Programs.

EDUCATION PROGRAMS

The local school districts, Modesto Police Department, and City departments have a long history of trying to improve safety conditions for bicyclists and pedestrians. Unfortunately, the lack of education for bicyclists, especially younger students, continues to be a leading cause of accidents. For example, the most common type of bicycle accident reported in California involves a younger person (between 8 and 16 years of age) riding on the wrong side of the road in the evening hours. Studies of accident locations around California consistently show the greatest concentration of accidents is directly adjacent to elementary, middle, and high schools. Many less-experienced adult bicyclists are unsure how to negotiate intersections and make turns on city streets.

Bicycle education programs in schools are typically taught once a year to third, fourth and fifth graders. Curriculum is generally derived from established programs developed by groups such as the California State Automobile Association, and taught by members of the police department. Budget cuts, demands on students' time, and liability concerns limit the extent of bicycle education to school children. Formal adult bicycle education is virtually non-existent.

Pedestrian education programs are rare, but important as well. School children need to understand how to safely cross the road (e.g. scanning for cars), where the best places to cross are, never to cross behind a bus or car, etc. Pedestrian education should be taught as early as first grade, and continue through third grade.

RECOMMENDATIONS

School Children Bicycle and Pedestrian Education

Existing school education programs should be expanded in a cooperative effort between the City and local school districts, and supported by a secure, regular funding source. A joint City/school district Safety Committee should be formed consisting of appointed parents, teachers, student representatives, administrators, police, active bicyclists and Transportation Department staff whose task it is to identify problems and solutions, ensure implementation, and submit recommendations to the School Boards or City Council. This effort will be complementary to the physical improvements recommended in the Safe Routes to School Program priority project.

Education materials should be expanded to promote the benefits of bicycling, the need for education and safety improvements, the most recent educational tools available in the country (including the use of low-cost safety videos), and directives to parents on the proper school drop-off/pick-up procedures for their children. Educational pamphlets for children should be made more readable. Incentive programs to reward good behavior should be developed. Educational programs, especially on-bike and on-street pedestrian training should be expanded to more grades and for more hours per year. Education curriculum should, at a minimum, cover the following lessons:

- On-bike training or bicycle "rodeos"
- Use and importance of bicycle helmets

- How to adjust and maintain a bicycle
- Night riding (clothes, lights)
- Rules of the road
- Riding on sidewalks
- How to negotiate intersections
- Riding and walking defensively
- Use of hand signals
- Seatbelt safety

Adult Bicycle Education

Establish an adult bicycle education program through Modesto's bicycling organizations such as the Stanislaus County Bicycle Club, in cooperation with local bike shops and the Parks, Recreation and Neighborhoods Department and/or other City departments. This program should (a) teach adults how to ride defensively, (b) teach adults how to ride on a variety of city and county streets, and (c) encourage adults to feel more confident to ride to work or for utilitarian and recreational trips. Work with local bicycling groups who could provide the training expertise, and possibly lead organized bicycle-training sessions, tours and rides.

Provide Safety Handbook

A standard safety handbook format should be developed incorporating the best elements of those currently in use, and made available to each school district on disk to they may be customized as needed. Schools should develop a circulation map of the campus and immediate neighborhood showing the preferred circulation and parking patterns and explaining in text the reason behind the recommendations. This circulation map should also be a permanent feature in all school newsletters. Bicycle helmet subsidy programs are available in California and should be used to provide low-cost approved helmets for all schoolchildren bicyclists.

Educate Motorists

Motorist education on the rights of bicyclists and pedestrians is virtually non-existent. Many motorists mistakenly believe, for example, that bicyclists do not have a right to ride in travel lanes and that they should be riding on sidewalks. Many motorists do not understand the concept of "sharing the road" with cyclists, or why a bicyclist may need to ride in a travel lane if there is no shoulder or it is full of gravel, glass, or potholes. Educate motorists about the rights and characteristics of bicyclists and pedestrians through a variety of means including:

- Making bicycle safety a part of traffic school curriculum.
- Producing a brochure on bicycle safety and laws for public distribution.
- Enforcing existing traffic laws for both motorists and bicycles.

- Sending an official letter to the Department of Motor Vehicles recommending the inclusion of bicycle laws in the drivers license exam.
- Developing and holding bicycle and pedestrian planning and design training for all transportation engineers and planners in the City of Modesto.
- Working with contractors, subcontractors and City maintenance and utility crews to ensure they understand the needs of bicyclists and follow standard procedures when working on or adjacent to roadways.
- Working with towing companies and emergency clean up crews so they better understand the needs of bicycles.
- Installing signs that read 'Share the Road' with a bicycle symbol along all routes of the proposed primary system where bike lanes are not feasible, travel lanes are under 14 feet wide, and ADTs exceed 10,000.

ENCOURAGEMENT PROGRAMS

Without community support, a bicycle/pedestrian plan lacks the key resources that are needed to ensure implementation over time. While the Modesto Public Works Department may be responsible for designing and constructing physical improvements, strategies for community involvement will be important to ensure broad-based support – which translates into political support – to help secure financial resources. Involvement by the private sector in raising awareness of the benefits of bicycling and walking can range from small incremental activities by non-profit groups, to efforts by the largest employers in the City. Specific programs are described below.

RECOMMENDATIONS

Facilitate the Development of Incentive Programs

Employer incentives to encourage employees to try bicycling or walking to work include providing bicycle lockers and shower facilities, and offering incentives to employees who commute by bicycle or walk by allowing for more flexible arrival and departure times, and possibly paying for transit or taxis during inclement weather. The City may offer incentives to employers to institute these improvements through air quality credits, lowered parking requirements, reduced traffic mitigation fees, or other means. Other efforts should include:

- Develop, promote and publicize bicycle commuter services, such as bike shops selling commute gear, bikes-on-transit policy, and regular commute rides.
- Implement a Bicycle Friendly Businesses Program.
- Create an annual commuter challenge for local businesses.
- Create events such as "bicycle to the grocery store" days, when cyclists get vouchers for, or coupons off items in the store, or "walk to the movies" days, when cyclists and pedestrians receive free popcorn or a discount on a movie or refreshments.

- Create public service announcements on radio and TV to promote the health and livability benefits of bicycling and walking, as well as the detrimental effect of excessive motor vehicle use (e.g. air pollution, traffic noise, congestion).
- Work with Parks, Recreation and Neighborhoods Department to deliver a "benefits of bicycling and walking message" to youth that are working on water, air, and general pollution activities.
- Hold an annual community event to encourage residents to replace one car trip a week with a bicycle trip.
- Promote and publicize new and existing education and encouragement efforts by community groups and businesses.
- Support planning and implementation of an annual mass bicycling ride in Modesto to attract new riders, showcase the city, and demonstrate the benefits of bicycling.
- Develop and implement a public education campaign to encourage bicycling and walking, such as ads on movie screens, city bench, bicycle locker and billboard advertising, and videos on cable access television.
- Develop measures to reduce bicycle theft such as a registration program, subsidized locks, and training for proper locking techniques.

Bicycle Clunker and Parts Program, Bicycle Repair Program

This program involves obtaining broken, stolen, or other bicycles and restoring them to working condition. The program's dual mission is also to train young people (ages 12 to 18) how to repair bicycles as part of a summer jobs training effort. Bicycles are an excellent medium to teach young people the fundamentals of mechanics, safety, and operation. Young people can use these skills to maintain their own bicycles, or to build on related interests. The program is often staffed by volunteers from local cycling organizations and bicycle shops, who can help build an interest in bicycling as an alternative to driving. The seed money to begin this program often comes from a local private funding source. The proposal submitted to this source should clearly outline the project objectives, operating details, costs, effectiveness evaluation, and other details. The bicycles themselves could be derived from unclaimed stolen bicycles from the police department, or from donated bicycles. The program will need to qualify as a Section 501c(3) non-profit organization to offer tax deductions.

Community Trail Adoption

Programs to have local businesses and organizations "adopt" a Class I pathway similar to the adoption of segments of the Interstate Highway system. Small signs located along the pathway would identify supporters, acknowledging their contribution. Support would be in the form of an annual commitment to pay for the routine maintenance of the pathway, which in general costs about $8,500 per mile. Parks, Recreation and Neighborhoods, or local groups, may administer this program. Other funding mechanisms for Class I facility maintenance programs are discussed in Chapter 8, Implementation.

Bike-to-Work and Bike-to-School Days

The City should continue to hold an annual Bike-to-Work day in May, in conjunction with the California bike-to-work week activities. Continued police presence in the Bike-to-Work Day activities through escorted routes should be continued, as should city staff presence at "energizer" stations along the route. Local Bike-to-School days could be jointly sponsored with the School Districts, possibly in conjunction with bicycle education programs.

Bike and Walking Fairs and Races

Hosting bike fairs and races in Modesto helps to raise the profile of bicycling in the area. The local Family Cycling Festival held in May includes a number of events to promote cycling. Activities include a bicycle safety check, bicycle rodeo/safety course, bicycle licensing. Bicycle stunt shows and an amateur criterium race are also being held to attract people to the event.

Events would need to be sponsored by local businesses, and involve some promotion, insurance, and development of adequate circuits for all levels of riders. It is not unusual for these events to draw up to 1,000 riders and walkers, which could bring some additional expenditures into the area. The City can assist in developing these events by acting as a co-sponsor, and expediting and possibly underwriting some of the expense of, for example, police time. The County should also encourage these events to have races and tours that appeal to the less experienced cyclist. For example, in exchange for local governments underwriting part of the costs of a race, the event promoters could hold a bicycle repair and maintenance workshop for kids, short fun races for kids, and/or a tour of the route lead by experienced cyclists who could show less experienced riders how to safely negotiate County streets.

The City should continue to support the Family Cycling Festival by offering permits, financial assistance and staff time during the festival for the bicycle safety events and to staff informational booths.

Bicycle Facilities Map

Updating Modesto's bicycle facilities map will be the primary tool for showing bicyclists all of the designated bikeways in Modesto. The map should also show significant destinations, the location of bicycle parking facilities, and bicycle facilities in adjacent communities (e.g. Ceres). The location of bike shops may also be shown (advertising by bike shops on the map can help to offset the printing costs). The map should be distributed as widely as possible at locations such as city offices, libraries, schools, bike shops and other recreational retail outlets, and Modesto Junior College. The map should clearly show the type of facility (path, lane, or route), as well as include basic safety information.

BIKEWAY AND PATHWAY SECURITY

The Modesto Police Department should continue to perform enforcement of applicable laws on bike paths, depending on available resources and priorities. Enforcement of vehicle statutes relating to bicycle operation will be enforced on Class II and Class III bikeways as part of the department's normal operations.

RECOMMENDATIONS

Increase Safety and Security Through Proper Design and Maintenance

The following recommendations emphasize safety and security through design and maintenance efforts. These actions should be incorporated into the planning and development process of all bicycle facilities.

- Adhere to the established design, operation, and maintenance standards presented in this Non-Motorized Transportation Master Plan.
- Supplement these standards with the sound judgment of professional planners, public safety officials and engineers.
- Maintain adequate recording and response mechanisms for reported safety and maintenance problems.
- Provide regular police patrols to the extent needed.
- Promote measures to reduce bicycle theft such as a registration program, subsidized locks, and training for proper locking techniques.
- Thoroughly research the causes of each reported accident within the City of Modesto's non-motorized network. Respond to accident investigations with appropriate design or operation improvements.

MAINTENANCE

Modesto's Non-Motorized Transportation network needs regular maintenance. Typical tasks include repairing damaged and potholed roadway surfaces and clearing plant overgrowth. Bike lanes and bike routes should have regular sweeping to clear debris. Although these latter aspects are generally associated with routine roadway maintenance, special attention to bikeway safety and usability is important and can mean additional costs are incurred. The typical maintenance program for bicycle facilities is provided in **Table 7-1**.

RECOMMENDATIONS

Develop a Funding Source for Trail Maintenance

Funding for bicycle and trail facility maintenance can often be difficult to identify. Most regional and State funding sources earmark the funds for capital improvement, or the building of new facilities, not for ongoing maintenance costs. There are several methods of securing funding for maintenance outside of the use of General Fund money. Several cities have employed successful "Adopt-a-Trail" programs, the implementation of "recreational fees" on the purchase of recreational equipment in the city, or other fundraising activities. The funding could be used to develop a bicycle and pedestrian maintenance request system. Additional discussion of maintenance funding is provided in Chapter 8, Implementation.

Table 7-1
Maintenance Program for Bicycle Facilities

Item	Frequency
Sign replacement/repair	1-3 years
Trail pavement marking replacement	1-3 years
On-Street pavement marking replacement	1-3 years
Planted tree, shrub, & grass trimming/fertilization	5 months-1 year
Pavement sealing/potholes	5-15 years/30-40 years for concrete
Clean drainage system	Annual
Pavement sweeping	Monthly
Shoulder mowing and weed removal	Bi-Annual – Fall/Spring
Trash disposal	As needed, twice a week
Inspect bridge abutments and structures	After each storm
Graffiti removal	Weekly
Maintain furniture	1 year
Restroom cleaning/repair	Weekly
Pruning to maintain vertical clearance	1-4 years
Remove fallen trees	As needed (on trail only)
Weed control	Monthly
Maintain emergency telephones	1 year
Maintain irrigation lines/replace sprinklers	1 year
Irrigate/water plants	Weekly - as required during establishment growth period
Fencing	Monthly

MARKETING THE MASTER PLAN

The success of the Modesto Non-Motorized Transportation Master Plan depends largely on the community's acceptance and promotion of the Plan's contents. In addition, City departments and commissions should incorporate the policies, objectives, and spirit of the Master Plan into their respective projects and responsibilities. The following are steps that will help ensure that the Plan becomes a living document, helping shape Modesto's future.

- Distribute copies of the Plan to the Community and Economic Development, Engineering and Transportation, and Parks, Recreation and Neighborhoods Departments.
- Distribute copies of the Plan to members of the Planning Commission, Tuolumne River Regional Park Citizens Advisory Committee, and other appropriate citizen advisory groups.
- Ensure that Plan implementation involves cooperation among the Modesto Parks, Recreation and Neighborhoods Department, Engineering and Transportation Department, Stanislaus County, local school districts, private sponsors, the Stanislaus County Bicycle Club, and community groups.
- Provide copies of the Modesto Bicycle facilities map to schools, bicycle and recreational groups, transit agencies, Modesto Junior College, and bicycle shops in Modesto.

8. IMPLEMENTATION

This chapter identifies steps towards implementation of the proposed facilities and programs of this plan, the estimated costs for the proposed improvements and maintenance, strategies on funding and financing, and a guide for recommended maintenance program.

IMPLEMENTATION PROCESS

The steps between the network improvements and concepts identified in this Plan and the final completion of the improvements will vary from project to project, but typically include:

1. Adoption of the Modesto Non-Motorized Master Plan Update by the Modesto City Council (and incorporation into City's General Plan).
2. Preparation of a Feasibility Study involving a conceptual design (with consideration of possible alternatives and environmental issues) and cost estimate for individual projects.
3. Secure, as necessary, outside funding and any applicable environmental approvals.
4. Approval of the project by the local planning body (if applicable) and the City Council, including the commitment by the latter to provide for any unfunded portion of the cost.
5. Completion of final plans, specifications and estimates, advertising for bids, receipt of bids and award of contract(s).
6. Construction of Project.

Once a Non-Motorized transportation system has been identified, the greatest challenge is to identify the top projects that will offer the greatest benefit to bicyclists and pedestrians in the next five years. Aside from the criteria used in developing the system as a whole, selection of the high priority projects is based on (a) cost and construction feasibility given existing traffic, safety, and environmental constraints, (b) need and benefit, and (c) strength of the project as measured by specific funding criteria. Finally, it is important to remember that the bikeway system and the top projects are flexible concepts that serve as guidelines to those responsible for implementation. The system and segments themselves will change over time as a result of changing bicycling patterns and implementation constraints and opportunities.

SYSTEM CONSTRUCTION COST BREAKDOWN

A breakdown of cost estimates for construction of the proposed network provided by this plan is presented in Table 8-1 below. The total cost of the recommended projects is estimated to be about $54 million. It is important to note the two following assumptions about the cost estimates. First, all cost estimates are highly conceptual, since there is no feasibility or preliminary design completed, and second, the costs do not include the feasibility study costs.

All the projects are recommended to be implemented over the next two to twenty years, or as funding is available. The more expensive projects, such as the Class I facilities, may take longer to implement. In addition, many funding sources are highly competitive, and therefore impossible to determine exactly which projects will be funded by which funding sources. Timing of projects is also something difficult to pinpoint exactly, due to the dependence on competitive funding sources and, timing of roadway and development, and the overall economy.

The projects listed above may be funded through various sources. The funding section below outlines some of the local, regional, state and federal funding methods and resources for non-motorized transportation projects.

Table 8-1
Recommended Non-Motorized Transportation System Cost Estimates

NAME	START	END	PROPOSED CLASS	LENGTH (MI.)	Cost ($)

* Cost per mile: Class I = $550,000 / Class II = $30,000 / Class III = $5,000
** Canal "Start" and "End" noted as nearest street.

CONSTRUCTION FUNDING SOURCES

There are a variety of potential funding sources including local, state, regional, and federal funding programs that can be used to construct the proposed bicycle improvements. Most of the Federal, state, and regional programs are competitive and involve the completion of extensive applications with clear documentation of the project need, costs, and benefits. Local funding for bicycle projects typically come from Transportation Development Act (TDA) funding, which is prorated to each County based on the return of gasoline taxes. Many of the projects and programs would need to be funded either with TDA, general fund (staff time), and regional, State and Federal sources. The primary funding sources are described below, and listed in Table 8-2 at the end of this section.

FEDERAL FUNDING SOURCES

The primary federal source of surface transportation funding—including bicycle and pedestrian facilities—is SAFETEA-LU, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A

Legacy for Users. SAFETEA-LU is the fourth in a series of Federal transportation funding bills. The $286.5 billion SAFETEA-LU bill was passed in 2005 and authorizes Federal surface transportation programs for the five-year period between 2005 and 2009.

SAFETEA-LU funding is administered through the State (Caltrans and Resources Agency) and regional planning agencies. Most, but not all, of these funding programs are oriented toward transportation versus recreation, with an emphasis on reducing auto trips and providing inter-modal connections. Specific funding programs under SAFETEA-LU include:

Congestion Mitigation and Air Quality (CMAQ) — Funds projects that are likely to contribute to the attainment of national ambient air quality standards. Funds are available for projects and programs in areas that have been designated in non-attainment or maintenance for ozone, carbon monoxide or particulate matter. Since the Bay Area is in attainment of national air quality standards for all pollutants except ozone, future Bay Area eligibility for CMAQ allocations is currently being determined.

Recreational Trails Program — $370 million nationally through 2009 for non-motorized trail projects.

Safe Routes to School Program — A new program with $612 million nationally through 2009.

Transportation, Community and System Preservation Program — $270 million nationally over five years (2006-2011) reserved for transit oriented development, traffic calming and other projects that improve the efficiency of the transportation system, reduce the impact on the environment, and provide efficient access to jobs, services and trade centers.

Federal Lands Highway Funds — Federal Lands Highway funds may be used to build bicycle and pedestrian facilities in conjunction with roads and parkways at the discretion of the department charged with administration of the funds. The projects must be transportation-related and tied to a plan adopted by the State and MPO. Approximately $1 billion dollars are available nationally for Federal Lands Highway Projects through 2009.

STATEWIDE FUNDING SOURCES

The State of California uses both federal sources (such as the Recreational Trails Program) and its own budget to fund pedestrian projects and programs. In some cases, such as Safe Routes to School, Office of Traffic Safety, and Environmental Justice grants, project sponsors apply directly to the State for funding. In others, such as Bay Trail grants, sponsors apply to a regional agency.

Bicycle Transportation Account

The State Bicycle Transportation Account (BTA) is an annual statewide discretionary program that is available through the Caltrans Bicycle Facilities Unit for funding bicycle projects. Available as grants to local jurisdictions, the emphasis is on projects that benefit bicycling for commuting purposes. Due to the passage of AB1772 in the year 2000, the BTA had $7.2 million

available between 2000 and 2005. Following the year 2005, the fund dropped to $5 million per year. In funding cycle 2007/2008, there are $5 million in statewide BTA funds available. The local match must be a minimum of 10% of the total project cost.

Recreational Trails Program (RTP)

The Recreational Trails Program provides funds to states to develop and maintain recreational trails and trail-related facilities for both non-motorized and motorized recreational trail uses. Examples of trail uses include hiking, bicycling, in-line skating, equestrian use, and other non-motorized as well as motorized uses. In California, RTP funds are administered by the California State Parks Department. $3.3 million statewide was available in fiscal year 2006. Recreational Trails Program funds may be used for:

- Maintenance and restoration of existing trails;
- Purchase and lease of trail construction and maintenance equipment;
- Construction of new trails;
- Acquisition of easements or property for trails; and
- Operation of educational programs to promote safety and environmental protection related to trails (limited to five percent of a State's funds).

Land and Water Conservation Fund

The Land and Water Conservation Fund is a federal program that provides grants for planning and acquiring outdoor recreation areas and facilities, including trails. The Fund is administered by the California State Parks Department and has been reauthorized until 2015. Cities, counties and districts authorized to acquire, develop, operate and maintain park and recreation facilities are eligible to apply. Applicants must fund the entire project, and will be reimbursed for 50 percent of costs. Property acquired or developed under the program must be retained in perpetuity for public recreational use. The grant process for local agencies is competitive, and forty percent of grants are reserved for Northern California. In 2006, approximately $480,000 is available for projects in Northern California.

Safe Routes to School (SR2S)

In September 2004, with the passage of SB 1087 (Soto), the State extended Safe Routes to School legislation for three additional years. The bill is scheduled to sunset on January 1, 2008. This program is meant to improve the safety of walking and cycling to school and encourage students to walk and bicycle to school through identification of existing and new routes to school and construction of pedestrian and bicycle safety and traffic calming projects. Caltrans is currently evaluating California's SR2S funding, in light of the new federal SR2S Program. Recent SAFETEA-LU legislation, which requires each state's Department of Transportation to designate a SR2S Coordinator, also contains a SR2S program. As of this printing, whether or not these programs will be combined in California or will remain autonomous has not been determined. Therefore, the amount of funds available is unknown at this point.

Environmental Justice: Context Sensitive Planning Grants

The Caltrans-administered Environmental Justice: Context Sensitive Planning Grants Program funds planning activities that assist low-income, minority, and Native American communities in becoming active participants in transportation planning and project development. Grants are available to transit districts, cities, counties, and tribal governments. This grant is funded by the State Highway Account at $1.5 million annually state-wide. Grants are capped at $250,000.

Office of Traffic Safety (OTS) Grants

The California Office of Traffic Safety distributes federal funding apportioned to California under the National Highway Safety Act and SAFETEA-LU. Grants are used to establish new traffic safety programs, expand ongoing programs to address deficiencies in current programs. Bicycle and pedestrian safety are included in the list of traffic safety priority areas. Eligible grantees are: governmental agencies, state colleges and state universities, local city and county government agencies, school districts, fire departments, and public emergency services providers. Grant funding cannot replace existing program expenditures, nor can traffic safety funds be used for program maintenance, research, rehabilitation, or construction. Grants are awarded on a competitive basis, and priority is given to agencies with the greatest need. Evaluation criteria to assess need include: potential traffic safety impact, collision statistics and rankings, seriousness of problems, and performance on previous OTS grants. OTS expects to have $56 million in funding available statewide for FY 2006/07.

California Center for Physical Activity Grant Program

The California Center for Physical Activity runs several programs related to walking and offers small grants to public health departments. Grants are in the amount of $4,999 dollars or less and are offered intermittently.

LOCAL FUNDING SOURCES

TDA Article 3

Transportation Development Act (TDA) Article 3 funds are available for transit, bicycle and pedestrian projects in California. According to the Act, pedestrian and bicycle projects are allocated two percent of the revenue from a ¼ cent of the general state sales tax, which is dedicated to local transportation. These funds are collected by the State, returned to each county based on sales tax revenues, and typically apportioned to areas within the county based on population. Eligible pedestrian and bicycle projects include: construction and engineering for capital projects; maintenance of bikeways; bicycle safety education programs; and development of comprehensive bicycle or pedestrian facilities plans. A city or county is allowed to apply for funding for bicycle or pedestrian plans not more than once every five years. These funds may be used to meet local match requirements for federal funding sources.

NON-TRADITIONAL FUNDING SOURCES

Integration into Larger Projects

California State's "routine accommodation" policies require Caltrans to design, construct, operate, and maintain transportation facilities using best practices for pedestrians and bicyclists. Local jurisdictions can begin to expect that some portion of bicycle and pedestrian project costs, when they are built as part of larger transportation projects, will be covered in project construction

budgets. This applies to Caltrans and other transportation facilities, such as new transit stations and stops.

Community Development Block Grants

The CDBG program provides money for streetscape revitalization, which may be largely comprised of bicycle and pedestrian improvements. Federal Community Development Block Grant Grantees may use CDBG funds for activities that include (but are not limited to): acquiring real property; building public facilities and improvements, such as streets, sidewalks, and recreational facilities; and planning and administrative expenses, such as costs related to developing a consolidated Plan and managing CDBG funds. In some cities, CDBG funds have also been used to find crossing guards, called "Safe Walk to School Monitors." $526 million in CDBG funds were distributed statewide in 2004/05.

REQUIREMENTS FOR NEW DEVELOPMENT

Mello-Roos Community Facilities Districts and Assessment Districts

Bike paths and bike lanes can be funded as part of a local community facilities district, assessment or benefit district. This may be a specific district for funding bicycle facilities, or may be combined with larger parks and recreation or other public infrastructure districts.

New Construction

Future road widening and construction projects are a means of providing bicycle facilities. To ensure that roadway construction projects provide facilities where needed and feasible, it is important that an effective review process be in place so that new roads meet the standards and guidelines presented in the County's Bicycle Transportation Plan.

Impact Fees

Another potential local source of funding is developer impact fees, typically tied to trip generation rates and traffic impacts produced by a proposed project. A developer may reduce the number of trips (and hence impacts and cost) by paying for on- and off-site bikeway improvements that will encourage residents to bicycle rather than drive. Potential impact fees must be reasonably related to and roughly proportional to the impact that the fees are designed to address.

San Joaquin Valley Air Pollution Control District

The San Joaquin Valley Air Pollution Control District (SVAPCD) is in the process of reviving funding opportunities for the construction of bicycle facilities. The SVAPCD established an air quality mitigation fee program in 2006, which will help fund projects to improve air quality in the district including bicycle projects.

SYSTEM MAINTENANCE COSTS

Many of Modesto's bicycling and walking paths need maintenance attention, such as fixing broken asphalt and clearing plant overgrowth. Bike lanes need regular sweeping to clear debris. The total annual maintenance cost of the primary non-motorized system is estimated to be about $925,000 per year when it is fully implemented. Class I bike path and sidewalk maintenance costs are based on $8,500 per mile, which covers labor, supplies, and amortized equipment costs for weekly trash removal, monthly sweeping, and bi-annual resurfacing and repair patrols. Other maintenance costs include bike lane line and crosswalk restriping, sweeping debris, and tuning signals for bicycle and pedestrian sensitivity. Although these latter aspects are generally associated with routine roadway maintenance, special attention to bikeway and walkway safety and usability is important and can mean additional costs are incurred. Table 8-3 provides cost estimates for the operation and maintenance of the recommended bicycle programs and the complete recommended bikeway network.

Maintenance access on the Class I bike paths may be achieved using standard City pickup trucks on the pathways. Sections with narrow widths or other clearance restrictions should be clearly marked. Class I bike path maintenance includes cleaning, resurfacing and restriping the asphalt path, repairs to crossings, cleaning drainage systems, trash removal, and landscaping. Underbrush and weed abatement should be performed once in the late spring and again in mid-summer.

Table 8-3
Operations and Maintenance Cost Estimates

Facility/Program	Unit Cost ($)	Unit Description	Units	Cost ($)	Notes
Class I Maintenance	8,500	Miles/Year	93.2	792,200	See Table 7-1
Class II Maintenance	2,000	Miles/Year	66.4	132,800	Repainting lane stripes and stencils, sign replacement as needed
Bicycle Education Safety Grants	10,000	Year	10	100,000	Safety programs taught in 3rd/4th grades
Bicycle Education Safety Materials	5,000	Every 5 years	4	20,000	Updated safety materials
Safe Routes to School Program	5,000	Year	10	50,000	Safety Coordination
Bike Fairs/Races	2,500	Year	10	25,000	Coordination
Employer Incentives	2,500	Year	10	25,000	Coordination
Bike-to-Work Days	2,500	Year	10	25,000	Coordination

Note: Costs incurred for maintenance of Class III facilities would be for sign replacement as needed (usually 3 – 5 years).

MAINTENANCE FUNDING

There are two general categories of recommended alternative, or non-general fund-based, methods for generating funds to cover regular trail maintenance costs. A brief description and examples of different methods are provided below. It is recommended that each method be carefully considered in terms of viability, including the necessary staff resources that may be required, as well as the potential base of public and private support. In addition, it is likely that more than one strategy will be necessary to adequately fund the trail maintenance program.

TAX AND FEE STRATEGIES

The first category of programs is fee or tax-based strategies that can raise the most revenue but also potentially be more politically difficult to implement. These revenue generating methods may include assessing a citywide tax or designating a local community facilities district tax or benefit assessment district fee.

Community Facilities Districts

Community Facilities Districts (CFDs) are mechanisms by which a specified district of property owners may vote to assess themselves a fee for the purpose of financing maintenance of open space, street medians, right-of-way, non-motorized facilities, street lighting, security, flood control and drainage. CFDs are usually implemented as part of new subdivision development but may also be organized by neighborhood groups or property owner associations.

Developer Impact Fees

Developer Impact Fees may be assessed on developers as part of development permits and/or impact mitigation requirements. The onetime impact fees are onetime fees that may be imposed on development activities for public goods and services associated with the development project, but provided for by the developer. The construction or improvement of water and sewer lines, streets and bridges, and parks and recreational facilities are some examples of typical projects funded through impact fees. In Modesto, the City may designate impact fees for new developments to cover costs of adjacent trail facilities.1

Sales Tax

Sales taxes must be approved by a 2/3 vote and can be earmarked for specific projects. Besides covering all general retail sales, sales taxes can also be imposed on purchases of specific items such as gasoline, motor vehicles, alcohol and tobacco. Sales taxes are attractive to local communities for at least two reasons: they are relatively easy to collect, and, although they fluctuate with the economy, they provide a constant revenue stream ideal for covering regular maintenance costs.

VOLUNTEER AND DONATION PROGRAMS

The second category of sources for trail maintenance funding covers the broad range of volunteer and donation strategies. These range from Adopt-a-Trail programs to special events geared towards fundraising.

[1] http://www.tpl.org/tier3_cdl.cfm?content_item_id=1061&folder_id=825

Adopt-a-Trail

Adopt-A-Trail programs vary in structure and goals but are primarily geared towards maintenance funding and are volunteer and donor-based. The Salida, Colorado Trail System's "Adopt-a-Trail" program, whose purpose has been both maintenance and beautification, has been extremely successful, to the extent that the nine original maintenance sections have been subdivided in order to accommodate all those who want to participate. Volunteers included the Boy Scouts, an agency for the developmentally handicapped, two businesses, a church, a bank, and the Cystic Fibrosis Association. The City of Modesto is already considering an adopt-a-trail program to acquire funding for portions of the Virginia Corridor Trail.

Special Events

Another volunteer and donation-based method includes hosting special events to draw charitable support from location businesses. Special events may include Bike to Work days, auctions and raffles, or other such events that may be held once or twice a year. In the Bay Area, these types of events are often organized by local bicycling or recreational groups in partnerships with city governments and rely on charitable sponsorship by businesses providing refreshments and equipments. Not only do these events raise money through auctions and raffles, but they also serve as an opportunity to encourage more citizens to enjoy bicycling or other alternative modes of transportation and to provide educational information on safety.

Volunteer Services

Volunteer organizations can work in partnership with the local government to maintain portions of trail systems. In California, the California Conservation Corps (CCC) can be utilized as a low-cost source of labor for maintaining trails. The CCC provides meaningful work and educational opportunities to assist young men and women by working together to protect and enhance California's environment, human resources and communities. The program is organized to provide corps members and services depending upon the project requirements. A crew usually consists of 10 to 15 young men and women; a staff supervisor who directs the crew; a vehicle, and basic tools.

In some cases, local recreational groups can help to maintain the trail, using a portion of membership dues to pay for volunteer trail maintenance activities. Other examples of volunteer and donor-based funding initiatives may include the creation of an annual award that recognizes outstanding local businesses or corporations that donate time and/or money in the maintenance of trails. The award may be an incentive for businesses to contribute. Placing corporate logos on signage and other amenities donated by businesses may also be an incentive for them to contribute.

Bicycle and other recreational equipment shops can also get involved in recruiting volunteers for trail maintenance. One bike shop in Colorado encourages trail volunteers by putting the name of a volunteer in a jar each day that person volunteers. At the end of the year, they draw a name from the jar and give them a mountain bike.

Small Business and Corporate Giving

Trail maintenance funding programs are considered under the heading of small business and corporate gifts. These programs are based on corporate sponsorship that may require promotion of the donating company by, for example, placing the corporate logos on trail signs. Other examples of small business donations and corporate giving include the provision of maintenance supplies,

volunteered labor provided by a firm, and donations to be included in raffle and auction events. One example of creative corporate giving occurred in Leadville, Colorado, where a local microbrewery created the Mineral Belt Pale Ale beer named after the local Mineral Belt recreational trail. A portion of the sales of the Pale Ale goes towards maintenance costs for the trail.

Recreational Fees and Sales

User fees may be considered the most direct form of revenue generation for trail maintenance, because the users of the facility are required to pay an annual fee to in order to use trail. However, unless the facility is heavily used, user fees are not likely to be viable in Modesto for at least three reasons. First, the trails in Modesto will likely be used mostly by commuters and occasional recreational users that will not add up to a number significant for fundraising. Second, fees may dissuade potential trail users from using the facility, conflicting with the City's goal of encouraging more riders. And third, the enforcement measures necessary to ensure user-permit compliance would impose an additional cost on the city.

Other Fundraising Examples

The following additional trail maintenance fundraising examples were provided by the American Trails national organization.[2]

- In Durango, Colorado, the Animas River Trail was supported by part of a 1/2 cent sales tax increase. City voters approved the tax to fund a new recreation center as well as the trail and greenway rehabilitation along the river.
- The Carolina Heartlands Rail-Trail received help from the North Carolina Corrections Department. Between 20 and 90 inmates a day worked on clearing trees, brush, and trash from the right-of-way. The young crews, mostly first-time offenders in a bootcamp-style program, tackled the 12.5 miles between Wadesboro and McFarlan.
- Bike suspension maker RockShox provides many $250 grants for volunteer trail projects. One example is the Discovery Program of Orange, VA, which will use the funds to construct a beginner mountain bike trail, renovate a section of existing trail, and conduct a trail study that will provide recommendations to local land managers. Participants include Prospect Heights Middle School and the Walnut Creek Park Trail Volunteers.
- Trails4All in Orange County, CA, has started a program to raise funds to support volunteer trail projects. Stores sell the "EnviroDollar Coupons" and some stores also match donations. Participating stores are listed in the Trails4All newsletter and their employees can win raffle items for supporting the program. Trails4All also helps stores set up a "Trails Advocacy Department" with trail maps, sign samples, rules-of-the-trail, etc.
- Cyclists can sponsor a mile of the Great Divide Mountain Bike Route from Canada to Mexico. The Trailblazer Fund of Adventure Cycling is raising funds for trail development at $100 a mile.
- "Gift catalogues" are one way to publicize the many ways that trail projects need money. Gift catalogues have been used by at least three trail organizations: the Eagle County Trail System and the Cache La Poudre River Trail in Colorado, and the Wood River Trails in

[2] http://www.americantrails.org/resources/funding/TipsFund.html

Idaho. Contributors can purchase drinking fountains, interpretive signs, trees, wildflowers, or give to the endowment fund. You can also buy a foot of paved trail for $100 or a mile of parallel equestrian trail for $5,000. Those who would like to make a bigger impact can also restore an old railroad trestle for $30,000 or build a serious missing link of trail for $75,000.

- Rail trails may end up with some saleable materials to finance construction and maintenance. The Old Creamery Trail between Vinton and Dysart, Iowa, offered railroad ties for landscaping for a "reasonable donation" to the trail fund.
- In Colorado's San Luis Valley, the Juvenile Restitution Program has become a key source of labor for trail projects. Mountain Trails Youth Ranch supervises the young people, who have committed crimes and are required to earn money owed for damages. Several community agencies and the State Off-Highway Vehicle Program combine to support the program.
- Some bicycle shops in the Ketchum/Sun Valley, Idaho area organized a system which they liken to "self-taxation." The dealers agreed that each would donate five dollars for every bicycle sold, and 25¢ for every rental of a bicycle or in-line skate. The money went to either the USFS trails, or to a paved bike path system which runs throughout the resort area -- with the customer making the choice. The dealer program has now operated for three years (only during the three months of summer when cash flow is high) and has raised about $3,000 each year.

APPENDIX A: BIKEWAY PLANNING AND DESIGN

This chapter provides basic bikeway planning and design requirements and recommendations for use in developing the Modesto bikeway system and support facilities.

BIKEWAY CLASSIFICATION DESCRIPTIONS

According to Caltrans, the term "bikeway" encompasses all facilities that provide primarily for bicycle travel. Caltrans has defined three types of bikeways in Chapter 1000 of the Highway Design Manual: Class I, Class II, and Class III. Descriptions and general design guidelines are presented below. The sources used for these design recommendations were Caltrans' Highway Design Manual and AASHTO's Guide for the Development of Bicycle Facilities. **Figure A-1** provides an illustration of the three types of bicycle facilities.

CLASS I BIKEWAY

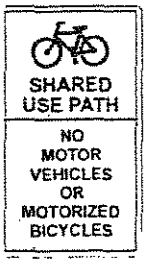
Typically called a "bike path" or "shared use path," a Class I bikeway provides bicycle travel on a paved right-of-way completely separated from any street or highway. The recommended width of a shared use path is dependent upon anticipated usage:

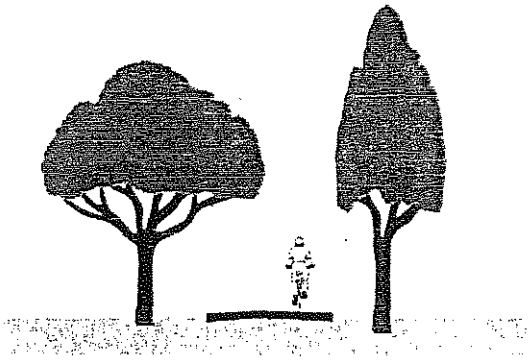
- 8' (2.4 m) is the minimum width for Class I facilities
- 8' (2.4 m) may be used for short neighborhood connector paths (generally less than one mile in length) due to low anticipated volumes of use
- 10' (3.0 m) is the recommended minimum width for a typical two-way bicycle path
- 12' (3.6 m) is the preferred minimum width if more than 300 users per peak hour are anticipated, and/or if there is heavy mixed bicycle and pedestrian use

A minimum 2' (0.6 m) wide graded area must be provided adjacent to the path to provide clearance from trees, poles, walls, guardrails, etc. On facilities with expected heavy use, a yellow centerline stripe is recommended to separate travel in opposite directions. **Figure A-2** illustrates a typical cross-section of a Class I multi-use path.

Shared Use Path – Class I

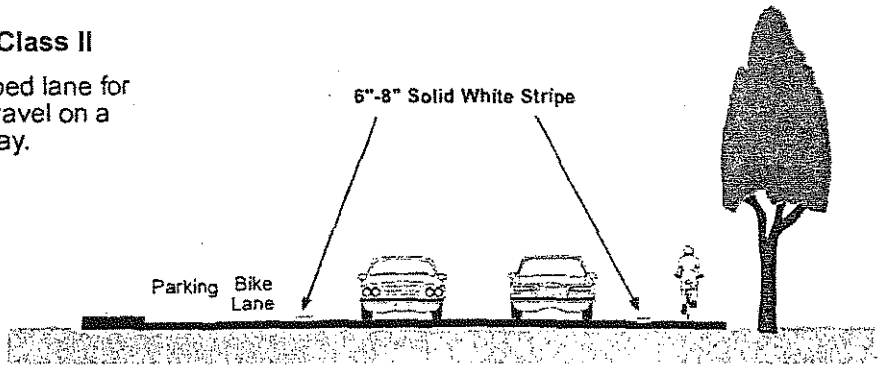
Provides a completely separated right of way for the exclusive use of bicycles and pedestrians with crossflow minimized.





Bike Lane – Class II

Provides a striped lane for one-way bike travel on a street or highway.



Bike Route – Class III
Signed Shared Roadway

Provides for shared use with pedestrian or motor vehicle traffic, typically on lower volume roadways.

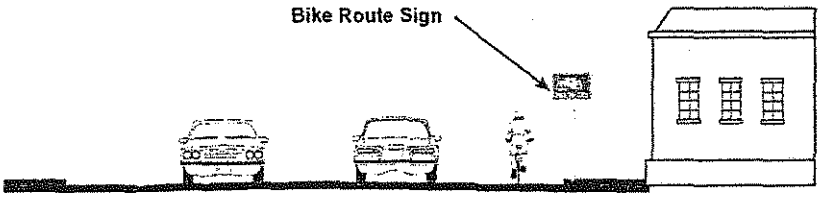


FIGURE A-1 Bicycle Facility Types

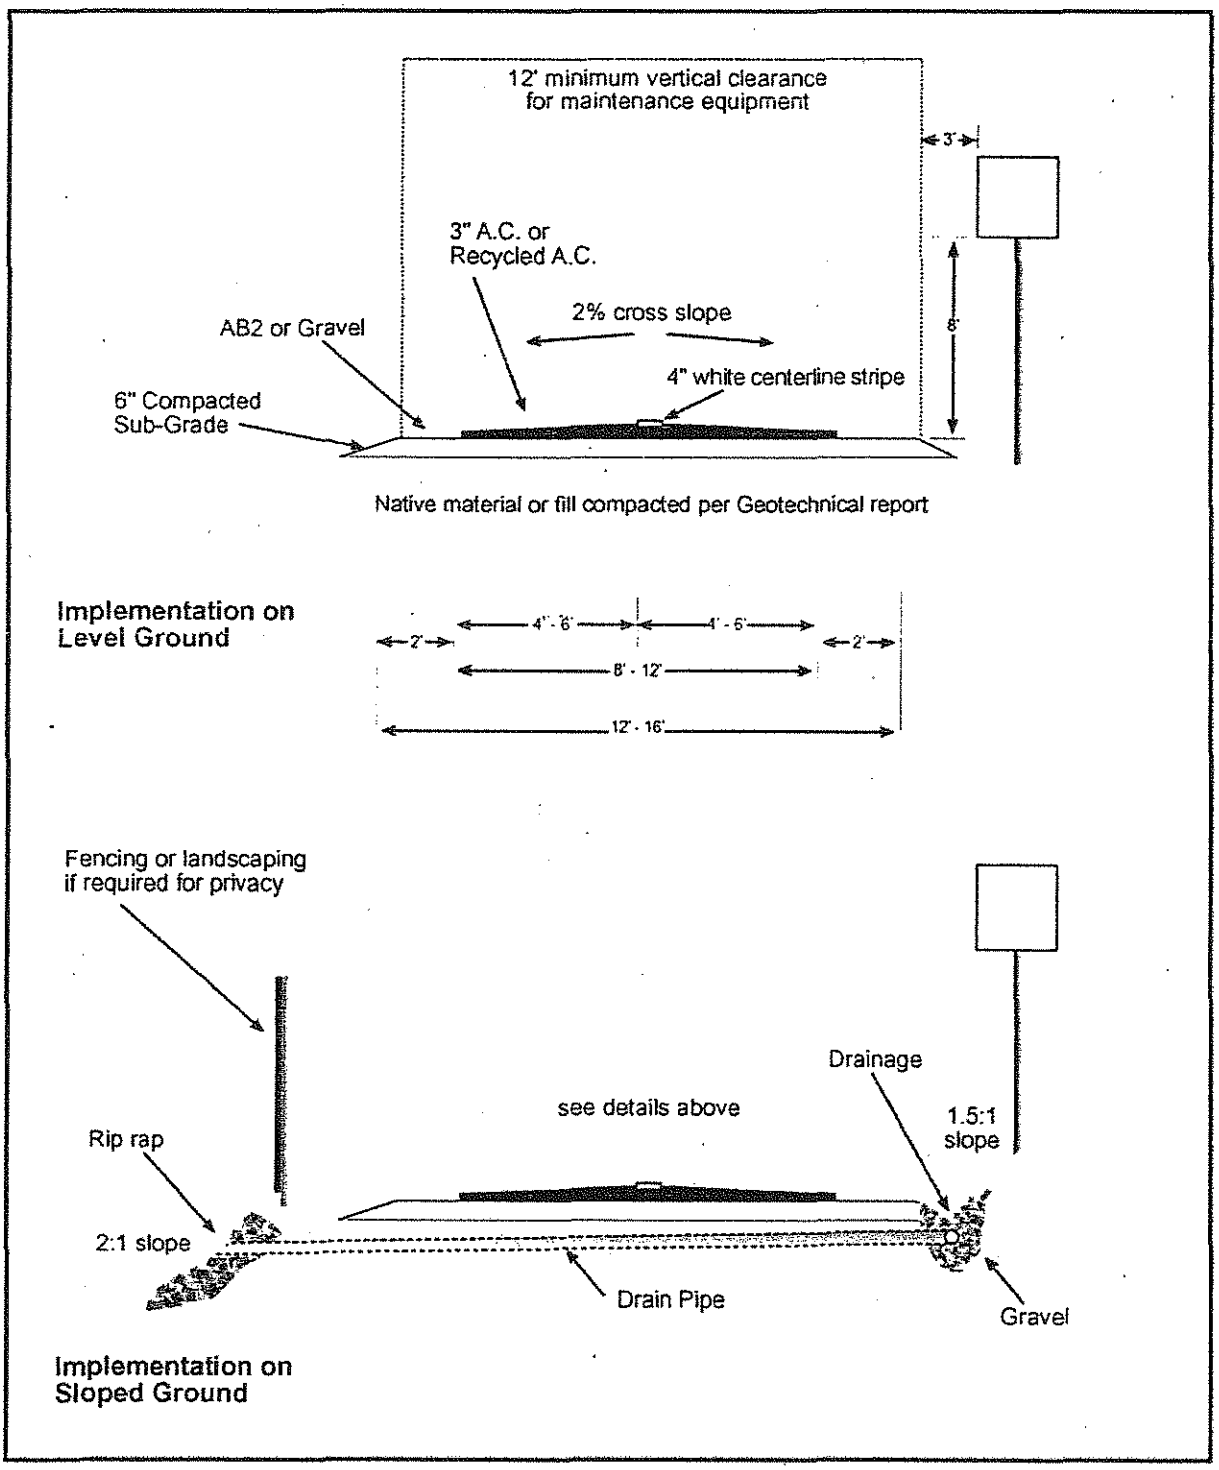

FIGURE A-2 Class I Facility Cross-Section

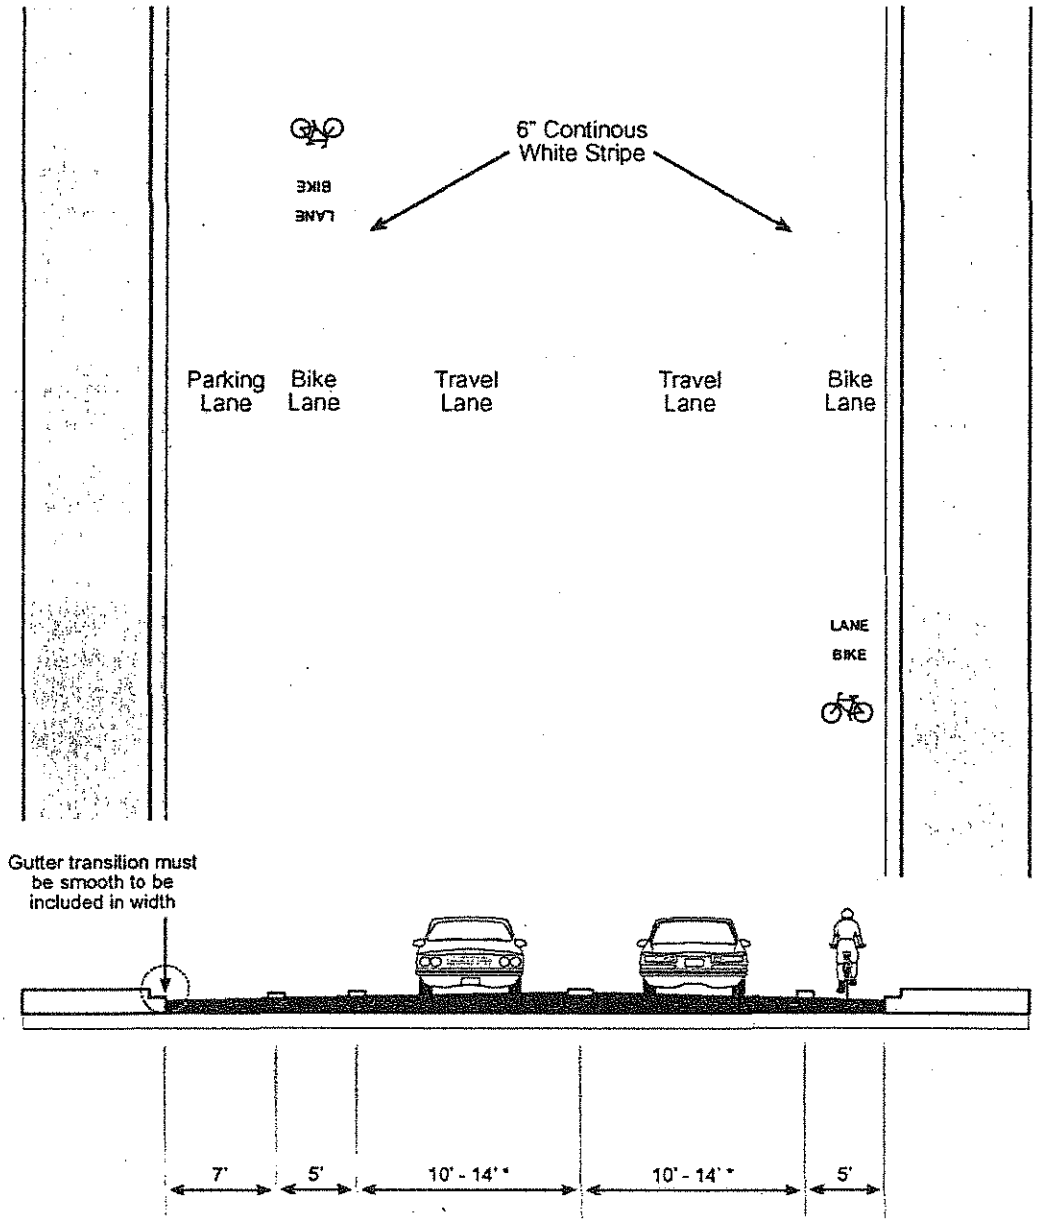
ADDITIONAL DESIGN RECOMMENDATIONS:

1. Shared use trails and unpaved facilities that serve primarily a recreation rather than a transportation function and will not be funded with federal transportation dollars may not need to be designed to Caltrans standards. However, state and national guidelines have been created with user safety in mind and should be followed as appropriate. Wherever any trail facility intersects with a street, roadway, or railway, standard traffic controls should always be used.
2. Class I bike path crossings of roadways require preliminary design review. Generally speaking, bike paths that cross roadways with average daily trips (ADTs) over 20,000 vehicles will require signalization or grade separation.
3. Landscaping should generally be low water consuming native vegetation and should have the least amount of debris.
4. Lighting should be provided where commuters will use the bike path in the evenings.
5. Barriers at pathway entrances should be clearly marked with reflectors and be ADA accessible (minimum five feet clearance).
6. Bike path construction should take into account impacts of maintenance and emergency vehicles on shoulders and vertical and structural requirements. Paths should be constructed with adequate sub grade compaction to minimize cracking and sinking.
7. All structures should be designed to accommodate appropriate loadings. The width of structures should be the same as the approaching trail width, plus minimum two-foot wide clear areas.
8. Where feasible, provide two-foot wide unpaved shoulders for pedestrians/runners, or a separate tread way.
9. Direct pedestrians to the right side of pathway with signing and/or stenciling.
10. Provide adequate trailhead parking and other facilities such as restrooms and drinking fountains at appropriate locations.

CLASS II BIKEWAY

Often referred to as a "bike lane," a Class II bikeway provides a striped and stenciled lane for one-way travel on either side of a street or highway. **Figure A-3** shows a typical Class II cross-section. To provide bike lanes along corridors where insufficient space is currently available, extra room can be provided by removing a traffic lane, narrowing traffic lanes, or prohibiting parking. The width of the bike lanes vary according to parking and street conditions:

- 4' (1.2 m) minimum if no gutter exists, measured from edge of pavement
- 5' (1.5 m) minimum with normal gutter, measured from curb face; or 3' (0.9 m) measured from the gutter pan seam
- 5' (1.5 m) minimum when parking stalls are marked
- 11' (3.3 m) minimum for a shared bike/parking lane where parking is permitted but not marked on streets without curbs; or 12' (3.6 m) for a shared lane adjacent to a curb face



*** Curb Lane:**
10' Under 2000 ADT
12' over 2000 ADT (under 35 mph)
14' over 20,000 ADT (over 35 mph)

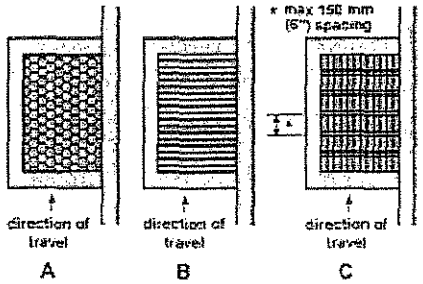
FIGURE A-3 Class II Facility Cross-Section

ADDITIONAL DESIGN RECOMMENDATIONS:

1. Whenever possible, the Department of Public Works should recommend that wider bike lanes beyond the minimum standard be installed.
2. Intersection and interchange treatment – Caltrans provides recommended intersection treatments in Chapter 1000 including bike lane "pockets" and signal loop detectors. The Department of Public Works should develop a protocol for the application of these recommendations, so that improvements can be funded and made as part of regular improvement projects.
3. Signal loop detectors, which sense bicycles, should be considered for all arterial/arterial, arterial/collector, and collector/collector intersections. A stencil of a bicycle and the words "Bicycle Loop" should identify the location of the detectors.
4. When loop detectors are installed, traffic signalization should be set to accommodate bicycle speeds.
5. Bicycle-sensitive loop detectors are preferred over a signalized button specifically designed for bicyclists (see discussion of loop detectors, below).
6. Bike lane pockets (min. 4' wide) between right turn lanes and through lanes should be provided wherever available width allows, and right turn volumes exceed 150 motor vehicles/hour.
7. Where bottlenecks preclude continuous bike lanes, they should be linked with Class III route treatments.
8. A bike lane should be delineated from motor vehicle travel lanes with a solid 6" white line, per MUTCD. Along major arterials, wider white lines, double white lines, or a painted buffer zone may be used to further delineate the bike lane from motor vehicle travel lanes.
9. Word and symbol pavement stencils should be used to identify bicycle lanes, as per Caltrans and MUTCD specifications.

Installing bike lanes may require more attention to continuous maintenance issues. Bike lanes tend to collect debris as vehicles disperse gravel, trash, and glass fragments from traffic lanes to the edges of the roadway. Striping and stenciling will need periodic replacing.

Poorly designed or placed drainage grates can often hazardous to bicyclists. Drainage grates with large slits can catch bicycle tires. Poorly placed drainage grates may also be hazardous, and can cause bicyclists to veer into the auto travel lane.



Examples of bicycle friendly drainage grates.

CLASS III BIKEWAY

Generally referred to as a "bike route," a Class III bikeway provides routes through areas not served by Class I or II facilities or to connect discontinuous segments of a bikeway.

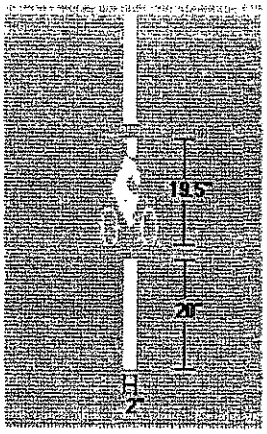
Class III facilities can be shared with either motorists on roadways or pedestrians on a sidewalk (not advisable) and is identified only by signing. There are no recommended minimum widths for Class III facilities, but when encouraging bicyclists to travel along selected routes, traffic speed and volume, parking, traffic control devices, and surface quality should be acceptable for bicycle travel. A wide outside traffic lane (14') is preferable to enable cars to safely pass bicyclists without crossing the centerline.

INTERSECTION CONSIDERATIONS

Intersections represent one of the primary collision points for bicyclists. Generally, the larger the intersection, the more difficult it is for bicyclists to cross. Oncoming vehicles from multiple directions and increased turning movements make it difficult for motorists to see non-motorized travelers.

Most intersections do not provide a designated place for bicyclists. Bike lanes and pavement markings often end before intersections, causing confusion for bicyclists. Loop and other detectors, such as video, often do not detect bicycles.

Bicyclists wanting to make left turns can face quite a challenge. Bicyclists must either choose to behave like motorists by crossing travel lanes and seeking refuge in a left-turn lane, or they act as pedestrians and dismount their bikes, push the pedestrian walk button located on the sidewalk, and then cross the street in the crosswalk. Bicyclists traveling straight also have difficulty maneuvering from the far right lane, across a right turn lane, to a through lane of travel. Furthermore, motorists often do not know which bicyclist movement to expect.



This bicycle loop detector stencil shows bicyclists where to position their bicycle to activate the signal

Changing how intersections operate also can help make them more "friendly" to bicyclists. Improved signal timings for bicyclists, bicycle-activated loop detectors, and camera detection make it easier and safer for cyclists to cross intersections.

Figure A-4 is an example of an intersection that provides bike lanes at critical locations at intersections.

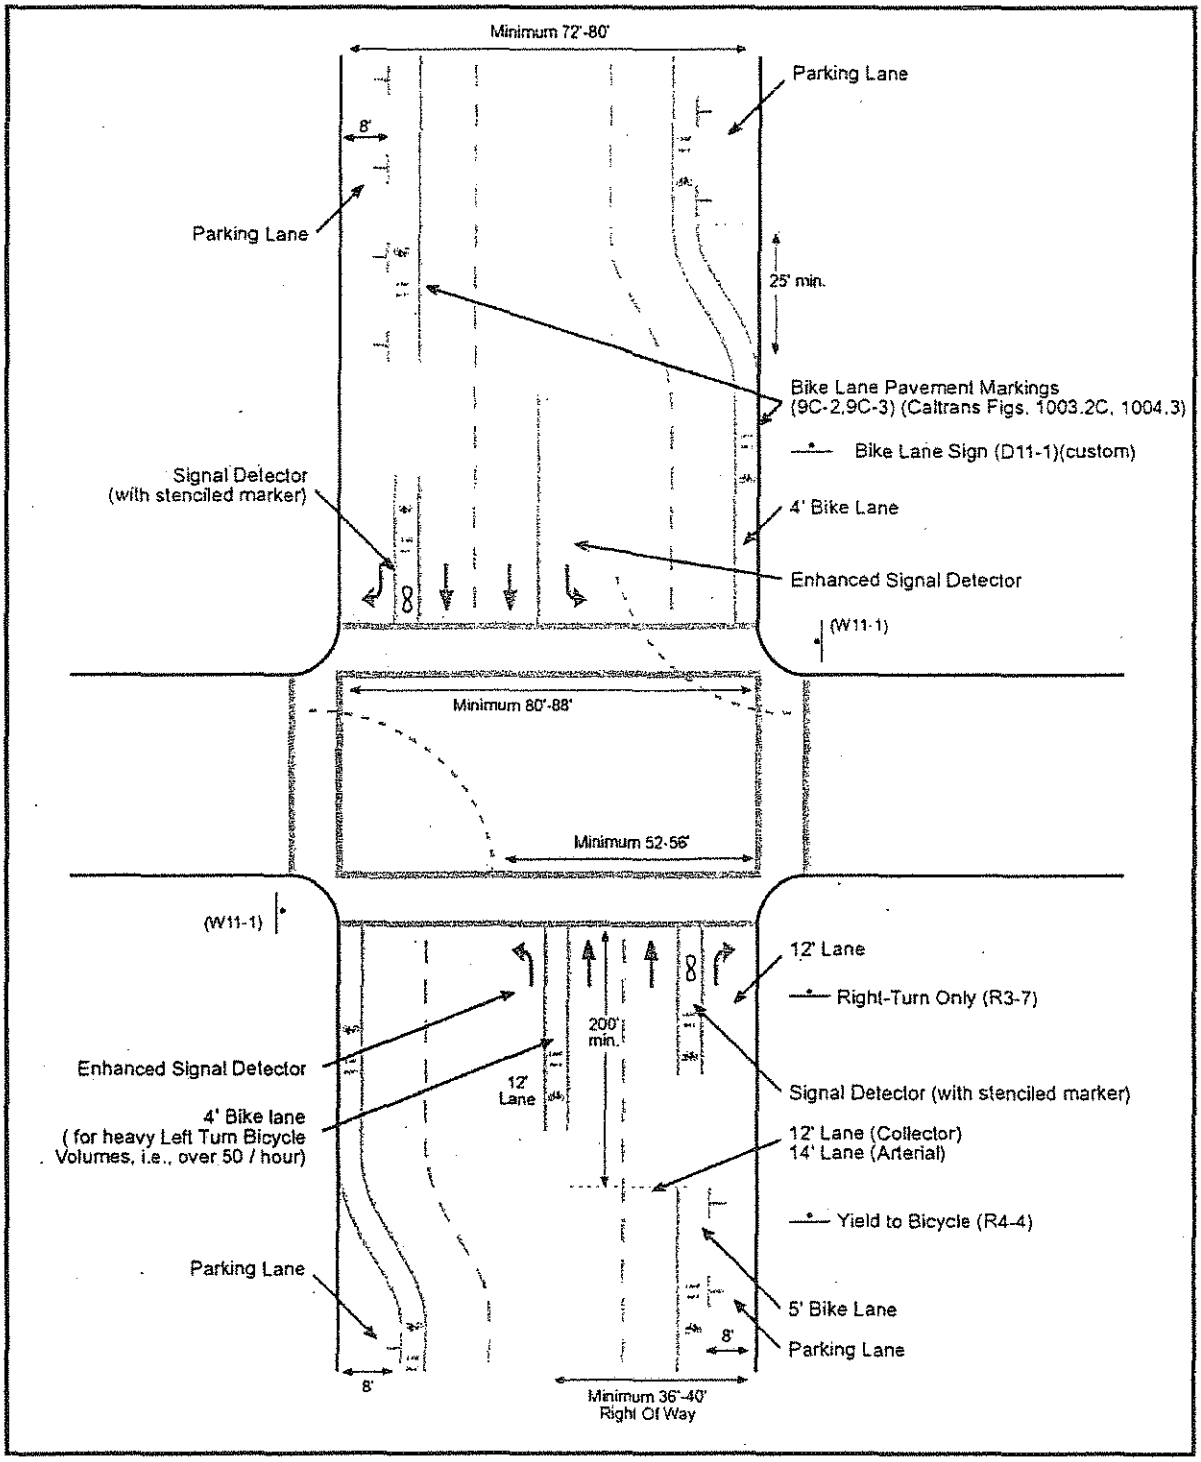


FIGURE A-4 Bike Lanes at Intersection

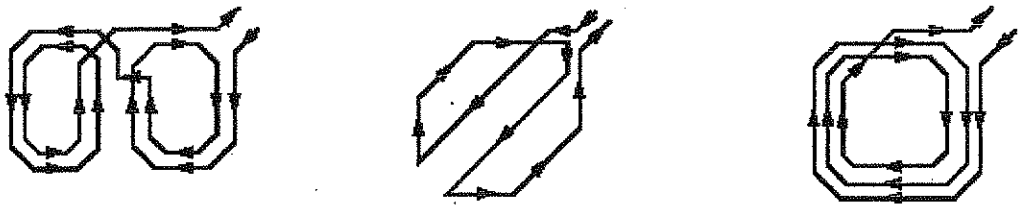
BICYCLE LOOP DETECTORS

The purpose of bicycle loops is to detect bicyclists waiting at intersections, and to give cyclists extra green time (e.g. five seconds) before the light turns yellow to make it through the light. Current and future loops that are sensitive enough to detect bicycles should have pavement markings to instruct cyclists how to trip them. Common loop detector types are shown in **Figure A-5** below:

Figure A-5
Common Loop Detector Types

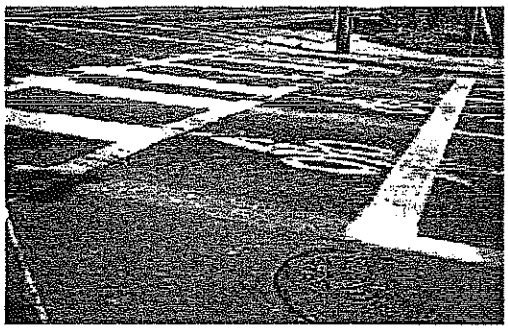


Quadrupole Loop	Diagonal Quadrupole Loop	Standard Loop
Detects most strongly in center	Sensitive over whole area	Detects most strongly over wires
Sharp cut-off sensitivity	Sharp cut-off sensitivity	Gradual cut-off
Used in bike lanes	Used in shared lanes	Used for advanced detection

From: Implementing Bicycle Improvements at the Local Level, FHWA, 1998, page 70.

BIKE BOX

A bike box is a relatively new innovation to improve turning movements for bicyclists without requiring cyclists to merge into traffic to reach the turn lane or use crosswalks as a pedestrian. Bike boxes are essentially extensions of bike lanes at intersections that allow bicyclists to position themselves ahead of motor vehicles stopped at a traffic signal. The bike box is formed by pulling the stop line for vehicles back from the intersection, and adding a stop line for bicyclists immediately behind the crosswalk. When a traffic signal is red, a bicyclist can move into this "box" ahead of the cars to make himself more visible, or to move into a more comfortable position to make a turn. Bike boxes have been used in Cambridge, MA; Eugene, OR; and European cities.



Bike box in Eugene, OR. (Photo: Evaluation of an Innovative Application of the Bike Box, FHWA, 2000.)

UNDERCROSSINGS

Figure A-6 illustrates basic design standards for undercrossings.

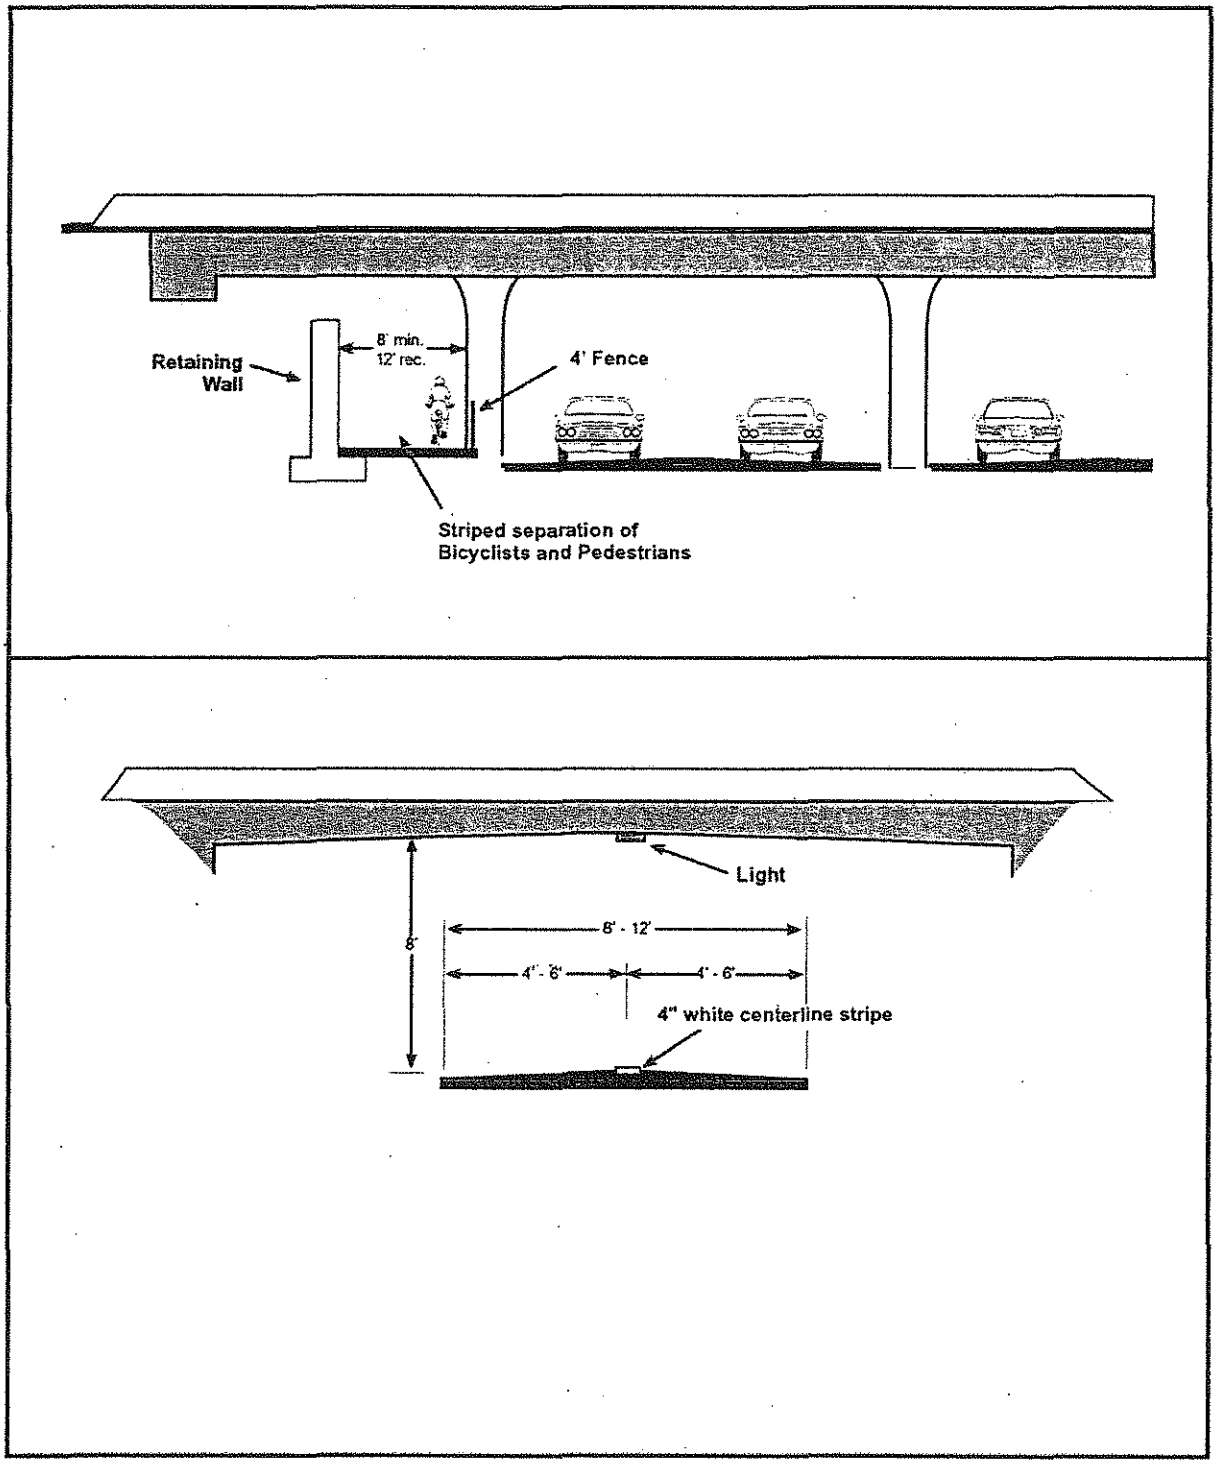


FIGURE A-6 Undercrossing Design Guidelines

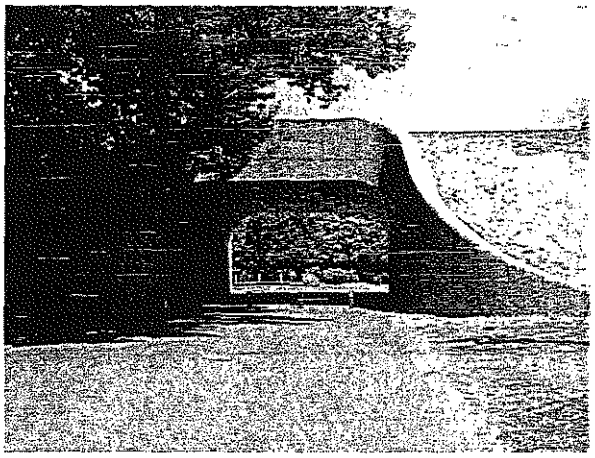
Some design considerations with undercrossings:

- Must have adequate lighting and sight distance for safety
- Must have adequate over-head clearance of at least 3.1 m (10 ft)
- Tunnels should be a *minimum* 4.3 m (14 ft) for several users to pass one another safely; a 3.0 m x 6.0 m (10 ft x 20 ft) arch is the recommended standard
- "Channeling" with fences and walls into the tunnel should be avoided for safety reasons
- May require drainage if the sag point is lower than the surrounding terrain



This undercrossing provides ample vertical and horizontal clearance and a clear sight line through the structure, improving the feeling of safety.

SIGNAGE

Implementing a well-planned and attractive system of signing can greatly enhance bikeway facilities by signaling their presence and location to both motorists and existing and potential bicycle users. By leading people to city bikeways and the safe and efficient transportation they offer to local residents and visitors to the county, effective signage can encourage more people to bicycle.

STANDARD SIGNAGE

All bikeway signing should conform to the signing identified in the Caltrans Traffic Manual and/or the Manual on Uniform Traffic Control Devices (MUTCD). These documents give specific information on the type and location of signing for the primary bike system. A list of bikeway signs from Caltrans and the MUTCD is shown in **Table A-1**.

Figures A-7, A-8, A-9, and A-10 illustrate a number of examples of bikeway signage.

In general, the sizes of signs used on bicycle paths are smaller than those used on roadways. Table 9B-1 of the MUTCD lists minimum sign sizes for both path and roadway bicycle facilities. If the sign applies to drivers and bicyclists, then the larger size used for conventional roads shall apply.

Table A-1
Recommended Signing and Marking

Item	Location	Color	Caltrans Designation	MUTCD Designation
No Motor Vehicles	Entrances to trail	B on W	R44A	R5-3
Use Ped Signal / Yield to Peds	At crosswalks; where sidewalks are being used	B on W	N/A	R9-5, R9-6
Bike Lane Ahead: Right Lane Bikes Only	At beginning of bike lanes	B on W	N/A	R3-16, R3-17
STOP, YIELD	At trail intersections with roads	W on R	R1-2	R1-1, R1-2
Bicycle Crossing	For motorists at trail crossings	B on Y	W79	W11-1
Bike Lane	At the far side of all arterial intersections	B on W	R81	D11-1
Hazardous Condition	Slippery or rough pavement	B on Y	W42	W8-10
Turns and Curves	At turns and curves which exceed 20- mph design specifications	B on Y	W1, 2, 3, 4, 5, 6, 14, 56, 57	W1-1, W1-2, W1-4, W1-5, W1-6
Trail Intersections	At trail intersections where no STOP or YIELD required, or sight lines limited	B on Y	W7, 8, 9	W2-1, W2-2, W2-3, W2-4, W2-5
STOP Ahead	Where STOP sign is obscured	B, R on Y	W17	W3-1
Signal Ahead	Where signal is obscured	B, R, G	W41	W3-3
Bikeway Narrows	Where bikeway width narrows or is below 8'	B on Y	W15	W5-4
Downgrade	Where sustained bikeway gradient is above 5%	B on Y	W29	W7-5
Pedestrian Crossing	Where pedestrian walkway crosses trail	B on Y	W54	W11A-2
Restricted Vertical Clearance	Where vertical clearance is less than 8'6"	B on Y	W47	W11A-2
Railroad Crossing	Where trail crosses railway tracks at grade	B on Y	W47	W10-1
Directional Signs	At intersections where access to major destinations is available	W on G	G7, G8	D1-1b(r/l), D1-1-c
Right Lane Must Turn Right; Begin Right Turn Here; Yield to Bikes	Where bike lanes end before intersection	B on W	R18	R3-7, R4-4

FIGURE A-10

Various On-Street Bikeway Warning Signs

OTHER SIGNAGE

Innovative signing is often developed to increase bicycle awareness and improve visibility. Signs to be installed on public roadways in California must be approved by Caltrans' California Traffic Control Devices Committee. New designs can be utilized on an experimental basis with Caltrans approval.

San Francisco was the first city in California to use the approved customized bike route logo sign. Jurisdictions may choose a graphic of their choice for the upper third portion of the sign and a numbering system, similar to the highway numbering system, can be used in the lower third. Some considerations for the use of directional signage:

- Use signs sparingly, primarily at intersections and junctions with other bicycle routes
- A consistent and recognizable logo, arrows and a destination should be on the sign to clearly direct bicyclists
- Bicycle route signs should be accompanied with destination and direction plaques

The new "Share the Road" sign, adopted by the California Traffic Control Devices Committee in 1999, is designed to advise motorists that bicyclists need to share narrow roadways with motor vehicles. This sign has been installed throughout Marin County.

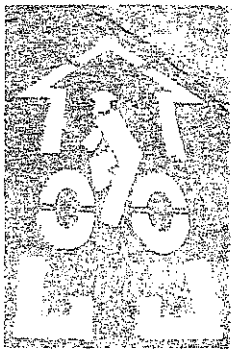
Interest has been generated over the "Bikes Allowed Use of Full Lane" sign. These words, taken directly from the California Vehicle Code (CVC 21202), remind motorists of the rights of bicyclists on the roadway, Cities may consider using this sign as an experiment as it has not yet been approved by the California Traffic Control Devices Committee.

PAVEMENT MARKINGS

The Manual on Uniform Traffic Control Devices (MUTCD) provides guidance for lane delineation, intersection treatments, and general application of pavement wording and symbols for on-road bicycle facilities and off-road paths. In addition to those presented in the MUTCD, the following experimental pavement markings may be considered.

SHARED LANE MARKINGS

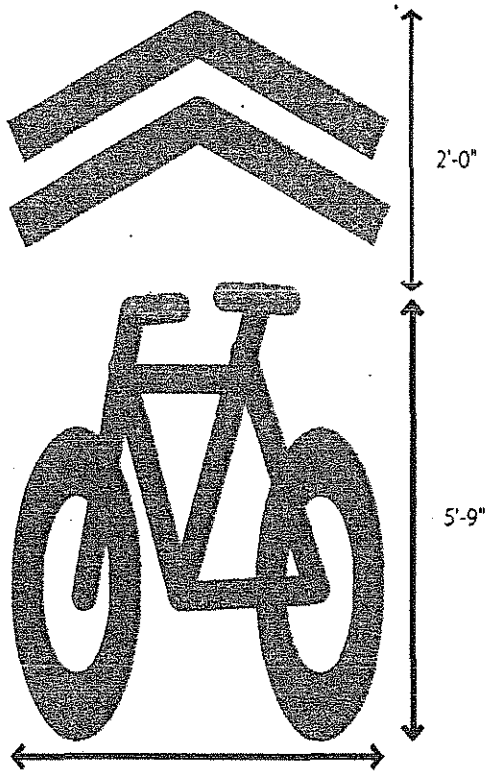
Recently, "shared lane marking" stencils, an additional treatment for Class III facilities, have been introduced in various cities to emphasize the share-the-lane concept. The stencil can serve a number of purposes, such as making motorists aware of bicycles potentially in their lane, showing bicyclists the direction of travel, and, with proper placement, reminding bicyclists to bike further from parked cars to prevent "dooring" collisions. The City of Denver has effectively used the "bike-in-house" shared marking treatment (shown in photo on previous page) for several years, and San Francisco recently tested



two designs of the shared lane marking stencil for use on Class III facilities where lanes are too narrow for sharing. Based on the results of the San Francisco study, the California Traffic Control Devices Committee (CTCDC) recommended in August 2004 that the "Chevron Bicycle Symbol" design of the Shared Lane Marking be adopted by Caltrans as a standard traffic control device in California. The "Chevron" marking design recommended by the CTCDC is shown below in **Figure A-11.** **Figure A-12** illustrates the recommended on-street Shared Lane Marking stencil installation.

Guidance language recommended by the CTCDC for use of the Shared Lane Marking is as follows:

Figure A-11
"Chevron" Design of Shared Lane Marking



Support:
The Shared Lane Marking is intended to improve the positioning of bicyclists on roadways with significant bicycle usage and parked vehicles where the curb lanes are too narrow for motorists and bicyclists to travel side by side within the lane.

Option:
The Shared Lane Marking may be used in shared lanes to improve bicyclists' positioning on roadways, encourage cycling in the correct direction, discourage cycling on sidewalks, and to decrease motor vehicle/bicycle conflicts by informing motorists where to expect cyclists, especially on urban and suburban roadways with narrow curb lanes.

Standard:
If used, the Shared Lane Marking shall be placed so that its center is a minimum of 3.4 meters (11 feet) from the curb face with on-street parking.

On street with no on-street parking, the marking should be placed so that it directs cyclists away from conditions alongside the curb face edge that compromise cyclists' safety, such as drain grates and longitudinal gutter joints. If used, the Shared Lane Marking generally should be spaced at 75 meter (250 foot) intervals.

Option:
The spacing may be increased or decreased based on judgment. On streets with downgrades, higher speeds, or wide parked vehicles, the distance from the curb lane may be increased beyond 3.4 meters (11 feet).

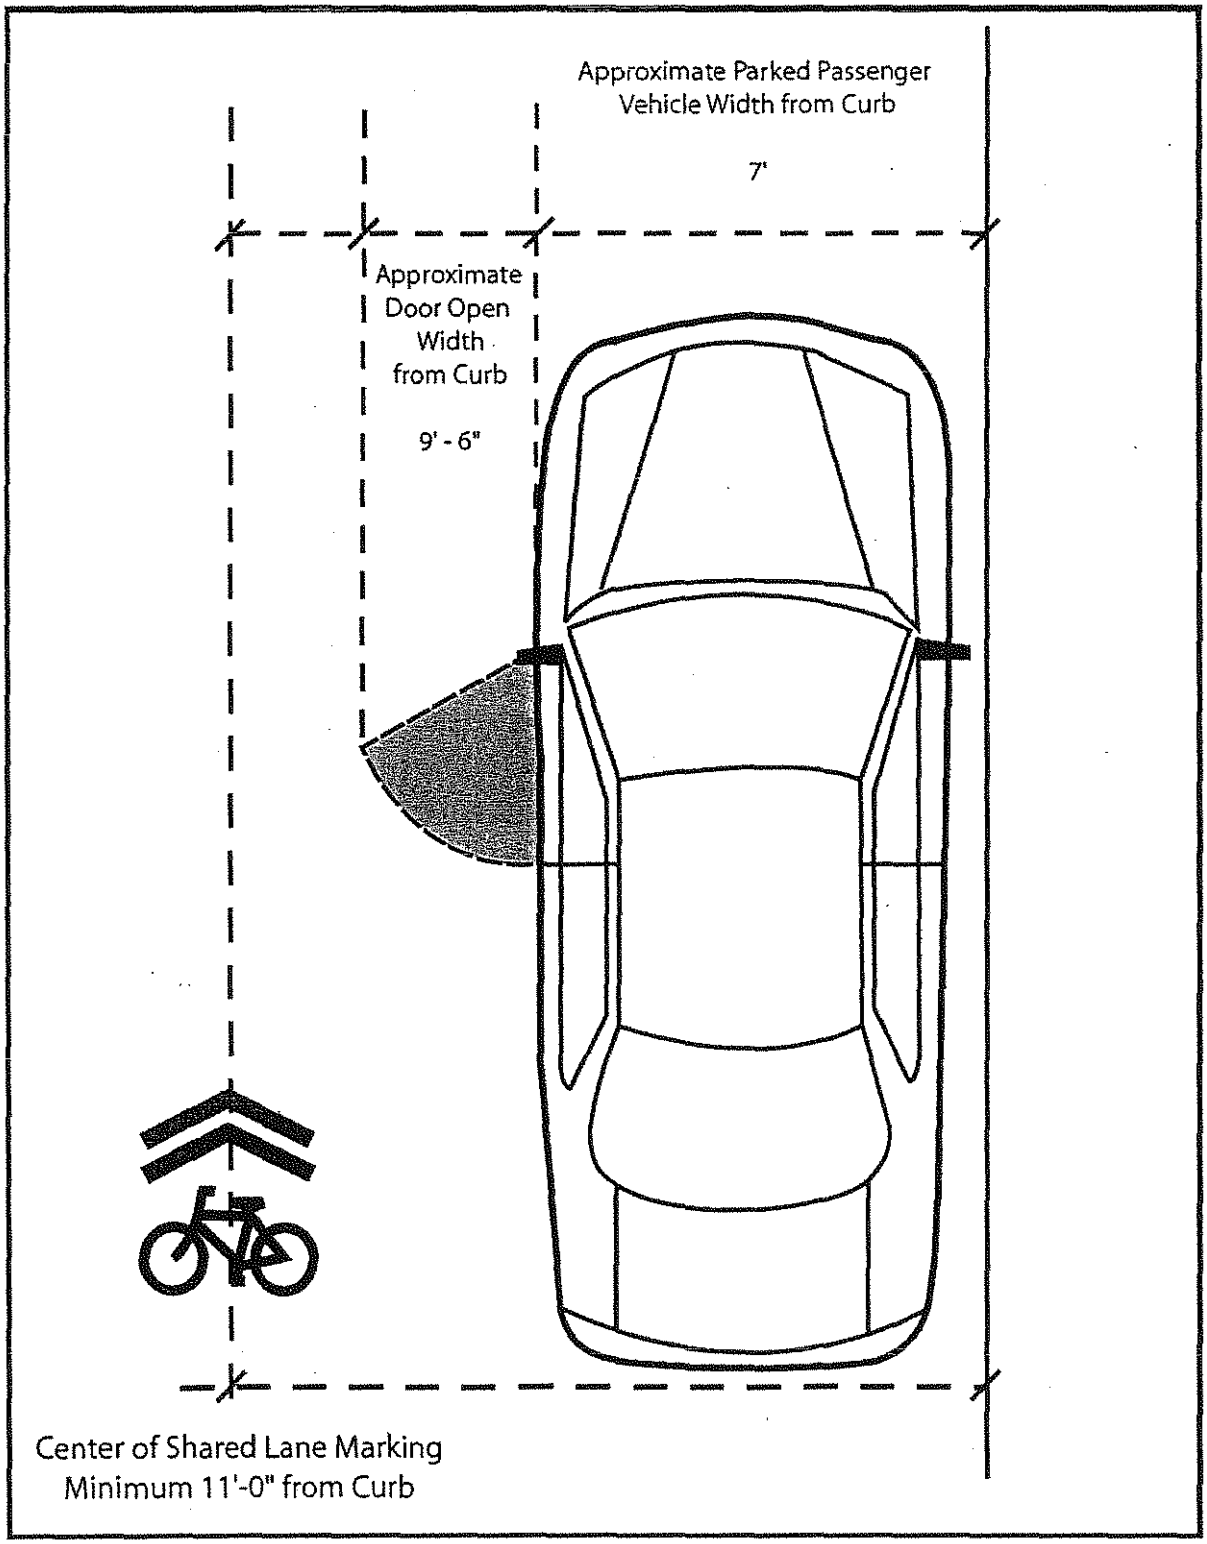


FIGURE A-12 Shared Lane Marking Installation

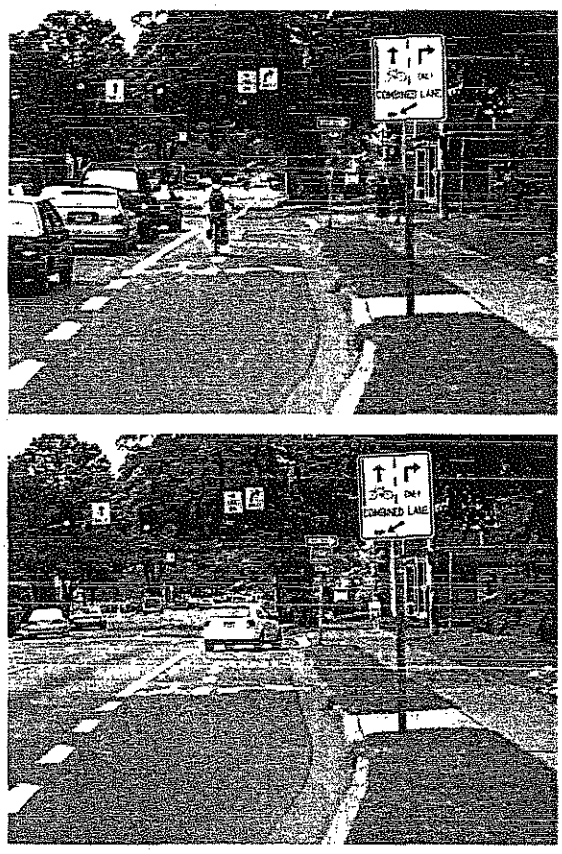
COMBINED BICYCLE/RIGHT TURN LANE

In this innovative treatment, a standard-width bicycle lane is installed on the left side of the dedicated right-turn lane. A dashed stripe provides the bicycle portion and the right-turn portion of the lane. This installation should be used on roadways where there is not enough room to provide a standard-width bicycle lane and a standard-width dedicated right-turn lane. These facilities are currently used in Eugene, Oregon.

Some considerations for the implementation of combined bicycle/right turn lanes:

- Average vehicle speeds < 48 km/h (30 mi/h)
- Install a sign to instruct motorists and bicyclists how to use the facility
- Stripe and sign bicycle lane pavement markings in the turn lane to position and guide bicyclists in the right-turn lane



The photos above show the operation of a combined bicycle/right turn lane, along with the signage instructing motorists and bicyclists how to properly use the facility.

BICYCLE PARKING

As more bikeways are constructed and bicycle usage grows, the need for bike parking will climb. Long-term bicycle parking at transit stations and work sites, as well as short-term parking at shopping centers and similar sites, both can support bicycling. Bicyclists have a significant need for secure long-term parking because bicycles parked for longer periods are more exposed to weather and theft, although adequate long-term parking rarely meets demand.

BICYCLE RACKS

When choosing bike racks, there are a number of things to keep in mind:

- The rack element (part of the rack that supports the bike) should keep the bike upright by supporting the frame in two places without the bicycle frame touching the rack. The rack should allow one or both wheels to be secured.
- Position racks so there is enough room between adjacent parked bicycles. If it becomes too difficult for a bicyclist to easily lock his or her bicycle, he or she may park it elsewhere and the

bicycle capacity is lowered. A row of inverted "U" racks should be situated on 30" minimum centers.

- Empty racks should not pose a tripping hazard for visually impaired pedestrians. Position racks out of the walkway's clear zone.
- When possible, racks should be in a lighted, high visibility, covered area protected from the elements. Long-term parking should always be protected

Table A-2 provides basic guidelines on the ideal locations for parking at several key activity centers as well as an optimum number of parking spaces.

Sample bicycle parking ordinance language is provided in the **Appendix** of this Plan, which outlines minimum bicycle parking standards for various land uses. This language can serve as a template for the City of Modesto in creating a bicycle parking ordinance for inclusion in the zoning code.

Table A-2
Recommended Guidelines for Bicycle Parking Locations and Quantities

Land Use or Location	Physical Location	Bicycle Capacity
City Park	Adjacent to restrooms, picnic areas, fields, and other attractions	8 bicycles per acre
City Schools	Near office entrance with good visibility	8 bicycles per 40 students
Public Facilities (city hall, libraries, community centers)	Near main entrance with good visibility	8 bicycles per location
Commercial, retail and industrial developments over 10,000 gross square feet	Near main entrance with good visibility	1 bicycle per 15 employees or 8 bicycles per 10,000 gross square feet
Shopping Centers over 10,000 gross square feet	Near main entrance with good visibility	8 bicycles per 10,000 gross square feet
Commercial Districts	Near main entrance with good visibility; not to obstruct auto or pedestrian movement	2 bicycles every 200 feet
Transit Stations	Near platform or security guard	1 bicycle per 30 parking spaces

ATTENDED BICYCLE PARKING FACILITIES

Attended bike parking is analogous to a coat check – your bike is securely stored until you need it in a supervised location. An organization called The Bikestation® Coalition is promoting enhanced attended parking at transit stations.

The Bikestation® concept is now in use in Palo Alto and Berkeley in the Bay Area. Bikestations® offer secured valet bicycle parking near transit centers. What makes Bikestations® distinctive are the other amenities that may be offered at the location – bicycle repair, cafes, showers and changing facilities, bicycle rentals, licensing, etc. Bikestations® become a virtual one-stop-shop for bicycle commuters.

Attended bicycle parking can be offered at some special events. For example, the Marin County Bicycle Coalition sponsors valet parking at many festivals in the county, the Sonoma County Bicycle Coalition sponsors valley parking at the downtown Santa Rosa Farmer's Market, and secured bicycle parking is offered at Pac Bell Park in San Francisco.

STANCOG REGIONAL BICYCLE ACTION PLAN (2001)

Table B-2 below lists the recommended bicycle facility projects located within the jurisdiction of the City of Modesto that were identified in the Stanislaus Council of Governments' (StanCOG) *Regional Bicycle Action Plan,* adopted in 2001. The bikeways recommended in the StanCOG were not identified as multi-use trails, lanes, or routes. In addition, it should be noted that the some cost estimates provided seem low and are not described, in terms of the methodology used to determine the estimates. Facilities with two costs listed are likely for optional Class III and Class II facilities.

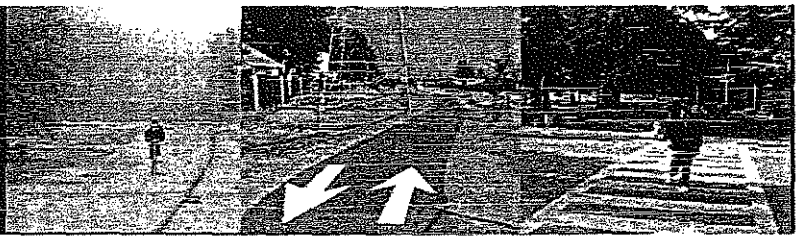
APPENDIX C: NON-MOTORIZED TRANSPORTATION MASTER PLAN SURVEY FORM

How walkable and bikeable is Modesto?



Thank you for taking the time to complete this survey on bicycling and walking conditions in Modesto. The goal of the Non-Motorized Transportation Master Plan Update is to make Modesto a safer and more enjoyable place for you and your children to walk and bicycle to work, to school, or for recreation. The "bikeability" and "walkability" checklists on the following pages are your chance to share your experiences walking and biking the streets, paths, and sidewalks of Modesto, and to help us to pinpoint areas that need improvement. Is your neighborhood a good place to walk or bike? Tell us why!

Before completing the checklists, please tell us a little about yourself:

Name: _____ Age: _____ Sex: _____

Address: _____ email: _____

Do you have children that walk or bike to school? ☐ Yes ☐ No School: _____

1. Reasons for bicycling or walking (check all that apply)

☐ Recreation (please describe, e.g. walking, jogging, cycling on paths, road club rides, etc.)

_____

☐ Commute to school

☐ Commute to work

☐ Shopping

Other: _____

2. In good weather months, how often do you bicycle or walk in Modesto?

☐ Every day

☐ Two to four times a week

☐ Once a week

☐ Once a month

☐ Never

3. Which of these phrases best describes you?

☐ A beginner rider who prefers to stick to the bike path or trail

☐ An intermediate rider who is not really comfortable riding in most traffic situations

☐ An advanced, confident rider who is comfortable riding in most traffic situations

Completed checklists can be turned in at the public meeting, or can be mailed to:

Bob Ford
City of Modesto Parks, Recreation & Neighborhoods Department
1010 Tenth Street, Suite 4400
Modesto, CA 95353
Phone: (209) 577-5437 Fax: (209) 579-5077

City of Modesto Parks, Recreation and Neighborhoods

Please feel free to take additional surveys for your friends and family members.

"Bikeability" Checklist

Origin/destination of bike ride(s) or route(s) (be specific):_____

_____

_____

1. Did you have a place to bicycle safely?

a) On the road, sharing the road with motor vehicles

☐ Yes ☐ Some problems (please note location):

- ☐ No space for bicyclists to ride
- ☐ Bicycle lane or paved shoulder disappeared
- ☐ Heavy and/or fast moving traffic
- ☐ Parked cars opening doors or parking in bikeways
- ☐ Too many trucks or buses
- ☐ No space for bicyclists at intersections
- ☐ Poorly lighted roadways

Other problems: _____

_____

Problem Locations: _____

_____

b) On an off-road path or trail, where motor vehicles are not allowed?

☐ Yes ☐ Some problems:

- ☐ Path ended abruptly
- ☐ Path didn't go where I wanted to go
- ☐ Path intersected with roads that were difficult to cross
- ☐ Path was crowded
- ☐ Path was poorly lighted

Other problems: _____

_____

Problem Locations: _____

_____

2. How was the surface that you rode on?

☐ Good ☐ Some problems, the road or path had:

- ☐ Potholes
- ☐ Debris (e.g. broken glass, sand, gravel)
- ☐ Dangerous drain grates, utility covers, or metal plates
- ☐ Slippery surfaces when wet (e.g. construction places, road markings)
- ☐ Uneven surface or gaps
- ☐ Cracked or broken pavement
- ☐ Bumpy or angled railroad crossings

Other problems: _____

_____

Problem Locations: _____

_____

3. How were the intersections you rode through?

☐ Good ☐ Some problems:

- ☐ Had to wait too long to cross intersections
- ☐ Signal didn't give me enough time to cross the road
- ☐ Unsure where or how to ride through intersection
- ☐ Couldn't see crossing traffic
- ☐ Signal didn't change for a bicycle

Other problems:_____

_____

Problem Locations:_____

_____

4. Did drivers behave well?

☐ Yes ☐ Some problems, drivers:

- ☐ Drove too fast
- ☐ Did not signal
- ☐ Cut me off
- ☐ Passed me too close
- ☐ Harassed me
- ☐ Ran red lights or stop sign

Other problems: _____

_____

Problem Locations:_____

_____

Ideas for educating drivers about sharing the road and respecting bicyclists:_____

_____

5. Was it easy for you to use your bike?

☐ Yes ☐ Some problems:

- ☐ No maps, signs, or road markings to help me find my way
- ☐ No safe or secure place to leave my bicycle at my destination
- ☐ No way for me to take my bicycle with me on the bus or train
- ☐ Hard to find a direct route I liked
- ☐ Had to ride on too many busy streets

Other problems: _____

_____

Problem Locations:_____

A RESOLUTION ACCEPTING WITH REGRET THE RESIGNATION OF CARLOS DELA FUENTE FROM THE HOUSING REHABILITATION LOAN COMMITTEE

WHEREAS, CARLOS DELA FUENTE was appointed a member of the Housing Rehabilitation Loan Committee on March 6, 2001, and

WHEREAS, CARLOS DELA FUENTE has tendered his resignation from the aforementioned committee, and

WHEREAS, CARLOS DELA FUENTE has been a devoted and sincere public servant and has contributed greatly to our civic progress,

NOW, THEREFORE, BE IT RESOLVED that the resignation of CARLOS DELA FUENTE from the Housing Rehabilitation Loan Committee be, and hereby is accepted with regret.

BE IT FURTHER RESOLVED that the Council of the City of Modesto, on its own behalf, and on behalf of the citizens of this City, hereby expresses its sincere appreciation to CARLOS DELA FUENTE for his outstanding service to the community.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-069

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE PURCHASE OF A DIGITAL EVIDENCE SYSTEM (SOFTWARE AND HARDWARE) FOR THE MODESTO POLICE DEPARTMENT TO, VERIPIC, SANTA CLARA, CA, FOR A TOTAL ESTIMATED COST OF $45,031.44

WHEREAS, in July 2005, the existing digital image file storage system for the Modesto Police Department reached capacity, and

WHEREAS, in September 2005, the Police Department contacted the Purchasing Manager to request bids for the purchase of a digital evidence system, and

WHEREAS, on December 9, 2005, the Purchasing Division issued an informal Request for Bid (RFB) for the purchase of a digital evidence system, and

WHEREAS, on January 13, 2006, informal RFB's were opened in the Purchasing Division, and

WHEREAS, two (2) companies chose to respond, and

WHEREAS, in February 2006, the Police Department evaluation committee evaluated the bid submittals, and

WHEREAS, members of the evaluation committee observed both bidders programs in use, and

WHEREAS, in March 2006, the Modesto Police Department and Information Technology Department started discussion regarding storage required for future digital media, and

WHEREAS, on September 26, 2006, a final meeting of the evaluation committee was held. After much research and discussion it was determined that VeriPic was the

product most suitable for the Modesto Police Department's current, as well as long-term, digital evidence storage and retrieval needs, and

WHEREAS, Modesto Municipal Code Section 8-3.204 states; except as otherwise provided by this chapter or when directed by the City Manager, all purchases involving an expenditure of City funds in the amount of fifty thousand dollars ($50,000.00) or less, shall be purchased, when feasible and when in the best interest of the City, in the open market by letter inquiry, informal solicitation, or telephone or facsimile solicitations, with or without newspaper advertisement, and without observation of prescribed formal bid procedures. The award of bid and contract for the purchase of a digital evidence system for the Modesto Police Department conforms to code requirements,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contract for the purchase of a digital evidence system (software and hardware) for the Modesto Police Department, to VeriPic, Santa Clara, CA, for a total estimated cost of $45,031.44.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue a purchase order for the purchase of a digital evidence system (software and hardware) for the Modesto Modesto Police Department, to VeriPic, Santa Clara, CA, for a total estimated cost of $45,031.44.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-072

A RESOLUTION APPROVING AN AMENDMENT TO THE REIMBURSEMENT AGREEMENT BETWEEN THE CITY OF MODESTO AND NATIONAL RAILROAD PASSENGER CORPORATION IN AN AMOUNT NOT-TO-EXCEED $96,542.02 FOR PLATFORM CONSTRUCTION REPAIR COSTS AT THE MODESTO CALIFORNIA AMTRAK STATION, AND AUTHORIZING THE CITY MANAGER TO EXECUTE AN AMENDMENT TO THE AGREEMENT.

WHEREAS, the lease agreement between the City and National Railroad Passenger Corporation (Amtrak) states: "LESSOR (the City), at its sole cost and expense, will maintain in good repair and safe condition the platform in accordance with all laws and regulations," and

WHEREAS, the truncated dome tiles on the platform of the Modesto Amtrak Station are in need of serious repair, and

WHEREAS, Amtrak has significant experience in repairing platforms, and

WHEREAS, on August 8, 2006, by Resolution No. 2006-505, Amtrak and the City of Modesto entered into a reimbursement agreement to pay for construction, and

WHEREAS, Amtrak has competitively bid the project and the increased cost for construction requires an Amendment to the Reimbursement Agreement,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves an Amendment to the Reimbursement Agreement between the City of Modesto and Amtrak in an amount not-to-exceed $96,542.02, for the platform construction repair costs at the Modesto California Amtrak Station.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute said Amendment to the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-073

A RESOLUTION APPROVING THE PROJECT, INCLUDING PLANS AND SPECIFICATIONS FOR THE PROJECT TITLED "LA LOMA AVENUE SANITARY SEWER LIFT STATION REPLACEMENT PROJECT," ACCEPTING THE BID AND APPROVING A $1,794,000 CONTRACT WITH PRESTON PIPELINES, INC., FOR THE PROJECT TITLED, "LA LOMA AVENUE SANITARY SEWER LIFT STATION REPLACEMENT PROJECT," AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE CONTRACT.

WHEREAS, plans and specifications have been prepared for the project titled "La Loma Avenue Sanitary Sewer Lift Station Replacement Project" and City staff recommends approval to the City Council, and

WHEREAS, the bids received for "La Loma Avenue Sanitary Sewer Lift Station Replacement Project" were opened at 11:00 a.m. on December 19, 2006, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the Public Works Director has recommended that the bid of $1,794,000 received from Preston Pipelines, Inc., be accepted as the lowest responsible bid and the contract be awarded to Preston Pipelines, Inc.,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the project titled "La Loma Avenue Sanitary Sewer Lift Station Replacement Project," including the plans and specifications.

BE IT FURTHER RESOLVED that the Council hereby accepts the bid of Preston Pipelines, Inc., in the amount of $1,794,000, and hereby awards Preston Pipelines, Inc., the contract titled "La Loma Avenue Sanitary Sewer Lift Station Replacement Project."

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-074

A RESOLUTION ADOPTING A MITIGATED NEGATIVE DECLARATION AND A MITIGATION MONITORING AND REPORTING PROGRAM FOR THE LA LOMA AVENUE SANITARY SEWER LIFT STATION REPLACEMENT PROJECT.

WHEREAS, the La Loma Avenue Sanitary Sewer Lift Station (lift station) was first installed in 1934 and last upgraded in 1992, and

WHEREAS, the lift station is located at the base of Morton Boulevard, as it crosses under the La Loma Bridge within the Dry Creek Floodway, and

WHEREAS, when storm water in Dry Creek floods its banks, it floods Morton Boulevard and makes maintenance on the lift station impossible, and

WHEREAS, in an effort for the City to be proactive, a new lift station was designed outside of the floodway, and

WHEREAS, Section 15070 of the CEQA Guidelines relating to Initial Study/Mitigated Negative Declarations (EA/PW No. 2004-15) provides for a lead agency to prepare an Initial Study on any proposed Project to analyze whether the Project may cause any significant effect on the environment, and

WHEREAS, the City of Modesto Department of Public Works has prepared an Initial Study/Mitigated Negative Declaration as provided for by CEQA, and

WHEREAS, a 30-day public review period for the proposed Initial Study/Mitigated Negative Declaration began on November 1, 2006 and ended on December 1, 2006, and

WHEREAS, the City received public comments on the draft Initial Study/Mitigated Negative Declaration and no changes to the document were necessary as a result, and

WHEREAS, the Mitigation Monitoring Plan (MMP) is included and described within the Initial Study/Mitigated Negative Declaration,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Initial Study/Mitigated Negative Declaration (EA/PW No. 2004-15) and Mitigation Monitoring Plan prepared for the La Loma Avenue Sanitary Sewer Lift Station Replacement Project, and based on the substantial evidence provided in said Initial Study/Mitigated Negative Declaration makes the following findings:

1. The recitals set forth above are true and correct.

2. The Initial Study/Mitigated Negative Declaration prepared for the proposed project has identified potentially significant environmental effects.

3. Before the Initial Study/Mitigated Negative Declaration was released for public review, feasible mitigation measures were made by or agreed to by the City, which will avoid or mitigate the effects to a point where clearly no significant effect will occur.

4. There is no substantial evidence, in light of the whole record before the public agency, that the project, as revised, may have a significant effect on the environment (Public Resources Code Section 21064.5(2)).

5. The Initial Study/Mitigated Negative Declaration reflects the independent judgment of the lead agency.

6. As required by Public Resources Code Section 21081.6 et seq., the Mitigation Monitoring and Reporting Program is hereby adopted, a copy of which is included in the Mitigated Negative Declaration, which is on file with the City Clerk.

7. The Initial Study/Mitigated Negative Declaration, Environmental Assessment (EA/PW 2004-15) provides the substantial evidence to support findings 1 through 6, above.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that it hereby adopts the Initial Study/Mitigated Negative Declaration EA/PW 2004-15, a copy of which is on file with the City Clerk and incorporated herein by reference.

BE IT FURTHER RESOLVED that the City of Modesto Public Works Department, Capital Improvement Services, is the custodian of the documents and other materials, which constitute the record of proceedings upon which its decision is based. The records are located at the office of the City of Modesto Public Works Deputy Director, 1010 Tenth Street, Fourth Floor, Modesto, CA 95354.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Public Works Director is hereby authorized and directed to file a Notice of Determination within five (5) business days with the Stanislaus County Clerk pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-075

A RESOLUTION AMENDING THE CURRENT CAPITAL IMPROVEMENT BUDGET IN ORDER TO FULLY FUND THE CONTRACT WITH PRESTON PIPELINES, INC., AND COVER CONSTRUCTION ADMINISTRATION COSTS BY DECREASING CIP ACCOUNT 6210-430-A215-6040 (DAF DISSOLVED AIR FLOTATION) BY $496,620 AND RETURNING THE FUNDS TO ACCOUNT 6210-800-8000-8003 (SEWER RESERVES), THEN DECREASING ACCOUNT 6210-800-8000-8003 (SEWER RESERVES) AND REAPPROPRIATING $496,620 TO CIP ACCOUNT 6210-430-B609 (LA LOMA SEWER LIFT STATION)

WHEREAS, the CIP account 6210-430-B609 (La Loma Sewer Lift Station) only provides $1,710,000 in available funds to fully fund construction of the La Loma Sewer Lift Station project in the estimated total amount of $2,206,620, including funding a Contract with Preston Pipelines, Inc., for construction and to cover construction contingency and construction administration costs, and

WHEREAS, certain budgetary transactions are necessary to fully fund said Contract with Preston Pipelines, Inc., in the amount of $1,794,000 for construction services, $143,520 for construction contingency, and $269,100 to cover construction administration costs, including contract administration by City staff, for a total of $2,206,620, and

WHEREAS, the CIP Account 6210-430-A215 (DAF Dissolved Air Flotation) experienced savings due to a favorable bid below the budgeted engineer's estimate for construction, and

WHEREAS, the total amount of $496,620 is to be transferred by decreasing CIP Account 6210-430-A215-6040 (DAF Dissolved Air Flotation) and returning the funds to Account 6210-800-8000-8003 (Sewer Reserves), then decreasing Account 6210-800-

8000-8003 (Sewer Reserves) and reappropriating $496,620 to CIP account 6210-430-B609 (La Loma Sewer Lift Station),

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Modesto hereby approves the transfer of funds as set forth herein to fully fund the Contract with Preston Pipelines, Inc., in the amount of $1,794,000 for construction services, $143,520 for construction contingency, and $269,100 to cover construction administration costs, including contract administration by City staff for a total of $2,206,620 for the La Loma Sewer Lift Station project.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-076

A RESOLUTION APPROVING THE PLANS AND SPECIFICATIONS, AWARDING THE BID, AND APPROVING A $158,301 CONSTRUCTION CONTRACT WITH RICHARD A. HEAPS FOR THE PROJECT ENTITLED "TRAFFIC SIGNAL INSTALLATION AT 16TH AND J STREETS INTERSECTION," AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE CONTRACT

WHEREAS, City staff has reviewed the plans and specifications for the project entitled, "Traffic Signal Installation at 16th and J Streets Intersection" and recommends approval to the City Council, and

WHEREAS, the bids received for the "Traffic Signal Installation at 16th and J Streets Intersection" project were opened at 11:00 a.m., on December 12, 2006, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the Public Works Director has recommended that the bid of $158,301 received from Richard A. Heaps be accepted as the lowest responsible bid, and the contract be awarded to Richard A. Heaps,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the plans and specifications for the "Traffic Signal Installation at 16th and J Streets Intersection" project.

BE IT FURTHER RESOLVED that the Council accepts the bid of Richard A. Heaps in the amount of $158,301, and hereby awards Richard A. Heaps the contract for "Traffic Signal Installation at 16th and J Streets Intersection."

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember O'Bryant, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-077

A RESOLUTION APPROVING THE FINAL MAP AND ACCEPTING PUBLIC IMPROVEMENTS OF 16TH & G STREET PROFESSIONAL OFFICE IN THE BASELINE DEVELOPMENT AREA OF THE CITY OF MODESTO AND AUTHORIZING THE CITY MANAGER TO EXECUTE A SUBDIVISION AGREEMENT WITH 1630 G STREET INVESTORS, LLC

WHEREAS, 1630 G STREET INVESTORS, LLC, is possessed of a tract of land situated in the City of Modesto, County of Stanislaus, consisting of 0.64 acres, known as 16TH & G Street Professional Office ("SUBDIVISION"), in the Baseline Developed Area, and

WHEREAS, a tentative map of said tract was approved by the Planning Commission of the City of Modesto on the 17th day of October, 2005, and

WHEREAS, the Secretary of the Planning Commission of the City of Modesto has certified that the final map of said tract substantially conforms to the approved tentative map, and

WHEREAS, the City Engineer of the City of Modesto has certified that the final map of said SUBDIVISION meets all of the provisions of the California Subdivision Map Act and the provisions of the Modesto Municipal Code relating to subdivisions, and that the map is technically correct, and

WHEREAS, the Public Works Director has certified that all public improvements required by the City of Modesto have been completed in said tract to the satisfaction of the Public Works Director, and

WHEREAS, the Public Works Director has indicated that it would be in order for the City Council to accept the public improvements in said subdivision as complete and authorize the City Clerk to file a Notice of Completion.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that:

1. The final map is hereby approved.

2. The dedications for streets, alleys and easements as shown thereon within the boundaries of said tract are hereby accepted on behalf of the public for public use.

3. The improvements completed in 16th & G Street Professional Office are hereby accepted and the City Clerk is hereby authorized to file a Notice of Completion for the improvements.

4. The City Clerk is hereby authorized to certify the map of said tract on behalf of the City of Modesto, after the fees and deposits required by the Modesto Municipal Code in amounts determined by the City Engineer have been paid.

5. The City Manager and the City Clerk are hereby authorized to execute and attest, respectively, an agreement with subdivider as required by Section 4-4.604(c) of the Municipal Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 23rd day of January, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-082

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE PURCHASE OF FOUR (4) HONDA POLICE MOTORCYCLES TO HONDA OF MODESTO, MODESTO, CA, FOR A TOTAL ESTIMATED COST OF $62,689.

WHEREAS, on October 24, 2006, Council approved Resolution No. 2006-673, to accept the Vehicle Impound/DUI/Selective Traffic Enforcement Program (STEP) grant in the amount of $1,000,000 from the State of California, Office of Traffic Safety (OTS), and

WHEREAS, this grant provides for four (4) full-time police officers and their vehicles, and

WHEREAS, grant funds will be used to pay 100% of the salary for the four (4) police officers the first operational year and 50% salary for the second year, and

WHEREAS, the grant will also fund four (4) fully equipped police motorcycles for these officers, and

WHEREAS, on November 28, 2006, Council approved Resolution No. 2006-732 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for the purchase of four (4) Honda ST1300P police motorcycles, as awarded in the Vehicle Impound/DUI/Selective Traffic Enforcement Program (STEP) grant, at an estimated total cost of $70,000, and

WHEREAS, on November 29, 2006, the Purchasing Division issued RFB No. 0607-30 for the purchase of four (4) Honda police motorcycles to eighteen (18) prospective bidders, one (1) of which is a local company, posted the bid on the City's web site and formally advertised as required by law, and

WHEREAS, on December 19, 2006, RFB's were formally opened in the City Clerk's office, and

WHEREAS, of the eighteen (18) prospective bidders, two (2) companies chose to respond, of which, one (1) company furnished a responsive and responsible bid. One (1) company was deemed non-responsive and non-responsible, as they provided only one (1) signed original document of Exhibit A in their bid submittal, and

WHEREAS, exhibit A is the Bid Acknowledgement, which acknowledges receipt of the referenced RFB and/or Addenda and the bidder offers and agrees to furnish the articles and/or services specified on behalf of the bidder, in accordance with the specifications, terms and conditions of the RFB and Bid Acknowledgement, and

WHEREAS, the company's bid submittal was disqualified and received no further consideration, and

WHEREAS, RFB 0607-30 specification 3.1 Required Documents, states:

- Failure to furnish two (2) "inked" signed original bid documents will result in disqualification.
- Failure to furnish the required documents may result in disqualification, and

WHEREAS, based on providing a responsive and responsible bid, City staff recommends the award of bid and contract for the purchase of four (4) Honda police motorcycles to Honda of Modesto, Modesto, CA, for the total estimated cost of $62,689, and

WHEREAS, Modesto Municipal Code Section 8-3.203 generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid. The award of bid and contract for the purchase of four (4) Honda police motorcycles conforms to code.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contract for the purchase of four (4) Honda police motorcycles to Honda of Modesto, Modesto, CA, for the total estimated cost of $62,689.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue a purchase order for the purchase of four (4) Honda police motorcycles to Honda of Modesto, Modesto, CA, for the total estimated cost of $62,689.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-083

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE PURCHASE OF FOUR (4) LIGHTED CROSSWALK SYSTEMS WITH AUDIBLE PUSH BUTTONS FOR THE PUBLIC WORKS DEPARTMENT, TRAFFIC ENGINEERING & OPERATIONS DIVISION, TO WESTERN PACIFIC SIGNAL, LLC., SAN LEANDRO, CA FOR THE TOTAL ESTIMATED COST OF $51,707

WHEREAS, on September 6, 2005, Council approved Resolution No. 2005-448 accepting a grant in the amount of $110,000 from the Office of Traffic Safety (OTS) for the CIP project titled, "Pedestrian and Bicyclist Safety Enhancement," and

WHEREAS, of this total amount, $80,000 was dedicated for the purchase of four (4) lighted crosswalk systems, and

WHEREAS, staff shall install lighted crosswalks at the following locations:

- Lucern Avenue and Hunter Avenue
- Sheldon drive and Pembroke Drive
- Evergreen Avenue and Dougfir Drive
- 11th Street at the 10th Street Parking Garage, and

WHEREAS, the installation of these lighted crosswalks will provide efficient and effective movement of people, goods, and services by enhancing traffic safety in the area, and

WHEREAS, on September 26, 2006, Council approved Resolution No. 2006-616 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for the purchase of four (4) lighted crosswalk systems with audible push buttons, for the Public Works Department, Traffic Engineering & Operations Division, and

WHEREAS, on November 21, 2006, the Purchasing Division issued Request for Bid No. 0607-28 for the purchase of four (4) lighted crosswalk systems with audible push buttons to thirteen (13) prospective bidders, one (1) of which was a local company, posted the bid on the City's web site and formally advertised as required by law, and

WHEREAS, on January 2, 2007, RFB's were formally opened in the City Clerk's office, and

WHEREAS, of the thirteen (13) prospective bidders, two (2) companies chose to respond. All bidders provided responsive and responsible bids, and

WHEREAS, based on being deemed the lowest responsive and responsible bidder, City staff recommends the award of bid and contract for the purchase of four (4) lighted crosswalk systems with audible push buttons for the Public Works Department, Traffic Engineering & Operations Division, to Western Pacific Signal, LLC., San Leandro, CA, for the total estimated cost of $51,707, and

WHEREAS, Modesto Municipal Code Section 8-3.203 generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid. The award of bid and contract for the purchase of four (4) lighted crosswalk systems with audible push buttons for the Public Works Department, Traffic Engineering & Operations Division, conforms to code requirements.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contract for the purchase of four (4) lighted crosswalk systems with audible push buttons for the Public Works Department, Traffic Engineering & Operations Division, to Western Pacific Signal, LLC., San Leandro, CA.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue a purchase order for the purchase of four (4) lighted crosswalk systems with audible push buttons for the Public Works Department, Traffic Engineering & Operations Division, to Western Pacific Signal, LLC., San Leandro, CA for the total estimated cost of $51,707.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-084

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE FURNISHING OF HOT PATCH WORK FOR THE PUBLIC WORKS DEPARTMENT, WATER DIVISION, TO PATCH CREW, MODESTO, CA, FOR A TWO (2) YEAR AGREEMENT, WITH THREE (3) ONE-YEAR EXTENSION OPTIONS AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED ANNUAL COST OF $138,000

WHEREAS, the Public Works Department, Water Division requested contractual assistance to perform hot patch work throughout Modesto and the outlying areas included in the City of Modesto's ten (10) water systems, and

WHEREAS, the outlying areas include Waterford, Hickman, Salida, Del Rio, parts of Ceres, parts of Turlock, Grayson, Empire and other County areas just outside the City limits, and

WHEREAS, hot patch work consists of asphalt repairs to street cuts made in order to make repairs and improvements to the water system, and

WHEREAS, the City crews perform some of this work, but often in-house resources are not available to perform the hot patch work as needed, and

WHEREAS, on September 5, 2006, Council approved Resolution No. 2006-529 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for the furnishing of Hot Patch Work for the Public Works Department, Water Division, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, and

WHEREAS, on November 22, 2006, the Purchasing Division issued Request for Bid No. 0607-12 for the furnishing of Hot Patch Work to forty-seven (47) prospective

bidders, six (6) of which were local companies, posted the bid on the City's web site, and formally advertised as required by law, and

WHEREAS, on January 2, 2007, RFB's were formally opened in the City Clerk's office. Of the forty-seven (7) prospective bidders, two (2) companies chose to respond, and

WHEREAS, based on being deemed the lowest responsive and responsible bidder, City staff recommends the award of bid and contract for the furnishing of Hot Patch Work for the Public Works Department, Water Division, to Patch Crew, Modesto, CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $138,000, and

WHEREAS, Modesto Municipal Code, Section 8-3.203, generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid. The award of bid and contract for the furnishing of Hot Patch Work conforms to code,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contract for the furnishing of Hot Patch Work for the Public Works Department, Water Division, to Patch Crew, Modesto, CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $138,000.

BE IT FURTHER RESOLVED that the Purchasing Division will draft an agreement for the approval and signature of the City Manager, for the furnishing of Hot Patch Work for the Public Work Department, Water Division, to Patch Crew, Modesto,

CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $138,000.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-085

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACTS FOR THE PURCHASE OF BRASS SERVICE FITTINGS TO THREE (3) COMPANIES, 1) FERGUSON WATERWORKS, MODESTO, CA, 2) GENERAL PLUMBING SUPPLY CO., INC., SONORA, CA, AND 3) GROENIGER & CO., MODESTO, CA, FOR A TWO (2) YEAR AGREEMENT, WITH THREE (3) ONE-YEAR EXTENSION OPTIONS AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED ANNUAL COST OF $143,261

WHEREAS, the Finance Department, Central Stores Division inventories various materials for use by the Public Works Department and Parks, Recreation and Neighborhoods Department for City projects, including brass service fittings, and

WHEREAS, these fittings are used to connect water meters to residential homes and businesses, and

WHEREAS, these fittings shall be purchased from annual purchase agreements as "inventory stock", and warehoused and distributed by the Central Stores Division, and

WHEREAS, on September 26, 2006, Council approved Resolution No. 2006-607 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for the purchase of Brass Service Fittings for the Public Works Department and Parks, Recreation and Neighborhoods Department, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, and

WHEREAS, on October 20, 2006, the Purchasing Division issued Request for Bid No. 0607-24 for the purchase of Brass Service Fittings to thirty-five (35) prospective bidders, fourteen (14) of which were local companies, posted the bid on the City's web site, and formally advertised as required by law, and

WHEREAS, on November 21, 2006, RFB's were formally opened in the City Clerk's office. Of the thirty-five (35) prospective bidders, five (5) companies chose to respond, and

WHEREAS, based on being deemed the lowest responsive and responsible bids, City staff recommends the award of bid and contracts for the purchase of Brass Service Fittings to three (3) companies, 1) Ferguson Waterworks, Modesto, CA, 2) General Plumbing Supply Co., Inc., Sonora, CA, and 3) Groeniger & Co., Modesto, CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $143,261, and

WHEREAS, Modesto Municipal Code, Section 8-3.203, generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid. The award of bid and contract for the purchase of Brass Service Fittings conforms to code,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the award of bid and contracts for the purchase of Brass Service Fittings to three (3) companies, 1) Ferguson Waterworks, Modesto, CA, 2) General Plumbing Supply Co., Inc., Sonora, CA, and 3) Groeniger & Co., Modesto, CA, for a two (2) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $143,261.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue purchase agreements for the purchase of Brass Service Fittings to three (3) companies, 1) Ferguson Waterworks, Modesto, CA, 2) General Plumbing Supply Co., Inc., Sonora, CA, and 3) Groeniger & Co., Modesto, CA, for a two (2) year agreement,

with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $143,261.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

RESOLUTION NO. 2007-086

A RESOLUTION ESTABLISHING FEES FOR MUNICIPAL OFF-STREET PARKING FACILITIES, PROVIDING FOR CONTROL THEREOF, AND, RESCINDING RESOLUTIONS NOS. 2001-608 AND 2003-105.

WHEREAS, Section 3-2.1601 of the Modesto Municipal Code provides that the City Council may from time to time establish and designate municipal off-street parking facilities in the City by resolution of the Council, and

WHEREAS, Section 3-2.1602 of the Modesto Municipal Code provides that the hours and days upon which the operation of off-street parking facilities shall be effective shall be established from time to time by resolution of the Council, and

WHEREAS, Section 3-2.1603 of the Modesto Municipal Code provides that the rates for use of off-street parking facilities shall be established from time to time by resolution of the Council, and

WHEREAS, on November 27, 2001, the City Council, by Resolution No. 2001-608, established the current fee schedule and hours that fees can be collected at the City's off-street parking facilities, and

WHEREAS, on February 25, 2003, the City Council, by Resolution No. 2003-105, amended Resolution No. 2001-608, extending parking garage fee collection hours at the 10th and 11th Street Garages, and

WHEREAS, on September 13, 2005, following the City's established three-bid process, the City hired Walker Parking Consultants to complete an assessment of the City-owned parking facilities (the Walker Report), and

WHEREAS, Walker's assessment included the financial condition of the Parking Services Division, a review of the current parking agreements, rates, equipment, management, administration and operations, and the feasibility of privatization of the parking system, and

WHEREAS, this item was presented to the Finance Committee on July 24, 2006, and August 9, 2006, and

WHEREAS, at its August 9, 2006, meeting the Finance Committee recommended that the City Council 1) accept the Walker Parking Consultants Parking Assessment Report, and 2) direct staff to develop an implementation plan for the provisions and recommendations of the report, and

WHEREAS, on September 12, 2006, by Resolution No. 2006-588, the Council accepted the report, approved implementation of many of the recommendations of the Walker Report, and directed staff to move forward with implementation of: enforcement of penalties for employee misuse of parking; increasing monthly passes and equalization of rates to surface lots; installation of automated pay stations; increasing responsibility of Lead Garage Attendants; conducting booth audits; and hiring of Parking Service Representatives, a Parking Supervisor and an Administrative Analyst, and

WHEREAS, one recommendation accepted by the Council on September 12, 2006, was to amend the parking fees to: implement a rate increase of $20 per month to bring the monthly parking pass rate from $40 to $60; implement annual rate increases of 3% for monthly passes until they are equivalent to 50% of the regular hourly parking fee for 160 hours a month; and standardize parking rates, resulting in the surface lots having the same per hour charge as the garages, and

WHEREAS, staff recommended that the Council also approve establishing rates for Recreational Vehicles, bus and commercial truck parking; establishing rates for rental of entire surface lots and the first floor of the Eleventh Street parking garage; providing grace periods in garages; and increasing the fee for validation stamp booklets, and

WHEREAS, the Fees Task Force met on November 29, 2006, and December 18, 2006, to consider the proposed fees, and

WHEREAS, on December 18, 2006, the Fees Task Force approved staff's recommendations, and

WHEREAS, by an agenda report to the City Council from the Parks, Recreation and Neighborhoods Department dated December 18, 2006, City staff recommended implementing a rate increase of $20 per month to bring the monthly parking pass rate from $40 to $60 and implementing annual rate increases of 3% for monthly passes until they are equivalent to 50% of the regular hourly parking fee for 160 hours a month, standardizing parking rates, resulting in the surface lots having the same per hour charge as the garages establishing rates for Recreational Vehicle, bus and commercial truck parking, establishing rates for rental of entire surface lots and first floors of parking garages, providing grace periods of ten (10) minutes in garages, and increasing the fee for validation stamp booklets, and

WHEREAS, said matter was set for a public hearing of the City Council to be held at 5:30 p.m. on January 9, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing of the Council was held for the purpose of receiving public comment on the proposed parking rates, and

WHEREAS, at said public hearing, the City Council adopted a motion of intent to adopt the recommended fees, with the exception that the increase for monthly parking passes be set at $2 annually, and

WHEREAS, on January 9, 2007, the City Council directed staff to address the net of the rental of surface lots and the first floor of the Eleventh Street parking garage on the weekends,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. GARAGE PARKING FACILITIES.

(a) The following municipal garage parking facilities are hereby established:

(1) Eleventh Street Garage (Lot 28) west side of 11th Street between I and J Streets;

(2) Ninth Street Garage (Lot 43) west side of 9th Street between K and L Streets;

(3) Tenth Street Garage (Lot 44) west side of 11th Street between J and K Streets.

(b) Vehicular parking on said parking facilities shall be controlled and regulated as follows:

(1) From 6:00 a.m. to 6:00 p.m., seven days per week, the rate of One and no/100ths dollar ($1.00) per hour or fraction thereof, unless validated in accordance with the provisions of Section 3-2.1604 of the Modesto Municipal Code.

(2) From 6:00 p.m. to 6:00 a.m., seven days per week, the rate of Five and no/100ths dollars ($5.00) per evening, unless validated in accordance with the provisions of Section 3-2.1604 of the Modesto Municipal Code.

(c) The price for validation stamps to be used with the validation system on said garage parking facilities, as provided by Section 3-2.1604 of the Modesto Municipal Code, shall be $107.00 for a book of one hundred (100) stamps.

(d) The Parks, Recreation and Neighborhoods Director may designate spaces in said garage parking facilities for the free parking of bicycles. When appropriate signs are erected, bicycles may be parked in such areas without charge.

(e) Monthly parking passes may be authorized by the Parks, Recreation and Neighborhoods Director at said garage parking facilities when it does not encroach on the needs of commercial parking and/or other parking agreements. The monthly charges for such passes for the three parking garages (Lots 28, 43 and 44) shall be Sixty and no/100ths dollars ($60.00) for 2007; Sixty-two and no/100th dollars ($62.00) for 2008; Sixty-four and no/100th dollars ($64.00) for 2009; Sixty-six and no/100th dollars ($66.00) for 2010; Sixty-eight and no/100th dollars ($68.00) for 2011; Seventy and no/100th dollars ($70.00) for 2012; Seventy-two and no/100th dollars ($72.00) for 2012; Seventy-four and no/100th dollars ($74.00) for 2013, Seventy-six and no/100th dollars ($76.00) for 2014; Seventy-eight and no/100th dollars ($78.00) for 2015; and, Eighty and no/100th dollars ($80.00) for 2015.

(f) From time to time, the promoters of special events have the need to use the entire first floor of the Eleventh Street parking garage for their events. The charges for such "buy-out" rentals shall be Two hundred Twenty-five and no/100th dollars ($225.00), per twenty-four (24) hour period or portion there of.

(g) In order to accommodate patrons who are unable to locate a parking space, a ten (10) - minute free, grace period shall be allowed.

SECTION 2. SURFACE PARKING LOTS.

(a) For the purposes of this section, municipal off-street parking facilities shall be defined as those that are equipped with automated collection devices and/or are staffed. Parking lots described in Section 3. below shall be excluded.

(b) Monthly parking passes may be authorized by the Parks, Recreation and Neighborhoods Director or any surface parking lot when it does not encroach on the needs of commercial parking. The monthly charges for such passes shall be Sixty and no/100ths dollars ($60.00) for 2007; Sixty-two and no/100th dollars ($62.00) for 2008; Sixty-four and no/100th dollars ($64.00) for 2009; Sixty-six and no/100th dollars ($66.00) for 2010; Sixty-eight and no/100th dollars ($68.00) for 2011; Seventy and no/100th dollars ($70.00) for 2012; Seventy-two and no/100th dollars ($72.00) for 2012; Seventy-four and no/100th dollars ($74.00) for 2013, Seventy-six and no/100th dollars ($76.00) for 2014; Seventy-eight and no/100th dollars ($78.00) for 2015; and, Eighty and no/100th dollars ($80.00) for 2015.

(c) Recreational Vehicles (RVs) may be allowed to park on surface lots as designated by the Parks, Recreation and Neighborhoods Director. The charges per twenty-four (24) hour period, or portion thereof, shall be Twenty and no/100ths dollars ($20.00).

(d) Buses and commercial trucks may be allowed to park on surface lots as designated by the Parks, Recreation and Neighborhoods Director. The charges per twenty-four (24) hour period, or portion thereof, shall be Thirty and no/100ths dollars ($30.00).

(e) From time to time, the promoters of special events have the need to use an entire surface lot for their event. The charges for such "buy-out" rentals shall be Six Hundred Fifteen and no/100th dollars ($615.00) for the surface lot at 10th and H (123 spaces); Three Hundred Thirty and no/100th dollars ($330.00) for the surface lot at 9th and I (66 spaces); Two Hundred Fifteen and no/100th dollars ($215.00) for the surface lot at 9th and J (43 spaces); Two Hundred Twenty-five and no/100th dollars ($225.00) for the first floor of the Eleventh Street garage (45 Spaces); and Seven Hundred Fifty and no/100th dollars ($750.00) for the Centre Plaza surface lot (150 spaces). In addition, a discount of $1 per space shall be provided at the Centre Plaza lot when

the rental of the Centre Plaza lot is in conjunction with an event at the Modesto Centre Plaza. In that case, the rate will be Six Hundred and no/100th dollars ($600.00), with Seventy-five and no/100th dollars ($75.00) of that amount going to the Centre Plaza operating fund.

(f) Additional surface parking facilities and/or hours of operation, including weekends may be authorized by the Parks, Recreation and Neighborhoods Director as appropriate to meet parking needs, comply with existing agreements, or allow for collection of fees for special events.

SECTION 3. FREE PARKING LOTS.

(a) The following municipal off-street parking facilities shall be free parking lots:

(1) Lot 13, north side of H Street between 15th and 16th Streets (Modesto Stanislaus Library);

(2) Lot 15, east side of 11th Street between F and G Streets (north of Fire Station #1); and

(3) Lot 16, east side of 11th Street between F and G Streets (south of Fire Station #1).

SECTION 4. DISABLED PERSONS. Notwithstanding any other provision of this resolution, disabled persons, as defined in Section 22511.5 of the California Vehicle Code, displaying a distinguishing license plate or distinguishing placard issued pursuant to Section 22511.5 of the California Vehicle Code may park free in any of the municipal off-street parking facilities specified in this resolution, except in reserved parking spaces.

SECTION 5. JURY PARKING. Persons ordered to appear for jury duty may park exclusively in the following municipal off-street parking facility in compliance with the fees and regulations specified in this resolution:

(1) Lot 10, exclusive all day, east side of 8th Street between I and K streets.

SECTION 6. Seventy-five percent (75%) of the gross evening revenues collected between the hours of 6:00 p.m. and 6:00 a.m. at the Eleventh Street Parking Garage shall be allocated for police services to support evening activities in proximity to that garage.

SECTION 7. The Finance Director, or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

SECTION 8. EFFECTIVE DATE. This resolution shall go into effect and be in full force and operation on and after February 7, 2007.

SECTION 9. RESCIND. Resolutions Nos. 2001-608 and 2003-105 are hereby rescinded effective at midnight on February 6, 2007.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-087

A RESOLUTION APPROVING THE PROTECTED-PERMISSIVE SIGNAL EVALUATION REPORT AND AUTHORIZING STAFF TO REPLACE THE PROTECTED-PERMISSIVE PHASE OPERATION WITH A PROTECTED LEFT-TURN OPERATION AT THE SYLVAN AVENUE/OAKDALE ROAD INTERSECTION (EAST/WEST DIRECTION)

WHEREAS, City staff has reviewed the Protected-Permissive Signal Evaluation Report and recommends approval to the City Council, and

WHEREAS, the City now has protected-permissive traffic signal phasing at 46 intersections, and

WHEREAS, staff recommends continuing use of protected-permissive phasing at appropriate locations and the monitoring of these installations for improvements and/or modifications based on periodic technical analysis, and

WHEREAS, after reviewing the data presented in the Protected-Permissive Signal Evaluation attached hereto as **Attachment 1** and incorporated herein by this reference, staff recommends replacing the protected-permissive phase operation with a protected left-turn operation at the Sylvan Avenue/Oakdale Road intersection (east/west direction), and

WHEREAS, the Safety & Communities Committee at its January 3, 2007, meeting reviewed this request and authorized its presentation to City Council,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Protected-Permissive Signal Evaluation report, attached hereto as Attachment 1.

BE IT FURTHER RESOLVED that the Council authorizes staff to replace the protected-permissive phase operation with a protected left-turn operation at the Sylvan Avenue/Oakdale Road intersection (east/west direction).

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-088

A RESOLUTION ACCEPTING THE ROBERTSON ROAD SANITARY SEWER IMPROVEMENTS AND PROVIDING SANITARY SEWER SERVICE FOR STANISLAUS COUNTY INFILL AREA KNOWN AS ROBERTSON ROAD NEIGHBORHOOD

WHEREAS, Stanislaus County administered the design and construction of the Robertson Road Sanitary Sewer System, and

WHEREAS, the City of Modesto has inspected and approved the facilities constructed, and

WHEREAS, the City of Modesto collection system can service the Robertson Road Neighborhood Infill Area defined as bordered by Robertson Road on the north, John Street on the south, Carpenter Road on the west, and Hays Street on the east, and

WHEREAS, the Robertson Road Neighborhood requires a positive sewer service to replace aging residential septic systems,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby accepts the Robertson Road Sanitary Sewer Improvements and will provide Sanitary Sewer Service for the Stanislaus County Infill Area known as Robertson Road Neighborhood.

BE IT FURTHER RESOLVED that the Council hereby directs City staff to provide for the operation and maintenance of the Robertson Road Sanitary Sewer System.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-089

A RESOLUTION ACCEPTING THE WORK BY RODGERS CONSTRUCTION AND ENGINEERING COMPANY, INC., FOR THE PROJECT TITLED "SCENIC DRIVE AND BODEM STREET RIGHT TURN LANE" AS COMPLETE, AUTHORIZING THE CITY CLERK TO FILE A NOTICE OF COMPLETION WITH THE STANISLAUS COUNTY RECORDER, AND AUTHORIZING PAYMENT OF AMOUNTS TOTALING $197,684.36.

WHEREAS, a report has been filed by the Public Works Director that the project titled "Scenic Drive and Bodem Street Right Turn Lane" has been completed by Rodgers Construction and Engineering Company, Inc., in accordance with the contract agreement dated April 5, 2005,

NOW, THEREFORE, BE IT RESOLVED by the Council that the project titled "Scenic Drive and Bodem Street Right Turn Lane" is hereby accepted as complete from said contractor, Rodgers Construction and Engineering Company, Inc., that the City Clerk is authorized to file a Notice of Completion with the Stanislaus County Recorder, and that payment of amounts totaling $197,684.36, is authorized as provided in the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-090

A RESOLUTION APPROVING A CONSULTANT SERVICES AGREEMENT WITH O'DELL ENGINEERING, INC., IN THE AMOUNT OF $15,658.82 FOR LANDSCAPE DESIGN SERVICES FOR PREPARATION OF CONSTRUCTION DOCUMENTS FOR LANDSCAPING AT THE SYLVAN AVENUE PEDESTRIAN OVERCROSSING PROJECT, AND AUTHORIZING THE COMMUNITY FACILITIES DISTRICT ADMINISTRATOR, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, on October 24, 2006, by Resolution No. 2006-678, the City Council awarded a construction contract in the amount of $1,556,375.00 to MCM Construction, Inc., to construct the Sylvan Avenue Pedestrian Overcrossing, and

WHEREAS, the Village One Facilities Master Plan was updated in May 2003 and contains a prioritization list for construction projects which contains all of the infrastructure projects that remain to be built in Village One, including the Pedestrian Overcrossing, and

WHEREAS, the Pedestrian Overcrossing will serve the James C. Enochs High School, and is among the improvement projects in the Village One Priority 1 list, and

WHEREAS, Chapter 2 of the Mitigated Negative Declaration for the Sylvan Avenue Pedestrian Overcrossing states that landscaping is part of the Pedestrian Overcrossing project, and

WHEREAS, on January 25, 2005, the City Council adopted Resolution No. 2005-50 approving an On-Call Landscape Architectural Service Provider List which list is valid from January 2005 through January 2008, and

WHEREAS, City staff has selected from the On-Call Landscape Architectural Service Provider List, O'Dell Engineering, Inc., to complete professional landscape architectural services for landscaping at the Sylvan Pedestrian Overcrossing, and

WHEREAS, City staff recommends the District execute an Agreement with O'Dell Engineering, Inc., in the amount of $15,658.82 for landscape design of landscaping at the Sylvan Avenue Pedestrian Overcrossing project, and

WHEREAS, the current budgeted amount of $15,658.82 for the Agreement is available in the CIP Account 2691-020-Q310 "Pedestrian Overcrossing" to cover the cost for these services,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby finds the potential impacts of this project have been adequately addressed within the context to a previously completed and certified Mitigated Negative Declaration. No changes have been proposed in this project subsequent to the just referenced action, which would require important revisions of the environmental document. No substantial changes have occurred in the circumstances under which the project is undertaken which would require such changes. Pursuant to Section 15162 of the CEQA Guidelines, no new environmental review need be completed, and this subsequent activity is entirely consistent with the anticipated project(s) that are analyzed in the previous environmental determination.

BE IT FURTHER RESOLVED that the Council hereby approves an Agreement between City of Modesto Communities Facilities District and O'Dell Engineering, Inc., for Landscape Design at the Sylvan Avenue Pedestrian Overcrossing in the amount of $15,658.82.

BE IT FURTHER RESOLVED that the District Administrator, or his designee, is hereby authorized to execute said Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-091

A RESOLUTION APPROVING THE PROJECT, INCLUDING PLANS AND SPECIFICATIONS FOR THE PROJECT TITLED "ROSELLE AVENUE AT FLOYD AVENUE IMPROVEMENTS," ACCEPTING THE BID AND APPROVING A $2,819,799.75 CONTRACT WITH TEICHERT CONSTRUCTION, FOR THE PROJECT TITLED, "ROSELLE AVENUE AT FLOYD AVENUE IMPROVEMENTS," AND AUTHORIZING THE COMMUNITY FACILITIES DISTRICT ADMINISTRATOR, OR HIS DESIGNEE, TO EXECUTE THE CONTRACT.

WHEREAS, plans and specifications have been prepared for the project titled "Roselle Avenue at Floyd Avenue Improvements" and City staff recommends approval by the City Council, and

WHEREAS, the bids received for "Roselle Avenue at Floyd Avenue Improvements" were opened at 11:00 a.m. on January 9, 2007, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the Public Works Director has recommended that the bid of $2,819,799.75 received from Teichert Construction, be accepted as the lowest responsible bid and the contract be awarded to Teichert Construction,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the "Roselle Avenue at Floyd Avenue Improvements" project, including the plans and specifications.

BE IT FURTHER RESOLVED that the Council hereby accepts the bid of Teichert Construction, in the amount of $2,819,799.75, and hereby awards Teichert Construction, the contract titled "Roselle Avenue at Floyd Avenue Improvements."

BE IT FURTHER RESOLVED that the Community Facilities District Administrator, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-092

A RESOLUTION FINDING THAT THE PROJECT IS WITHIN THE SCOPE OF THE FINAL PROGRAM ENVIRONMENTAL IMPACT REPORT FOR THE VILLAGE ONE SPECIFIC PLAN (SCH NO. 90020181).

WHEREAS, on May 24, 1994, the City Council of the City of Modesto certified a Supplemental to the Village One Program Environmental Impact Report (EIR) (SCH# 90020181), this supplement updated and modified the original EIR, and

WHEREAS, the Public Works Department, by Initial Study, EA/PW 2006-09, reviewed the proposed Roselle Avenue at Floyd Avenue Improvements Project, and made the determination that the proposed project will have no additional significant effect on the environment that was not identified in the EIR; and further, that no new or additional mitigation measures or alternatives may be required, and that, therefore, the proposed project is within the scope of the project covered by the EIR, and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the EIR and whether the subsequent project was described in the EIR as being within the scope of the project,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Initial Study prepared for the proposed Roselle Avenue at Floyd Avenue Improvements Project, a copy of which is attached hereto as **Exhibit "A",** and incorporated herein by reference, and based on the substantial evidence included in said Initial Study makes the following findings:

A. The proposed Roselle and Floyd Intersection Control Road Widening Project is within the scope of the Village One Program EIR as updated by the 1994 Final Supplemental EIR (SCH No. 90020181), which analyzed the potential impacts of build out of Village One, including roadways in this area.

B. No additional significant environmental effects will occur as a result of the Roselle and Floyd Intersection Control Road Widening Project that were not previously examined in the Village One Program EIR as updated by the 1994 Final Supplemental EIR.

C. No new mitigation measures or alternatives will be required as a result of the proposed Roselle and Floyd Intersection Control Road Widening Project that were not previously considered in the Village One Program EIR as updated by the 1994 Final Supplemental EIR.

D. There are no specific features unique to the Roselle and Floyd Intersection Control Road Widening Project that requires project specific mitigation measures. All certified mitigation measures identified in the EIR would apply city wide, including this project as appropriate.

E. This initial study provides substantial evidence to support findings A, B, C, and D above.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Public Works Director is hereby authorized and directed to file a notice of approval or determination within five (5) business days with the Stanislaus County Clerk pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

WRITTEN CHECKLIST

EA/PW No. 2006-09

I. PURPOSE

This written checklist, pursuant to CEQA Guidelines Section 15168 (C) (4), serves to make a determination where subsequent activities of a Program EIR involve site-specific operations, based on evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR. Based on a review of the project and Section 15162(a), this determination would permit the lead agency (City of Modesto) to approve the activity as being within the scope of the project covered by the Program EIR. This determination includes whether any new environmental document is required beyond the adopted Village One Specific Plan Program EIR (SCH# 90020181) for the proposed Floyd Avenue and Roselle Avenue Improvements (project).

On September 11, 1990, the Modesto City Council certified a Final Program Environmental Impact Report for the Village One Specific Plan. This Program EIR analyzed the impacts of build-out of the Village One Specific Plan, which includes the area in which this project is proposed. Subsequently, on May 24, 1994, the City Council certified a Supplemental to the Village One Program EIR. This supplement updated and modified the original EIR.

In Addition, on May 6, 2003, the City Council determined that the environmental effects of the Village One Facilities Master Plan Update (May 2003) and the Storm Drainage Master Plan Update projects have been addressed by the Village One Program EIR, as amended by the Supplemental EIR or are less than significant. Addenda for the Village One Facilities Master Plan Update (May 2003) and the Storm Drainage Master Plan Update were then prepared and certified by the City Council.

The 1994 Supplemental EIR that amended and superseded the 1990 Program EIR is the document reviewed for projects within the Village One Specific Plan area. Where appropriate feasible mitigation measures developed in the Supplement to the program EIR shall be incorporated into the proposed project as outlined in Section V of this Checklist.

II. PROJECT INFORMATION

1. **Project Title:**	Floyd Avenue and Roselle Avenue Improvements
2. **Lead Agency Name and Address:**	City of Modesto, P.O. Box 642, Modesto, CA 95353
3. **Contact Person and Phone Number:**	Paul Hom, Project Coordinator Modesto Capital Improvement Services 209/571-5175
4. **Project Location:**	Floyd Avenue between Grouse Crossing Way and Fine Avenue, and Roselle Avenue between Kodiak Drive and Belharbour Drive, Modesto, California (see attached Exhibit A)
5. **Project Sponsor's Name and Address:**	City of Modesto – Community Facilities District P.O. Box 642 Modesto, CA 95353
6. **General Plan Designation:**	The General Plan land use designation is Village Residential (VR)
7. **Zoning:**	Specific Plan-Overlay (SP-O) Zone

8. **Description of Project:** Pursuant to the General Plan and adopted Village One Specific Plan, the City of Modesto will construct road improvements to Floyd Avenue between Grouse Crossing Way and Fine Avenue, and Roselle Avenue between Kodiak Drive and Belharbour Drive implementing these Plans and as anticipated therein. These improvements include construction of a two-lane roundabout at the intersection of Roselle and Floyd Avenues. The roundabout will have a 120-foot diameter from curb to curb, with an inner landscaped area. Splitter islands will be located on all four approaches to guide vehicles into the roundabout, and the posted speed limit within the roundabout area will be 15 mph. Completion of this project is in specific furtherance of Mitigation Measure 7 of the Village One Supplemental EIR, which calls for completion of 4-lane improvements on Roselle Avenues. Mitigation Measure 14 calls for improvement of the Roselle/Floyd intersection to provide adequate capacity for projected traffic; the roundabout proposed at this location has been determined by the City's Traffic Engineer to provide the required capacity (memo dated December 19, 2005 from Firoz Vohra, Deputy Director of Public Works). Improvements to Floyd and Roselle will be to the City's 4-lane standard as specified in the Village One Facilities Master Plan, to include two northbound and two southbound lanes and a 16-foot-wide landscaped median on Roselle, and two eastbound and two westbound lanes and a 16-foot-wide landscaped median on Floyd. Bus turnouts will be included.

9. **Surrounding Land Uses and Setting:** The Village One Specific Plan Area is over half built, as planned and approved by the 1990 Village One Specific Plan. The project area is adjoined on the west by single-family subdivisions. On the north east corner is multi-family, the south east corner is commercial, with single-family subdivisions to the east.

10. **Other Public Agencies whose Approval Is Required:** None.

III. DETERMINATION:

Based on the analysis contained in this document, staff finds that pursuant to Guidelines Section 15162 the following is true for the proposed project:

(1) Major revisions to the Village One Program EIR as amended by the 1994 Final Supplemental EIR (SCH No. 90020181), with Addenda for the Village One Storm Drainage Master Plan and the Village One Facilities Master Plan Update, are not required because the project will not involve new significant environmental effects or increase severity of effects previously identified, and

(2) Major revisions to the Village One Program EIR as amended by the 1994 Final Supplemental EIR, with Addenda for the Village One Storm Drainage Master Plan and the Village One Facilities Master Plan Update, are not required because no substantial changes to circumstances have occurred that involve new significant environmental effects or increase severity of effects previously identified, and

(3) No new information of substantial importance that was not known has become available that shows:

a. one or more significant effects is not discussed in the Village One Program EIR as amended by the 1994 Final Supplemental EIR, with Addenda for the Village One Storm Drainage Master Plan and the Village One Facilities Master Plan Update,

b. identified significant effects will be more severe,

c. previously infeasible mitigation measures are now feasible,

d. project proponents have declined to adopt mitigation measures that would substantially reduce significant effects.

(4) Because no new significant effects have been identified and no new mitigation is required for the project, the environmental effects of the operation of the proposed project were covered by the Village One Program EIR as updated by the 1994 Final Supplemental EIR, with Addenda for the Village One Storm Drainage Master Plan and the Village One Facilities Master Plan Update. Therefore, pursuant to CEQA Section 15168 (C) (4) no new environmental document is required.

(5) Therefore, the Floyd Avenue and Roselle Avenue Improvements project is within the scope of the Village One Program EIR as updated by the 1994 Final Supplemental EIR, with Addenda for the Village One Storm Drainage Master Plan and the Village One Facilities Master Plan Update.

_____

Project Manager Date

IV. PROJECT EVALUATION:

The following written Checklist based on Appendix G of the CEQA Guidelines serves to document the evaluation of the site and activity of the proposed project pursuant to CEQA Guidelines Section 15168 (c) (4) to determine whether the environmental effects of the operation were covered in the Program EIR.

I.	**AESTHETICS.** Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
a.	Have a substantial adverse effect on a scenic vista?				
b.	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings along a scenic highway?	☐	☐	☐	☑
c.	Substantially degrade the existing visual character or quality of the site and its surroundings?	☐	☐	☐	☑
d.	Create a new source of substantial light or glare that would adversely affect daytime or nighttime views in the area?	☐	☐	☐	☑

Aesthetic and visual impacts are analyzed on pages III-100 through III-103 of the 1994 Supplement.

Responses to Checklist Questions

a,b. The Village One Specific Plan program EIR found that, as Village One is built, it will eliminate views of the valley and the distant mountains from adjacent areas and reduce the area's visual open space. However, the program EIR found the effects of Village One Development on scenic vistas and resources to be less than significant because views from the project area are minimal and there are no scenic resources in the area. The proposed Floyd Avenue and Roselle Avenue Improvements project would not change the extent or nature of construction in the specific plan area, or cause any other changes in the project area. Impacts on scenic vistas and resources would therefore remain the same as those identified in the program EIR. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR found that Village One would have a less-than-significant impact on the visual character of the area. The proposed Floyd Avenue and Roselle Avenue Improvements project would not change the design or layout of the construction proposed under the Village One Specific Plan. For this reason, impacts on the visual character of the area would remain the same as those identified in the program EIR. There would be no additional impact. No mitigation is required.

d. The proposed Floyd Avenue and Roselle Avenue Improvements project will incorporate the normal street lighting for a street of this type as found throughout the community and as specified in the City of Modesto Standard Specifications. This lighting is consistent with that studied in the Village One Specific Plan program EIR and would not change the extent or nature of construction in the specific plan area, or cause any other changes in the project area. For this reason, impacts associated with additional light and glare would remain the same as those identified in the program EIR. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
II.	**AGRICULTURAL RESOURCES.** In determining whether impacts on agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation. Would the project:				
a.	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☑
b.	Conflict with existing zoning for agricultural use or conflict with a Williamson Act contract?	☐	☐	☐	☑
c.	Involve other changes in the existing environment that, due to their location or nature, could result in conversion of Farmland to non-agricultural use?	☐	☐	☐	☑

Impacts on agricultural resources are analyzed on pages III-80 through III-94 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that approximately 670 acres of land designated as Prime Farmland and 588 acres of land designated as Unique Farmland would be lost as a result of the Village One project. This impact was determined to be significant and not mitigable. The City made a statement of overriding considerations when it certified the 1994 Supplement. The proposed Floyd Avenue and Roselle Avenue Improvements project would not affect this finding because the project area would remain the same. There would be no additional impact. No mitigation is required.

b. The Village One Specific Plan program EIR presented information showing that any Williamson Act contracts in the project area would be automatically cancelled on annexation of the land to the City of Modesto, which has occurred, or would expire within 10 years of the time the original program EIR was prepared. The last Williamson Act contract covering land in the project area has expired. There are now no lands in the project area under Williamson Act contract. The project area has also been rezoned consistent with the specific plan, and no lands in the project area are now zoned for agricultural use. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR identified a potential land use conflict between new residential uses in the specific plan area and adjacent agricultural uses. Such conflicts can lead to conversion of adjacent farmlands to other uses. The program EIR proposed mitigation measures for this potential impact that would reduce the impact's significance, although the EIR noted that the mitigation measure might not fully mitigate the impact. No additional mitigation measures are available for this impact. The proposed Floyd Avenue and Roselle Avenue Improvements project would not affect this finding because the project area and proposed land use would remain the same. There would be no additional impact. No mitigation is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
III. AIR QUALITY. When available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				

a.	Conflict with or obstruct implementation of the applicable air quality plan?	❑	❑	❑	☑
b.	Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	❑	❑	❑	☑
c.	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is a nonattainment area for an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors)?	❑	❑	❑	☑
d.	Expose sensitive receptors to substantial pollutant concentrations?	❑	❑	❑	☑
e.	Create objectionable odors affecting a substantial number of people?	❑	❑	❑	☑

Impacts on air quality are analyzed on pages III-45 through III-54 of the 1994 Supplement.

Responses to Checklist Questions

a., b. The Village One Specific Plan program EIR found that air pollution from project-related construction and construction traffic, project-related industrial/business park and urban area traffic, and fireplaces and wood stoves in planned residential areas would violate air quality standards and contribute to an existing air quality violation. Construction activities would temporarily increase TSP and PM10 standards in the project vicinity and could result in violation of the state and federal 24-hour PM10 standards in the project vicinity. Construction traffic emissions would contribute to violation of the state and federal 8-hour carbon monoxide (CO) and particulate matter (PM10) standards and the federal ozone standard in the Modesto Urban Area and the San Joaquin Valley Air Basin. Urban traffic pollution would contribute to violations of the state ozone, CO, and PM10 standards in the Modesto Urban Area and San Joaquin Valley Air Basin. Residential pollution would contribute to violations of the pollutant standard index in the Modesto Urban Area. Partial mitigation for these impacts is included in the program EIR, and the City of Modesto adopted a statement of overriding consideration for each impact. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the amount of development and construction in the project area, so trips generated by the project would not be affected and the types of land uses would not change. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR found that air pollutant emissions associated with traffic at build-out of Village One would exacerbate the existing ozone, PM10, and CO violations in the Modesto area and cause a significant cumulative impact. Partial mitigation for

these emissions is included in the 1994 supplement to the program EIR (Mitigation Measure # 2) and the City of Modesto made a statement of overriding consideration for each impact. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the amount of traffic associated with build-out of Village One or the types of land uses, so trips generated by the project would not be affected. There would be no additional impact. No additional mitigation is required.

d. The Village One Specific Plan program EIR found that PM10 generated during construction would aggravate the respiratory problems of people living and working nearby, therefore exposing sensitive receptors in the area to pollutant concentrations and causing a significant impact. However, the program EIR outlines mitigation measures that will be implemented to reduce the impact to an acceptable level (Mitigation Measure #40). The proposed Floyd Avenue and Roselle Avenue Improvements would not change the level of construction emissions. There would be no additional impact. No additional mitigation is required.

e. The Floyd Avenue and Roselle Avenue Improvements project does not contain any components that would create odors. The proposed Floyd Avenue and Roselle Avenue Improvements would not change planned uses of the project area. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
IV.	**BIOLOGICAL RESOURCES.** Would the project:				
a.	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☑
b.	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☑
c.	Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marshes, vernal pools, coastal wetlands, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☑

d.	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	❑	❑	❑	☑
e.	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	❑	❑	❑	☑
f.	Conflict with the provisions of an adopted habitat conservation plan, natural community conservation plan, or other approved local, regional, or state habitat conservation plan?	❑	❑	❑	☑

Impacts on biological resources are analyzed on pages III-68 through III-79 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that development within the Village One area could result in the loss of foraging habitat for Swainson's hawk, a state-listed threatened species, but found that mitigation measures identified in the program EIR would reduce the impact to a less-than-significant level. The proposed Floyd Avenue and Roselle Avenue Improvements would not change project area boundaries. Further, the area to be developed is adjacent to an existing roadway and is heavily disturbed; and has no current utility as foraging habitat. There would be no additional impact. No mitigation is required. A Swanson Hawk survey was completed in conjunction with the proposed commercial development to the southeast (copy on file), which confirms that the area is not in use as a foraging habitat.

b. The Village One Specific Plan program EIR did not find that any riparian habitat or other designated sensitive natural community was present in the Floyd Avenue and Roselle Avenue Improvements area, and so found that the project would have a less-than-significant impact. The proposed Floyd Avenue and Roselle Avenue Improvements would not change project area boundaries. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR found that two areas indicated as "drainage areas with wetland vegetation", designated in Figure 34, page 4.9-2 of the Program EIR, could result in the loss of lands that might be classified as wetlands by the U.S. Army Corps of Engineers. Floyd Avenue and Roselle Avenue Improvements are not located in one of those two areas and would not change the project area boundaries or the areas that would be disturbed. There would be no additional impact. No mitigation is required.

d. The Village One Specific Plan program EIR did not identify any migratory corridors in the Floyd Avenue and Roselle Avenue Improvements area, nor did it find that the project would interfere with the movement of any species. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project area boundaries. There would be no impact. No mitigation is required.

e., f. No local biological resource protection policies, ordinances, habitat conservation plans, or natural community conservation plans apply to the Village One Specific Plan area. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
V.	**CULTURAL RESOURCES.** Would the project:				
a.	Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?	☐	☐	☐	☑
b.	Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?	☐	☐	☐	☑
c.	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☐	☑
d.	Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☐	☑

Responses to Checklist Questions

a.–d. Impacts on cultural resources resulting from Village One (e.g., from construction of associated infrastructure) are addressed in the Opportunities/Constraints Report prepared for the Modesto Planning Commission (December 1, 1989). The report concluded that there are no known historic, archaeological, or paleontological resources in the Village One Specific Plan area. Based on the results of this report, (Cultural and Historic Resources Report, page 4 & 5, Exhibit D) it was determined that the likelihood that Floyd Avenue and Roselle Avenue Improvements would change or disturb human remains or significant historic, archaeological, or paleontological resources was low.

The proposed Floyd Avenue and Roselle Avenue Improvements would not change the locations or types of construction in the project area nor the boundaries of the project area. Construction of the roadway will not result in any effects on historic structures. Since no archaeological, or

paleontological resources were found in the previous document to be located in the project area, and since the proposed project would not have a significant impact on historic structures, there would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
VI.	**GEOLOGY AND SOILS.** Would the project:				
a.	Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
	1. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☐	☑
	2. Strong seismic groundshaking?	☐	☐	☐	☑
	3. Seismic-related ground failure, including liquefaction?	☐	☐	☐	☑
	4. Landslides?	☐	☐	☐	☑
b.	Result in substantial soil erosion or the loss of topsoil?	☐	☐	☐	☑
c.	Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project and potentially result in an onsite or offsite landslide, lateral spreading, subsidence, liquefaction, or collapse?	☐	☐	☐	☑
d.	Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	☐	☐	☐	☑
e.	Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems in areas where sewers are not available for the disposal of wastewater?	☐	☐	☐	☑

Impacts associated with geology and soils are analyzed on pages III-105 through III-108 of the 1994 Supplement.

Responses to Checklist Questions

a.–d. The program EIR, as supplemented, found that the project area is not subject to geologic or soil-related hazards that cannot be adequately mitigated through the implementation of existing city regulations, such as the building code. No significant impacts were identified, and no mitigation measures were required. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the locations or types of construction in the project area nor the boundaries of the project area. There would be no additional impact. No mitigation is required.

e. The Village One Specific Plan included provisions for the project to be served by public sewers. No septic tanks or alternative wastewater systems were proposed. The proposed Floyd Avenue and Roselle Avenue Improvements project would not change the proposed method of wastewater disposal. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
VII.	**HAZARDS AND HAZARDOUS MATERIALS.** Would the project:				
a.	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☐	☑
b.	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☐	☑
c.	Emit hazardous emissions or involve handling hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☐	☑
d.	Be located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☑
e.	Be located within an airport land use plan area or, where such a plan has not been adopted,	☐	☐	☐	☑

	be within two miles of a public airport or public use airport, and result in a safety hazard for people residing or working in the project area?				
f.	Be located within the vicinity of a private airstrip and result in a safety hazard for people residing or working in the project area?	❑	❑	❑	☑
g.	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	❑	❑	❑	☑
h.	Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	❑	❑	❑	☑

Impacts associated with hazards and hazardous materials are analyzed on pages III-80 through III-94 and III-109 through III-119 of the 1994 Supplement.

Responses to Checklist Questions

a.–c. The Village One Specific Plan does not allow any land uses that would use hazardous materials. The proposed Floyd Avenue and Roselle Avenue Improvements would not change land uses or project area boundaries. There would be no impact. No mitigation is required.

d. The Village One Specific Plan program EIR, as supplemented, found no hazardous materials were stored at the roadway site. No significant impacts were identified, and no mitigation measures were required. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the locations or types of construction in the project area nor the boundaries of the project area. There would be no additional impact. No mitigation is required.

e. The Village One Specific Plan program EIR found that the roadway would not be located in an airport land use plan area or within 2 miles of a public airport. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project area boundaries. There would be no impact. No mitigation is required.

f. The Village One Specific Plan program EIR found that a private airstrip, the Eastside Mosquito Abatement District Airstrip, is located east of the eastern border of the Village One project area. However, take-offs and landings were found to take place parallel to and outside the area's border, and flight patterns are generally situated to the east of the project area. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project area boundaries. There would be no additional impact. No mitigation is required.

g. Since the adoption of the Village One Specific Plan, the Modesto General Plan has been updated to include development of Village One consistent with the specific plan. City emergency plans are developed with the assumption that the Village One Specific Plan will be implemented. The proposed Floyd Avenue and Roselle Avenue Improvements would not change construction, land use, or other physical attributes of Village One. There would be no additional impact. No mitigation is required.

h. The Village One project is located in an area of the City of Modesto planned for build-out of an urban neighborhood. Currently, less than 50% of the project area remains undeveloped, with a covering of dry brush and vegetation. The potential for wild land fires is low, and this potential will decrease as build-out continues. Adoption of the proposed Floyd Avenue and Roselle Avenue Improvements would not change the schedule or amounts of development. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
VIII.	**HYDROLOGY AND WATER QUALITY.** Would the project:				
a.	Violate any water quality standards or waste discharge requirements?	❑	❑	❑	☑
b.	Substantially deplete groundwater supplies or interfere substantially with groundwater recharge, resulting in a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level that would not support existing land uses or planned uses for which permits have been granted)?	❑	❑	❑	☑
c.	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation onsite or offsite?	❑	❑	❑	☑
d.	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding onsite or offsite?	❑	❑	❑	☑
e.	Create or contribute runoff water that would exceed the capacity of existing or planned	❑	❑	❑	☑

	stormwater drainage systems or provide substantial additional sources of polluted runoff?				
f.	Otherwise substantially degrade water quality?	❑	❑	❑	☑
g.	Place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	❑	❑	❑	☑
h.	Place within a 100-year flood hazard area structures that would impede or redirect floodflows?	❑	❑	❑	☑
i.	Expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?	❑	❑	❑	☑
j.	Contribute to inundation by seiche, tsunami, or mudflow?	❑	❑	❑	☑

Impacts associated with hydrology are analyzed on pages III-109 through III-119 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR did not find that the Village One project would violate any water quality standards or waste discharge requirements. The proposed Floyd Avenue and Roselle Avenue Improvements would not change water use or discharge associated with the Village One project. There would be no additional impact. No mitigation is required.

b. The Village One Specific Plan program EIR found that the Village One project might interfere with local groundwater recharge. However, the impact was found to be less than significant because the project area is not a major groundwater recharge area and the project includes a recharge/discharge plan for disposal of storm-water runoff and recharge of groundwater. In Addition, in 2003 two addenda to the Village One program EIR were prepared and certified. One related to the Facilities Master Plan Update and the other related to the Storm Drainage Master Plan Update.

   The proposed Floyd Avenue and Roselle Avenue Improvements would not change the amount of impervious surface in the project area or the proposed storm drain facilities. There would be no additional impact. No additional mitigation is required.

c.–e. The Village One Specific Plan program EIR found that the Village One project will substantially alter the existing drainage pattern of the area but, because the project will incorporate an urban storm drain system, will not result in any erosion impacts. The proposed Floyd Avenue and Roselle

Avenue Improvements would not change the amount of impervious surface or the proposed storm drain facilities. There would be no additional impact. No mitigation is required.

f. The Village One Specific Plan program EIR did not find that the Village One project would otherwise substantially degrade water quality. The proposed Floyd Avenue and Roselle Avenue Improvements would not change water use or discharge from that already determined. There would be no additional impact. No mitigation is required.

g.–i. According to the Village One Specific Plan program EIR, the Village One project is not situated in a 100-year flood hazard area or downstream from a levee or dam. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project area boundaries. There would be no impact. No mitigation is required.

j. The Village One project area is located in a flat, inland area not susceptible to seiche, tsunami, or mudflow. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project area boundaries. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
IX.	**LAND USE AND PLANNING.** Would the project:				
a.	Physically divide an established community?	☐	☐	☐	☑
b.	Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to, a general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☑
c.	Conflict with any applicable habitat conservation plan or natural community conservation plan?	☐	☐	☐	☑

Impacts associated with land use and planning are analyzed on pages III-80 through III-94 of the 1994 Supplement.

Responses to Checklist Questions

a. The proposed Floyd Avenue and Roselle Avenue Improvements would not result in any physical changes to the environment beyond those proposed as a part of the Village One project. Village One would continue to be developed as a planned community; therefore, the proposed Floyd Avenue and Roselle Avenue Improvements would not divide an established community. There would be no impact, and no mitigation is required.

b., c. The Village One Specific Plan has been adopted by the City of Modesto and has been incorporated into the Modesto General Plan. The proposed Floyd Avenue and Roselle Avenue Improvements would be consistent with the Village One Specific Plan as amended by subsequent addenda. There are no other applicable land use or conservation plans for the project area. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
X.	**MINERAL RESOURCES.** Would the project:				
a.	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☑
b.	Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?	☐	☐	☐	☑

Responses to Checklist Questions

a., b. No known mineral resources or important recovery sites are located in the Village One Specific Plan Area. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XI.	**NOISE.** Would the project:				
a.	Expose persons to or generate noise levels in excess of standards established in a local general plan or noise ordinance or applicable standards of other agencies?	❑	❑	❑	☑
b.	Expose persons to or generate excessive groundborne vibration or groundborne noise levels?	❑	❑	❑	☑
c.	Result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	❑	❑	❑	☑
d.	Result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	❑	❑	❑	☑
e.	Be located within an airport land use plan area, or, where such a plan has not been adopted, within two miles of a public airport or public use airport and expose people residing or working in the project area to excessive noise levels?	❑	❑	❑	☑
f.	Be located in the vicinity of a private airstrip and expose people residing or working in the project area to excessive noise levels?	❑	❑	❑	☑

Impacts associated with noise are analyzed on pages III-55 through III-67 of the 1994 Supplement.

Responses to Checklist Questions

a., c. The Village One Specific Plan program EIR found that traffic associated with the Village One project would expose existing residential uses on Claus Road, Floyd Avenue, Briggsmore Expressway, Oakdale Road, Roselle Avenue and Sylvan Avenue, to noise levels exceeding the general plan thresholds for residential uses. Mitigation measures identified in the program EIR were determined to reduce the level of impact, but in some cases not to a less-than-significant level. The City made a statement of overriding considerations when it certified the 1994 Supplement.

The proposed Floyd Avenue and Roselle Avenue Improvements project would not change project-related noise-generating activities. There would be no additional impact. No mitigation is required.

b. The Village One Specific Plan program EIR found that the Village One project would not expose people to, or generate excessive, groundborne vibration or groundborne noise levels. The proposed Floyd Avenue and Roselle Avenue Improvements project would not change project-related noise-generating activities. There would be no impact. No mitigation is required.

d. The Village One Specific Plan program EIR found that construction of the Village One project would result in a substantial temporary increase in ambient noise levels for residential housing. However, mitigation measures were incorporated into the program EIR to reduce the impact to a less-than-significant level. The proposed Floyd Avenue and Roselle Avenue Improvements would not change construction activities. There would be no additional impact. No additional mitigation is required.

e. The Village One Specific Plan program EIR found that the Village One project would not be located in an airport land use plan area or within 2 miles of a public airport. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project area. There would be no impact. No mitigation is required.

f. The Village One Specific Plan program EIR found that a private airstrip, the Eastside Mosquito Abatement District Airstrip, is located east of the eastern border of the Village One project area. However, take-offs and landings take place parallel to and outside the area's border, and flight patterns are generally situated east of the project area. The adjacent land use would be a business park, which would not be significantly affected by the limited noise generated at the airstrip. The proposed Floyd Avenue and Roselle Avenue Improvements would not change land use designations or the boundaries of the project area. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XII.	**POPULATION AND HOUSING.** Would the project:				
a.	Induce substantial population growth in an area, either directly (e.g., by proposing new homes and businesses) or indirectly (e.g., through extension of roads or other infrastructure)?	☐	☐	☐	☑
b.	Displace a substantial number of existing housing units, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☑
c.	Displace a substantial number of people, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☑

Impacts on population and housing are analyzed on pages III-95 through III-99 of the 1994 Supplement.

Responses to Checklist Questions

a.–c. The Village One Specific Plan program EIR found that the Village One project would result in no significant impacts on population and housing units. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the amount of housing or employment in the specific plan area. There would be no impact. No mitigation is required.

XIII. PUBLIC SERVICES. Would the project:

a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities or a need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the following public services:

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
Fire protection?	❑	❑	❑	☑
Police protection?	❑	❑	❑	☑
Schools?	❑	❑	❑	☑
Parks?	❑	❑	❑	☑
Other public facilities?	❑	❑	❑	☑

Impacts on public services are analyzed on pages III-120 through III-158 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that the only significant impact the Village One project would have on public services would be in the areas of fire protection and law enforcement. Mitigation measures were identified in the program EIR to reduce the level of this impact to a less-than-significant level. No other significant impacts on public services were identified. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the provision of public services. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XIV.	**RECREATION.** Would the project:				
a.	Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	❑	❑	❑	☑
b.	Include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?	❑	❑	❑	☑

Impacts on recreation are analyzed on pages III-120 through III-158 of the 1994 Supplement.

Responses to Checklist Questions

a., b. No significant impacts on recreation were identified in the program EIR. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the provision of parks and recreation facilities. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XV.	**TRANSPORTATION/TRAFFIC.** Would the project:				
a.	Cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in the number of vehicle trips, the volume-to-capacity ratio on roads, or congestion at intersections)?	☐	☐	☐	☑
b.	Cause, either individually or cumulatively, exceedance of a level-of-service standard established by the county congestion management agency for designated roads or highways?	☐	☐	☐	☑
c.	Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	☐	☐	☐	☑
d.	Substantially increase hazards because of a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☐	☑
e.	Result in inadequate emergency access?	☐	☐	☐	☑
f.	Result in inadequate parking capacity?	☐	☐	☐	☑
g.	Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?	☐	☐	☐	☑

Impacts on transportation and traffic are analyzed on pages III-40 – III-44 of the 1994 Supplement.

Responses to Checklist Questions

a., b. The Village One Specific Plan program EIR found that the Village One project would cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system and would affect level of service at several intersections. Mitigation measures identified in the program EIR were identified to reduce impacts to a less-than-significant level for all intersections except the Briggsmore Avenue/Oakdale Avenue intersection. For that intersection, the impact

was determined to be significant and not mitigable. The City of Modesto made a statement of overriding considerations for that impact at the time it certified the 1994 Supplement. The proposed Floyd Avenue and Roselle Avenue Improvements would not alter traffic patterns in the project area or result in additional trips. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR did not find that the Village One project would result in a change in air traffic patterns. The proposed Floyd Avenue and Roselle Avenue Improvements do not include any elements that would affect air traffic patterns. There would be no impact. No mitigation is required.

d. The Village One Specific Plan program EIR did not find that the Village One project included any hazardous design features or increased any incompatible uses for roads in the project area. The proposed Floyd Avenue and Roselle Avenue Improvements incorporate roadway (including roundabout) design consistent with City of Modesto Standard Specifications. There would be no impact. No mitigation is required.

e. The Village One Specific Plan program EIR did not find that the Village One project would result in inadequate emergency access in the project area. Project design included provision of adequate roadways to serve the Village One development. The proposed Floyd Avenue and Roselle Avenue Improvements would not change roadway layout or land uses. There would be no additional impact. No mitigation is required.

f. The Village One Specific Plan program EIR did not find that the Village One project would result in inadequate parking capacity in the project area. The provision of parking, consistent with zoning requirements for all land uses, will be required. The proposed Floyd Avenue and Roselle Avenue Improvements would not change land use standards related to parking or amounts or intensity of development. There would be no impact. No mitigation is required.

g. The Village One Specific Plan has been adopted by the City of Modesto. Policies of the specific plan are coordinated with the policies of the general plan, including those applicable to transportation. The proposed Floyd Avenue and Roselle Avenue Improvements does not include any changes related to transportation policies, and would have no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XVI.	**UTILITIES AND SERVICE SYSTEMS.** Would the project:				
a.	Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	❑	❑	❑	☑
b.	Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	❑	❑	❑	☑
c.	Require or result in the construction of new stormwater drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	❑	❑	❑	☑
d.	Have sufficient water supplies available to serve the project from existing entitlements and resources, or would new or expanded entitlements be needed?	❑	❑	❑	☑
e.	Result in a determination by the wastewater treatment provider that serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	❑	❑	❑	☑
f.	Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	❑	❑	❑	☑
g.	Comply with federal, state, and local statutes and regulations related to solid waste?	❑	❑	❑	☑

Impacts on utilities and service systems are analyzed on pages III-120 through III-158 of the 1994 Supplement.

Responses to Checklist Questions

a. The City provides sewer services to the Village One area. All wastewater would be directed to city wastewater treatment facilities. No wastewater discharges would occur in the project area. The proposed Floyd Avenue and Roselle Avenue Improvements would not increase the amount of

wastewater that will be generated at build-out of the Village One project. There would be no additional impact. No mitigation is required.

b., e. The Village One Specific Plan program EIR discusses the changes and new facilities that will be needed for the Village One project. The EIR found that, with mitigation, there would be no significant impact on water or wastewater infrastructure. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project demand for water or wastewater service. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR discusses the changes and new facilities that will be needed for the Village One project. The EIR found that, with mitigation, there would be no significant impact on storm water drainage facilities. An update to the Storm Drainage Master Plan has been completed and Adopted by the Modesto City Council. An addendum to the Village One program EIR for the Storm Drainage Master Plan has also been completed and adopted by the Modesto City Council.

The proposed Floyd Avenue and Roselle Avenue Improvements would not change the project drainage plans or expected volume of storm-water. The project would not result in any additional impacts or the need for any additional mitigation beyond that assessed in the Addenda to the Village One Program EIR for the Storm Drainage Master Plan. No Mitigation is required

d. The Village One Specific Plan program EIR found that, with mitigation, the effects of the Village One project on water supply would be less than significant. The proposed Floyd Avenue and Roselle Avenue Improvements would not change the Village One project's demand for water. There would be no additional impact. No mitigation is required.

f., g. The Village One Specific Plan program EIR found that the area's landfills have sufficient permitted capacity to accommodate the Village One project's solid waste disposal needs. The proposed Floyd Avenue and Roselle Avenue Improvements would not result in any generation of additional solid waste. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XVII.	**MANDATORY FINDINGS OF SIGNIFICANCE.**				
a.	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☐	☑
b.	Does the project have impacts that are individually limited but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	☐	☐	☐	☑
c.	Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☐	☑

Cumulative impacts are analyzed on page III-161 of the 1994 Supplement.

Responses to Checklist Questions

a. As described above, the proposed Floyd Avenue and Roselle Avenue Improvements would not result in any significant impacts on the environment over and above those associated with implementation of the Village One Specific Plan and as analyzed in the Village One Specific Plan program EIR and subsequent supplements and addenda.

b. As described above, the proposed Floyd Avenue and Roselle Avenue Improvements would not result in any significant impacts, either on a project or on cumulative level, over and above those associated with implementation of the Village One Specific Plan and as analyzed in the Village One Specific Plan program EIR and subsequent supplements and addenda.

c. As described above, the proposed Floyd Avenue and Roselle Avenue Improvements would not result in any significant impacts affecting

humans over and above those associated with implementation of the Village One Specific Plan and as analyzed in the Village One Specific Plan program EIR and subsequent supplements and addenda.

V. MITIGATION APPLIED TO PROJECT

The following mitigation measures developed in the 1994 Village One Specific Plan Supplement to the Program EIR are appropriate to the project and will be incorporated into the project. Therefore, the environmental effects of the project were covered by the program EIR.

I. Aesthetics
None

II. Agricultural Resources
None

III. Air Quality
None

IV. Biological Resources
None

V. Cultural Resources
None

VI. Geology and Soils
None

VII. Hazards and Hazardous Materials
None

VIII. Hydrology and Water Quality
None

IX. Land Use and Planning
None

X. Mineral Resources
None

XI. Noise
None

XII. Population and Housing

None

XIII. Public Services

None

XIV. Recreation

None

XV. Transportation/Traffic

Completion of this project is in specific furtherance of Mitigation Measure 7 of the Village One Supplemental EIR, which calls for completion of 4-lane improvements on Roselle Avenue. Mitigation Measure 14 calls for improvement of the Roselle/Floyd intersection to provide adequate capacity for projected traffic; the roundabout proposed at this location has been determined by the City's Traffic Engineer to provide the required capacity.

XVI. Utilities and Service Systems

None

XVII. Mandatory Findings of Significance

None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-093

A RESOLUTION APPROVING THE INCREASE IN PAYMENTS TO BUS PASS OUTLETS FOR MONTHLY BUS PASS SALES FROM $0.25 PER PASS SOLD TO $0.50 PER PASS SOLD.

WHEREAS, in October 1989, Council approved the plan to establish outlets to sell monthly bus passes, and

WHEREAS, there are currently eight (8) outlets that have executed agreements with the City to sell these monthly bus passes, and

WHEREAS, these outlets are strategically located around Modesto, and

WHEREAS, the current amount paid per bus pass sold is $0.25, which has not been increased since 1996, and

WHEREAS, it is necessary to increase the payment from the current $0.25 to $0.50 per pass sold to encourage businesses to continue participation in the program, and

WHEREAS, current executed agreements with the pass outlets allows the Council, by Resolution, to change the rate paid per monthly bus pass sold from time to time, and

WHEREAS, this recommended increase will cost approximately $575.00 annually and funds are budget in Account 6540-165-1672-0235 to cover this increase,

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Modesto hereby approves the increase in payment to bus pass outlets for monthly bus pass sales from $0.25 per pass sold to $0.50 per pass sold.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-094

A RESOLUTION APPROVING THE RETENTION OF CITY FORCES TO PERFORM FORESTRY MAINTENANCE SERVICES FOR A TWO-YEAR TERM, WITH THE TERM OF THE CONTRACT TO BEGIN ON JULY 1, 2007.

WHEREAS, the City of Modesto has used internal staff to perform Forestry Services for a number of years, and

WHEREAS, in 1994 an external management auditing firm, Arroyo Seco and Associates, compared City costs/outputs with outside service contractor costs with similar California cities, and

WHEREAS, the recommendation of Arroyo Seco and Associates, after detailed analysis, was to continue the use of internal staff for these services, and

WHEREAS, in FY 2004-05 the budget for tree-related services was approximately $3.2 million; however, the budget was reduced for FY 2005-06 due to shortfalls in the Gas Tax Fund and General Fund, and

WHEREAS, the heart of the tree-related services is planned cycle pruning, which includes general maintenance and mistletoe removal, and

WHEREAS, for several years crews were able to perform these tasks on a four-year cycle, and

WHEREAS, due to budget cuts and the growth of trees in size and number, the cycle has been extended to seven years, and

WHEREAS, because of the seven-year cycle change and the need to reduce overall expenditures, staff brought forward a recommendation to begin the managed competition process to see if these services could be performed at a lower costs and/or increased service levels at the same cost, and

WHEREAS, on June 14, 2005, Council, by motion, directed staff to begin the managed competition process, to begin the "meet and confer" process with the affect bargaining units, and authorized the issuance of a formal Request for Proposals (RFP) for Forestry Services by Resolution 2005-314, and

WHEREAS, on October 24, 2006, Council, by motion, approved a modification to the RFP, limiting the scope of the project to one-third of the forestry program and for all tree and stump removals, and

WHEREAS, this modification insured City staff minimum ramp up time to resume the program if the contract was awarded to an outside contractor and they failed to perform according to the terms of the contract, and

WHEREAS, the City's formal RFP process was followed and five (5) proposers chose to respond; however, only two were deemed to be responsive, Grover Landscaping and the Modesto City Employees Association (MCEA), and

WHEREAS, MCEA received the highest points in total evaluation, and the RFP Evaluation Committee recommended the contract be awarded to MCEA, and

WHEREAS, the MCEA'S proposal was developed using actual current costs for these services and represents no change in the Forestry's Division's budget, and

WHEREAS, MCEA's proposal is based on the full staffing of the Forestry Division, and

WHEREAS, under separate Council action, the Public Works Position Allocation is being amended to reallocate two (2) limited-term tree trimmer positions to full-time status in order to maintain the five-year pruning cycle as stated in MCEA's proposal, and

WHEREAS, starting the term of the contract on July 1, 2007 will align it with the FY 2007-08 budget cycle, and

WHEREAS, the Finance Committee, at its January 22, 2007 meeting, recommended approval of this action to retain City Forces to perform Forestry Maintenance Services for a two-year term,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves retaining City Forces to perform Forestry Maintenance Services for a two-year term, with the term of the contract to begin July 1, 2007.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-095

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MODESTO CALLING A SPECIAL ELECTION FOR THE PURPOSE OF SUBMITTING THE LEVY OF THE CITY OF MODESTO COMMUNITY FACILITIES DISTRICT NO. 1997-1 (NORTH BEYER PARK) SPECIAL TAXES TO THE QUALIFIED ELECTORS OF THE TERRITORY PROPOSED TO BE ANNEXED TO THE DISTRICT (ANNEXATION NO. 2)

WHEREAS, this Council did, on January 2, 2007, adopt its Resolution No. 2007-021 (the "Resolution of Intention to Annex") to indicate its intention to annex certain territory to the City's Community Facilities District No. 1997-1 (North Beyer Park) (the "District") and authorize the levy of the District special taxes within the territory proposed to be annexed (the "Annexed Territory"), pursuant to Chapter 2.5 of Part 1 of Division 2 of Title 5 (commencing with Section 53311) of the California Government Code, commonly known as the "Mello-Roos Community Facilities Act of 1982" (the "Act"), and set a hearing thereon; and

WHEREAS, notice of the hearing was duly published as required by law, as evidenced by the proof of publication on file with the City Clerk; and

WHEREAS, a map of the Annexed Territory, entitled "Annexation Map No. 2 of Community Facilities District No. 1997-1 (North Beyer Park) of the City of Modesto, County of Stanislaus, State of California," was recorded on January 3, 2007, in the Office of the County Recorder of the County of Stanislaus, in Book 4 of Maps of Assessment and Community Facilities Districts, at page 63; and

WHEREAS, at the time and date set for the hearing (February 6, 2007) pursuant to the Resolution of Intention to Annex, this Council held the public hearing, as required by the Act, related to the proposed annexation and the levy of the District special taxes

within the Annexed Territory, and all other matters set forth in the Resolution of Intention to Annex; and

WHEREAS, at the hearing all persons desiring to be heard on all matters pertaining to the proposed annexation and the levy of the District special taxes within the Annexed Territory, and all other matters set forth in the Resolution of Intention to Annex, including all interested persons for or against the proposed annexation to the District and the levy of the District special taxes within the Annexed Territory were heard and considered, and a full and fair hearing was held thereon; and

WHEREAS, at the hearing evidence was presented to this Council on the matters before it, and this Council, at the conclusion of the hearing, was fully advised as to all matters related to the proposed annexation and the levy of the District special taxes within the Annexed Territory, and all other matters set forth in the Resolution of Intention to Annex; and

WHEREAS, written protests against the proposed annexation and the levy of the District special taxes within the Annexed Territory have not been filed with the City Clerk by 50 percent or more of the registered voters or six registered voters, whichever is more, residing within the District or residing within the Annexed Territory, or the owners of one-half or more of the land in the District, or in the Annexed Territory; and

WHEREAS, the Stanislaus County Registrar of Voters has certified there are less than 12 registered voters residing in the Annexed Territory; accordingly, the qualified electors are the landowners; and

WHEREAS, the City Clerk, being the Council's designated election official for purposes of the election herein called, has concurred in the election date herein set forth for the election;

NOW THEREFORE, BE IT RESOLVED, ORDERED AND FOUND by the City Council of the City of Modesto that:

SECTION 1. The foregoing recitals are true and correct.

SECTION 2. All prior proceedings taken with respect to the annexation of the Annexed Territory to the District, and the levy of the District special taxes within the Annexed Territory were valid and in conformity with the requirements of the Act. This determination shall be final and conclusive upon all persons.

SECTION 3. The proposed annexation of the Annexed Territory to the District and the levy of the District special taxes within the Annexed Territory have not been precluded by majority protest pursuant to Section 53339.5 of the Act.

SECTION 4. As stated in the Resolution of Intention to Annex, it is the intention of this Council, subject to the approval of the qualified electors of the Annexed Territory, to annex the Annexed Territory to the District and levy the District special taxes within the Annexed Territory. Upon such approval the Council will be authorized to levy the District special taxes within the Annexed Territory.

SECTION 5. A special election is hereby called at which the question of levying the District special taxes within the Annexed Territory shall be submitted to the qualified electors of the Annexed Territory. The election shall be held in accordance with and subject to the Act, all of the terms of which shall, unless waived as herein provided, be

applicable to such election. The ballot measure shall be substantially in the form attached hereto as **Exhibit A**.

SECTION 6. Fewer than 12 persons have been registered to vote within the Annexed Territory for each of the 90 days preceding the close of the hearing referenced herein. Accordingly, the vote shall be by the landowners of the Annexed Territory, and each such landowner shall have one vote for each acre or portion thereof that he or she owns within the Annexed Territory. The ballots shall be distributed by mail with return postage prepaid, or by personal service, to each landowner, all as provided in Section 53326 of the Act.

Since the City Clerk has received an appropriate waiver of time limits and other requirements pertaining to the conduct of the election by the owner of all of the land in the Annexed Territory (the "Landowner"), the election shall be held on the 6th day of February 2007. The election shall be conducted by the City Clerk in the manner required by this resolution, the Act and applicable laws.

The hour on such date when the ballots are required to be received in the office of the City Clerk is 6:00 p.m., Pacific Time, provided that if all qualified electors have voted prior to such time, the election shall be closed upon the receipt of all of the ballots.

SECTION 7. In accordance with Section 53327(b) of the Act, analysis and arguments, as required by Section 53327(a) of the Act are hereby waived, as the City Clerk has received the unanimous consent to such waivers from the Landowner.

SECTION 8. The publication of this Resolution as notice of the special election is hereby waived as the City Clerk has received the unanimous consent to such waiver from the Landowner.

SECTION 9. The Annexed Territory shall constitute a single election precinct for the purpose of holding the election.

SECTION 10. The City Clerk is hereby authorized to take any and all steps necessary for the holding of the election, and to perform and render all services and proceedings incidental to and in connection with the election.

SECTION 11. The City Clerk shall canvass the returns and certify the results of the election to this Council. If two-thirds or more of the votes cast are in favor of levying the District special taxes in the Annexed Territory, this Council may thereafter order the annexation of the Annexed Territory to the District and levy the District special taxes in the Annexed Territory in the amount and for the purposes specified in Resolution No. 97-355 adopted by this Council on June 19, 1997 (the "Resolution of Formation").

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th of February 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-096

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MODESTO CANVASSING THE RESULTS OF THE FEBRUARY 6, 2007, ELECTION HELD WITHIN THE TERRITORY PROPOSED TO BE ANNEXED TO CITY OF MODESTO COMMUNITY FACILITIES DISTRICT NO. 1997-1 (NORTH BEYER PARK), AND ORDERING ANNEXATION OF THE TERRITORY TO THE DISTRICT (ANNEXATION NO. 2)

WHEREAS, this Council is conducting proceedings pertaining to the annexation of certain territory to the City's Community Facilities District No. 1997-1 (North Beyer Park) (the "District") and the levy of the District special taxes (the "District Special Taxes") within such territory, as described in its Resolution No. 2007-021, entitled "A Resolution of the City Council of the City of Modesto of Intention to Annex Territory to Community Facilities District No. 1997-1 (North Beyer Park) and to Authorize the Levy of Special Taxes therein (Annexation No. 2)" adopted on January 2, 2007, pursuant to Chapter 2.5 of Part 1 of Division 2 of Title 5 (commencing with Section 53311) of the California Government Code, commonly known as the "Mello-Roos Community Facilities Act of 1982" (the "Act"); and

WHEREAS, the owners of all the property within the territory proposed to be annexed to the District waived those provisions related to the timing and conduct of the election referenced in Sections 5, 6, 7 and 8 of this Council's Resolution No. 2007-096, adopted on February 6, 2007, and, as a result, this Council called an election within the territory proposed to be annexed to the District (the "Election") for February 6, 2007, or as soon thereafter as practicable, relative to the foregoing; and

WHEREAS, on February 6, 2007, the Election was held; and

WHEREAS, the City Clerk has certified that at the Election the proposition of levying the District Special Taxes within the territory proposed to be annexed to the District was approved by more than two-thirds (2/3) of the votes cast at the Election;

NOW, THEREFORE, BE IT RESOLVED, ORDERED AND FOUND by the City Council of the City of Modesto that:

SECTION 1. The Election was duly and validly conducted in conformity with all applicable laws pertaining thereto. It is hereby determined that the owner or owners of the territory proposed to be annexed are as set forth in the Certificate of City Clerk as to Distribution of Official Ballots, submitted to this Council and on file with the City Clerk.

SECTION 2. The ballot proposition presented to the qualified electors of the territory proposed to be annexed at the Election received at least two-thirds (2/3) of the votes cast at the Election. A copy of the City Clerk's certificate of election results is attached.

SECTION 3. Pursuant to Section 53339.8 of the Act, it is hereby ordered that the territory proposed to be annexed to the District pursuant to Resolution No. 2007-021 be annexed to and be a part of the District with full legal effect, and that the District Special Taxes be levied within the territory.

SECTION 4. The City Clerk is hereby directed to enter this resolution on the minutes of this City Council, which shall constitute the official declaration of the result of the Election.

SECTION 5. The City Clerk is further authorized and directed to record an amendment to the Notice of Special Tax Lien with the County Recorder of the County of Stanislaus, within 15 days from the date hereof, in accordance with the provisions of Sections 3114.5 and 3117.7 of the California Streets and Highways Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	None

CERTIFICATE OF CITY CLERK

I, JEAN MORRIS, City Clerk of the City of Modesto, hereby certify that, pursuant to Resolution No. 2007-095, A Resolution of the City Council of the City of Modesto Calling an Election for the Purpose of Submitting the Levy of the City of Modesto Community Facilities District No. 1997-1 (North Beyer Park) Special Taxes to the Qualified Electors of the Territory Proposed to be Annexed to the District (Annexation No. 2) adopted on January 2, 2007, by the City Council of the City of Modesto, I did conduct the Special Tax Election on February 6, 2007, and that the election was conducted by mail or in person at the City Hall of the City of Modesto.

I further certify that the following shows the full text of the measure submitted to the voters at the election and the full and true totals of all votes cast for and against the measure.

Proposition A. Shall special taxes, with maximum rates, method of apportionment, and manner of collection as provided in Exhibit A to the City's Resolution No. 1997-355 entitled "A Resolution of the City Council of the City of Modesto of Formation, Establishing City of Modesto Community Facilities District No. 1997-1, Authorizing the Levy of Special Taxes within the District, Preliminarily Establishing an Appropriations Limit for the District, and Calling an Election for the Purpose of Submitting the Levy of the Special Tax and the Establishment of the Appropriations Limit to the Qualified Electors of the District (North Beyer)" (the "Resolution of Formation"), adopted by the City Council on June 24, 1997, which is incorporated herein by this reference, be levied within the territory proposed to be annexed to City of Modesto Community Facilities District No. 1997-1 (North Beyer Park) pursuant to the City Resolution No. 2007-021, entitled "A Resolution of Intention to Annex Territory to Community Facilities District No. 1997-1 (North Beyer Park) and to authorize the levy of Special Taxes therein. (Annexation No. 2) (the "Resolution of Intention to Annex") adopted by the City Council of the City of Modesto on January 2, 2007, for the purposes set for in the Resolution of Formation?

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-097

A RESOLUTION APPROVING A DEVELOPMENT PLAN FOR PLANNED DEVELOPMENT ZONE, P-D(577), FOR A MULTI-FUNCTION MINISTRY CENTER ON PROPERTY LOCATED ON THE WEST SIDE OF MARTIN LUTHER KING DRIVE AND ON THE NORTH SIDE OF VINE STREET. (CITY MINISTRY NETWORK, INC.)

WHEREAS, a verified application for an amendment to Section 31-3-9 of the Zoning Map was filed by City Ministry Network, Inc. on March 2, 2006, to rezone from Low Density Residential Zone, R-1, and Planned Development Zones, P-D(503) and P-D(533) to a Planned Development Zone, P-D(577), to allow for a multi-function center on three combined parcels totaling 2.56 acres, property located on the northwest corner of Martin Luther King Drive and Vine Street, described as follows:

All that certain real property being a portion of the South half of Lot 9 of Spencer Colony, according to the Official Map thereof, filed in the office of the Recorder of Stanislaus County, State of California, on December 16, 1904 in Volume 2 of Maps at Page 3, described as Follows

P-D(533) to P-D(577)

The East 149.08 feet of the South 209 feet of said Lot 9, excepting therefrom the South 130 feet.

P-D(503) to P-D(577)

Beginning at the Northeast corner of the said South half of Lot 9, at a point on the centerline of N. Martin Luther King Drive (formerly known as Franklin Street), and running thence South 89°58'30" West, 665.68 feet, more or less, to the Northwest corner of said South half of Lot 9; thence South 0°10' West, along the west line of said Lot 9 and the centerline of the Modesto Irrigation District canal, 97.05 feet to a point; thence North 89°58'30" East, 125 feet to a point; thence South 0°10' West, 100 feet to a point; thence North 89°59' East, 391.60 feet; thence North 0°10'00" East, 79.00 feet; thence South 89°59'00" West, 20.92 feet; thence North 0°10'00" East, 61.00 feet; thence North 89°59'00" East, 170.00 feet to the centerline of N. Martin Luther King Drive; thence along said centerline, 57.05 feet to the point of beginning.

R-1 to P-D(577)

Commencing at the Northwest corner of the South half of said Lot 9, and running thence South 0°10" West, 97.05 feet to the true point of beginning; thence continuing South 0°10" West, 100 feet to a point; thence North 89°58'30" East, 125 feet; thence North 0°19' East, 100 feet; thence South 89°56'30" West, 125 feet to the true point of beginning.

WHEREAS, this matter was originally heard by the Planning Commission in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California on August 7, 2006, and after failure to obtain four votes to deny, the matter was continued to August 21, 2006; and

WHEREAS, at the request of the applicant, the matter was further continued to October 2, 2006, and November 6, 2006, and

WHEREAS, after a public hearing held on November 6, 2006, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, it was found and determined by the Planning Commission, by its Resolution No. 2006-67, that rezoning of the property as requested is required by public necessity, convenience, and general welfare in accordance with the following findings:

> The proposed Planned Development Zone is in conformance with the General Plan which provides for institutional religious activities and facilities in all neighborhoods.

WHEREAS, said matter was set for a public hearing of the City Council to be held on February 6, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing was held, and

WHEREAS, after said public hearing the Council found and determined that the application of City Ministry Network, Inc. for a Planned Development Zone should be granted as being consistent with public necessity, convenience and general welfare in accordance with the findings set forth in Planning Commission Resolution No. 2006-67 and quoted above, and

WHEREAS, the Council has introduced Ordinance No. 3432-C.S. on the 6th day of February, rezoning the above-described property from Low Density Residential Zone, R-1, and Planned Development Zones, P-D(503) and P-D(533) to Planned Development Zone, P-D(577).

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. DEVELOPMENT PLAN. The development plan for Planned Development Zone, P-D(577), is hereby approved subject to the following conditions:

1. All development shall be in accordance with the plot plan and building elevations titled "City Ministry Center West" as amended in red, stamped approved by the City Council on February 6, 2007.
2. Street dedication and improvements in accordance with the City of Modesto Standard Specifications shall be provided on Martin Luther King Drive prior to occupancy of any structure or as requested by the City Engineer.
3. Prior to issuance of a building permit, improvement plans for required improvements shall be prepared by a Registered Civil Engineer and approved by the City Engineer. Improvement plans shall include upgrade to the water delivery system pipe size to the site, specifically from four inches to eight inches. Improvements shall be constructed in accordance with the approved plans.
4. All private streets including the widening of Vine Street, shall be constructed in accordance with the standard structural section for local

residential streets as contained in the City of Modesto Standard Specifications. The curb cuts onto Vine Street shall be drop-curb type.

5. Development shall comply with the following stormwater requirements:

   a. Developer shall obtain coverage for project under the General Construction Activity Storm Water Permit (General Construction Permit) issued by the State Water Resources Control Board (SWRCB).

   b. To obtain coverage under the General Permit, a Notice of Intent (NOI) shall be filed with the SWRCB. Submit one copy of NOI to Development Services, Stormwater, when filed.

   c. The General Construction Permit requires the Developer to prepare and implement a Stormwater Pollution Prevention Plan (SWPPP) for project. Submit one copy of SWPPP to Development Services, Stormwater, for review.

   d. Trash enclosures for project shall be bermed to prevent stormwater run-on and graded to drain to adjacent landscape areas.

   e. Developer shall provide permanent, post-construction treatment (grass swale, vegetative strip, or other approved proprietary device) to remove pollutants from the first ½" of stormwater run-off from site.

   f. Provide owner-signed and notarized Stormwater Treatment Device Access and Maintenance Agreement to Development Services, Stormwater for recording. This shall be done prior to obtaining a Grading or building permit.

6. Prior to issuance of a building permit, the applicant shall satisfy the Fire Chief of the following:

   a. An automatic fire sprinkler system is required for new construction exceeding 5,000 square feet of floor area under one roof.

   b. Fire Department Connection (FDC) should be accessible and located within 90 feet of a fire hydrant that will be located on the supply side of the fire suppression system check valve.

   c. On and offsite hydrants shall be located at 300-foot intervals. Please show all existing and proposed fire hydrants.

7. Prior to the issuance of a building permit, a landscaping and irrigation plan shall be approved by the Parks, Recreation and Neighborhoods Director or designee. Landscaping and the irrigation system shall be installed and maintained in accordance with the approved plan.

8. Fences or walls shall be constructed prior to occupancy and shall be a six-foot-high solid masonry wall along the entire west property line and along the northern property line.

9. All landscaping, fences, and walls shall be maintained and the premises shall be kept free of weeds, trash, and other debris.

10. Prior to issuance of a building permit, the developer shall dedicate public utility easements as required by the utility companies and the City Engineer or designee. A 15-foot-wide public utility easement shall be dedicated along Martin Luther King Dr.

11. The trash enclosure shall be angled to facilitate unloading, as shown in red on the approved plan and shall be constructed to the specifications of Public Resources Code per the requirements of the City's Solid Waste Management Division.

12. All signs shall comply with the sign requirements of the R-1 Zone.

13. The developer shall indemnify, defend and hold harmless the City of Modesto, its agents, officers, and employees from any and all claims, action or proceedings against the City of Modesto, its agents, officers, and employees to arbitrate, attack, review, set aside, void, or annul, any approval by the City of Modesto of a development approval.

14. The City of Modesto shall promptly notify the developer of any claim, action, or proceeding and shall cooperate fully in the defense. If the City fails to do so, the developer shall not thereafter be responsible to defend, indemnify, or hold City harmless.

15. All outdoor lighting shall be shielded from adjacent residential properties as required by the City Engineer.

SECTION 2. DEVELOPMENT SCHEDULE. The following development schedule is hereby approved for said Planned Development Zone, P-D(577):

The entire construction program be accomplished in one phase, construction to begin on or before February 6, 2011, and completion to be not later than February 6, 2013.

SECTION 3. CHANGES IN DEVELOPMENT PLAN. Any changes in the above approved development plan shall be made in accordance with the provisions of Section 10-2.1709 of the Modesto Municipal Code.

SECTION 4. COMPLIANCE WITH CODE PROVISIONS, ETC. In all other respects said planned development shall be accomplished in accordance with and in strict adherence to the provisions of Article 17 of Title 10 of the Modesto Municipal Code relating to Planned Development Zones and other applicable City laws, rules, regulations and procedures.

SECTION 5. EFFECTIVE DATE. This resolution shall not become effective unless and until the ordinance reclassifying the above-described property to Planned Development Zone, P-D(577), becomes effective.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-098

A RESOLUTION FINDING THAT THE FOLLOWING PROJECT IS WITHIN THE SCOPE OF THE PROJECT COVERED BY THE MODESTO URBAN AREA GENERAL PLAN MASTER ENVIRONMENTAL IMPACT REPORT (SCH NO. 1999082041): AMENDING SECTION 31-3-9 OF THE ZONING MAP TO REZONE FROM LOW DENSITY RESIDENTIAL, R-1, AND PLANNED DEVELOPMENT ZONES, P-D(503) AND P-D(533), TO PLANNED DEVELOPMENT ZONE, P-D(577) PROPERTY LOCATED ON THE NORTHWEST CORNER OF MARTIN LUTHER KING DRIVE AND VINE STREET (CITY MINISTRY NETWORK, INC.)

WHEREAS, on March 4, 2003, the City Council of the City of Modesto certified the updated Final Master Environmental Impact Report ("Master EIR") (SCH No. 1999082041) for the Modesto Urban Area General Plan, and

WHEREAS, City Ministry Network, Inc. has proposed that the zoning designation for property located on the northwest corner of Martin Luther King Drive and Vine Street be amended to rezone from Low Density Residential Zone, R-1, and Planned Development Zones, P-D(503) and P-D(533), to a new Planned Development Zone, P-D(577), in the City of Modesto ("the project") to allow a multi-function ministry center and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a Master EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the project, and

WHEREAS, the City's Community & Economic Development Department by Environmental Assessment Initial Study EA/C&ED 2006-41 ("Initial Study") reviewed the proposed amendment to the Zoning Map and rezone to P-D(577) project to determine whether the project is within the scope of the project covered by the Modesto Urban Area General Plan Master EIR ("Master EIR"), and made the determination that the proposed project will have no additional significant effect on the environment that was not identified in the Master EIR, and further, that no new or additional mitigation measures or alternatives are required, and that, therefore, the proposed project is within the scope of the project covered by the Master EIR, and

WHEREAS, in accordance with CEQA guidelines beginning on January 14, 2007, the City caused to be published a 10-day notice of the City's intent to make a finding that the proposed project conforms with the Master EIR, and

WHEREAS, said matter was considered by the City Council at a duly noticed public hearing which was held on February 6, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Initial Study prepared for the proposed amendment to the Zoning Map and rezone to P-D(577) project, a copy of which is attached hereto as **Exhibit "A",** and incorporated herein by reference, and based on the substantial evidence included in said Initial Study makes the following findings:

1. The proposed P-D Zone is in conformance with the General Plan which provides for institutional religious activities and facilities in all neighborhoods.
2. The type of project is described in Chapter II of the Master EIR.

3. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

4. An Initial Study was prepared by the City of Modesto that analyzed whether the proposed subsequent project may cause any significant effect on the environment that was not examined in the MEIR and it has been determined that the project was described in the MEIR as being within the scope of the MEIR.

5. Based on the Initial Study, the City of Modesto finds and determines:

    a. The proposed subsequent project will have no additional significant effect as defined in CEQA Section 21158 that was not identified in the MEIR.

    b. No new or additional mitigation measures or alternatives are required.

6. The Initial Study, Environmental Assessment No. EA/C&ED 2006-41, provides the substantial evidence to support finding numbers 2-6, noted above.

7. The improvements to Vine Street and Martin Luther King Drive are necessary to facilitate the increased traffic into and out of the proposed development.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Community & Economic Development Director is hereby authorized and directed to file a notice of approval or determination within five (5) business days with the Stanislaus County Clerk pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

City of Modesto

Finding of Conformance to General Plan Master EIR:

Initial Study C&ED No. (2006- 41)

For the proposed:

Rezone from R-1, P-D(503), and P-D(533) to a New P-D Zone for a Multi-function Ministry Center at Martin Luther King Drive and Vine Street

Prepared by:
City of Modesto
Community & Economic Development Department
Planning Division

May 31, 2006

City of Modesto
Master EIR Initial Study Checklist

I. PURPOSE

CEQA allows for the limited environmental review of subsequent projects under the City's Master EIR. This Initial Study Checklist is used in determining whether the **Rezone from R-1, P-D(503), and P-D(533) to a new P-D Zone for a Multi-function Ministry Center at Martin Luther King Drive and Vine Street** is "within the scope" of the project analyzed in the Modesto Urban Area General Plan Master EIR (SCH# 1999082041) (Public Resources Code section 21157.1). When the Initial Study supports this conclusion, the City will issue a finding of conformity.

A subsequent project is "within the scope" of the Master EIR when:

1. it will have no additional significant effects on the environment that were not addressed as significant effects in the Master EIR; and

2. no new or additional mitigation measures or alternatives are required.

"Additional significant effects" means a project-specific effect that was not addressed as a significant effect in the Master EIR. (Public Resources Code Section 21158(d))

The determination must be based on substantial evidence in the record. "Substantial evidence" means facts, reasonable assumptions predicated upon facts, or expert opinion based on facts. It does not include speculation or unsubstantiated opinion. (State CEQA Guidelines Section 15384)

II. PROJECT DESCRIPTION

A. Title: Rezone from R-1, P-D(503), and P-D(533) to a New P-D Zone for a Multi-function Ministry Center at Martin Luther King Drive and Vine Street

B. Address or Location: West side of Martin Luther King Drive and North side of Vine Street

C. Applicant: City Ministries Network, Inc, Attn: Ross Briles, P.O. Box 4309, Modesto CA 95352

D. City Contact Person: Robert S. Cannell

Project Manager: Robert S. Cannell
Department: Community and Economic Development Department
Phone Number: (209) 577-5274
E-mail address: bcannell@modestogov.com

E. Current General Plan Designation(s): "R" Residential

F. Current Zoning Classification(s): P-D(503), Planned Development Zone, P-D(533) and R-1, Low-Density Residential

G. Surrounding Land Uses:

North:	Residential Units (County Properties)
South:	Apartments, R-3 Zone and City-owned Community Center
East:	Residential Units (R-2 Zone Properties)
West:	Residential Units (County Properties)

H. Project Description, including the project type listed in Section II.C (Anticipated Future Projects) of the Master EIR (Attach additional maps/support materials as needed for complete record):

The applicant proposes to combine three adjoining properties into one 2.56 acre site for a multi-functional ministry center featuring a new 30,000-square-foot one- and two-story building including a gymnasium and 140 off-street parking spaces. The land had been previously approved for a senior citizen housing complex.

I. Other Public Agencies Whose Approval is Required:

None.

IIII. FINDINGS/DETERMINATION (SELECT ONE ON THE BASIS OF THE ANALYSIS IN SECTION IV)

1. X **Within the Scope** - The project is within the scope of the Master EIR and no new environmental document or Public Resources Code Section 21081 findings are required. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

   C. An Initial Study was prepared by the City of Modesto that analyzed whether the proposed subsequent project may cause any significant effect on the environment that was not examined in the MEIR and it has been determined that the project was described in the MEIR as being within the scope of the MEIR.

   D. Based on the Initial Study, the City of Modesto finds and determines:
      a) The proposed subsequent project will have no additional significant effect as defined in CEQA Section 21158 that was not identified in the MEIR.
      b) No new or additional mitigation measures or alternatives are required.

   E. The criteria for currency of the Master EIR were reviewed (section 5 below) and it was determined that the Master EIR is current for all areas of the Initial Study.

2.____ **Mitigated Negative Declaration Required** - On the basis of the above determinations, the project is not within the scope of the Master EIR. A mitigated negative declaration will be prepared for the project. The following items are found to be true:

A. The type of project is described in Chapter II of the Master EIR.

B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

C. The project will have one or more potential new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures are being required of the project that will reduce the effects to a less-than-significant level.

3.____ **Focused EIR Required-** On the basis of the above determinations, the project is not within the scope of the Master EIR. A Focused EIR will be prepared for the project. The following items are found to be true:

A. The type of project is described in Chapter II of the Master EIR.

B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

C. The project will have one or more new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures or alternatives are required as a result.

Project Manager	Senior Planner Title	May 31, 2006 Date

4. Within the Scope Analysis of this Document:

The Master EIR permits projects to be found within the scope of the MEIR if certain criteria are met, Basically, if the following statements are found to be true for all 20 sections of this Initial Study, then the project was covered by the MEIR analysis and is within the scope of the MEIR. Any "No" response must be discussed.

		YES	NO
(1)	The lead agency for subsequent projects shall be the City of Modesto or a responsible agency identified in the Master EIR.	X	☐
(2)	City policies which reduce, avoid or mitigate environmental effects, will continue to be in effect and therefore would be applied to subsequent projects where appropriate. The policies are described in the list of policies in place and mitigation measures attached to the Initial Study template.	X	☐
(3)	Federal, State, Regional and Stanislaus County regulations do not change in a manner that is less restrictive on development than current law (i.e., would not offer the same level of protection assumed under the Master EIR).	X	☐
(4)	No specific information concerning the known or potential presence of significant resources is identified in future reports, or through formal or informal input received from responsible or trustee agencies or other qualified sources.	X	☐
(5)	The development will occur within the boundaries of the City's planning area as established in this Urban Area General Plan.	X	☐
(6)	Development within the project will comply with all mitigation measures identified in the General Plan Master EIR.	X	☐

5. Currency of the Master EIR Document

The MEIR should be reviewed on a regular basis to determine its currency, and whether additional analysis/mitigation should be incorporated into the MEIR via a Supplemental or Subsequent EIR (CEQA Section 21157.6). Staff has reviewed sections 1 through 20 of this document in light of the criteria listed below to determine whether the MEIR is current. The analysis contained within the Master EIR is current as long as the following circumstances have not changed. Any "No" response must be discussed.

		YES	NO
(1)	Certification of the General Plan Master EIR occurred less than five years prior to the filing of the application for this subsequent project.	X	☐
(2)	This project was described in the Master EIR and its approval will not affect the adequacy of the Master EIR for any subsequent project because the City can make the following findings:	X	☐
(3)	No substantial changes have occurred with respect to the circumstances under which the Master EIR was certified.	X	☐

(4) No new information, which was not known and could not have been known at the time the Master EIR was certified as complete, has become available. X ☐

(5) Policies remain in place that require site-specific mitigation, and avoidance or other mitigation of impacts as a prerequisite to future development. X ☐

IV. ENVIRONMENTAL ANALYSIS

This Initial Study, in accordance with Section 21157.1(b) of the Public Resources Code, analyzes whether this project may cause any project-specific significant effect on the environment that was not examined in the Final Master EIR (MEIR) for the General Plan and whether new or additional mitigation measures or alternatives may be required as a result. The Initial Study thereby documents whether or not the project is "within the scope" of the Master EIR.

Pursuant to Public Resources Code Section 21157.1, no new environmental document or findings are necessary for projects that are determined to be within the scope of the MEIR. Adoption of a notice of conformity after completion of the Initial Study fulfills the City's obligation in that situation.

All environmental effects cited reflect year 2025 build-out of the Urban Area General Plan as identified in the MEIR.

The Master EIR for the General Plan organizes its analysis of environmental impacts into eighteen subject areas. The following analysis is based on the impact analyses contained in Chapter V of the Master EIR. For ease of cross-reference, the sections are numbered in the same order as the analyses in Chapter V.

In addition to the 18 Master EIR subject areas, the Initial Study checklist addresses the issues of land use/planning and aesthetics. The reason for including these additional issues is to ensure that consideration is being given to the full range of subjects of importance contained in Appendix G of the CEQA Guidelines. The format for the land use/planning and aesthetics sections differs from that of the other 18 subject areas since these two subjects were not addressed as distinct subjects in the Master EIR.

1. TRAFFIC AND CIRCULATION

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant and unavoidable traffic and circulation impacts within certain areas of the "Baseline Developed Area":

Effect: Increased traffic will result in certain roadway segments operating at LOS "D" or worse.

Effect: The substantial increase in traffic relative to the existing load and capacity of the street system will cause, violation, either individually or cumulatively, of a LOS standard established by the County CMP for designated roads and highways.

Effect: Creation of need for Capacity-enhancing modifications to existing facilities.

Effect: Increase in energy consumption associated with the operation of highway projects, rail improvements, and aviation facilities.

Effect: Severe contrast with existing neighborhood or area character caused by highway and transit projects.

DISCUSSION:
This is an application to rezone to P-D, two previously-approved planned development zones. The addition of the Ministry Center is compatible with the existing surrounding mixed use of residential development and recreational uses located around this area. Because the project is consistent with the surrounding mixed use, the proposed land use will not change to a level that will cause a change to the existing road capacities or levels of service.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Traffic and Circulation mitigation measures that may be pertinent to this project are found on MEIR pages V-1-15 through V-1-21. All feasible measures appropriate to the project – including any new measures - will be incorporated into or made conditions of approval of this project and will be listed in Section IV, *Mitigation Measures Applied to Project.*

c. Project-Specific Effects

Section V-1.B of the MEIR provides analysis of Traffic and Circulation impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Significance Criteria: A subsequent development project will have a new significant effect on the environment if it would exceed the following criteria:

	YES	NO
(1) Does the project contribute one hundred (100) or more peak hour trips to or from the site during the adjacent roadway's peak hour or the development's peak hour, to adjoining roads and generates more trips than assumed for their general plan land use category and zoning in the Master EIR.	☐	X

Note:

If a project exceeds an additional one hundred (100) or more peak hour trips contribution, a site access study may be conducted to determine to what extent the project would exceed the year 2025 level of service (LOS) expected for the adjoining roadways under the Master EIR. The site access study would recommend new, project-specific mitigation measures. If the project also exceeds the Master EIR's traffic generation assumption, as determined by Engineering & Transportation staff, a comprehensive traffic study would be required that will include off-site traffic impact analysis.

		YES	NO
(2)	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).	☐	X
(3)	Result in inadequate emergency access.	☐	X
(4)	Result in inadequate parking capacity.	☐	X

DISCUSSION:

(1) Engineering and Transportation Staff reviewed the proposed project and found:

A. The proposed project will not generate traffic impacts to the adjacent roadways in excess of what was assumed under the MEIR. No traffic study is required.
B. A site access study is not required for this project.

(2) The project will not substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).

(3) Police and Fire Staff have reviewed this proposal and have indicated that there is no emergency access problem.

(4) The project has been evaluated for compliance to the City of Modesto Parking regulations. The design and layout of the proposed parking area will comply with both City standards and ADA (Americans with Disability Act) standards.

2. AIR QUALITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to air quality:

Effect: Projected City traffic levels will result in increased ambient carbon monoxide (CO) levels in the project area. *This is a significant and unavoidable impact.*

Effect: Projected City traffic levels will result in increased ROG and NOX levels in the project area. *This is a significant and unavoidable impact.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Air Quality mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-2-11 through V-2-18 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project and are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

Mitigation Measures appropriate to this project include: AQ-17

c. Project-Specific Effects

Section V-2.B of the MEIR provides analysis of Air Quality impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project exceeds the emissions thresholds established for CO and NOx by the San Joaquin Valley Unified Air Pollution Control District's (SJVUAPCD) adopted CEQA Guidelines.	☐	X
(2)	The project does not incorporate the best management practices for PM10 reduction established by the SJVUAPCD.	☐	X
(3)	The project does not comply with the air quality policies of the Modesto Urban Area General Plan.	☐	X
(4)	The project would expose sensitive receptors to substantial pollutant concentrations.	☐	X
(5)	The project would create objectionable odors affecting a substantial number of people.	☐	X

DISCUSSION:

(1) The project was referred to the San Joaquin Valley Unified Air Pollution Control District who determined that the project would not have a significant effect on the ambient air quality.

(2) This project does incorporate the best management practices for PM10 reduction established by the SJVUAPD (see mitigations measures above).

(3) Applicable General Plan Policies will be applied to the project. Therefore, project-specific effects will be less than significant for this impact (see mitigations measures above).

(4) The project is not a significant contributor to pollution levels in that it involves only a building addition for an existing church. PM10 emissions created through the construction phase will be mitigated as called for by the MEIR by the measures listed above.

(5) The proposed project will not produce objectionable odors.

3. NOISE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant and unavoidable environmental impacts relative to noise:

Effect: Traffic noise levels for future conditions in the plan area have the potential to result in an excess of the City's Noise Significance Standards.

Effect: Noise level projections based on the traffic levels anticipated in the General Plan indicate that noise will exceed the City's General Plan and noise ordinance standards.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Noise policies and mitigation measures pertinent to the project being analyzed in this Initial Study are found on pages V-3-10 through V-3-15 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project and any new measures are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

Mitigation Measures appropriate to this project include: N-4, N-5 and N-6.

c. Project-Specific Effects

Section V-3.B of the MEIR provides analysis of noise impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project will exceed the standards for noise level and hours of operation established by the Modesto noise ordinance.	☐	X
(2)	The project will exceed the noise policies of or otherwise be inconsistent with the Modesto Urban Area General Plan.	☐	X
(3)	The project will result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	X
(4)	The project will result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project.	☐	X

DISCUSSION:

(1) The City's noise policy is incorporated into the conditions of approval as a mitigation measure.

(2) The project is consistent with the noise policies of the General Plan. The noise mitigation measures called for by the General Plan for projects within the baseline-developed area are incorporated into the conditions of approval for the project.

(3) The only permanent noise levels produced by the project would be associated with traffic. The traffic levels are within the scope of what the MEIR assumed for the site. Therefore, this project will not result in a substantial permanent increase in ambient noise levels.

(4) The project will not result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity. There will be some construction related noise, but the noise mitigation measures called for by the General Plan for projects within the baseline developed area, are incorporated into the conditions of approval for the project.

4. AGRICULTURAL LANDS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to agricultural lands:

Effect: Development within the urbanized Baseline Developed Area and Redevelopment Area will have a less-than-significant impact on agricultural lands.

Effect: Conversion of agricultural land will occur as available developable land is occupied within the City. This is a significant and unavoidable impact.

Effect: Growth within Modesto's planning area would contribute considerably to the loss of agricultural land within Stanislaus County. This is a significant and unavoidable cumulative impact.

DISCUSSION:

The site is not zoned for agriculture or designated on the General Plan for future agricultural use. The proposed project will not affect areas zoned for agriculture or designated on the General Plan for future agricultural use. The project site and the surrounding property are located within a fully developed urbanized area, both inside and outside the corporate City limits.

b. Master EIR and/or New Mitigation Measures Pertinent to the Project

Agricultural Land mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-4-7 and V-4-8 MEIR. All feasible measures appropriate to the project and any new mitigation to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-4.B of the MEIR provides analysis of Agricultural Lands impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project will directly result in the development of land outside the March 2003 planning area boundaries.	☐	X
(3)	The project will Conflict with existing zoning for agricultural use, or a Williamson Act contract.	☐	X
(4)	The project will Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan land use policies. It is an infill project, proposed within the urbanized area of the City. There are no agricultural parcels affected by the proposal and no agricultural and will be converted.

(2) The project is within the Baseline-Developed area of the City and therefore will not result in the development of land outside the March 2003 planning area boundaries.

(3) The project site is not zoned for agriculture nor is it under Williamson Act contract.

(4) The project will not involve changes to the existing environment that could result in the conversion of farmland to non-agricultural uses. The project is completely surrounded by urbanization.

5. WATER SUPPLY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to water supply:

Effect: Urban Area General Plan policies are established to limit groundwater extractions to the safe yield of the aquifer and thereby avoid aquifer over drafting. In addition, the UWMP requires that new urban development would proceed in conjunction with the availability of water supplies and distribution facilities. It is assumed that increased entitlement of surface water supplies such as a water transfer from another water purveyor would undergo independent environmental review pursuant to CEQA. *This is a less-than-significant impact.*

Effect: Development to the future projected City population would require expansion of the MRWTP to its full 60 mgd capacity, development of additional groundwater wells, and construction of additional water distribution and treatment facilities. Construction of some of the required facilities would most likely require site-specific environmental impact assessments to be conducted under CEQA. *Consequently, the potential environmental impacts of the Urban Area General Plan are considered less-than-significant.*

Effect: During drought years, despite available options, significant water shortages are forecast for the San Joaquin River basin by the year 2020. Modesto would make a cumulatively considerable contribution to the cumulative impact on water supply under drought conditions. *This is a significant and unavoidable cumulative impact.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Water Supply mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-5-7 through V-5-8 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-5.B of the MEIR provides analysis of Water Supply impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	Sufficient water supplies are not available to serve the project from existing entitlements and resources, new or expanded entitlements are needed.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan both in land use and intensity.

(2) The project was referred to Engineering and Transportation for comment and there was no determination that there is insufficient capacity to serve the project.

6. SANITARY SEWER SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to sanitary sewer services:

Effect: The City has already begun to implement the provisions of the Wastewater Master Plan (WMP) to meet future demand for sanitary sewer services. As City wastewater treatment facilities are expanded to meet the needs of the Baseline Developed, Redevelopment, and Planned Urbanizing Areas, the City will obtain the necessary wastewater discharge and NPDES permits from the Central Valley RWQCB, as required under Urban Area General Plan Policy V-D.2(a). Implementing the WMP, requirement of Best Management Practices for post-construction activities, as well as the Urban Area General Plan policy cited above, will avoid violation of wastewater discharge requirements. *As a result, this impact would be less-than-significant.*

Effect: The City has adopted the WMP specifically to ensure that sewer capacity will match the level of growth projected by the Urban Area General Plan. Development within the Baseline Developed and the Planned Urbanizing Areas that is consistent with the Urban Area General Plan will not have a significant effect on capacity. Urban Area General Plan Policy III-D.1(d) will ensure that development in the Planned Urbanizing Area will fund the necessary improvements. *This is a less-than-significant impact.*

Note on the WMP Master EIR. The WMP Master EIR identified a number of impacts and mitigation measures. Its mitigation measures have been adopted by the City and are being implemented by the City under the WMP. Those impacts are being independently addressed under that Master EIR and do not need to be considered under this Initial Study. Refer to the WMP Master EIR for details.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Sewer Service mitigation measure(s) pertinent to the project being analyzed in this Initial Study. are found on pages V-6-4 through V-6-7 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-6.B of the MEIR provides analysis of Sanitary Sewer Service impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project will result in a determination by the wastewater treatment provider which serves or may serve the project that it has inadequate capacity to serve the project's projected demand in addition to the provider's existing commitments.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan both in land use and intensity.

(2) The project was referred to Engineering and Transportation for comment and there was no indication that there is insufficient capacity to serve the project.

7. SENSITIVE WILDLIFE AND PLANT HABITAT

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to sensitive wildlife and plant habitat:

Effect: Although many sensitive species live in riparian habitats within the planning area, the policies of the plan will ensure that impacts of the Urban Area General Plan will be less-than-significant.

Effect: Requiring higher residential density than the suburban norm and a compact pattern of growth within the designated planning area to the year 2025 will minimize the City's contribution to the cumulative loss of habitat. Nonetheless, this is a significant and unavoidable impact.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Wildlife and Plant Habitat mitigation measure pertinent to the project being analyzed in this Initial Study are found on pages V-7-19 through V-7-21. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project regarding sensitive wildlife and plant habitat. The project site is not a biologically sensitive site as defined by Figures V-7-1a through V-7-1e of the MEIR.

c. Project-Specific Effects

Section V-7.B of the MEIR provides analysis of Wildlife and Plant Habitat impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	Consultation with the California Department of Fish and Game or the U.S. Fish and Wildlife Service determines that the project would have a significant effect on special status species.	☐	X
(3)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan both in land use and intensity.

(2) The project site is not a biologically sensitive site as defined by Figures V-7-1a through V 7-1e of the MEIR. The California Department of Fish and Game and the U.S. Fish and Wildlife Service were consulted in the production of the MEIR.

(3) There is no conflict with any local policies or ordinances protecting biological resources.

8. ARCHAEOLOGICAL OR HISTORICAL SITES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to archaeological or historical sites:

Effect: If a site-specific project involves the modification or demolition of a qualifying structure more than 50 years in age, then the impact will be significant.

Effect: Areas of high probability for archaeological resources are located within the riparian corridors along the Tuolumne River, Dry Creek, and the Stanislaus River. There, the potential impact comes from earthmoving activities that could result in disturbance of resources or human remains. There is a low probability that archaeological resources will be uncovered in areas outside of the riparian corridors.

Effect: The City Zoning Ordinance requires that when substantial changes to a structure are proposed, the development will be required to comply with other Zoning Ordinance provisions such as parking or landscaping requirements. This could result in modifications to the structure, which substantially reduce its historical significance. This would be a less-than-significant impact with the imposition of new mitigation measure Cultural-1.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Archaeological or Historic mitigation measures pertinent to the project being analyzed in this Initial Study are found on page V-8-13 and V-8-14 MEIR.

DISCUSSION:

Mitigation Measures applicable to this project include: AH-8, Master EIR.

c. Project-Specific Effects

Section V-8.B of the MEIR provides analysis of Archaeological/Historical impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would adversely affect a cultural resource that is either listed or eligible for listing in the California Register of Historical Resources, or that is listed by the City of Modesto as a Designated Landmark Preservation Site.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would not adversely affect a cultural resource that is either listed or eligible for listing in the California Register of Historical Resources, or that is listed by the City of Modesto as a Designated Landmark Preservation Site. The mitigation measure called for by the General Plan is incorporated into the conditions of approval for the project.

9. STORM DRAINAGE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to storm drainage:

Effect: The potential impacts on storm water drainage that could occur from the project were qualitatively evaluated with respect to several factors including: extent of the projected increase in urban surface area compared to undeveloped ground; magnitude of projected changes to hydrologic and physical site characteristics of the study area compared to existing conditions; regulatory criteria and guidelines; and professional judgment. Because the Urban Area General Plan includes policies that require new development in all three sections of the planning area to install approved drainage facilities, the potential impacts of the Urban Area General Plan on storm water drainage are considered *less-than-significant.*

Effect: The population of Stanislaus County is projected to increase in a fashion similar to that of Modesto, resulting in additional urban development and associated increases in impervious areas and associated urban storm water drainage. Cumulative hydrologic impacts of storm water flows from Modesto urban areas and other areas of the County could occur due to the fixed capacity of MID and TID irrigation canals to convey drainage west to the San Joaquin River. If drainage channels in some areas prove insufficient to handle the increased drainage discharges, existing storm water runoff from urban and agricultural areas during large storm events would have to be interrupted until water levels receded to a point allowing the resumption of discharges to the channel. Ceasing discharges to drainage channels could cause inundation in and around the drainage conveyance pipeline systems, surface drainage channels, detention basins, and other urban areas. *This cumulative impact is considered significant and unavoidable.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Storm Drainage mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-9-4 through V-9-8.

DISCUSSION:

Mitigation measures appropriate to this project include: SD-7, MEIR. This mitigation measure is addressed by conditions of approval.

c. Project-Specific Effects

Section V-9.B of the MEIR provides analysis of Storm Drainage impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or offsite.	☐	X
(3)	Create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project will meet the standards contained in the "Guidance Manual for New Development-Storm Water Quality Control Measures," adopted by the City as required by the above-listed mitigation measures.

(3) The project will not contribute additional water runoff that would exceed the capacity of the storm drainage system.

10. FLOODING AND WATER QUALITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to flooding and water quality:

Effect: Increased runoff can accelerate soil erosion, stream channel scouring, and sedimentation of channels, and also increase pollutant transport to waterways. The potential impacts of the project on flooding are considered less-than-significant because the Urban Area General Plan Update includes policies to restrict development in the floodplain and therefore would avoid exposing persons and property to flood hazards. In addition, new development under the Urban Area General Plan is required to install storm water drainage facilities that restrict the amount of post-development runoff from exceeding pre-development conditions.

Effect: The potential impacts of the project on surface-water quality are considered less-than-significant because the City policies and capital improvement projects for storm water drainage facilities would minimize discharges of urban pollutants to natural waterways. The City drainage program policies require new development to prepare drainage plans and implement urban runoff control measures; larger Specific Plan developments must have storm drainage systems designed to control pollutant runoff. The City's implementation policies for the municipal NPDES storm water permit require new development to implement an appropriate selection of permanent pollution control measures. Permanent erosion control measures such as seeding and planting vegetation for new cut-and-fill slopes, directing runoff through vegetation, or otherwise reducing the offsite discharge of particulates and sediment are the most effective method of controlling offsite discharges of urban pollutants.

Effect: The City's future development will contribute to cumulative water quality effects. EPA regulations for NPDES storm water permits and new proposed regulatory additions to the rules have become much more comprehensive in recent years and are being implemented to reduce pollutant runoff from both large- and small-scale activities. Implementation of NPDES-permitting programs throughout the county will reduce potential water-quality impacts to a less-than-significant level.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Flooding and Water Quality mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-10-7 through V-10-10 MEIR. All feasible measures appropriate to the project have been incorporated into the conditions of approval.

DISCUSSION:

Mitigation measures appropriate to this project include: FWQ-14, MEIR. This mitigation measure is addressed by conditions of approval.

c. Project-Specific Effects

Section V-10.B of the MEIR provides analysis of Flooding and Water Quality impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project does not comply with the regulatory requirements of the federal Clean Water Act or the State Porter-Cologne Act.	☐	X
(3)	The project does not comply with Modesto's Guidance Manual for New Development Storm water Quality Control Measures.	☐	X
(4)	The project would create or contribute runoff water, which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would comply with the Federal Clean Water Act and the Porter Cologne Act requirements.

(3) Mitigation Measures as called for by FWQ-14 will be applied to the project so that the project will comply with the Guidance Manual for New Development Storm Water Quality Control Measures.

(4) The project would not create or contribute to runoff water in excess of the capacity of existing or planned storm water drainage systems or provide additional sources of polluted runoff.

11. PARKS AND OPEN SPACE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to parks and open space:

Effect: Within the Baseline Developed and Redevelopment Areas, the Urban Area General Plan does not propose any elimination of existing park and/or open space land. *Impacts on parks and open space will be less-than-significant.*

Effect: The projected population of the Planned Urbanizing Area is 148,600, requiring 149 acres of neighborhood parks and 298 acres of community parks. The required minimum acreages can be met through the application of existing policies and regulations, including Government Code Section 66474, which require developers to pay Parks Capital Facilities Fees to fund the acquisition of appropriate parkland acreage. *This impact is less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Parks and Open Space Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-11-4 through V-11-19 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project, are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project. It is not on or adjacent to any park sites, nor is it near any of the riparian area identified by Figures V-7-1a through V-7-1e of the MEIR.

c. Project-Specific Effects

Section V-11.B of the MEIR provides analysis of Parks and Recreation impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity. There are no mitigation measures applicable to this project.

12. SCHOOLS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to schools:

Effect: The estimated increase in population over 1994/1995 would generate an additional 29,200 elementary school students, 7,330 middle school students, and 14,640 high school students above those enrollments. Assuming that existing facilities cannot sufficiently accommodate this increase and that all of the new students would require new school facilities, build out of the General Plan would result in the need for approximately 37 elementary schools, 8 middle schools, and 7 high schools beyond 1994/1995 levels. This would result in a significant impact on schools in that it would exceed current capacity. By statute, this impact is considered to be mitigated below a level of significance by payment of school impact fees and exercise of any or all of the financing options set out in Government Code Section 65997.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan.). As long as all anticipated subsequent projects apply these policies, no new mitigation is necessary. Further, payment of school impact fees and compliance with SB 50 is statutorily deemed to be full mitigation of school impacts (Government Code Section 65995). The proposed additional school policy will address the situation that would arise should AB 50 be repealed. It will authorize impact fees or other methods to finance additional school facilities.

The following schools mitigation measure(s) are pertinent to the project being analyzed in this Initial Study. See pages V-12-4 through V-12-7 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. Those measures will be listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-12.B of the MEIR provides analysis of Schools impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project does not comply with SB 50/Proposition 1A funding provisions, or succeeding measures which provide that compliance results in less-than-significant impacts on schools.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan in both land use and intensity.

(2) The project was referred to Modesto City Schools who indicated no opposition to the project.

13. POLICE SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to police services:

Effect: The 1995 Master EIR identified two impacts on the demand for police services; however, it concluded that no significant impact, based on the mitigation measures identified in the 1995 Master EIR, would occur. Those mitigation measures are now policies of the Urban Area General Plan. *The impact is less-than-significant.*

Effect: Within the Planned Urbanizing Area, complying with the Urban Area General Plan policies, particularly the policy that requires a long-range financing strategy for each Comprehensive Plan Area, will allow the City to provide the resources necessary to extend service to the newly growing Planned Urbanizing areas. *These policies reduce the impact to a less-than-significant level.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Police Services mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-13-3 and V-13-4 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-13.B of the MEIR provides analysis of police services impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would not result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives. The project meets City Standards for emergency services access.

14. FIRE SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to fire services:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. *Impacts on fire services of development in these areas will be less-than-significant.*

Effect: In the Planned Urbanizing Area, the Urban Area General Plan would result in the need for additional fire protection services due to increases in the number of employees, permanent population, and associated improvements. City policy requires that fire protection be in place concurrent with construction in the Planned Urbanizing Area. This policy will be implemented with the adoption of future Comprehensive Plans in the Planned Urbanizing Area. *This impact would be less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Fire Services mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-14-3 through V-14-5 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project. are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-14.B of the MEIR provides analysis of fire services impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would not result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives. The project meets City Standards for emergency services access.

15. SOLID WASTE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to solid waste:

Effect: New development projects would exceed available landfill capacity; it is identified as a significant impact. The Fink Road Landfill may be closed by the time the City reaches build out, unless an expansion is approved by the County and the Integrated Waste Management Board. As the waste stream generated increases with population, additional landfills and methods for diversion would have to be utilized. New projects will also generate the need for additional collection and transfer facilities. This impact is significant and unavoidable. *The impact would be less-than-significant at such time as the Fink Road Landfill expansion is approved.*

Effect: New development projects can make a considerable contribution to the cumulative impact on landfill capacity of development in Stanislaus County. *This impact is significant and unavoidable.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Solid Waste Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study. are found on pages V-15-5 and V-15-6 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-15.B of the MEIR provides analysis of solid waste impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The County is unable to expand its solid waste disposal capacity and the project would result in waste stream levels that exceed disposal capacity.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) This project was referred to the County and Solid Waste Division of the Engineering and Transportation Division for review, and no indication was given that there would be a problem serving this project.

16. HAZARDOUS MATERIALS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to hazardous materials:

Effect: The impacts of the project relative to hazardous materials are less-than-significant, based on the existing regulatory framework. New development will be required to comply with regulations monitoring and controlling the handling and use of hazardous and toxic materials.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under federal, state and county policies and regulations, and the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Hazardous Materials Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-16-9 through V-16-12 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-16.B of the MEIR provides analysis of hazardous materials impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project does not comply with all applicable federal, state, and county standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes.	☐	X
(3)	The project contains a contaminated site not identified as of March 2003.	☐	X
(4)	The project would emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.	☐	X
(5)	The project would be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and as a result, would create a significant hazard to the public or the environment.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project does comply with all applicable federal, state, and county standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes. (No hazardous materials will be involved with this project).

(3) The project site is not known to contain any contaminants.

(4) The project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste.

(5) The project would not be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and as a result, would not create a significant hazard to the public or the environment.

17. LANDSLIDES AND SEISMIC ACTIVITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to landslides and seismic activity:

Effect: There are areas of known sand and gravel resources within the Baseline Developed Area and Redevelopment Area. Future development will be subject to SMARA requirements, therefore, *the project impact will be less-than-significant.*

Effect: There are areas of known sand and gravel resources within the Planned Urbanizing Area. Future development will be subject to SMARA requirements, therefore, *the project impact will be less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Landslide and Seismic Activity Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-17-6 and V-17-7 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-17.B of the MEIR provides analysis of landslides and seismic impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would be located on soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan in both land use and intensity.

(2) The project would not be located on soil that is unstable, or that would become unstable as a result of the project.

18. ENERGY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to energy:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. New development within the Redevelopment Area will comply with Title 24 standards as well as City Urban Area General Plan policies. *Impacts on energy by development in these areas (i.e., changes in levels of use above the current baseline) will be less-than-significant.*

Effect: Build out under the Urban Area General Plan will utilize an estimated 1,400 million cubic feet per month of natural gas, 1,300 million kilowatt hours (kwh) of electricity per year and 650,000 gallons of gasoline per day. PG&E has indicated that they have at the current time sufficient supplies of natural gas to serve the increased natural gas demands of the project. At present, gasoline supplies are apparently sufficient to serve the gasoline demands of the project. Title 24 of the California Code of Regulation, which ensures that the project will not exceed local, state, and federal energy standards. *The impact is less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

The following energy mitigation measure(s) are pertinent to the project being analyzed in this Initial Study. See page V-18-3 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. Those measures will be listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-18.B of the MEIR provides analysis of energy impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

19. PLANNING AND LAND USE

The Master EIR was certified for the Modesto Urban Area General Plan. The significant effects described in the 18 subject areas contained in the Master EIR are based on the planning policies and diagrams adopted as part of the General Plan. Planning and land use were not among the 18 subject areas analyzed in the Master EIR because they essentially defined the project being evaluated in the EIR.

a. Project-Specific Effects

Determination of project effects will be based on the following threshold. A project-specific effect is less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project includes a substantive amendment to the Modesto Urban Area General Plan.	☐	X
(3)	The project would physically divide an established community	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) No amendment to the General Plan is required by this project.

(3) The project is infill development that will not divide an established community.

20. AESTHETICS

The Master EIR was certified for the Modesto Urban Area General Plan. The significant effects described in the 18 subject areas contained in the Master EIR, are based on the planning policies and diagrams adopted as part of the General Plan. At that level of detail, no significant effects on aesthetics were identified.

a. Project-Specific Effects

Determination of project effects will be based on the following threshold. A project-specific effect is less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would have a substantial adverse effect on a scenic vista.	☐	X
(3)	The project would substantially degrade the existing visual character or quality of the project site and its surroundings.	☐	X
(4)	The project would create a new source of substantial light and glare, which would adversely affect day or nighttime views in the area.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan in both land use and intensity.

(2) There are no Scenic Vistas from the location of the proposed development. It is completely surrounded by urbanization. Views to the Diablo and Sierra Mountain Ranges are already precluded from this site and its surroundings.

(3) The project would not substantially degrade the existing visual character or quality of the project site and its surroundings.

(4) The project would not create a substantial source of light or glare that would adversely affect daytime or nighttime views in the area.

V. MITIGATION MEASURES APPLIED TO THE PROJECT

A. Master EIR Mitigation Measures Applied to the Project

Pursuant to CEQA Section 21157.1 (c), in order for a Finding of Conformance to be made, all feasible measures from the Master EIR appropriate to the project shall be incorporated into the project. The following adopted General Plan Policies and Master EIR Mitigation Measures (also contained in Section III, "Global List") shall be made part of the project prior to approval by means of conditions of project approval or incorporation into the appropriate document or plan:

All applicable and appropriate mitigation measures have been applied to the project.

Traffic and Circulation Measures:

N/A

Air Quality Measures:

1. All land clearing, grubbing, scraping, excavation, land leveling, grading, cut & fill, and demolition activities shall be effectively controlled of fugitive dust emissions utilizing application of water or by presoaking.

2. When materials are transported off-site, all material shall be covered, or effectively wetted to limit visible dust emissions, and at least six inches of freeboard space from the top of the container shall be maintained.

Noise Measures:

1. The City's noise ordinance (Modesto Municipal Code Section 4-9.101) prohibits the "loud and raucous discharge into the open air of the steam of any steam equipment or exhaust from any stationary internal-combustion engine."

   The noise ordinance prohibits the loud and raucous operation or use of any of the following before 7:00 a.m. or after 9:00 p.m. daily (except Saturday and Sunday and State or federal holidays, when the prohibited time shall be before 9:00 a.m. and after 9:00 p.m.):

A. A hammer, or any other device or implement used to pound or strike an object.

B. An impact wrench, or other tool or equipment powered by compressed air.

C. A hand-powered saw.

D. Any tool or piece of equipment powered by an internal-combustion engine such as, but not limited to, chain saw, backpack blower, and lawn mower.

E. Any electrically powered (whether by alternating current electricity or by direct current electricity) tool or piece of equipment used for cutting, drilling, or shaping wood, plastic, metal, or other materials or objects, such as, but not limited to, a saw, drill, lathe, or router.

F. Any of the following: heavy equipment (such as but not limited to bulldozer, steam shovel, road grader, back hoe), ground drilling and boring equipment (such as but not limited to derrick or dredge), hydraulic crane and boom equipment, portable power generator or pump, pavement equipment (such as but not limited to pneumatic hammer, pavement breaker, tamper, compacting equipment), pile-driving equipment, vibrating roller, sand blaster, gunite machine, trencher, concrete truck, and hot kettle pump.

G. Any construction, demolition, excavation, erection, alteration, or repair activity. In the case of urgent necessity and in the interest of public health and safety, the Chief Building Official may issue a permit for exemption from these. Such period shall not exceed three (3) working days in length while the emergency continues but may be renewed for successive periods of three (3) days or less while the emergency continues. The Chief Building Official may limit such permit as to time of use and/or permitted action, depending upon the nature of the emergency and the type of action requested.

H. Construction equipment and vehicles should be equipped with properly operating mufflers according to the manufacturers' recommendations. Air compressors and pneumatic equipment should be equipped with mufflers, and impact tools should be equipped with shrouds or shields.

Agricultural Land Measures:

N/A

Water Supply Measures:

N/A

Sanitary Sewer Service Measures:

N/A

Sensitive Wildlife and Plant Habitat Measures:

N/A

Archaeological or Historic Sites Measures:

1. If archaeological resources are discovered at any time during construction, all activity shall cease until a qualified archaeologist surveys the site. The survey shall include mitigation measures, which shall be implemented before construction resumes. The survey shall follow the criteria presented in Appendix K

Storm Drainage Measures:

1. The developer shall implement pre- and post- construction best management practices (BMPs) to minimize pollutants entering the storm system.

Flooding and Water Quality Measures:

1. The developer shall implement pre- and post- construction best management practices (BMPs) to minimize pollutants entering the storm system.

Parks and Open Space Measures:

N/A

Schools Measures:

N/A

Police Services:

N/A

Fire Services:

N/A

Generation of Solid Waste

N/A

Generation of Hazardous Materials

N/A

Potential for Landslides and Seismic Activity

N/A

Energy

N/A

Planning and Land Use

N/A

Aesthetics

N/A

B. New or Additional Mitigation Measures or Alternatives Required

Where the project's effects would exceed the specific thresholds defined for each environmental category, a mitigated negative declaration or Focused EIR must be prepared. Staff has reviewed the project against those thresholds set forth in the Master EIR for all applicable categories in this Initial Study. The following project-specific mitigation measures are necessary to reduce the identified new significant effect: ***None.***

Print

MODESTO CITY COUNCIL
RESOLUTION NO. 2007- 099

A RESOLUTION FINDING THAT THE FOLLOWING PROJECT IS WITHIN THE SCOPE OF THE VILLAGE ONE PROGRAM ENVIRONMENTAL IMPACT REPORT (SCH NO. 90020181), AS AMENDED BY THE SUPPLEMENTAL EIR: APPLICATION FOR A PRECISE PLAN AMENDMENT TO AREA NO. 20 SUB-AREA C OF THE VILLAGE ONE SPECIFIC PLAN TO ALLOW A SENIOR HOUSING TOWNHOUSE DEVELOPMENT, PROPERTY LOCATED ON CHANDON DRIVE, SOUTHEAST OF FLOYD AND ROSELLE AVENUES (SILVER OAK)

WHEREAS, the Modesto City Council has adopted Resolution No. 90-757 certifying that the Village One Final Environmental Impact Report ("EIR") (State Clearing House No. 90020181) is complete and adequate pursuant to Section 15090 of the California Environmental Quality Act ("CEQA") Guidelines, and

WHEREAS, the Modesto City Council has adopted Resolution No. 94-297 which certified the Final Supplemental EIR for Village One; thus, the 1990 Village One Program EIR has been amended and updated by the 1994 Supplemental EIR, adopted by Resolution No. 94-297 on May 24, 1994, and

WHEREAS, on May 6, 2003, the City Council adopted Resolution No. 2003-223 which adopted an Addendum to Village One Specific Plan Program Environmental Impact Report for the Village One Facilities Master Plan Update – May 2003 ("VI FMP "), and

WHEREAS, an application has been filed by Silver Oak Communities for a amendment to Precise Plan for Area No. 20, property located on Chandon Drive, southeast of Floyd and Roselle avenues, and

WHEREAS, the City's Community & Economic Development Department reviewed the proposed Project to determine if said Project might have a significant effect on the environment, and

WHEREAS, City staff has prepared a Written Checklist, Environmental Assessment No. EA/C&ED 2006-71, which concluded that the proposed Project is within the scope of the Village One Program EIR (SCH No. 90020181), as amended by the Village One Supplemental EIR, and the addendum to Village One Specific Plan Program Environmental Impact Report for the Village One Facilities Master Plan, and

WHEREAS, the Planning Commission, by Resolution No. 2006-79, adopted on December 18, 2006, and City staff, by a report dated December 5, 2006, from the Community and Economic Development Department, recommended to the City Council approval of a Precise Plan for Area No. 20, property located on Chandon Drive, southeast of Floyd and Roselle Avenues, and

WHEREAS, said matter was considered by the City Council at a duly noticed public hearing which was held on February 6, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Written Checklist, Environmental Assessment No. EA/C&ED 2006-71, entitled "Determination: Project within the Scope of the Village One Specific Plan Program Environmental Impact Report Initial Study EA/C&ED No. 2006-71 For the Proposed Precise Plan Amendment of Area No. 20 in the Village One Specific Plan Area", for the proposed project, and the Council hereby makes the following findings:

1. The proposed Precise Plan and rezoning is consistent with the Village One Specific Plan and Modesto Urban Area General Plan, and

2. As per Sections 15168 of the California Environmental Quality Act ("CEQA") Guidelines, this project is within the scope of the projects covered by the Program EIR, and no new environmental document or findings are required by CEQA, and

3. There are no substantial changes proposed in the project, which result in new significant environmental effects, or a substantial increase in the severity of previously identified significant effects and, therefore, no major revisions to the Program EIR are required.

4. No substantial changes have occurred with respect to the circumstances under which the project is undertaken which will result in new significant environmental effects or a substantial increase in the severity of previously identified significant effects and therefore, no major revisions to the Program EIR, are required.

5. There is no new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence when the Program EIR, was adopted which shows any of the following:

    a. One or more significant effects which is not discussed in the Program EIR; or,

    b. Significant effects which were previously examined will be substantially more severe than previously shown; or,

    c. Previously infeasible mitigation measures or alternatives are now feasible and would substantially reduce one or more significant effects of the project, but the Project proponents decline to adopt the mitigation measure or alternative; or,

    d. Mitigation measures or alternatives which are considerably different from those analyzed in the Program EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

6. The Written Checklist, Environmental Assessment No. EA/C&ED 2006-71, provides the substantial evidence to support findings 3-5, noted above.

A copy of said Written Checklist, Environmental Assessment No. EA/C&ED 2006-71, entitled "Determination: Project within the Scope of the Village One Specific Plan Program Environmental Impact Report Initial Study EA/C&ED No. 2006-71 for the proposed Precise Plan Amendment to No. 20 in the Village One Specific Plan Area", is attached hereto as **Exhibit "A",** and incorporated herein by reference.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Community & Economic Development Director is hereby authorized and directed to file a notice of determination within five (5) business days with the Stanislaus County Clerk pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	None

ATTEST: Jean Morris
JEAN MORRIS, City Clerk

December 18, 2006

WRITTEN CHECKLIST

EA/C&ED No. 2006-71

I. PURPOSE

This written checklist, pursuant to CEQA Guidelines Section 15168 (C) (4), serves to make a determination where subsequent activities of a Program EIR involve site-specific operations, based on evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR. Based on a review of the project and Section 15162(a), this determination would permit the lead agency (City of Modesto) to approve the activity as being within the scope of the project covered by the Program EIR. This determination includes whether any new environmental document is required beyond the adopted Village One Specific Plan Program EIR (SCH# 90020181) for the proposed Precise Plan Area #19 and The Plaza VTSM (project).

The 1994 Supplemental EIR that amended and superseded the 1990 Program EIR is the document reviewed for projects within the Village One Specific Plan area. A summary of significant impacts and their mitigation measures from the 1994 Supplemental EIR is attached as Exhibit "A." Where appropriate those feasible mitigation measures developed in the Supplement to the program EIR shall be incorporated into the proposed project.

II. PROJECT INFORMATION

1. **Project Title:** Precise Plan 20 & The Devante Senior Villas VTSM

2. **Lead Agency Name and Address:** City of Modesto

3. **Contact Person and Phone Number:** David Wage, Assistant Planner
Modesto Community & Economic Development Department
209/577-5302

4. **Project Location:** Property located southeast of Floyd and Roselle on Chandon.
Modesto, California
APN # 085-040-063

5. **Project Sponsor's Name and Address:** Silver Oak Communities LLC. Attn: Jeff Kind
7600 N Ingram, Suite 131, Fresno, CA 93711

6. **General Plan Designation:** The General Plan land use designation for the project site is: Village Residential (VR).

7. **Zoning:** Specific Plan Overlay (SP-O)

8. **Description of Project:** The applicant plans to develop seventy lots to accommodate seventy privately owned, senior restricted dwelling units known as Davante Senior Villas. The senior condominiums will be located on six acres at Chandon Drive. The proposed senior housing development is consistent with the use and development standards outlined in Precise Plan for Area No. 20; however an amendment is needed in order to develop condominiums. .

9. **Surrounding Land Uses and Setting:** The Village One Specific Plan Area is over half built, as planned and approved by the 1990 Village One Specific Plan. The project area is bounded by developing subdivisions, Hacienda del Sol and Village Ranch, to the east and west, by Ustach Middle School to the north and by an existing residential neighborhood to the south.

10. **Other Public Agencies whose Approval Is Required:** None.

III. DETERMINATION:

Based on the analysis contained in this document, staff finds that pursuant to Guidelines Section 15162 the following is true for the proposed project:

(1) Major revisions to the Village One Program EIR as amended by the 1994 Supplement, are not required because the project will not involve new significant environmental effects or increase severity of effects previously identified, and

(2) Major revisions to the Village One Program EIR as amended by the 1994 Supplement, are not required because no substantial changes to circumstances

have occurred that involve new significant environmental effects or increase severity of effects previously identified, and

(3) No new information of substantial importance that was not known has become available that shows:

   a. one or more significant effects is not discussed in the Village One Program EIR as amended by the 1994 Supplement,

   b. identified significant effects will be more severe,

   c. previously infeasible mitigation measures are now feasible,

   d. project proponents have declined to adopt mitigation measures that would substantially reduce significant effects.

(4) Because no new significant effects have been identified and no new mitigation is required for the project, the environmental effects of the operation of the proposed project were covered by the Village One Program EIR as updated by the 1994 Supplement. Therefore, pursuant to CEQA Section 15168 (C) (4) no new environmental document is required.

(5) Therefore, the projects known as Precise Plan 20 and Devante Senior Villas VTSM are within the scope of the Village One Program EIR.

David Wayne 12/12/06

Project Manager Date

IV. PROJECT EVALUATION:

The following written Checklist based on Appendix G of the CEQA Guidelines serves to document the evaluation of the site and activity of the proposed project pursuant to CEQA Guidelines Section 15168 (c) (4) to determine whether the environmental effects of the operation were covered in the Program EIR.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
I.	**AESTHETICS.** Would the project:				
a.	Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☑
b.	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings along a scenic highway?	☐	☐	☐	☑
c.	Substantially degrade the existing visual character or quality of the site and its surroundings?	☐	☐	☐	☑
d.	Create a new source of substantial light or glare that would adversely affect daytime or nighttime views in the area?	☐	☐	☐	☑

Aesthetic and visual impacts are analyzed on pages III-100 through III-101 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that as the Specific Plan area is developed, it will eliminate views of the valley and the distant mountains from adjacent areas and reduce the area's visual open space. However, the program EIR found the effects of buildout of Village One on scenic vistas to be less than significant because views from the project area are minimal. The proposed residential project would not change the extent or nature of construction in the Specific Plan area, or cause any other changes in the project area. Impacts on scenic vistas would therefore remain the same as those identified in the program EIR. There would be no additional impact. No mitigation is required.

b. The Village One Specific Plan program EIR found that there are no scenic resources in the project area, and that development within the Specific Plan area would therefore not result in significant impacts on scenic resources. This

finding would not be affected by the proposed residential project. There would be no impact. No mitigation is required.

c. The Village One Specific Plan program EIR found that the development within the Specific Plan area would have a less-than-significant impact on the visual character of the area. The proposed residential project would not change the design or layout of the development proposed within the Village One Specific Plan. For this reason, impacts on the visual character of the area would remain the same as those identified in the program EIR. There would be no additional impact. No mitigation is required.

d. The proposed residential development is consistent with the Village One Specific Plan. For this reason, impacts associated with additional light and glare would remain the same as those identified in the program EIR. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
II.	**AGRICULTURAL RESOURCES.** In determining whether impacts on agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation. Would the project:				
a.	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☑
b.	Conflict with existing zoning for agricultural use or conflict with a Williamson Act contract?	☐	☐	☐	☑
c.	Involve other changes in the existing environment that, due to their location or nature, could result in conversion of Farmland to non-agricultural use?	☐	☐	☐	☑

Impacts on agricultural resources are analyzed on pages III-80 through III-94 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that land designated as Prime Farmland would be lost as a result of development in the Village One Specific Plan area. This impact was determined to be significant and not mitigable. The proposed residential development would not affect this finding because the project area would remain the same. There would be no additional impact. No mitigation is required.

b. The Village One Specific Plan program EIR presented information showing that any Williamson Act contracts in the Village One Specific Plan area would be automatically cancelled on annexation of the land to the City of Modesto, which has occurred, or would expire within 10 years of the time the original program EIR was prepared. The last Williamson Act contract covering land in the Village One Specific Plan area expired in 2001. There are no lands in the project area under Williamson Act contract. The Village One Specific Plan area has also been rezoned consistent with the specific plan, and no lands in the project area are now zoned for agricultural use. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR identified a potential land use conflict between new residential uses in the specific plan area and adjacent agricultural uses. Such conflicts can lead to conversion of adjacent farmlands to other uses. The program EIR proposed mitigation measures for this potential impact that would reduce the impact's significance, although the EIR noted that the mitigation measure might not fully mitigate the impact. No additional mitigation measures are available for this impact. This finding would not be affected by the proposed project because the project area and proposed land uses would remain the same. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
III.	**AIR QUALITY.** When available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a.	Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☐	☑
b.	Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	☐	☐	☐	☑

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
c.	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is a nonattainment area for an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors)?	☐	☐	☐	☑
d.	Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☐	☑
e.	Create objectionable odors affecting a substantial number of people?	☐	☐	☐	☑

Impacts on air quality are analyzed on pages III-45 through III-54 of the 1994 Supplement.

Responses to Checklist Questions

a. / b. The Village One Specific Plan program EIR found that air pollution from project-related construction traffic and fireplaces & wood stoves in planned residential areas would violate air quality standards and contribute to an existing air quality violation. Construction traffic emissions would contribute to violation of the state and federal 8-hour carbon monoxide (CO) and particulate matter (PM10) standards and the federal ozone standard in the Modesto Urban Area and the San Joaquin Valley Air Basin. Urban traffic pollution would contribute to violations of the state ozone, CO, and PM10 standards in the Modesto Urban Area and San Joaquin Valley Air Basin. Residential pollution would contribute to violations of the pollutant standard index in the Modesto Urban Area. Partial mitigation for these impacts is included in the program EIR (Mitigation Measures 3–5), and the City of Modesto adopted a statement of overriding consideration for each impact. The proposed residential project would not change the amount of development and construction in the project area, so trips generated by the project would not be affected and the types of land uses would not change. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR found that air pollutant emissions associated with traffic at buildout of Village One would exacerbate the existing ozone, PM10, and CO violations in the Modesto area and cause a significant cumulative impact. Partial mitigation for these emissions is included in the program EIR (Mitigation Measures 4.5.3[a] and 4.5.3[b]), and the City of Modesto made a statement of overriding consideration for each impact. The proposed residential development would not change the amount of traffic associated with buildout of Village One or the types of land uses, so trips

generated by the project would not be affected. There would be no additional impact. No mitigation is required.

d. The Village One Specific Plan program EIR found that PM10 generated during construction would aggravate the respiratory problems of people living and working nearby, therefore exposing sensitive receptors in the area to pollutant concentrations and causing a significant impact. However, the program EIR outlines mitigation measures that will be implemented to reduce the impact to an acceptable level (Mitigation Measure 40). The proposed residential development would not change the level of construction emissions. There would be no additional impact. No mitigation is required.

e. The proposed residential development would not create odors. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
IV.	**BIOLOGICAL RESOURCES.** Would the project:				
a.	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☑	☐
b.	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☑
c.	Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marshes, vernal pools, coastal wetlands, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☑
d.	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☐	☑

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
e.	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☑
f.	Conflict with the provisions of an adopted habitat conservation plan, natural community conservation plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☑

Impacts on biological resources are analyzed on pages III-68 through III-79 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that the buildout could result in the loss of foraging habitat for Swainson's Hawk, a state-listed threatened species. However, a Swainson's Hawk survey was conducted by a qualified biologist for the project site. The ensuing report (attached) found that the development of the project site would result in a less than significant impact to foraging habitat for Swainson's Hawk. Therefore, no mitigation is required.

b. The Village One Specific Plan program EIR did not find that any riparian habitat or other designated sensitive natural community was present in the project area, and so found that the project would have a less-than-significant impact. The proposed residential development would not change the boundaries of the Specific Plan area. There would be no impact. No mitigation is required.

c. The Village One Specific Plan program EIR found that buildout of the Village One Specific Plan area would result in the loss of lands that might be classified as wetlands by the U.S. Army Corps of Engineers, but that, with mitigation, the impact would be less than significant. The proposed residential development would not change the Specific Plan area boundaries or the areas that would be disturbed. There would be no additional impact. No mitigation is required.

d. The Village One Specific Plan program EIR did not identify any migratory corridors in the project area, nor did it find that the project would interfere with the movement of any species. The proposed residential development would not change the Specific Plan area boundaries. There would be no impact. No mitigation is required.

e. / f. No local biological resource protection policies, ordinances, habitat conservation plans, or natural community conservation plans apply to the Village One Specific Plan area. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
V.	**CULTURAL RESOURCES.** Would the project:				
a.	Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?	☐	☐	☐	☑
b.	Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?	☐	☐	☐	☑
c.	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☐	☑
d.	Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☐	☑

Responses to Checklist Questions

a.-d. Impacts on cultural resources resulting from the buildout of Village One (e.g., from construction of associated infrastructure) are addressed in the Opportunities/Constraints Report prepared for the Modesto Planning Commission (December 1, 1989). The report concluded that there are no known historic, archaeological, or paleontological resources in the Village One Specific Plan area. Based on the results of this report, (Cultural and Historic Resources Report, page 3) it was determined that the likelihood that the proposed residential development would change or disturb human remains or significant historic, archaeological, or paleontological resources was low.

The proposed project would not change the locations or types of construction in the project area nor the boundaries of the project area. Development of the proposed project will not result in effects on scattered existing structures. A Cultural Resources Assessment was prepared to determine if any of these affected structures are considered historic resources. The Cultural Resources Assessment is attached to this document as Appendix A. No historic structures are located within the project area boundaries. Therefore, no mitigation measures are necessary.

Since no archaeological, or paleontological resources were found in the previous document to be located in the project area, and since the proposed project would not have a significant impact on historic structures, there would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
VI.	**GEOLOGY AND SOILS.** Would the project:				
a.	Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
	1. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	☐	☐	☐	☑
	2. Strong seismic groundshaking?	☐	☐	☐	☑
	3. Seismic-related ground failure, including liquefaction?	☐	☐	☐	☑
	4. Landslides?	☐	☐	☐	☑
b.	Result in substantial soil erosion or the loss of topsoil?	☐	☐	☐	☑
c.	Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the project and potentially result in an onsite or offsite landslide, lateral spreading, subsidence, liquefaction, or collapse?	☐	☐	☐	☑
d.	Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	☐	☐	☐	☑
e.	Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems in areas where sewers are not available for the disposal of wastewater?	☐	☐	☐	☑

Impacts associated with geology and soils are analyzed on pages III-105 through III-108 of the 1994 Supplement.

Responses to Checklist Questions

a.-d. The program EIR, as supplemented, found that the project area is not subject to geologic or soil-related hazards that cannot be adequately mitigated through the implementation of existing city regulations, such as the building code. No significant impacts were identified, and no mitigation measures were required. The proposed residential development would not change the locations or types of construction in the project area nor the boundaries of the project area. There would be no additional impact. No mitigation is required.

e. The Village One Specific Plan included provisions for the project to be served by public sewers. No septic tanks or alternative wastewater systems were proposed. The proposed residential project would not change the proposed method of wastewater disposal. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation	Less-than-Significant Impact	No Impact
VII.	**HAZARDS AND HAZARDOUS MATERIALS.** Would the project:				
a.	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☐	☑
b.	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☐	☑
c.	Emit hazardous emissions or involve handling hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☐	☑
d.	Be located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☑
e.	Be located within an airport land use plan area or, where such a plan has not been adopted, be within two miles of a public airport or public use airport, and result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☑

Potentially Significant | Less than Significant | Less-than-Significant | No Impact

		Impact	with Mitigation Incorporated	Impact	
f.	Be located within the vicinity of a private airstrip and result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☑
g.	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☑
h.	Expose people or structures to a significant risk of loss, injury, or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	☐	☐	☐	☑

Impacts associated with hazards and hazardous materials are analyzed on pages III-80 through III-94 and III-109 through III-119 of the 1994 Supplement.

Responses to Checklist Questions

a.–c. The Village One Specific Plan does not allow any land uses that would use hazardous materials. The proposed residential development would not change land uses contemplated by the Specific Plan. There would be no impact. No mitigation is required.

d. The Village One Specific Plan program EIR, as supplemented, found no hazardous materials were stored at or near the project site. No significant impacts were identified, and no mitigation measures were required. There would be no additional impact. No mitigation is required.

e. The Village One Specific Plan area is not located in an airport land use plan area or within 2 miles of a public airport. There would be no impact. No mitigation is required.

f. The Village One Specific Plan program EIR found that a private airstrip, the Eastside Mosquito Abatement District Airstrip, is located to the east of the Village One Specific Plan area. However, take-offs and landings were found to take place parallel to and outside the Specific Plan area boundaries, and flight patterns are generally situated to the east of the Specific Plan area. There would be no additional impact. No mitigation is required.

g. Since the adoption of the Village One Specific Plan, the Modesto General Plan has been updated to include development of Village One consistent with the specific plan. City emergency plans are developed with the assumption that the Village One Specific Plan will be implemented. The proposed residential development would not change construction, land use, or other physical attributes of the Right-of-Way Acquisition. There would be no additional impact. No mitigation is required.

h. The project site is located in an area of the City of Modesto planned for buildout of an urban neighborhood. Approximately 50% of the project area remains undeveloped, with a covering of dry brush and vegetation. The potential for wildland fires is low, and this potential will decrease further as buildout continues. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
VIII.	**HYDROLOGY AND WATER QUALITY.** Would the project:				
a.	Violate any water quality standards or waste discharge requirements?	☐	☐	☐	☑
b.	Substantially deplete groundwater supplies or interfere substantially with groundwater recharge, resulting in a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level that would not support existing land uses or planned uses for which permits have been granted)?	☐	☐	☐	☑
c.	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation onsite or offsite?	☐	☐	☐	☑
d.	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding onsite or offsite?	☐	☐	☐	☑

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
e.	Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☐	☐	☐	☑
f.	Otherwise substantially degrade water quality?	☐	☐	☐	☑

g.	Place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	❑	❑	❑	☑
h.	Place within a 100-year flood hazard area structures that would impede or redirect floodflows?	❑	❑	❑	☑
i.	Expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?	❑	❑	❑	☑
j.	Contribute to inundation by seiche, tsunami, or mudflow?	❑	❑	❑	☑

Impacts associated with hydrology are analyzed on pages III-109 through III-119 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR did not find that residential development would violate any water quality standards or waste discharge requirements. The proposed project is consistent with the Village One Specific Plan, so there would be no additional impacts. No mitigation is required.

b. The Village One Specific Plan program EIR found that buildout of the Village One Specific Plan area might interfere with local groundwater recharge. However, the impact was found to be less than significant because the Specific Plan area is not a major groundwater recharge area and it includes a recharge/discharge plan for disposal of stormwater runoff and recharge of groundwater. The proposed project would not change the amount of impervious surface in the Specific Plan area or the proposed storm drain facilities. There would be no additional impact. No mitigation is required.

c.–e. The Village One Specific Plan program EIR found that development will substantially alter the existing drainage pattern of the area but, because the project will incorporate an urban storm drain system, will not result in any erosion impacts. The proposed project would not change the amount of impervious surface or the proposed storm drain facilities. There would be no additional impact. No mitigation is required.

f. The Village One Specific Plan program EIR did not find that development would substantially degrade water quality. The proposed project would not change water use or discharge associated with the buildout of the Village One Specific Plan area. There would be no additional impact. No mitigation is required.

g.–i. According to the Village One Specific Plan program EIR, the project site is not situated in a 100-year flood hazard area or downstream from a levee or dam. There would be no impact. No mitigation is required.

j. The project site is located in a flat, inland area not susceptible to seiche, tsunami, or mudflow. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
IX.	**LAND USE AND PLANNING.** Would the project:				
a.	Physically divide an established community?	☐	☐	☐	☑
b.	Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to, a general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☑
c.	Conflict with any applicable habitat conservation plan or natural community conservation plan?	☐	☐	☐	☑

Impacts associated with land use and planning are analyzed on pages III-80 through III-94 of the 1994 Supplement.

Responses to Checklist Questions

a. The proposed project would not result in any physical changes to the environment beyond those described in the Village One Specific Plan. Village One would continue to be developed as a planned community; therefore, the project would not divide an established community. There would be no impact, and no mitigation is required.

b., c. The Village One Specific Plan has been adopted by the City of Modesto and has been incorporated into the Modesto General Plan. The proposed project would be consistent with the Village One Specific Plan. There are no other applicable land use or conservation plans for the project area. There would be no impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation	Less-than-Significant Impact	No Impact
X.	**MINERAL RESOURCES.** Would the project:				
a.	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☑

b.	Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?	☐	☐	☐	☑

Responses to Checklist Questions

a., b. No known mineral resources or important recovery sites are located in the Village One Specific Plan Area. There would be no impact. No mitigation is required.

XI. NOISE. Would the project:

c.	Result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☐	☑
d.	Result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☐	☑
e.	Be located within an airport land use plan area, or, where such a plan has not been adopted, within two miles of a public airport or public use airport and expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☑
f.	Be located in the vicinity of a private airstrip and expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☑

Impacts associated with noise are analyzed on pages III-55 through III-67 of the 1994 Supplement.

a., c. The Village One Specific Plan program EIR found that proposed residential housing in the project area would be exposed to noise levels exceeding general plan thresholds, but mitigation measures were incorporated to reduce the impact to a less-than-significant level. The proposed project would not change project-related noise-generating activities. There would be no additional impact. No mitigation is required.

b. The Village One Specific Plan program EIR found that the buildout of Village One would not expose people to, or generate excessive, groundborne vibration or groundborne noise levels. There would be no impact. No mitigation is required.

d. The Village One Specific Plan program EIR found that construction of the proposed project would result in a substantial temporary increase in ambient noise levels for residential housing. However, mitigation measures were incorporated into the program EIR to reduce the impact to a less-than-significant

level. The proposed project would not change construction activities. There would be no additional impact. No mitigation is required.

e. The Village One Specific Plan program EIR found that the Village One Specific Plan area is not located in an airport land use plan area or within 2 miles of a public airport. There would be no impact. No mitigation is required.

f. The Village One Specific Plan program EIR found that a private airstrip, the Eastside Mosquito Abatement District Airstrip, is located east of the Village One Specific Plan area. However, take-offs and landings take place parallel to and outside the Specific Plan boundaries, and flight patterns are generally situated east of the project area. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XII.	**POPULATION AND HOUSING.** Would the project:				
a.	Induce substantial population growth in an area, either directly (e.g., by proposing new homes and businesses) or indirectly (e.g., through extension of roads or other infrastructure)?	☐	☐	☐	☑
b.	Displace a substantial number of existing housing units, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☑
c.	Displace a substantial number of people, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☑

Impacts on population and housing are analyzed on pages III-95 through III-99 of the 1994 Supplement.

Responses to Checklist Questions

a.–c. The Village One Specific Plan program EIR found that buildout of the Village One Specific Plan area would not result in significant adverse impacts on population and housing units. No mitigation is required.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact

XIII. PUBLIC SERVICES. Would the project:

a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities or a need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the following public services:				
Fire protection?	☐	☐	☑	☐
Police protection?	☐	☐	☑	☐
Schools?	☐	☐	☐	☑
Parks?	☐	☐	☑	☐
Other public facilities?	☐	☐	☑	☐

Impacts on public services are analyzed on pages III-120 through III-158 of the 1994 Supplement.

Responses to Checklist Questions

a. The Village One Specific Plan program EIR found that the only significant impact that buildout of the Village One Specific Plan area would have on public services would be in the areas of fire protection and law enforcement. Mitigation measures were identified in the program EIR to reduce the level of this impact to a less-than-significant level. No other significant impacts on public services were identified. The proposed project would not change the provision of public services. There would be no additional impact. No mitigation is required.

	Potentially Significant Impact	Less than Significant with Mitigation	Less-than-Significant Impact	No Impact
XIV. RECREATION. Would the project:				
a. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☐	☑
b. Include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?	☐	☐	☐	☑

Impacts on recreation are analyzed on pages III-120 through III-158 of the 1994 Supplement.

Responses to Checklist Questions

a., b. No significant impacts on recreation were identified in the program EIR. The proposed project would not change the provision of parks and recreation facilities. There would be no additional impact. No mitigation is required.

		Potentially Significant Impact	Less than Significant with Mitigation	Less-than-Significant Impact	No Impact
XV.	**TRANSPORTATION/TRAFFIC.** Would the project:				
a.	Cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in the number of vehicle trips, the volume-to-capacity ratio on roads, or congestion at intersections)?	☐	☐	☐	☑
b.	Cause, either individually or cumulatively, exceedance of a level-of-service standard established by the county congestion management agency for designated roads or highways?	☐	☐	☐	☑
c.	Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	☐	☐	☐	☑
d.	Substantially increase hazards because of a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☐	☑
e.	Result in inadequate emergency access?	☐	☐	☐	☑
f.	Result in inadequate parking capacity?	☐	☐	☐	☑
g.	Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?	☐	☐	☐	☑

Impacts on transportation and traffic are analyzed on pages III-40 – III-44 of the 1994 Supplement.

Responses to Checklist Questions

a., b. The Village One Specific Plan program EIR found that buildout of the Village One Specific Plan area would cause an increase in traffic that is substantial in relation to the existing traffic load and capacity of the street system and would affect level of service at several intersections. Mitigation measures identified in the program EIR were identified to reduce impacts to a less-than-significant level for all intersections except the Briggsmore Avenue/Oakdale Avenue intersection. For that intersection, the impact was determined to be significant and not mitigable. The City of Modesto made a statement of overriding considerations for that impact at the time it certified the 1994 Supplement. The proposed project would not alter traffic patterns in the Specific Plan area or result in additional trips. There would be no additional impact. No mitigation is required.

c. The Village One Specific Plan program EIR did not find that the buildout of the Village One Specific Plan area would result in a change in air traffic patterns. The proposed project does not include any elements that would affect air traffic patterns. There would be no impact. No mitigation is required.

d. The Village One Specific Plan program EIR did not find that buildout of the Village One Specific Plan area included any hazardous design features or increased any incompatible uses for roads in the project area. The proposed project would not change roadway design or land uses. There would be no impact. No mitigation is required.

e. The Village One Specific Plan program EIR did not find that buildout of the Village One Specific Plan area would result in inadequate emergency access in the Specific Plan area. The Specific Plan includes provision of adequate roadways to serve the Village One development. The proposed project would not change roadway design or land uses contained within the Specific Plan. There would be no additional impact. No mitigation is required.

f. The Village One Specific Plan program EIR did not find that buildout of the Village One Specific Plan area would result in inadequate parking capacity in the Specific Plan area. The provision of parking, consistent with zoning requirements for the proposed project, is included in the project design. There would be no impact. No mitigation is required.

g. The proposed project does not include any changes related to transportation policies, and would have no impact. No mitigation is required.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less-than-Significant Impact	No Impact
XVI. UTILITIES AND SERVICE SYSTEMS. Would the project:				
a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	☐	☐	☐	☑

b.	Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☐	☑
c.	Require or result in the construction of new stormwater drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☐	☑
d.	Have sufficient water supplies available to serve the project from existing entitlements and resources, or would new or expanded entitlements be needed?	☐	☐	☐	☑
e.	Result in a determination by the wastewater treatment provider that serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☐	☑
f.	Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	☐	☐	☐	☑
g.	Comply with federal, state, and local statutes and regulations related to solid waste?	☐	☐	☐	☑

Impacts on utilities and service systems are analyzed on pages III-120 through III-158 of the 1994 Supplement.

Responses to Checklist Questions

a. The City provides sewer services to the Village One area. All wastewater would be directed to city wastewater treatment facilities. No wastewater discharges would occur in the project area. The proposed project would not increase the amount of wastewater that will be generated at buildout of the Specific Plan area. There would be no additional impact. No mitigation is required.

b., e. The Village One Specific Plan program EIR discusses the changes and new facilities that will be needed to accommodate buildout of the Village One Specific Plan area. The EIR found that, with mitigation, there would be no significant impact on water or wastewater infrastructure. There would be no additional impact as a result of the proposed project. No mitigation is required.

c. The Village One Specific Plan program EIR discusses the changes and new facilities that will be needed in order to accommodate buildout of the Village One Specific Plan area. The EIR found that, with mitigation, there would be no significant impact on stormwater drainage facilities. An update to the Storm Drainage Master Plan has been prepared and is under consideration by the City.

An addendum to the Village One program EIR for the Storm Drainage Master Plan has also been prepared and is under consideration by the City. The project would not result in any additional impacts or the need for any additional mitigation beyond that assessed in the Addendum to the Village One Program EIR for the Storm Drainage Master Plan.

d. The Village One Specific Plan program EIR found that, with mitigation, the effects of buildout of the Village One Specific Plan area on water supply would be less than significant. There would be no additional impact resulting from the proposed project. No mitigation is required.

f., g. The Village One Specific Plan program EIR found that the area's landfills have sufficient permitted capacity to accommodate the project's solid waste disposal needs. The proposed project would not result in any physical changes in the environment or the generation of any additional solid waste. There would be no impact. No mitigation is required.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE.

a.	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?	☐	☐	☐	☑
b.	Does the project have impacts that are individually limited but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	☐	☐	☐	☑
c.	Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☐	☑

Cumulative impacts are analyzed on page III-161 of the 1994 Supplement.

Responses to Checklist Questions

a. As described above, the proposed project would not result in any significant impacts on the environment over and above those associated with

implementation of the Village One Specific Plan and as analyzed in the Village One Specific Plan program EIR.

b. As described above, the proposed project would not result in any significant impacts, either on a project or on cumulative level, over and above those associated with implementation of the Village One Specific Plan and as analyzed in the Village One Specific Plan program EIR.

c. As described above, the proposed project would not result in any significant impacts affecting humans over and above those associated with implementation of the Village One Specific Plan and as analyzed in the Village One Specific Plan program EIR.

V. MITIGATION APPLIED TO PROJECT

The following mitigation measures developed in the 1994 Village One Specific Plan Supplement to the Program EIR are appropriate to the project and will be incorporated into the project. Therefore, the environmental effects of the project were covered by the program EIR.

1. Prior to the Final Inspection, Building Inspection Division shall verify that all fireplaces and wood stoves in residential units are equipped to meet the performance and emissions standards set forth in Part 60, Title 40, Subpart AAA Code of Federal Regulations, February 26, 1988.

2. Construction noise is regulated by the City's Noise Ordinance, Section 4.9 – 103. Construction noise is generally permitted during the hours of 7:00 am to 9:00 pm. To avoid complaints from nearby residents, and possible citations, the full text of the ordinance should be reviewed by builders prior to construction. City construction projects will be monitored by Construction Inspection for conformance with the City's Noise Ordinance.

3. During construction activities, Building Inspection Division shall verify that contractors observe the requirements of City of Modesto Standard Specification 2.07(A)(5), Dust Control, and when necessary, Regulation VIII of the San Joaquin Valley Unified Air Pollution Control District to control the generation of PM 10 from construction related dust and emissions.

4. "All deeds for lots sold in this subdivision shall contain the following statement:

   'This lot is located near existing agricultural operations. Residents may be subjected to customary and accepted farming practices that produce noise, dust, smoke and other impacts. The grantee accepts the potential impacts of customary farming practices, which may include the application and use of various, chemicals through spraying, spreading or other customary means in accordance with applicable state and federal regulations regarding such applications. The grantee also acknowledges the need to avoid activities that conflict with nearby farm uses.'"

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-100

A RESOLUTION APPROVING A DEVELOPMENT PLAN FOR PLANNED DEVELOPMENT ZONE, P-D(578). (DUDLEY-CASH)

WHEREAS, a verified application for an amendment to Sections 29-3-9 and 32-3-9 of the Zoning Map was filed by William Dudley-Cash on June 20, 2006, to rezone from Commercial-Industrial Zone, C-M, to Planned Development Zone, P-D(578), to allow a mixed-use development, property located on the east corner of Seventh Street and J Street described as follows:

C-M to P-D(578)

All that certain real property situated in the City of Modesto, County of Stanislaus, State of California, and being a portion of the South half of Section 29, Township 3 South, Range 9 East, and a portion of the North half of Section 32, Township 3 South, Range 9 East, Mount Diablo Base and Meridian, more particularly described as follows:

Lots 27, 28, 29, 30, 31, and 32 in Block 42 of the City of Modesto, as shown on that map of City Blocks of the City of Modesto recorded in Volume 5 of Maps, Page 42, Stanislaus County Records; also including the Northeast half of 7th Street, the Southeast half of J Street, and the Southwest half of the alley, all being immediately adjacent to the above described properties.

WHEREAS, after a public hearing held on December 18, 2006, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, it was found and determined by the Planning Commission, by its Resolution No. 2006-77, that rezoning of the property as requested is required by public necessity, convenience, and general welfare for the following reasons:

1. The proposed Rezoning is consistent with the General Plan designation for the site. The site is within the Redevelopment Planning District (RPD) outlined in the Modesto Urban Area General Plan. The land use designation for this site within the RPD is Commercial-Residential-Public (CRP).

2. The proposed Planned Development Zone furthers goals outlined in Redevelopment Planning District, such as mixed-use developments and the infill of the development area.

3. The proposed Planned Development Zone, by reason of its plot plan design and conditions of approval, will be compatible with the surrounding land uses.

WHEREAS, said matter was set for a public hearing of the City Council to be held on February 6, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing was held, and

WHEREAS, after said public hearing the Council found and determined that the application of William Dudley-Cash for a Planned Development Zone should be granted as consonant with public necessity, convenience and general welfare for the reasons set forth in Planning Commission Resolution No. 2006-77 and quoted above, and

WHEREAS, the Council has introduced Ordinance No. 3434-C.S. on the sixth day of February 2007, rezoning the above-described property from Commercial-Industrial Zone, C-M, to Planned Development Zone, P-D(578).

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. DEVELOPMENT PLAN. The development plan for Planned Development Zone, P-D(578), is hereby approved subject to the following conditions:

1. Prior to issuance of a building permit of phase two (restaurant/loft), the applicant shall submit, for approval by the Community and Economic Development Director, a set of revised plot plans and building elevations showing any reduction or alteration in the building footprint and providing architecture and landscaping in accordance with the City's adopted Commercial and Industrial Guidelines. All development shall conform to this revised plan as amended in red, stamped approved by the Planning Commission.

2. Prior to issuance of a building permit, a landscaping and irrigation plan shall be approved by the Parks, Recreation and Neighborhood Director or designee. Landscaping and the irrigation system shall be installed and maintained in accordance with the approved plan.

3. Prior to issuance of a building permit, the applicant shall submit an application for a lot line adjustment. Prior to occupancy the applicant shall complete a lot line adjustment.

4. Fences or walls shall be constructed prior to occupancy and shall be as follows:

   A six-foot-high wood fence along the property line to the southeast on Seventh Street, adjacent to or as a replacement of the existing four-foot-high chain-link fence.

5. All landscaping, fences, and walls shall be maintained and the premises shall be kept free of weeds, trash, and other debris.

6. Street dedication consistent with Standard Specifications shall be made prior to the issuance of a building permit or at any time requested by the City Engineer or designee to alleviate a health, safety, or traffic problem in the area.

7. Street improvements consistent with Standard Specifications shall be provided prior to the occupancy of any structures or when requested by the City Engineer or designee to alleviate a health, safety, or traffic problem in the area.

8. Prior to issuance of a building permit, improvement plans for required improvements shall be prepared by a Registered Civil Engineer and approved by the City Engineer or designee. Improvements shall be constructed in accordance with the approved plans.

9. Prior to issuance of a building permit, the developer shall dedicate public utility easements as required by the utility companies and the City Engineer or designee.

10. Electric facilities and overhead lines shall be removed, relocated, or protected as required by the Modesto Irrigation District and the City Engineer or designee. Appropriate easements for electrical facilities shall be granted as required. Relocation or installation of electric facilities shall conform to the District's Electric Service Rules. Costs for relocation and/or undergrounding the District's facilities at the request of others will be borne by the requesting party.

11. Trash bins shall be kept in enclosures in accordance with the approved plan and in accordance with plans approved by the Public Works Director or designee. Enclosures shall be constructed of building materials consistent with those used in the major buildings as approved by the Community and Economic Development Department Director or designee.

12. Trash enclosures shall be of a size and design to permit the storage and removal of required recyclable material receptacles, or a separate enclosure of the collection for recyclable materials shall be provided as approved by the Public Works Director or designee.

13. Trash enclosures shall be bermed to prevent stormwater run-on and graded to drain to adjacent landscape areas as required by the Public Works director or designee.

14. Prior to issuance of a building permit, the developer shall show on the plans submitted to Building and Development Services all fire hydrants and FDC's required by the Fire Chief. Fire hydrant spacing and distribution for this zone is 300 feet, not to exceed 150 feet on a street frontage to a hydrant. All hydrants and FDC's required by the Fire Chief shall be installed and operable prior to construction of any structures.

15. Fire Department Connection (FDC) for automatic fire sprinklers should be accessible and located within 90 feet of a fire hydrant. FDC inlets should be no more than 48 inches AFF.

16. The developer shall install automatic fire sprinklers in the proposed residence/office and all other buildings over 5,000 sq ft.

17. Prior to the issuance of a building permit, the developer shall submit a plan to provide on-site treatment of storm water, as approved by the Public Works Director or designee. Storm drain improvements shall be constructed in accordance with the approved plans.

18. All signs for the office shall comply with the sign requirements of the P-O Zone, and the restaurant shall comply with the sign requirements of the C-3 Zone.

19. The property owner and developer shall, at their sole expense, defend, indemnify and hold harmless the City of Modesto, its agents, officers, directors and employees, from and against all claims, actions, damages, losses, or expenses of every type and description, including but not limited to payment of attorneys' fees and costs, by reason of, or arising out of, this development approval. The obligation to defend, indemnify and hold harmless shall include but is not limited to any action to arbitrate, attack, review, set aside, void or annul this development approval on any grounds whatsoever. The City of Modesto shall promptly notify the developer of any such claim, action, or proceeding and shall cooperate fully in the defense.

20. The Capital Facilities Fees payable at the time of the issuance of a building permit for any construction in this development shall be based on the rates in effect at time of issuance of the building permit.

In addition, the following recommended Conditions of Approval are mitigation measures from the Modesto Urban Area General Plan Master Environmental Impact Report that should be applied to the project:

21. All disturbed areas, including storage piles, which are not being actively utilized for construction purposes, shall be effectively stabilized of dust emissions using water, chemical stabilizer/suppressant, covered with a tarp or other suitable cover or vegetative ground cover.

22. All land clearing, grubbing, scraping, excavation, land leveling, grading, cut and fill, and demolition activities shall be effectively controlled of fugitive dust emissions utilizing application of water or by presoaking.

23. When materials are transported off-site, all material shall be covered, or effectively wetted to limit visible dust emissions, and at least six inches of freeboard space from the top of the container shall be maintained.

24. All operations shall limit or expeditiously remove the accumulation of mud or dirt from adjacent public streets at the end of each workday. The use of dry rotary brushes is expressly prohibited except where preceded or accompanied by sufficient wetting to limit the visible dust emissions. Use of blower devices is expressly forbidden.

25. Following the addition of materials to, or the removal of materials from, the surface of outdoor storage piles, said piles shall be effectively stabilized of fugitive dust emissions utilizing sufficient water or chemical stabilizer/suppressant.

26. Within urban areas, track out shall be immediately removed when it extends 50 or more feet from the site and at the end of each workday.

27. Install wheel washers for all exiting trucks, or wash off all trucks and equipment leaving the site.

28. Suspend excavation and grading activity when winds exceed 20 mph.

29. Limit the area subject to excavation, grading and other construction activity at any one time.

30. The City's Noise Ordinance (Modesto Municipal Code Section 4-9.101) prohibits the "loud and raucous discharge into the open air of the steam of any steam equipment or exhaust from any stationary internal-combustion engine."

    The Noise Ordinance prohibits the loud and raucous operation or use of any of the following before 7:00 a.m. or after 9:00 p.m. daily (except Saturday and Sunday and State or Federal holidays, when the prohibited time shall be before 9:00 a.m. and after 9:00 p.m.):

    a. A hammer or any other device or implement used to pound or strike an object.

b. An impact wrench or other tool or equipment powered by compressed air.

c. A hand-powered saw.

d. Any tool or piece of equipment powered by an internal-combustion engine such as, but not limited to, chain saw, backpack blower, and lawn mower.

e. Any electrically powered (whether by alternating current electricity or by direct current electricity) tool or piece of equipment used for cutting, drilling, or shaping wood, plastic, metal, or other materials or objects, such as, but not limited to, a saw, drill, lathe, or router.

f. Any of the following: heavy equipment (such as but not limited to bulldozer, steam shovel, road grader, back hoe), ground drilling and boring equipment (such as but not limited to derrick or dredge), hydraulic crane and boom equipment, portable power generator or pump, pavement equipment (such as but not limited to pneumatic hammer, pavement breaker, tamper, compacting equipment), pile-driving equipment, vibrating roller, sand blaster, gunite machine, trencher, concrete truck, and hot kettle pump.

g. Any construction, demolition, excavation, erection, alteration, or repair activity. In the case of urgent necessity and in the interest of public health and safety, the Chief Building Official may issue a permit for exemption from these. Such period shall not exceed three (3) working days in length while the emergency continues but may be renewed for successive periods of three (3) days or less while the emergency continues. The Chief Building Official may limit such permit as to time of use and/or permitted action, depending upon the nature of the emergency and the type of action requested.

h. Construction equipment and vehicles should be equipped with properly operating mufflers according to the manufacturers' recommendations. Air compressors and pneumatic equipment should be equipped with mufflers, and impact tools should be equipped with shrouds or shields.

31. If archaeological resources are discovered at any time during construction, all activity shall cease until the site is surveyed by a qualified archaeologist. The survey shall include mitigation measures, which shall be implemented before construction resumes. The survey shall follow the criteria as presented in Appendix K.

SECTION 2. DEVELOPMENT SCHEDULE. The following development schedule is hereby approved for said Planned Development Zone, P-D(578):

The construction program be accomplished in two phases as follows:

1. Phase I – Construction to begin on or before two years after City Council approval and completion to be not later than three years after City Council approval.

2. Phase II – Construction to begin on or before three years after City Council approval and completion to be not later than four years after City Council approval.

SECTION 3. CHANGES IN DEVELOPMENT PLAN. Any changes in the above approved development plan shall be made in accordance with the provisions of Section 10-2.1709 of the Modesto Municipal Code.

SECTION 4. COMPLIANCE WITH CODE PROVISIONS, ETC. In all other respects said planned development shall be accomplished in accordance with and in strict adherence to the provisions of Article 17 of Title 10 of the Modesto Municipal Code relating to Planned Development Zones and other applicable City laws, rules, regulations and procedures.

SECTION 5. EFFECTIVE DATE. This resolution shall not become effective unless and until the ordinance reclassifying the above-described property to Planned Development Zone, P-D(578), becomes effective.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember O'Bryant, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-101

Print

A RESOLUTION FINDING THAT THE FOLLOWING PROJECT IS WITHIN THE SCOPE OF THE PROJECT COVERED BY THE MODESTO URBAN AREA GENERAL PLAN MASTER ENVIRONMENTAL IMPACT REPORT (SCH NO. 1999082041): AMENDING SECTIONS 29-3-9 AND 32-3-9 OF THE ZONING MAP TO REZONE FROM COMMERCIAL INDUSTRIAL ZONE, C-M, TO PLANNED DEVELOPMENT ZONE, P-D(578) PROPERTY LOCATED ON THE EAST CORNER OF SEVENTH AND J STREETS (DUDLEY-CASH)

WHEREAS, on March 4, 2003, the City Council of the City of Modesto certified the Final Master Environmental Impact Report ("Master EIR") (SCH No. 1999082041) for the Modesto Urban Area General Plan, and

WHEREAS, William Dudley-Cash has proposed that the zoning designation for property located on the east corner of 7th and J Streets be amended to rezone from Commercial-Industrial Zone, C-M, to a new Planned Development Zone, P-D(578), in the City of Modesto to allow a mixed use development, and

WHEREAS, Section 21157.1 of the Public Resources Code, relating to reviewing subsequent projects for a Master EIR, states that the lead agency shall prepare an Initial Study on any proposed subsequent project to analyze whether the subsequent project may cause any significant effect on the environment that was not examined in the master environmental impact report and whether the subsequent project was described in the master environmental impact report as being within the scope of the project, and

WHEREAS, the City's Community & Economic Development Department by Environmental Assessment Initial Study EA/C&ED No. 2006-69 ("Initial Study") reviewed the proposed amendment to the Zoning Map and rezone to P-D(578) project to determine whether the project is within the scope of the project covered by the Modesto Urban Area General Plan Master EIR ("Master EIR"), and concluded that the proposed

project is within the scope of the Master EIR and will have no additional significant effect on the environment that was not identified in the Master EIR, and further, that no new additional mitigation measures or alternatives are required, and that, therefore, the proposed project is within the scope of the project covered by the Master EIR, and

WHEREAS, in accordance with CEQA guidelines begininning on January 15, 2007, the City caused to be published a 20-day notice of the City's intent to make a finding that the proposed project conforms with the Master EIR, and

WHEREAS, said matter was considered by the City Council at a duly noticed public hearing which was held on February 6, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Initial Study prepared for the proposed amendment to the Zoning Map and rezone to P-D(578) project, a copy of which is attached hereto as **Exhibit "A"**, and incorporated herein by reference, and based on the substantial evidence included in said Initial Study makes the following findings:

1. That the proposed project is contemplated and described in the Master EIR (SCH No. 1999082041) as being within the scope of the Master EIR.

2. That the project will have no new significant effects on the environment not identified or examined in the Master EIR, and no new or additional mitigation measures are required.

3. That, as per Section 21157.1 of the Public Resources Code, no new environmental document or findings are required by the California Environmental Quality Act (CEQA).

4. That there are no specific features which are unique to the proposed project that require project specific mitigation measures. Accordingly, the certified mitigation measures identified in the Master EIR will be sufficient for this project.

5. That all feasible mitigation measures set forth in the Master EIR which are appropriate to the project shall be incorporated in the project.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Community & Economic Development Director is hereby authorized and directed to file a notice of approval or determination within five (5) business days with the Stanislaus County Clerk pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of February, 2007, by Councilmember O'Bryant, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

Initial Study

EA/C&ED 2006-69

City of Modesto

Finding of Conformance to General Plan Master EIR:

Initial Study C&ED No. (2006- 69)

For the proposed:

Rezone from C-M to a (PD) Planned Development Zone for a 9,500 square-foot mixed- use-building complex at 924-930 J Street
(Cash Dudley, Applicant)

Prepared by:
City of Modesto
Community & Economic Development Department
Planning Division

December 18, 2006

City of Modesto
Master EIR Initial Study Checklist

I. PURPOSE

CEQA allows for the limited environmental review of subsequent projects under the City's Master EIR. This Initial Study Checklist is used in determining whether the **Rezone from C-M to a (PD) Planned Development Zone for a 9,500 square-foot mixed- use building complex at 924-930 J Street** is "within the scope" of the project analyzed in the Modesto Urban Area General Plan Master EIR (SCH# 1999082041) (Public Resources Code section 21157.1). When the Initial Study supports this conclusion, the City will issue a finding of conformity.

A subsequent project is "within the scope" of the Master EIR when:

1. it will have no additional significant effects on the environment that were not addressed as significant effects in the Master EIR; and

2. no new or additional mitigation measures or alternatives are required.

"Additional significant effects" means a project-specific effect that was not addressed as a significant effect in the Master EIR. (Public Resources Code Section 21158(d))

The determination must be based on substantial evidence in the record. "Substantial evidence" means facts, reasonable assumptions predicated upon facts, or expert opinion based on facts. It does not include speculation or unsubstantiated opinion. (State CEQA Guidelines Section 15384)

II. PROJECT DESCRIPTION

A. Title: Rezone from C-M to a (PD) Planned Development Zone for a 9,500 square-foot mixed- use building complex at 924-930 J Street

B. Address or Location: 924-930 7th Street

C. Applicant: Edna Faye Cash- Dudley, William Arliss Dudley- Cash, 1608 F Street, Modesto, CA 95354

D. City Contact Person: David Wage

Project Manager: David Wage, Assistant Planner
Department: Community and Economic Development Department
Phone Number: (209) 577-5302
E-mail address: dwage@modestogov.com

E. Current General Plan Designation(s): "C-M" Commercial-Industrial

F. Current Zoning Classification(s): RPD, Redevelopment Planned District

G. Surrounding Land Uses:

North:	(C-M) St. Stanislaus Church
South:	(C-M) residential units
East:	(C-M) industrial
West:	(C-M) residential units

H. Project Description, including the project type listed in Section II.C (Anticipated Future Projects) of the Master EIR (Attach additional maps/support materials as needed for complete record):

The applicant proposes a rezone to a Planned Development and the construction of 9,500 square-foot mixed-use building complex located on two vacant lots at 924-930 7th Street. The development would include a home residence, offices, a two-story restaurant/apartment building and fifteen (15) off street parking spaces.

I. Other Public Agencies Whose Approval is Required:

None.

IIII. FINDINGS/DETERMINATION (SELECT ONE ON THE BASIS OF THE ANALYSIS IN SECTION IV)

1. X **Within the Scope** - The project is within the scope of the Master EIR and no new environmental document or Public Resources Code Section 21081 findings are required. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

   C. An Initial Study was prepared by the City of Modesto that analyzed whether the proposed subsequent project may cause any significant effect on the environment that was not examined in the MEIR and it has been determined that the project was described in the MEIR as being within the scope of the MEIR.

   D. Based on the Initial Study, the City of Modesto finds and determines:
      a) The proposed subsequent project will have no additional significant effect as defined in CEQA Section 21158 that was not identified in the MEIR.
      b) No new or additional mitigation measures or alternatives are required.

   E. The criteria for currency of the Master EIR were reviewed (section 5 below) and it was determined that the Master EIR is current for all areas of the Initial Study.

2. ____ **Mitigated Negative Declaration Required** - On the basis of the above determinations, the project is not within the scope of the Master EIR. A mitigated negative declaration will be prepared for the project. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

   B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

   C. The project will have one or more potential new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures are being required of the project that will reduce the effects to a less-than-significant level.

3. ____ **Focused EIR Required-** On the basis of the above determinations, the project is not within the scope of the Master EIR. A Focused EIR will be prepared for the project. The following items are found to be true:

   A. The type of project is described in Chapter II of the Master EIR.

B. All applicable policies, regulations, and mitigation measures identified in the Master EIR have been applied to the project or otherwise made conditions of approval of the project.

C. The project will have one or more new significant effects on the environment that were not addressed as significant effects in the Master EIR. New or additional mitigation measures or alternatives are required as a result.

Project Manager	Assistant Planner Title	December 18, 2006 Date

4. Within the Scope Analysis of this Document:

The Master EIR permits projects to be found within the scope of the MEIR if certain criteria are met, Basically, if the following statements are found to be true for all 20 sections of this Initial Study, then the project was covered by the MEIR analysis and is within the scope of the MEIR. Any "No" response must be discussed.

		YES	NO
(1)	The lead agency for subsequent projects shall be the City of Modesto or a responsible agency identified in the Master EIR.	X	☐
(2)	City policies which reduce, avoid or mitigate environmental effects, will continue to be in effect and therefore would be applied to subsequent projects where appropriate. The policies are described in the list of policies in place and mitigation measures attached to the Initial Study template.	X	☐
(3)	Federal, State, Regional and Stanislaus County regulations do not change in a manner that is less restrictive on development than current law (i.e., would not offer the same level of protection assumed under the Master EIR).	X	☐
(4)	No specific information concerning the known or potential presence of significant resources is identified in future reports, or through formal or informal input received from responsible or trustee agencies or other qualified sources.	X	☐
(5)	The development will occur within the boundaries of the City's planning area as established in this Urban Area General Plan.	X	☐
(6)	Development within the project will comply with all mitigation measures identified in the General Plan Master EIR.	X	☐

5. Currency of the Master EIR Document

The MEIR should be reviewed on a regular basis to determine its currency, and whether additional analysis/mitigation should be incorporated into the MEIR via a Supplemental or Subsequent EIR (CEQA Section 21157.6). Staff has reviewed sections 1 through 20 of this document in light of the criteria listed below to determine whether the MEIR is current. The analysis contained within the Master EIR is current as long as the following circumstances have not changed. Any "No" response must be discussed.

		YES	NO
(1)	Certification of the General Plan Master EIR occurred less than five years prior to the filing of the application for this subsequent project.	X	☐
(2)	This project was described in the Master EIR and its approval will not affect the adequacy of the Master EIR for any subsequent project because the City can make the following findings:	X	☐
(3)	No substantial changes have occurred with respect to the circumstances under which the Master EIR was certified.	X	☐

(4) No new information, which was not known and could not have been known at the time the Master EIR was certified as complete, has become available. X ☐

(5) Policies remain in place that require site-specific mitigation, and avoidance or other mitigation of impacts as a prerequisite to future development. X ☐

IV. ENVIRONMENTAL ANALYSIS

This Initial Study, in accordance with Section 21157.1(b) of the Public Resources Code, analyzes whether this project may cause any project-specific significant effect on the environment that was not examined in the Final Master EIR (MEIR) for the General Plan and whether new or additional mitigation measures or alternatives may be required as a result. The Initial Study thereby documents whether or not the project is "within the scope" of the Master EIR.

Pursuant to Public Resources Code Section 21157.1, no new environmental document or findings are necessary for projects that are determined to be within the scope of the MEIR. Adoption of a notice of conformity after completion of the Initial Study fulfills the City's obligation in that situation.

All environmental effects cited reflect year 2025 build-out of the Urban Area General Plan as identified in the MEIR.

The Master EIR for the General Plan organizes its analysis of environmental impacts into eighteen subject areas. The following analysis is based on the impact analyses contained in Chapter V of the Master EIR. For ease of cross-reference, the sections are numbered in the same order as the analyses in Chapter V.

In addition to the 18 Master EIR subject areas, the Initial Study checklist addresses the issues of land use/planning and aesthetics. The reason for including these additional issues is to ensure that consideration is being given to the full range of subjects of importance contained in Appendix G of the CEQA Guidelines. The format for the land use/planning and aesthetics sections differs from that of the other 18 subject areas since these two subjects were not addressed as distinct subjects in the Master EIR.

1. TRAFFIC AND CIRCULATION

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant and unavoidable traffic and circulation impacts within certain areas of the "Baseline Developed Area":

Effect: Increased traffic will result in certain roadway segments operating at LOS "D" or worse.

Effect: The substantial increase in traffic relative to the existing load and capacity of the street system will cause, violation, either individually or cumulatively, of a LOS standard established by the County CMP for designated roads and highways.

Effect: Creation of need for Capacity-enhancing modifications to existing facilities.

Effect: Increase in energy consumption associated with the operation of highway projects, rail improvements, and aviation facilities.

Effect: Severe contrast with existing neighborhood or area character caused by highway and transit projects.

DISCUSSION:
This is an application to rezone to P-D and build a mixed-use complex. The addition of offices, a residence, a restaurant and an apartment is compatible with the existing residential, commercial and industrial uses located in this area. Due its size and nature, the proposed land use will not significantly change existing road capacities or levels of service.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Traffic and Circulation mitigation measures that may be pertinent to this project are found on MEIR pages V-1-15 through V-1-21. All feasible measures appropriate to the project – including any new measures - will be incorporated into or made conditions of approval of this project and will be listed in Section IV, *Mitigation Measures Applied to Project.*

c. Project-Specific Effects

Section V-1.B of the MEIR provides analysis of Traffic and Circulation impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Significance Criteria: A subsequent development project will have a new significant effect on the environment if it would exceed the following criteria:

	YES	NO
(1) Does the project contribute one hundred (100) or more peak hour trips to or from the site during the adjacent roadway's peak hour or the development's peak hour, to adjoining roads and generates more trips than assumed for their general plan land use category and zoning in the Master EIR.	☐	X

Note:

If a project exceeds an additional one hundred (100) or more peak hour trips contribution, a site access study may be conducted to determine to what extent the project would exceed the year 2025 level of service (LOS) expected for the adjoining roadways under the Master EIR. The site access study would recommend new, project-specific mitigation measures. If the project also exceeds the Master EIR's traffic generation assumption, as determined by Engineering & Transportation staff, a comprehensive traffic study would be required that will include off-site traffic impact analysis.

YES NO

(2)	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).	☐	X
(3)	Result in inadequate emergency access.	☐	X
(4)	Result in inadequate parking capacity.	☐	X

DISCUSSION:

(1) Engineering and Transportation Staff reviewed the proposed project and found:

A. The proposed project will not generate traffic impacts to the adjacent roadways in excess of what was assumed under the MEIR. No traffic study is required.
B. A site access study is not required for this project.

(2) The project will not substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).

(3) Police and Fire Staff have reviewed this proposal and have indicated that there is no emergency access problem.

(4) The project has been evaluated for compliance to the City of Modesto Parking regulations. The design and layout of the proposed parking area will comply with both City standards and ADA (Americans with Disability Act) standards.

2. AIR QUALITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to air quality:

Effect: Projected City traffic levels will result in increased ambient carbon monoxide (CO) levels in the project area. *This is a significant and unavoidable impact.*

Effect: Projected City traffic levels will result in increased ROG and NOX levels in the project area. *This is a significant and unavoidable impact.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Air Quality mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-2-11 through V-2-18 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project and are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

Mitigation Measures appropriate to this project include: AQ-17

c. Project-Specific Effects

Section V-2.B of the MEIR provides analysis of Air Quality impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project exceeds the emissions thresholds established for CO and NOx by the San Joaquin Valley Unified Air Pollution Control District's (SJVUAPCD) adopted CEQA Guidelines.	☐	X
(2)	The project does not incorporate the best management practices for PM10 reduction established by the SJVUAPCD.	☐	X
(3)	The project does not comply with the air quality policies of the Modesto Urban Area General Plan.	☐	X
(4)	The project would expose sensitive receptors to substantial pollutant concentrations.	☐	X
(5)	The project would create objectionable odors affecting a substantial number of people.	☐	X

DISCUSSION:

(1) The project was referred to the San Joaquin Valley Unified Air Pollution Control District who determined that the project would not have a significant effect on the ambient air quality.

(2) This project does incorporate the best management practices for PM10 reduction established by the SJVUAPD (see mitigations measures above).

(3) Applicable General Plan Policies will be applied to the project. Therefore, project-specific effects will be less than significant for this impact (see mitigations measures above).

(4) The project is not a significant contributor to pollution levels in that it involves only a building addition for an existing church. PM10 emissions created through the construction phase will be mitigated as called for by the MEIR by the measures listed above.

(5) The proposed project will not produce objectionable odors.

3. NOISE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant and unavoidable environmental impacts relative to noise:

Effect: Traffic noise levels for future conditions in the plan area have the potential to result in an excess of the City's Noise Significance Standards.

Effect: Noise level projections based on the traffic levels anticipated in the General Plan indicate that noise will exceed the City's General Plan and noise ordinance standards.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Noise policies and mitigation measures pertinent to the project being analyzed in this Initial Study are found on pages V-3-10 through V-3-15 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project and any new measures are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

Mitigation Measures appropriate to this project include: N-4, N-5 and N-6.

c. Project-Specific Effects

Section V-3.B of the MEIR provides analysis of noise impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project will exceed the standards for noise level and hours of operation established by the Modesto noise ordinance.	☐	X
(2)	The project will exceed the noise policies of or otherwise be inconsistent with the Modesto Urban Area General Plan.	☐	X
(3)	The project will result in a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	X
(4)	The project will result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project.	☐	X

DISCUSSION:

(1) The City's noise policy is incorporated into the conditions of approval as a mitigation measure.

(2) The project is consistent with the noise policies of the General Plan. The noise mitigation measures called for by the General Plan for projects within the baseline-developed area are incorporated into the conditions of approval for the project.

(3) The only permanent noise levels produced by the project would be associated with traffic. The traffic levels are within the scope of what the MEIR assumed for the site. Therefore, this project will not result in a substantial permanent increase in ambient noise levels.

(4) The project will not result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity. There will be some construction related noise, but the noise mitigation measures called for by the General Plan for projects within the baseline developed area, are incorporated into the conditions of approval for the project.

4. AGRICULTURAL LANDS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to agricultural lands:

Effect: Development within the urbanized Baseline Developed Area and Redevelopment Area will have a less-than-significant impact on agricultural lands.

Effect: Conversion of agricultural land will occur as available developable land is occupied within the City. This is a significant and unavoidable impact.

Effect: Growth within Modesto's planning area would contribute considerably to the loss of agricultural land within Stanislaus County. This is a significant and unavoidable cumulative impact.

DISCUSSION:

The site is not zoned for agriculture or designated on the General Plan for future agricultural use. The proposed project will not affect areas zoned for agriculture or designated on the General Plan for future agricultural use. The project site and the surrounding property are located within a fully developed urbanized area, both inside and outside the corporate City limits.

b. Master EIR and/or New Mitigation Measures Pertinent to the Project

Agricultural Land mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-4-7 and V-4-8 MEIR. All feasible measures appropriate to the project and any new mitigation to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-4.B of the MEIR provides analysis of Agricultural Lands impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project will directly result in the development of land outside the March 2003 planning area boundaries.	☐	X
(3)	The project will Conflict with existing zoning for agricultural use, or a Williamson Act contract.	☐	X
(4)	The project will Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan land use policies. It is an infill project, proposed within the urbanized area of the City. There are no agricultural parcels affected by the proposal and no agricultural and will be converted.

(2) The project is within the Baseline-Developed area of the City and therefore will not result in the development of land outside the March 2003 planning area boundaries.

(3) The project site is not zoned for agriculture nor is it under Williamson Act contract.

(4) The project will not involve changes to the existing environment that could result in the conversion of farmland to non-agricultural uses. The project is completely surrounded by urbanization.

5. WATER SUPPLY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to water supply:

Effect: Urban Area General Plan policies are established to limit groundwater extractions to the safe yield of the aquifer and thereby avoid aquifer over drafting. In addition, the UWMP requires that new urban development would proceed in conjunction with the availability of water supplies and distribution facilities. It is assumed that increased entitlement of surface water supplies such as a water transfer from another water purveyor would undergo independent environmental review pursuant to CEQA. *This is a less-than-significant impact.*

Effect: Development to the future projected City population would require expansion of the MRWTP to its full 60 mgd capacity, development of additional groundwater wells, and construction of additional water distribution and treatment facilities. Construction of some of the required facilities would most likely require site-specific environmental impact assessments to be conducted under CEQA. *Consequently, the potential environmental impacts of the Urban Area General Plan are considered less-than-significant.*

Effect: During drought years, despite available options, significant water shortages are forecast for the San Joaquin River basin by the year 2020. Modesto would make a cumulatively considerable contribution to the cumulative impact on water supply under drought conditions. *This is a significant and unavoidable cumulative impact.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Water Supply mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-5-7 through V-5-8 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-5.B of the MEIR provides analysis of Water Supply impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	Sufficient water supplies are not available to serve the project from existing entitlements and resources, new or expanded entitlements are needed.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan both in land use and intensity.

(2) The project was referred to Engineering and Transportation for comment and there was no determination that there is insufficient capacity to serve the project.

6. SANITARY SEWER SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to sanitary sewer services:

Effect: The City has already begun to implement the provisions of the Wastewater Master Plan (WMP) to meet future demand for sanitary sewer services. As City wastewater treatment facilities are expanded to meet the needs of the Baseline Developed, Redevelopment, and Planned Urbanizing Areas, the City will obtain the necessary wastewater discharge and NPDES permits from the Central Valley RWQCB, as required under Urban Area General Plan Policy V-D.2(a). Implementing the WMP, requirement of Best Management Practices for post-construction activities, as well as the Urban Area General Plan policy cited above, will avoid violation of wastewater discharge requirements. *As a result, this impact would be less-than-significant.*

Effect: The City has adopted the WMP specifically to ensure that sewer capacity will match the level of growth projected by the Urban Area General Plan. Development within the Baseline Developed and the Planned Urbanizing Areas that is consistent with the Urban Area General Plan will not have a significant effect on capacity. Urban Area General Plan Policy III-D.1(d) will ensure that development in the Planned Urbanizing Area will fund the necessary improvements. *This is a less-than-significant impact.*

Note on the WMP Master EIR. The WMP Master EIR identified a number of impacts and mitigation measures. Its mitigation measures have been adopted by the City and are being implemented by the City under the WMP. Those impacts are being independently addressed under that Master EIR and do not need to be considered under this Initial Study. Refer to the WMP Master EIR for details.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Sewer Service mitigation measure(s) pertinent to the project being analyzed in this Initial Study. are found on pages V-6-4 through V-6-7 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-6.B of the MEIR provides analysis of Sanitary Sewer Service impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project will result in a determination by the wastewater treatment provider which serves or may serve the project that it has inadequate capacity to serve the project's projected demand in addition to the provider's existing commitments.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan both in land use and intensity.

(2) The project was referred to Engineering and Transportation for comment and there was no indication that there is insufficient capacity to serve the project.

7. SENSITIVE WILDLIFE AND PLANT HABITAT

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to sensitive wildlife and plant habitat:

Effect: Although many sensitive species live in riparian habitats within the planning area, the policies of the plan will ensure that impacts of the Urban Area General Plan will be less-than-significant.

Effect: Requiring higher residential density than the suburban norm and a compact pattern of growth within the designated planning area to the year 2025 will minimize the City's contribution to the cumulative loss of habitat. Nonetheless, this is a significant and unavoidable impact.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Wildlife and Plant Habitat mitigation measure pertinent to the project being analyzed in this Initial Study are found on pages V-7-19 through V-7-21. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project regarding sensitive wildlife and plant habitat. The project site is not a biologically sensitive site as defined by Figures V-7-1a through V-7-1e of the MEIR.

c. Project-Specific Effects

Section V-7.B of the MEIR provides analysis of Wildlife and Plant Habitat impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project-specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	Consultation with the California Department of Fish and Game or the U.S. Fish and Wildlife Service determines that the project would have a significant effect on special status species.	☐	X
(3)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan both in land use and intensity.

(2) The project site is not a biologically sensitive site as defined by Figures V-7-1a through V 7-1e of the MEIR. The California Department of Fish and Game and the U.S. Fish and Wildlife Service were consulted in the production of the MEIR.

(3) There is no conflict with any local policies or ordinances protecting biological resources.

8. ARCHAEOLOGICAL OR HISTORICAL SITES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to archaeological or historical sites:

Effect: If a site-specific project involves the modification or demolition of a qualifying structure more than 50 years in age, then the impact will be significant.

Effect: Areas of high probability for archaeological resources are located within the riparian corridors along the Tuolumne River, Dry Creek, and the Stanislaus River. There, the potential impact comes from earthmoving activities that could result in disturbance of resources or human remains. There is a low probability that archaeological resources will be uncovered in areas outside of the riparian corridors.

Effect: The City Zoning Ordinance requires that when substantial changes to a structure are proposed, the development will be required to comply with other Zoning Ordinance provisions such as parking or landscaping requirements. This could result in modifications to the structure, which substantially reduce its historical significance. This would be a less-than-significant impact with the imposition of new mitigation measure Cultural-1.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Archaeological or Historic mitigation measures pertinent to the project being analyzed in this Initial Study are found on page V-8-13 and V-8-14 MEIR.

DISCUSSION:

Mitigation Measures applicable to this project include: AH-8, Master EIR.

c. Project-Specific Effects

Section V-8.B of the MEIR provides analysis of Archaeological/Historical impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would adversely affect a cultural resource that is either listed or eligible for listing in the California Register of Historical Resources, or that is listed by the City of Modesto as a Designated Landmark Preservation Site.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would not adversely affect a cultural resource that is either listed or eligible for listing in the California Register of Historical Resources, or that is listed by the City of Modesto as a Designated Landmark Preservation Site. The mitigation measure called for by the General Plan is incorporated into the conditions of approval for the project.

9. STORM DRAINAGE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to storm drainage:

Effect: The potential impacts on storm water drainage that could occur from the project were qualitatively evaluated with respect to several factors including: extent of the projected increase in urban surface area compared to undeveloped ground; magnitude of projected changes to hydrologic and physical site characteristics of the study area compared to existing conditions; regulatory criteria and guidelines; and professional judgment. Because the Urban Area General Plan includes policies that require new development in all three sections of the planning area to install approved drainage facilities, the potential impacts of the Urban Area General Plan on storm water drainage are considered *less-than-significant.*

Effect: The population of Stanislaus County is projected to increase in a fashion similar to that of Modesto, resulting in additional urban development and associated increases in impervious areas and associated urban storm water drainage. Cumulative hydrologic impacts of storm water flows from Modesto urban areas and other areas of the County could occur due to the fixed capacity of MID and TID irrigation canals to convey drainage west to the San Joaquin River. If drainage channels in some areas prove insufficient to handle the increased drainage discharges, existing storm water runoff from urban and agricultural areas during large storm events would have to be interrupted until water levels receded to a point allowing the resumption of discharges to the channel. Ceasing discharges to drainage channels could cause inundation in and around the drainage conveyance pipeline systems, surface drainage channels, detention basins, and other urban areas. *This cumulative impact is considered significant and unavoidable.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Storm Drainage mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-9-4 through V-9-8.

DISCUSSION:

Mitigation measures appropriate to this project include: SD-7, MEIR. This mitigation measure is addressed by conditions of approval.

c. Project-Specific Effects

Section V-9.B of the MEIR provides analysis of Storm Drainage impacts of development of the General Plan; the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or offsite.	☐	X
(3)	Create or contribute runoff water that would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project will meet the standards contained in the "Guidance Manual for New Development-Storm Water Quality Control Measures," adopted by the City as required by the above-listed mitigation measures.

(3) The project will not contribute additional water runoff that would exceed the capacity of the storm drainage system.

10. FLOODING AND WATER QUALITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to flooding and water quality:

Effect: Increased runoff can accelerate soil erosion, stream channel scouring, and sedimentation of channels, and also increase pollutant transport to waterways. The potential impacts of the project on flooding are considered less-than-significant because the Urban Area General Plan Update includes policies to restrict development in the floodplain and therefore would avoid exposing persons and property to flood hazards. In addition, new development under the Urban Area General Plan is required to install storm water drainage facilities that restrict the amount of post-development runoff from exceeding pre-development conditions.

Effect: The potential impacts of the project on surface-water quality are considered less-than-significant because the City policies and capital improvement projects for storm water drainage facilities would minimize discharges of urban pollutants to natural waterways. The City drainage program policies require new development to prepare drainage plans and implement urban runoff control measures; larger Specific Plan developments must have storm drainage systems designed to control pollutant runoff. The City's implementation policies for the municipal NPDES storm water permit require new development to implement an appropriate selection of permanent pollution control measures. Permanent erosion control measures such as seeding and planting vegetation for new cut-and-fill slopes, directing runoff through vegetation, or otherwise reducing the offsite discharge of particulates and sediment are the most effective method of controlling offsite discharges of urban pollutants.

Effect: The City's future development will contribute to cumulative water quality effects. EPA regulations for NPDES storm water permits and new proposed regulatory additions to the rules have become much more comprehensive in recent years and are being implemented to reduce pollutant runoff from both large- and small-scale activities. Implementation of NPDES-permitting programs throughout the county will reduce potential water-quality impacts to a less-than-significant level.

b. Master EIR and/or New Mitigation Measures Applied to the Project

Flooding and Water Quality mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-10-7 through V-10-10 MEIR. All feasible measures appropriate to the project have been incorporated into the conditions of approval.

DISCUSSION:

Mitigation measures appropriate to this project include: FWQ-14, MEIR. This mitigation measure is addressed by conditions of approval.

c. Project-Specific Effects

Section V-10.B of the MEIR provides analysis of Flooding and Water Quality impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project does not comply with the regulatory requirements of the federal Clean Water Act or the State Porter-Cologne Act.	☐	X
(3)	The project does not comply with Modesto's Guidance Manual for New Development Storm water Quality Control Measures.	☐	X
(4)	The project would create or contribute runoff water, which would exceed the capacity of existing or planned storm water drainage systems or provide substantial additional sources of polluted runoff.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would comply with the Federal Clean Water Act and the Porter Cologne Act requirements.

(3) Mitigation Measures as called for by FWQ-14 will be applied to the project so that the project will comply with the Guidance Manual for New Development Storm Water Quality Control Measures.

(4) The project would not create or contribute to runoff water in excess of the capacity of existing or planned storm water drainage systems or provide additional sources of polluted runoff.

11. PARKS AND OPEN SPACE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to parks and open space:

Effect: Within the Baseline Developed and Redevelopment Areas, the Urban Area General Plan does not propose any elimination of existing park and/or open space land. *Impacts on parks and open space will be less-than-significant.*

Effect: The projected population of the Planned Urbanizing Area is 148,600, requiring 149 acres of neighborhood parks and 298 acres of community parks. The required minimum acreages can be met through the application of existing policies and regulations, including Government Code Section 66474, which require developers to pay Parks Capital Facilities Fees to fund the acquisition of appropriate parkland acreage. *This impact is less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Parks and Open Space Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-11-4 through V-11-19 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project, are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project. It is not on or adjacent to any park sites, nor is it near any of the riparian area identified by Figures V-7-1a through V-7-1e of the MEIR.

c. Project-Specific Effects

Section V-11.B of the MEIR provides analysis of Parks and Recreation impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

	YES	NO
(1) The project is inconsistent with the Modesto Urban Area General Plan.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity. There are no mitigation measures applicable to this project.

12. SCHOOLS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to schools:

Effect: The estimated increase in population over 1994/1995 would generate an additional 29,200 elementary school students, 7,330 middle school students, and 14,640 high school students above those enrollments. Assuming that existing facilities cannot sufficiently accommodate this increase and that all of the new students would require new school facilities, build out of the General Plan would result in the need for approximately 37 elementary schools, 8 middle schools, and 7 high schools beyond 1994/1995 levels. This would result in a significant impact on schools in that it would exceed current capacity. By statute, this impact is considered to be mitigated below a level of significance by payment of school impact fees and exercise of any or all of the financing options set out in Government Code Section 65997.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan.). As long as all anticipated subsequent projects apply these policies, no new mitigation is necessary. Further, payment of school impact fees and compliance with SB 50 is statutorily deemed to be full mitigation of school impacts (Government Code Section 65995). The proposed additional school policy will address the situation that would arise should AB 50 be repealed. It will authorize impact fees or other methods to finance additional school facilities.

The following schools mitigation measure(s) are pertinent to the project being analyzed in this Initial Study. See pages V-12-4 through V-12-7 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. Those measures will be listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

There are no mitigation measures applicable to this project.

c. Project-Specific Effects

Section V-12.B of the MEIR provides analysis of Schools impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project does not comply with SB 50/Proposition 1A funding provisions, or succeeding measures which provide that compliance results in less-than-significant impacts on schools.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan in both land use and intensity.

(2) The project was referred to Modesto City Schools who indicated no opposition to the project.

13. POLICE SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to police services:

Effect: The 1995 Master EIR identified two impacts on the demand for police services; however, it concluded that no significant impact, based on the mitigation measures identified in the 1995 Master EIR, would occur. Those mitigation measures are now policies of the Urban Area General Plan. *The impact is less-than-significant.*

Effect: Within the Planned Urbanizing Area, complying with the Urban Area General Plan policies, particularly the policy that requires a long-range financing strategy for each Comprehensive Plan Area, will allow the City to provide the resources necessary to extend service to the newly growing Planned Urbanizing areas. *These policies reduce the impact to a less-than-significant level.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Police Services mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-13-3 and V-13-4 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-13.B of the MEIR provides analysis of police services impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would not result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives. The project meets City Standards for emergency services access.

14. FIRE SERVICES

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to fire services:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. *Impacts on fire services of development in these areas will be less-than-significant.*

Effect: In the Planned Urbanizing Area, the Urban Area General Plan would result in the need for additional fire protection services due to increases in the number of employees, permanent population, and associated improvements. City policy requires that fire protection be in place concurrent with construction in the Planned Urbanizing Area. This policy will be implemented with the adoption of future Comprehensive Plans in the Planned Urbanizing Area. *This impact would be less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Fire Services mitigation measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-14-3 through V-14-5 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project. are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-14.B of the MEIR provides analysis of fire services impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project would not result in the need for construction of new or significantly altered facilities which could cause new significant environmental impacts in order to maintain acceptable service ratios, response times or other performance objectives. The project meets City Standards for emergency services access.

15. SOLID WASTE

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to solid waste:

Effect: New development projects would exceed available landfill capacity; it is identified as a significant impact. The Fink Road Landfill may be closed by the time the City reaches build out, unless an expansion is approved by the County and the Integrated Waste Management Board. As the waste stream generated increases with population, additional landfills and methods for diversion would have to be utilized. New projects will also generate the need for additional collection and transfer facilities. This impact is significant and unavoidable. *The impact would be less-than-significant at such time as the Fink Road Landfill expansion is approved.*

Effect: New development projects can make a considerable contribution to the cumulative impact on landfill capacity of development in Stanislaus County. *This impact is significant and unavoidable.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

Solid Waste Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study. are found on pages V-15-5 and V-15-6 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-15.B of the MEIR provides analysis of solid waste impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The County is unable to expand its solid waste disposal capacity and the project would result in waste stream levels that exceed disposal capacity.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) This project was referred to the County and Solid Waste Division of the Engineering and Transportation Division for review, and no indication was given that there would be a problem serving this project.

16. HAZARDOUS MATERIALS

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to hazardous materials:

Effect: The impacts of the project relative to hazardous materials are less-than-significant, based on the existing regulatory framework. New development will be required to comply with regulations monitoring and controlling the handling and use of hazardous and toxic materials.

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under federal, state and county policies and regulations, and the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Hazardous Materials Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-16-9 through V-16-12 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-16.B of the MEIR provides analysis of hazardous materials impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project does not comply with all applicable federal, state, and county standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes.	☐	X
(3)	The project contains a contaminated site not identified as of March 2003.	☐	X
(4)	The project would emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school.	☐	X
(5)	The project would be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and as a result, would create a significant hazard to the public or the environment.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) The project does comply with all applicable federal, state, and county standards and regulations relative to the handling, storage, disposal, and transport of hazardous or toxic materials or wastes. (No hazardous materials will be involved with this project).

(3) The project site is not known to contain any contaminants.

(4) The project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste.

(5) The project would not be located on a site, which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and as a result, would not create a significant hazard to the public or the environment.

17. LANDSLIDES AND SEISMIC ACTIVITY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to landslides and seismic activity:

Effect: There are areas of known sand and gravel resources within the Baseline Developed Area and Redevelopment Area. Future development will be subject to SMARA requirements, therefore, *the project impact will be less-than-significant.*

Effect: There are areas of known sand and gravel resources within the Planned Urbanizing Area. Future development will be subject to SMARA requirements, therefore, *the project impact will be less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

The Master EIR did not identify any new mitigation measures. Mitigation relies upon the implementation of the policies in place under the Modesto Urban Area General Plan. These are identified and described in the list of policies in place and MEIR mitigation measures attached to the Initial Study template.

Landslide and Seismic Activity Mitigation Measure(s) pertinent to the project being analyzed in this Initial Study are found on pages V-17-6 and V-17-7 MEIR. All feasible measures appropriate to the project to be incorporated into or made conditions of approval of this project are listed in Section IV, Mitigation Measures Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-17.B of the MEIR provides analysis of landslides and seismic impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would be located on soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan in both land use and intensity.

(2) The project would not be located on soil that is unstable, or that would become unstable as a result of the project.

18. ENERGY

a. Significant Effects Identified in the Master EIR

The Master EIR identified the following significant environmental impacts relative to energy:

Effect: The Baseline Developed Area and Redevelopment Area are already developed. New development within the Redevelopment Area will comply with Title 24 standards as well as City Urban Area General Plan policies. *Impacts on energy by development in these areas (i.e., changes in levels of use above the current baseline) will be less-than-significant.*

Effect: Build out under the Urban Area General Plan will utilize an estimated 1,400 million cubic feet per month of natural gas, 1,300 million kilowatt hours (kwh) of electricity per year and 650,000 gallons of gasoline per day. PG&E has indicated that they have at the current time sufficient supplies of natural gas to serve the increased natural gas demands of the project. At present, gasoline supplies are apparently sufficient to serve the gasoline demands of the project. Title 24 of the California Code of Regulation, which ensures that the project will not exceed local, state, and federal energy standards. *The impact is less-than-significant.*

b. Master EIR and/or New Mitigation Measures Applied to the Project

The following energy mitigation measure(s) are pertinent to the project being analyzed in this Initial Study. See page V-18-3 MEIR. All feasible measures appropriate to the project will be incorporated into or made conditions of approval of this project. Those measures will be listed in Section IV, Mitigation Applied to Project:

DISCUSSION:

No mitigation measures are applicable to this project.

c. Project-Specific Effects

Section V-18.B of the MEIR provides analysis of energy impacts of development of the General Plan, the following is an analysis of whether the proposed project would result in a new, significant, project -specific effect not previously analyzed in the MEIR.

Determination of project effects will be based on the following thresholds. The project-specific effects will be less-than-than significant unless:

	YES	NO
(1) The project is inconsistent with the Modesto Urban Area General Plan.	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

19. PLANNING AND LAND USE

The Master EIR was certified for the Modesto Urban Area General Plan. The significant effects described in the 18 subject areas contained in the Master EIR are based on the planning policies and diagrams adopted as part of the General Plan. Planning and land use were not among the 18 subject areas analyzed in the Master EIR because they essentially defined the project being evaluated in the EIR.

a. Project-Specific Effects

Determination of project effects will be based on the following threshold. A project-specific effect is less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project includes a substantive amendment to the Modesto Urban Area General Plan.	☐	X
(3)	The project would physically divide an established community	☐	X

DISCUSSION:

(1) The project is consistent with the Modesto Urban Area General Plan in both land use and intensity.

(2) No amendment to the General Plan is required by this project.

(3) The project is infill development that will not divide an established community.

20. AESTHETICS

The Master EIR was certified for the Modesto Urban Area General Plan. The significant effects described in the 18 subject areas contained in the Master EIR, are based on the planning policies and diagrams adopted as part of the General Plan. At that level of detail, no significant effects on aesthetics were identified.

a. Project-Specific Effects

Determination of project effects will be based on the following threshold. A project-specific effect is less-than-than significant unless:

		YES	NO
(1)	The project is inconsistent with the Modesto Urban Area General Plan.	☐	X
(2)	The project would have a substantial adverse effect on a scenic vista.	☐	X
(3)	The project would substantially degrade the existing visual character or quality of the project site and its surroundings.	☐	X
(4)	The project would create a new source of substantial light and glare, which would adversely affect day or nighttime views in the area.	☐	X

DISCUSSION:

(1) The project is consistent with the General Plan in both land use and intensity.

(2) There are no Scenic Vistas from the location of the proposed development. It is completely surrounded by urbanization. Views to the Diablo and Sierra Mountain Ranges are already precluded from this site and its surroundings.

(3) The project would not substantially degrade the existing visual character or quality of the project site and its surroundings.

(4) The project would not create a substantial source of light or glare that would adversely affect daytime or nighttime views in the area.

V. MITIGATION MEASURES APPLIED TO THE PROJECT

A. Master EIR Mitigation Measures Applied to the Project

Pursuant to CEQA Section 21157.1 (c), in order for a Finding of Conformance to be made, all feasible measures from the Master EIR appropriate to the project shall be incorporated into the project. The following adopted General Plan Policies and Master EIR Mitigation Measures (also contained in Section III, "Global List") shall be made part of the project prior to approval by means of conditions of project approval or incorporation into the appropriate document or plan:

All applicable and appropriate mitigation measures have been applied to the project.

Traffic and Circulation Measures:

N/A

Air Quality Measures:

1. All land clearing, grubbing, scraping, excavation, land leveling, grading, cut & fill, and demolition activities shall be effectively controlled of fugitive dust emissions utilizing application of water or by presoaking.

2. When materials are transported off-site, all material shall be covered, or effectively wetted to limit visible dust emissions, and at least six inches of freeboard space from the top of the container shall be maintained.

Noise Measures:

1. The City's noise ordinance (Modesto Municipal Code Section 4-9.101) prohibits the "loud and raucous discharge into the open air of the steam of any steam equipment or exhaust from any stationary internal-combustion engine."

   The noise ordinance prohibits the loud and raucous operation or use of any of the following before 7:00 a.m. or after 9:00 p.m. daily (except Saturday and Sunday and State or federal holidays, when the prohibited time shall be before 9:00 a.m. and after 9:00 p.m.):

A. A hammer, or any other device or implement used to pound or strike an object.

B. An impact wrench, or other tool or equipment powered by compressed air.

C. A hand-powered saw.

D. Any tool or piece of equipment powered by an internal-combustion engine such as, but not limited to, chain saw, backpack blower, and lawn mower.

E. Any electrically powered (whether by alternating current electricity or by direct current electricity) tool or piece of equipment used for cutting, drilling, or shaping wood, plastic, metal, or other materials or objects, such as, but not limited to, a saw, drill, lathe, or router.

F. Any of the following: heavy equipment (such as but not limited to bulldozer, steam shovel, road grader, back hoe), ground drilling and boring equipment (such as but not limited to derrick or dredge), hydraulic crane and boom equipment, portable power generator or pump, pavement equipment (such as but not limited to pneumatic hammer, pavement breaker, tamper, compacting equipment), pile-driving equipment, vibrating roller, sand blaster, gunite machine, trencher, concrete truck, and hot kettle pump.

G. Any construction, demolition, excavation, erection, alteration, or repair activity. In the case of urgent necessity and in the interest of public health and safety, the Chief Building Official may issue a permit for exemption from these. Such period shall not exceed three (3) working days in length while the emergency continues but may be renewed for successive periods of three (3) days or less while the emergency continues. The Chief Building Official may limit such permit as to time of use and/or permitted action, depending upon the nature of the emergency and the type of action requested.

H. Construction equipment and vehicles should be equipped with properly operating mufflers according to the manufacturers' recommendations. Air compressors and pneumatic equipment should be equipped with mufflers, and impact tools should be equipped with shrouds or shields.

Agricultural Land Measures:

N/A

Water Supply Measures:

N/A

Sanitary Sewer Service Measures:

N/A

Sensitive Wildlife and Plant Habitat Measures:

N/A

Archaeological or Historic Sites Measures:

1. If archaeological resources are discovered at any time during construction, all activity shall cease until a qualified archaeologist surveys the site. The survey shall include mitigation measures, which shall be implemented before construction resumes. The survey shall follow the criteria presented in Appendix K

Storm Drainage Measures:

1. The developer shall implement pre- and post- construction best management practices (BMPs) to minimize pollutants entering the storm system.

Flooding and Water Quality Measures:

1. The developer shall implement pre- and post- construction best management practices (BMPs) to minimize pollutants entering the storm system.

Parks and Open Space Measures:

N/A

Schools Measures:

N/A

Police Services:

N/A

Fire Services:

N/A

Generation of Solid Waste

N/A

Generation of Hazardous Materials

N/A

Potential for Landslides and Seismic Activity

N/A

Energy

N/A

Planning and Land Use

N/A

Aesthetics

N/A

B. New or Additional Mitigation Measures or Alternatives Required

Where the project's effects would exceed the specific thresholds defined for each environmental category, a mitigated negative declaration or Focused EIR must be prepared. Staff has reviewed the project against those thresholds set forth in the Master EIR for all applicable categories in this Initial Study. The following project-specific mitigation measures are necessary to reduce the identified new significant effect: ***None.***

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-102

Print

A RESOLUTION ACCEPTING WITH REGRET THE RESIGNATION OF CAROLINE MITTON FROM THE CITIZENS HOUSING & COMMUNITY DEVELOPMENT COMMITTEE

WHEREAS, CAROLINE MITTON was appointed a member of the Citizens Housing & Community Development Committee on October 17, 2000, and

WHEREAS, CAROLINE MITTON has tendered her resignation from the aforementioned committee, and

WHEREAS, CAROLINE MITTON has been a devoted and sincere public servant and has contributed greatly to our civic progress.

NOW, THEREFORE, BE IT RESOLVED that the resignation of CAROLINE MITTON from the Citizens Housing & Community Development Committee hereby is accepted with regret.

BE IT FURTHER RESOLVED that the Council of the City of Modesto, on its own behalf, and on behalf of the citizens of this City, hereby expresses its sincere appreciation to CAROLINE MITTON for her outstanding service to the community.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	None

A RESOLUTION ACCEPTING WITH REGRET THE RESIGNATION OF ART DE WERK FROM THE AIRPORT ADVISORY COMMITTEE

WHEREAS, ART DE WERK was appointed a member of the Airport Advisory Committee by the City of Ceres, as its representative, on August 15, 2000, and

WHEREAS, ART DE WERK has served as Chairman since February 2002, and

WHEREAS, ART DE WERK has tendered his resignation from the aforementioned committee effective March 1, 2007, and

WHEREAS, ART DE WERK has been a devoted and sincere public servant and has contributed greatly to our civic progress,

NOW, THEREFORE, BE IT RESOLVED that the resignation of ART DE WERK from the Airport Advisory Committee hereby is accepted with regret.

BE IT FURTHER RESOLVED that the Council of the City of Modesto, on its own behalf, and on behalf of the citizens of this City, hereby expresses its sincere appreciation to ART DE WERK for his outstanding service to the community.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Keating, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-104

A RESOLUTION APPOINTING JACKIE WILSON TO THE GOLF COURSES ADVISORY COMMITTEE

WHEREAS, Section 1102 of the Charter of the City of Modesto authorizes the City Council to appoint members to various Boards and Commissions, and

WHEREAS, the Dryden Park Women's Golf Club recommends JACKIE WILSON, as its representative, to the Golf Courses Advisory Committee.

NOW, THEREFORE, BE IT HEREBY RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. JACKIE WILSON, representing Dryden Park Women's Golf Club, is hereby appointed to the Golf Courses Advisory Committee with term expirations of January 1, 2011.

SECTION 2. The City Clerk is hereby directed to transmit a copy of this resolution to the newly appointed members of the Golf Courses Advisory Committee, and the Secretary thereof.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-105

A RESOLUTION APPROVING A MASTER PROFESSIONAL SERVICES AGREEMENT FOR CONSULTANT SERVICES WITH GOODWIN CONSULTING GROUP FOR THE ADMINISTRATION OF COMMUNITY FACILITIES DISTRICTS AND ASSESSMENT DISTRICTS AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT

WHEREAS, the City of Modesto ("City") has determined that Community Facilities Districts ("CFDs") and Assessment Districts ("ADs") are necessary funding mechanisms to construct and maintain infrastructure for new development areas, and

WHEREAS, the City has also determined that it is necessary to administer the annual tax levies including tax enrollment and delinquency reporting, answer citizen inquiries, prepare cash flow projections, coordinate foreclosure activities, administer bond redemptions if necessary, and ensure compliance with disclosure requirements for future CFDs and/or ADs, and

WHEREAS, Goodwin Consulting Group, Inc. ("Consultant") represents that it is qualified, willing and able to provide said services and prepare such document(s), and

WHEREAS , City and Consultant desire to enter into a Master Professional Services Agreement for Consultant Services ("Master Agreement") pursuant to which Consultant shall administer existing and future CFDs and perform other related on-call services as assigned by City, and

WHEREAS, prior to commencement of services under the Master Agreement, all work and services to be provided to City by Consultant shall be outlined in a Task Order for each project and shall be approved by the City in accordance with City's policies regarding contracting authority,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Master Professional Services Agreement for Consultant Services between the City of Modesto and Goodwin Consulting Group for the administration of existing and future Community Facilities Districts and Assessment Districts is hereby approved.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Master Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-106

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MODESTO APPROVING AN INTERFUND LOAN FROM THE UNAPPROPRIATED GENERAL FUND RESERVE TO THE SOLID WASTE SPECIAL REVENUE FUND FOR THE PURPOSE OF PAYING COSTS RELATED TO A SITE ASSESSMENT STUDY AND THE DEVELOPMENT OF A MITIGATION AND MONITORING PLAN FOR THE CLOSED CARPENTER ROAD LANDFILL AND AMENDING THE BUDGETS OF THE GENERAL FUND AND THE SOLID WASTE SPECIAL REVENUE FUND TO REFLECT THE LOAN AND THE APPROPRIATION OF THE STUDY COSTS

WHEREAS, on January 2, 2007 the City Council approved the release of a Request for Proposal to obtain bids for the preparation of a Site Assessment Study and Mitigation and Monitoring Plan for the closed Carpenter Road Landfill; and

WHEREAS, the Solid Waste Special Revenue Fund does not have the resources to pay for the cost of these studies; and

WHEREAS, the City Council directed that the General Fund should loan to the Solid Waste Special Revenue fund the amount of $150,000.00 to pay for the cost of these studies; and

WHEREAS, the operating budgets of the General Fund and the Solid Waste Special Revenue Fund must be amended to reflect the loan and appropriation of the study costs as shown in **Exhibit A** to this resolution, which is incorporated by reference herein;

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Finance Director to take all steps necessary to amend the budgets of the General Fund and the Solid Waste Special Revenue Fund as shown in Exhibit A to this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13h day of February 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-107

A RESOLUTION APPROVING AN AGREEMENT WITH EDAW, INC. TO PROVIDE PHASE 1.2 CONSTRUCTION DOCUMENTS, CONSTRUCTION OBSERVATION/ADMINISTRATION AND PERMITTING SUPPORT FOR THE GATEWAY PARCEL OF THE TUOLUMNE RIVER REGIONAL PARK AT A COST NOT TO EXCEED $380,841.00, AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT.

WHEREAS, the Parks, Recreation and Neighborhoods Department, on behalf of the Tuolumne River regional Park Joint Powers Authority began a project to plan for the future development of the Tuolumne River Regional Park (TRRP) when the Joint Powers Authority of the City of Modesto, City of Ceres and Stanislaus County adopted the TRRP Master Plan in December 2001, and

WHEREAS, the Gateway Parcel is one of six planning areas addressed in the TRRP Master Plan, and

WHEREAS, the TRRP Commission envisions the Gateway Parcel to be a high-profile public gathering place close to the commercial centers of Modesto and Ceres and accessible to the rest of the region along major arterial streets and State Route (SR) 99, as defined in the TRRP Master Plan, and

WHEREAS, in 2003, the City of Modesto, as Lead Agency, accepted the recommendation of the TRRP Commission and approved the development of Precise Plan and Construction Documentation to be completed by one firm, and

WHEREAS, the Gateway Parcel Precise Plan is intended to achieve the objectives of the Master Plan and to provide additional design detail needed to implement the proposed park improvements within the Gateway Parcel, and

WHEREAS, after an RFP process, it was determined that EDAW, Inc. (EDAW) was the most qualified to complete these projects, and

WHEREAS, EDAW has since completed the Precise Plan and Initial Study, 90% Construction Documentation and permitting for Phase 1, and 100% Construction Documentation and permitting for Phase 1.1, and

WHEREAS, on December 15, 2006, the City of Modesto, on behalf of TRRP, accepted $1,526,000 in state funding from Proposition 50 for the development and construction of Phase 1.2, which includes the production of Construction Documents, and

WHEREAS, EDAW, Inc. is prepared to produce the Phase 1.2 Construction Documents, based on the 90% construction documents previously produced and to return biddable documents in May 2007, which will allow the City time to solicit bids to complete the construction work of Phase 1.2 between August and November of 2007, and

WHEREAS, this time-frame is necessary because of the time limitations imposed by State and Federal regulatory agencies that limit construction access to the river channel from July 15 to November 1, and

WHEREAS, with the acceptance of the Proposition 50 contract in December 2006 for funds from the state, TRRP has the necessary funding in place to hire EDAW, Inc. to do this work, and

WHEREAS, the Tuolumne River Regional Park Commission met on October 12, 2005, and recommended the acceptance of a proposal from EDAW, Inc. to provide Phase 1 Construction Documents, Construction Observation/Administration and Permitting Support for the Gateway Parcel of the Tuolumne River Regional Park,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves an agreement with EDAW, Inc. to provide Phase 1.2 Construction Documents, Construction Observation/Administration and Permitting Support for the Gateway Parcel of the Tuolumne River Regional Park at a cost not to exceed $380,841.00.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-108

A RESOLUTION AMENDING THE FY 06-07 CIP TO ESTIMATE $1,000,000 IN REVENUE FROM THE COUNTY OF STANISLAUS PUBLIC FACILITY FEES AND APPROPRIATE SAID REVENUE TO CIP PROJECT 8910-310-N441, TRRP GATEWAY PROJECT, FOR CONSTRUCTION OF PHASE 1.2 IN THE TUOLUMNE RIVER REGIONAL PARK GATEWAY PARCEL.

WHEREAS, the Parks, Recreation and Neighborhoods Department, on behalf of the Tuolumne River regional Park Joint Powers Authority began a project to plan for the future development of the Tuolumne River Regional Park (TRRP) when the Joint Powers Authority of the City of Modesto, City of Ceres and Stanislaus County adopted the TRRP Master Plan in December 2001, and

WHEREAS, the Gateway Parcel is one of six planning areas addressed in the TRRP Master Plan, and

WHEREAS, the TRRP Commission envisions the Gateway Parcel to be a high-profile public gathering place close to the commercial centers of Modesto and Ceres and accessible to the rest of the region along major arterial streets and State Route (SR) 99, as defined in the TRRP Master Plan, and

WHEREAS, the TRRP Commission has discussed and agreed to recommend that the Stanislaus County Board of Supervisors and the Modesto City Council simultaneously approve the use of Public Facilities Fees (PFF) and Capital Facilities Fees (CFF), respectively, to fund the Gateway parcel as an all or nothing proposal to help reduce overall construction costs and finish Phase I, and

WHEREAS, County and City staff agreed to take this proposal to their respective bodies on the same day to demonstrate solidarity in their commitment to make the Gateway a significant asset to the region, and

WHEREAS, at its meeting on February 13, 2007, the Board of Supervisors of the County of Stanislaus adopted a resolution committing $1,000,000 in County Public Facilities Fees for construction of Phase 1.2 in the Tuolumne River Regional Park Gateway Parcel,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves amending the FY 06-07 CIP to estimate $1,000,000 in revenue from the County of Stanislaus Public Facility Fees and appropriate said revenue to CIP Project 8910-310-N441, TRRP Gateway Project, for construction of Phase 1.2 in the Tuolumne River Regional Park Gateway Parcel.

BE IT FURTHER RESOLVED that the Finance Director, or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-110

A RESOLUTION APPROVING AN AGREEMENT WITH CAROLLO ENGINEERS TO PREPARE A 35% PROJECT DESIGN AND A PRELIMINARY DESIGN REPORT (PDR) FOR PHASE 1A AND PHASE 1B TERTIARY TREATMENT FACILITIES PROJECT IN AN AMOUNT NOT TO EXCEED $1,113,700, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, the City of Modesto operates and maintains a secondary treatment system at 7007 Jennings Road, and

WHEREAS, based on the recent analysis prepared for the Wastewater Master Plan, the City expects that tertiary treatment will be required to meet anticipated regulatory requirements, and

WHEREAS, a phased approach will allow the City to comply with expected regulatory issues and continue with development within a short timeframe, and

WHEREAS, the Wastewater Master Plan and near term capacity study recommended that Phase 1A should consist of a temporary facility to be phased out when Phase 2 is completed, and

WHEREAS, an alternative approach to regroup Phase 1A and Phase 1B to the same site will be analyzed, and

WHEREAS, the City Administrative Directive 3.1 was followed to select a professional engineering design consultant, and

WHEREAS, following a Request for Qualifications for engineering design services, which was sent to all listed engineering firms, seven Statements of Qualifications were received, and

WHEREAS, of the seven Statements of Qualifications, two firms were short listed for Proposals and Interviews, and

WHEREAS, Carollo Engineers was deemed most qualified and selected for preliminary engineering design services, and

WHEREAS, the Public Works Director has recommended accepting the proposed contract with Carollo Engineers to complete the Preliminary Design Services for the Phase 1A and Phase 1B Tertiary Treatment Facility in an amount not to exceed $1,113,700,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the agreement with Carollo Engineers to prepare a 35% project design and a Preliminary Design Services Report for Phase 1A and Phase 1B Tertiary Treatment Facilities project in an amount not to exceed $1,113,700,

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-111

A RESOLUTION APPROVING THE PLANS AND SPECIFICATIONS FOR THE PROJECT TITLED "REMODEL OF EXISTING WATER QUALITY CONTROL LABORATORY," ACCEPTING THE BID AND APPROVING A $424,925.00 CONTRACT WITH GWINN CONSTRUCTION, INC., FOR THE PROJECT TITLED, " REMODEL OF EXISTING WATER QUALITY CONTROL LABORATORY," AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE CONTRACT

WHEREAS, the low bid received for "Remodel of Existing Water Quality Control Laboratory" was opened at 11:00 a.m. on January 23, 2007, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the plans and specifications included the remodel of the existing laboratory at the City of Modesto Primary Wastewater Treatment Facility, and

WHEREAS, the Public Works Director has recommended that the bid received from Gwinn Construction, Inc., be accepted as the lowest responsible bid and the contract be awarded to Gwinn Construction, Inc.,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the plans and specifications for the "Remodel of Existing Water Quality Control Laboratory".

BE IT FURTHER RESOLVED that the Council hereby accepts the bid of $424,925.00 and hereby awards Gwinn Construction, Inc., the contract titled "Remodel of Existing Water Quality Control Laboratory."

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-112

A RESOLUTION APPROVING A CFD RIGHT-OF-WAY ACQUISITION AGREEMENT BETWEEN THE VILLAGE ONE COMMUNITY FACILITIES DISTRICT NO. 1996-1 AND THE SYLVAN SCHOOL DISTRICT FOR THE PURCHASE OF A .48 ACRE PARCEL LOCATED ON FLOYD AVENUE AT LINCOLN OAK DRIVE FOR $81,600.00, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT AND ALL RELATED PROPERTY DOCUMENTS AS GRANTEE ON BEHALF OF THE CITY OF MODESTO

WHEREAS, the Floyd Avenue Improvement project between Oakdale Road and Roselle Avenue requires the acquisition of right-of-way along the north side of Floyd Avenue, and

WHEREAS, the City purchased all but one parcel before awarding the construction contract, and

WHEREAS, the City was unable to acquire the remaining parcel, Assessor's Parcel Number 077-008-027, a .48 acre parcel owned by the Sylvan School District, because the City and Sylvan School District were unable to agree upon a purchase price at the time, and

WHEREAS, on April 26, 2005, the District Administrator approved an Access and Indemnity Agreement between the Village One Community Facilities District No. 2004-1 (Village One #2) and the Sylvan School District that allowed the City access to the parcel for construction purposes while the Sylvan School District and the City negotiated a fair price, and

WHEREAS, after reviewing multiple appraisals, the City offered the Sylvan School District $170,000 per acre or $81,600 for the parcel and on January 16, 2007, the

Sylvan School District Board of Trustees accepted the offer and approved the CFD Right-of-Way Acquisition Agreement,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the CFD Right-of-Way Acquisition Agreement between the Village One Community Facilities District No.1996-1 and the Sylvan School District for the purchase of a .48 Acre parcel located on Floyd Avenue at Lincoln Oak Drive for $81,600.00.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement and all related property documents as Grantee on behalf of the City of Modesto.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-113

A RESOLUTION APPROVING A PROFESSIONAL SERVICES AGREEMENT WITH STORM WATER CONSULTING INC., IN THE NOT-TO-EXCEED AMOUNT OF $107,600 TO DEVELOP AN ENGINEER'S REPORT NEEDED FOR THE STORM DRAINAGE UTILITY RATE AND CONNECTION FEE ANALYSIS AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, the City of Modesto is nearing the completion of its Storm Drainage Master Plan (SDMP), and

WHEREAS, the City is desirous to conduct a Storm Drainage Utility Rate and Connection Fee Analysis, and

WHEREAS, the principal of Storm Water Consulting, Inc., has intimate knowledge of the SDMP (as a past employee of the Stantec Consulting team working on its development) and its modeling software, and

WHEREAS, City staff requested a project proposal from Storm Water Consulting Inc., and

WHEREAS, City staff negotiated an Agreement with Storm Water Consulting Inc., to provide all of the professional services needed to develop an Engineer's Report for the Storm Drainage Utility Rate and Connection Fee Analysis based on the SDMP, on a time and materials basis in the not-to-exceed amount of $107,600, and

WHEREAS, City staff recommends that Storm Water Consulting Inc., be hired to develop an Engineer's Report for the Storm Drainage Utility Rate and Connection Fee Analysis based on the SDMP, and

WHEREAS, Stantec Consulting has expressed its support of this action due to the requirements and particular circumstances of this project (Stantec Consulting will be a sub-consultant to Storm Water Consulting Inc., for this work), and

WHEREAS, the Finance Committee reviewed this item on January 29, 2007, and recommended its approval,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Agreement with Storm Water Consulting Inc., in the not-to-exceed amount of $107,600 for developing an Engineer's Report for the Storm Drainage Utility Rate and Connection Fee Analysis based on the SDMP.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-114

A RESOLUTION AMENDING THE CURRENT OPERATING BUDGET BY AUTHORIZING THE TRANSFER OF $125,000 FROM THE STORM DRAINAGE FUND RESERVE (6280-800-8000-8003) AND REAPPROPRIATING $107,600 TO THE STORM DRAIN ENGINEERING ACCOUNT (6280-440-5319-0235) AND $17,400 TO THE STORM DRAIN ENGINEERING ACCOUNT (6280-440-5319-0255)

WHEREAS, the City of Modesto is nearing the completion of its Storm Drainage Master Plan (SDMP), and

WHEREAS, the City is desirous to put together a work plan aimed at developing a financing strategy to fund the proposed improvements identified in the SDMP, and

WHEREAS, City staff negotiated an Agreement with Storm Water Consulting Inc., to provide all of the professional services needed to develop an Engineer's Report for the Storm Drainage Utility Rate and Connection Fee Analysis (as a first step in the work plan) based on the SDMP, on a time and materials basis, in the not-to-exceed amount of $107,600, and

WHEREAS, City staff has recommended Storm Water Consulting Inc., be hired to develop an Engineer's Report for the Storm Drainage Utility Rate and Connection Fee Analysis, and

WHEREAS, the Storm Drain Engineering account does not have sufficient funds to cover the cost of these services, the current Operating Budget needs to be amended by authorizing the transfer of $125,000 from the Storm Drainage Fund Reserve Account (6280-800-8000-8003) and reappropriating $107,600 to the Storm Drain Engineering Account (6280-440-5319-0235) and $17,400 to the Storm Drain Engineering Account (6280-440-5319-0255) based on the following:

Agreement with Storm Water Consulting Inc. for Engineer's Report	$107,600
Contract Administration by City Staff	$ 17,400
TOTAL ANTICIPATED EXPENDITURES:	$125,000

WHEREAS, the Finance Committee reviewed this item on January 29, 2007, and recommended its approval,

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Modesto hereby amends the operating budget and approves the transfer of funds as set forth herein to fully fund the Agreement with Storm Water Consulting Inc., in the not-to-exceed amount of $107,600 to develop an Engineer's Report needed for Storm Drainage Utility Rate and Connection Fee Analysis, and contract administration by City staff in the amount of $17,400 for a total of $125,000 for the Storm Drain Engineering project by reducing Account 6280-800-8000-8003 (Storm Drainage Fund Reserves) and reappropriating $107,600 to Account 6280-440-5319-0235 (Storm Drain Engineering–Services, Professional & Other) and $17,400 to Account 6280-440-5319-0255 (Storm Drain Engineering–Services City Forces).

BE IT FURTHER RESOLVED that the Finance Director, or his designee, is hereby authorized to take the steps necessary to amend the Operating Budget.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

A RESOLUTION APPROVING A PROFESSIONAL SERVICES AGREEMENT WITH JONES AND STOKES ASSOCIATES, INC., FOR ENVIRONMENTAL REVIEW WORK RELATED TO COMPLETION OF THE STORM DRAINAGE MASTER PLAN IN THE NOT-TO-EXCEED AMOUNT OF $90,942, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, the City of Modesto is nearing the completion of its Storm Drainage Master Plan (SDMP) and needs to complete the project's associated Environmental Review, and

WHEREAS, using Professional Consulting Services will enable this project to continue moving forward in a timely manner, and

WHEREAS, the City is desirous of taking full advantage of past experiences and the breadth of knowledge certain consultants have obtained while working for the City, and

WHEREAS, Jones & Stokes Associates, Inc., (Jones & Stokes) is on the City's pre-qualified short list for providing Environmental Review services, and

WHEREAS, Jones & Stokes has demonstrated their clear understanding of the City's environmental challenges and City staff is familiar with the high quality of their work, and

WHEREAS, staff requested a proposal from Jones & Stokes to complete the project's Environmental Review work, and

WHEREAS, staff negotiated an agreement with Jones & Stokes to provide all of the professional services needed to complete the SDMP's Environmental Review work, on a time and materials basis, for a "not to exceed" amount of $90,942, and

WHEREAS, staff is recommending Jones & Stokes be hired to complete the Environmental Review work for the SDMP, and

WHEREAS, the Finance Committee reviewed this item on January 29, 2007, and recommended its approval,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the agreement with Jones & Stokes Associates, Inc., in the not-to-exceed amount of $90,942 for conducting the Environmental Review for the SDMP.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-116

A RESOLUTION APPROVING A CONSULTANT AGREEMENT WITH HARRIS AND ASSOCIATES FOR CONSTRUCTION MANAGEMENT SERVICES OF THE LA LOMA AVENUE SANITARY SEWER LIFT STATION REPLACEMENT PROJECT IN THE NOT-TO-EXCEED AMOUNT OF $200,725.00, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, on January 23, 2007, by Resolution No. 2007-073, City Council awarded a construction contract in the amount of $1,794,000 to Preston Pipelines, Inc., for construction of the La Loma Avenue Sanitary Sewer Lift Station Replacement Project (Lift Station), and

WHEREAS, due to the current staffing levels, a construction management company is being tasked with the management of the project, and

WHEREAS, the selection process for construction management services followed the City's selection procedures for professional consultants, and

WHEREAS, in accordance with Administrative Directive 3.1, Capital Improvement Services (CIS) staff mailed a Request for Qualifications for construction management services to all firms that had previously indicated an interest in providing construction management services to the City, and

WHEREAS, four specialized consulting firms of construction management services were asked to provide a proposal, and

WHEREAS, the City's Selection Committee reviewed the proposals submitted and held interviews with the top two firms, and

WHEREAS, the firm of Harris and Associates was considered to be the most qualified to provide construction management services for the project, and

WHEREAS, CIS staff recommends the consulting firm of Harris and Associates be awarded a contract to perform the construction management services as current

workload levels do not provide for timely in-house solutions/responses, and

WHEREAS, City desires to enter into an Agreement with Harris and Associates in an amount not-to-exceed $200,725.00 to perform construction management services of the Lift Station project, and

WHEREAS, Harris and Associates will be paid on a time and materials basis for actual hours required performing individual tasks at a set rate,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Agreement for Construction Management Services with Harris and Associates in an amount not-to-exceed $200,725.00 for construction management services of the La Loma Avenue Sanitary Sewer Lift Station project.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

RESOLUTION NO. 2007-118

A RESOLUTION APPROVING A CONSULTANT AGREEMENT WITH TRS CONSULTANTS, INC., IN THE NOT-TO-EXCEED AMOUNT OF $282,145.42 FOR CONSTRUCTION MANAGEMENT SERVICES OF THE FLOYD/ROSELLE AVENUES ROUNDABOUT PROJECT, AND AUTHORIZING THE COMMUNITY FACILITIES DISTRICT ADMINISTRATOR, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, on February 6, 2007, by Resolution No. 2007-091, City Council awarded a construction contract in the amount of $2,819,799.75 to Teichert Construction, for construction of the Roselle Avenue at Floyd Avenue Improvements (Floyd/Roselle Avenues Roundabout), and

WHEREAS, due to the current staffing levels, a construction management company is being tasked with the construction management of the Floyd/Roselle Avenues Roundabout, and

WHEREAS, the selection process for construction management services followed the City's selection procedures for professional consultants, and

WHEREAS, in accordance with Administrative Directive 3.1, Capital Improvement Services (CIS) staff mailed a Request for Qualifications for construction management services to all firms that had previously indicated an interest in providing construction management services to the City, and

WHEREAS, three specialized consulting firms of construction management services were asked to provide a proposal, and

WHEREAS, the City's Selection Committee reviewed the proposals submitted and held interviews with the three firms, and

WHEREAS, the firm of TRS Consulting, Inc., (TRS) was considered to be the most qualified to provide construction management services of the Floyd/Roselle Avenues Roundabout, and

WHEREAS, City staff recommends the consulting firm of TRS be awarded a contract to perform the construction management services as current workload levels do not provide for timely in-house solutions/responses, and

WHEREAS, City desires to enter into an Agreement with TRS in an amount not-to-exceed $282,145.42 to perform construction management services of the Floyd/Roselle Avenues Roundabout project, and

WHEREAS, TRS will be paid on a time and materials basis for actual hours required performing individual tasks at a set rate,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Agreement with TRS Consulting, Inc., in an amount not-to-exceed $282,145.42 for construction management services of the Floyd/Roselle Avenues Roundabout.

BE IT FURTHER RESOLVED that the Community Facilities District Administrator, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O;'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-119

A RESOLUTION AMENDING THE FISCAL YEAR 06-07 OPERATING BUDGET TO APPROPRIATE $592,150 FROM 0100-800-8000-8003 GENERAL FUND RESERVE TO VARIOUS ACCOUNTS IN THE FIRE DEPARTMENT'S OPERATING BUDGET FOR IMPLEMENTATION OF THE CITY'S NEGOTIATED MEMORANDUM OF UNDERSTANDING WITH THE MODESTO CITY FIRE FIGHTERS ASSOCIATION (MCFFA).

WHEREAS, on December 12, 2006, the City of Modesto (CITY) and the Modesto City Fire Fighters Association (MCFFA) reached an agreement for a new MOU, which went into effect December 26, 2006, and

WHEREAS, representatives of the CITY and MCFFA met and conferred in good faith concerning wages, hours, terms and conditions of employment for employees in said bargaining unit, and

WHEREAS, the City Council agreed to increase the CITY's contribution to Health, Dental and Vision benefits for employees represented by MCFFA, and

WHEREAS, the City Council agreed to increase the salaries of employees represented by MCFFA, and

WHEREAS, the City Council agreed to implement other economic items which impact the FY 06-07 General Fund Operating Budget including educational incentive pay, holiday cashout for non-shift employees, Fire Investigator On-Call pay, increases in uniform allowance and compensation for training, and

WHEREAS, the FY 06-07 net increased costs associated with these salary and benefit changes are estimated at $592,150 effective December 26, 2006, and

WHEREAS, these increased expenditures have not yet been budgeted,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the fiscal year 2006-07 Operating Budget is hereby amended to appropriate $592,150 from 0100-800-8000-8003 General Fund Reserve to various accounts in the Fire Department's operating budget for implementation of the negotiated MOU between the City of Modesto and the Modesto City Fire Fighters Association.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-120

A RESOLUTION APPROVING THE FUNDING OF GENERAL FUND SUPPLEMENTAL BUDGET REQUESTS FOR FISCAL YEAR 2006-07

WHEREAS, during the FY2006-07 budget process, the City Council decided to defer the consideration of supplemental budget requests until the year-end information was finalized, and

WHEREAS, on January 22, 2007, the Finance Committee reviewed the City Manager's recommendations for General Fund supplemental funding of ongoing and one-time requests, as well as requests that were not recommended to move forward, and

WHEREAS, the Finance Committee recommended that the City Manager's recommendations for supplemental funding be referred to the City Council for approval, and

WHEREAS, on February 13, 2007, the City Council reviewed the requests for supplemental funding, and

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Modesto that it hereby approves the funding of General Fund supplemental budget requests as set forth in **Attachment A**, and directs that the necessary budgetary adjustments be made for FY2006-07 as designated in said Attachment "A" as ongoing and one-time requests.

BE IT FURTHER RESOLVED that the Finance Director, or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following votes:

General Fund Supplemental Requests
As Recommended by the Council Finance Committee (1/22/07)

Line From Proforma	Dept.	Budget Request	FY 06-07 General Fund	FY 06-07 Other	FY 07-08 General Fund	FY 07-08 Other
36	PD	Sworn Staffing (6)/CAD: Designates funding for the six sworn positions currently funded through grants and, as a interim step, utilizes these funds for the Computer Aided Dispatch system.	$819,680	$0	$586,087	$0
46	Pers.	Workers Comp Claims Examiner (60%/Benefited/Confidential): Responsible for adjustment medical-only workers comp claims and bill review process. Funding reflects difference between current part-time funding allocation and cost of permanent position at 60%.	$5,000	$4,777	$20,800	$8,532
47	Pers.	Employee Relations Specialist: Provides assistance and advise to departments in disciplinary investigation/resolution, and grievances. Also participates in the meet & confer process, provides mandated training in a variety of areas including sexual harassment.	$27,470	$0	$109,075	$0
48	City Atty	Legal Secretary: Provides administrative support for the criminal prosecution function of the City Attorney's Office and litigation support for the civil drug nuisance actions and receivership actions brought by the Office. Request restores a position previously eliminated as a budget reduction measure.	$16,075	$0	$66,872	$0
49	City Atty	Deputy City Attorney II: Responsible for prosecution of MMC violations to support police, fire, and NPU enforcement efforts. Position will re-establish the Office's ability to provide support for time-consuming civil drug abatement actions and civil receivership actions in support of the Beat Health Program.	$26,290	$0	$109,364	$0
50	IT	Network Engineer III/Security Manager: Responsible for developing and managing security policies/procedures and providing a high level of expertise in managing/protecting the City's network, system data, and computer systems from destructive or malicious hackers and electronic pirating.	$20,413	$10,992	$69,182	$37,252
51	Finance	Administrative Analyst II: Provides analytical support in the monitoring, billing, and auditing of Police grants to assure grant compliance. Position would physically reside in the PD but be allocated in the Accounting Division of the Finance Department.	$21,749	$0	$84,234	$0
52	Finance	Bids-Online Maintenance Support: Funding supports the management/maintenance of this online purchasing management system which allows vendors to register online, receive automated service and commodity solicitations via e-mail and will eventually allow for electronic submission of bids.	$8,000	$0	$8,000	$0

General Fund Supplemental Requests
As Recommended by the Council Finance Committee (1/22/07)

Line From Proforma	Dept.	Budget Request	FY 06-07 General Fund	FY 06-07 Other	FY 07-08 General Fund	FY 07-08 Other
53	Finance	Account Clerk II: Processes parking citations issued by the PD to meet State-mandated time frames and manage increased activity in the adjudication process. Position is fully supported by revenue generation from parking citation revenue.	$12,255	$0	$50,981	$0
54	PD	Sworn Staffing (4): Funding moves the City towards the Council desired goal of 1.85 officers per 1,000 residents.	$135,417	$0	$407,214	$0
55	PRN	Administrative Office Assistant I (from 75% benefited to full-time benefited): Responsible for department-wide tasks, including distribution of City Council and Committee reports; preparing check requests; and other basic clerical support functions. This request is fully supported by revenue generation from service credits to other funds.	$3,072	$0	$12,287	$0
56	PRN	Maddux Youth Center: Provides for facility and programming needs at the updated and expanded Maddux Youth Center.	$97,780	$0	$82,723	$0
57	PRN	Weed, Litter, & Blight Removal: Provides funding support for the removal of weeds, litter, and other blight from the public right-of-ways.	$100,000	$0	$150,000	$0
58	PRN	John Thurman Capital Projects: Provides capital funding for projects at John Thurman Field in keeping the Modesto Nuts agreement. This year's funding provides for new fencing and upgraded lighting.	$50,000	$0	$50,000	$0
59	PRN	Golf Capital Projects: In keeping with prior Council direction, this funding designates $1 of each 18-hole round for capital infrastructure needs at the City's three golf courses.	$99,372	$0	$100,000	$0
60	PW	Fleet Supervisor: Funding of this position assures full-time management of both the downtown shop where police vehicles are maintained and of the transit bus facility. This additional supervisor will provide future planning as well as management of current operations.	$6,078	$21,582	$25,282	$64,748
61	PRN	Exhibits Coordinator (75%/Benefited): Moves this position from part-time to a permanent position with benefits; position is responsible for exhibits at both the Mansion and the Museum. There may be an opportunity for this cost to be offset by contributions from the McHenry Musuem and Historical Society and the McHenry Mansion Foundation.	$7,441	$0	$30,954	$0

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-121

A RESOLUTION AMENDING THE GENERAL FUND FISCAL YEAR 06-07 OPERATING BUDGET TO REFLECT REVISED REVENUE PROJECTIONS.

WHEREAS, each year the City Council adopts revenue forecasts for the upcoming fiscal year based on staff analysis, and

WHEREAS, those forecasts are reviewed from time to time to assure their validity, and

WHEREAS, there have been changes in the revenue forecasts which require amending the previously adopted revenue projections for FY 06-07 General Fund revenue, and

WHEREAS, these new revenue projections are identified in a staff report to City Council from the City Manager dated January 29, 2007, a copy of which is on file in the Office of the City Clerk, and

WHEREAS, the Finance Committee reviewed said revenue information at their meeting of January 22, 2007,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves amending the General Fund operating budget for FY 06-07 to reflect the aforementioned revised revenue projections.

BE IT FURTHER RESOLVED that this action will increase overall major revenue projections in the General Fund for FY 06-07 by an estimated $3.5 million dollars over the adopted revenue budget.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-122

A RESOLUTION AUTHORIZING THE MODESTO IRRIGATION DISTRICT TO EXECUTE AMENDMENT NO. 5 TO THEIR EXISTING AGREEMENT WITH THE BLACK & VEATCH CORPORATION IN AN AMOUNT NOT TO EXCEED $353,940, TO COMPLETE THE ENGINEERING DESIGN SERVICES RELATED TO THE MODESTO REGIONAL WATER TREATMENT PLANT PHASE TWO EXPANSION

WHEREAS, on October 11, 2005, by Resolution No. 2005-516 the Council of the City of Modesto approved the Amended and Restated Treatment and Delivery Agreement (ARTDA) with the Modesto Irrigation District (MID) that contemplates the design, construction, and operation of the Modesto Regional Water Treatment Plant (MRWTP) Phase Two Expansion project, and

WHEREAS, the City and MID have been working together planning for the expansion of the MRWTP from its existing capacity of 36 mgd to 72 mgd, and

WHEREAS, it has been well documented that the MRWTP Phase Two Expansion project is needed to provide existing users with a reliable water source and to keep pace with the City's projected growth, and

WHEREAS, the ARTDA requires MID to obtain City authorization for such amendments, and

WHEREAS, MID and City staff agree that additional services are needed and justified to complete the project's engineering design services,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes Modesto Irrigation District to execute Amendment No. 5 to the Agreement with Black & Veatch in an amount not to exceed an additional $353,940, for

a total agreement amount of $4,760,769, to complete the engineering design services related to the Modesto Regional Water Treatment Plant Phase Two Expansion project.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007 by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-123

A RESOLUTION AUTHORIZING THE MODESTO IRRIGATION DISTRICT TO EXECUTE AN AGREEMENT WITH THE BLACK & VEATCH CORPORATION IN AN AMOUNT NOT TO EXCEED $5,659,785, TO PROVIDE CONSTRUCTION PHASE SERVICES RELATED TO THE MODESTO REGIONAL WATER TREATMENT PLANT PHASE TWO EXPANSION

WHEREAS, on October 11, 2005, by Resolution No. 2005-516 the Council of the City of Modesto approved the Amended and Restated Treatment and Delivery Agreement (ARTDA) with the Modesto Irrigation District (MID) that contemplates the design, construction, and operation of the Modesto Regional Water Treatment Plant (MRWTP) Phase Two Expansion project, and

WHEREAS, the City and MID have been working together planning for the expansion of the MRWTP from its existing capacity of 36 mgd to 72 mgd, and

WHEREAS, it has been well documented that the MRWTP Phase Two Expansion project is needed to provide existing users with a reliable water source and to keep pace with the City's projected growth, and

WHEREAS, the ARTDA requires MID to obtain City authorization for such agreements, and

WHEREAS, MID and City staff agree that construction phase services are needed and justified to complete the project's construction,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes Modesto Irrigation District to execute an Agreement with Black & Veatch in an amount not to exceed $5,659,785, to provide construction phase services related to the Modesto Regional Water Treatment Plant Phase Two Expansion project.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-124

A RESOLUTION AUTHORIZING THE MODESTO IRRIGATION DISTRICT TO EXECUTE AMENDMENT NO. 1 TO THEIR EXISTING MEMORANDUM OF UNDERSTANDING WITH THE US FILTER-WASTEWATER GROUP (NOW SIEMENS WATER TECHNOLOGIES CORPORATION) IN AN AMOUNT NOT TO EXCEED $1,119,570, TO COMPLETE THE DESIGN AND PROCUREMENT PROCESS OF THE LOW-PRESSURE MEMBRANE WATER FILTRATION SYSTEM FOR THE MODESTO REGIONAL WATER TREATMENT PLANT PHASE TWO EXPANSION

WHEREAS, on October 11, 2005, by Resolution No. 2005-516 the Council of the City of Modesto approved the Amended and Restated Treatment and Delivery Agreement (ARTDA) with the Modesto Irrigation District (MID) that contemplates the design, construction, and operation of the Modesto Regional Water Treatment Plant (MRWTP) Phase Two Expansion project, and

WHEREAS, the City and MID have been working together planning for the expansion of the MRWTP from its existing capacity of 36 mgd to 72 mgd, and

WHEREAS, it has been well documented that the MRWTP Phase Two Expansion project is needed to provide existing users with a reliable water source and to keep pace with the City's projected growth, and

WHEREAS, the ARTDA requires MID to obtain City authorization for such amendments, and

WHEREAS, MID and City staff agree that additional services are needed and justified to complete the project's design and procurement process of the low-pressure membrane water filtration system,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes Modesto Irrigation District to execute Amendment No. 1 to the

Memorandum of Understanding with the US Filter-Wastewater Group (now Siemens Water Technology Corporation) in an amount not to exceed an additional $1,119,570, for a total Memorandum of Understanding amount of $5,433,436, to complete the design and procurement process of the low-pressure membrane water filtration system related to the Modesto Regional Water Treatment Plant Phase Two Expansion project.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-126

A RESOLUTION DENYING THE ABANDONMENT OF A PORTION OF THE MERLE AVENUE RIGHT-OF-WAY AT THE CLAUS ROAD INTERSECTION (PACIFIC PRIDE COMMUNITIES)

WHEREAS, Pacific Pride Communities has filed an application to vacate and abandon a portion of the Merle Avenue right-of-way, located at the Claus Road Intersection ("Proposed Abandonment"), and

WHEREAS, said right-of-way to be vacated and abandoned is more particularly described in **Exhibit "A"** attached hereto and incorporated by this reference, and

WHEREAS, Government Code Section 65402(a) requires that prior to abandoning a public right-of-way, the Planning Commission shall make a determination as to whether the abandonment is consistent with the General Plan, and

WHEREAS, the proposed right-of-way abandonment has been referred to affected City departments and local utility companies and no objection to the abandonment has been received, and

WHEREAS, a hearing was held by the Planning Commission on December 18, 2006, in the Tenth Street Chambers, located at 1010 Tenth Street, Modesto, California, at which hearing both oral and documentary was received and considered regarding the proposed vacation and abandonment, and

WHEREAS, several residents testified in opposition to the abandonment at the public hearing, due to ingress and egress concerns; and

WHEREAS, by Planning Commission Resolution No. 2006-78, the Planning Commission rendered a report finding that the Proposed Abandonment is in conformance

with the Modesto Urban Area General Plan, but recommended that the Council reconsider the General Plan policies pertaining to the abandonment of Merle Avenue, and

WHEREAS, a duly noticed public hearing was held by the Council of the City of Modesto on Tuesday, February 13, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California, at which time all persons interested in or objecting to the Proposed Abandonment were afforded the opportunity to appear, and

WHEREAS, a notice of the hearing on the proposed right-of-way abandonment has been posted and published in the Modesto Bee for two successive weeks starting January 30, 2007, as required by the California Streets and Highways Code Sections 8322 and 8323, and

WHEREAS, after said public hearing, the Council found and determined that said abandonment should be denied, and

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Modesto hereby denies the proposed abandonment of a portion of Merle Avenue for the following reasons:

1. Until such time as the Claus Road Expressway is constructed, the abandonment of Merle Avenue is premature, because it will reduce the options for ingress and egress to and from Village One unnecessarily in that the Merle Avenue and Claus Road intersection operates in accordance with City Standards under the current configuration.
2. Until such time as Precise Plan 30 is developed, the abandonment of Merle Avenue is premature, because Precise Plan 30 will provide an alternative means of ingress and egress for the adjacent neighborhood and emergency services during school drop-off and pick-up times for the schools along Fine and Merle Avenues.
3. Denying the abandonment of Merle Avenue is consistent with the Village One Specific Plan, because the abandonment is not being denied indefinitely, but delayed pending the construction of the Claus Road Expressway and development of Precise Plan 30, as referenced in the above findings.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-127

A RESOLUTION CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT FOR THE PROMENADE PROJECT (STATE CLEARINGHOUSE NUMBER 2004102044)

WHEREAS, Setrok LP filed applications for a General Plan Amendment and PD zone district, including submittal of a Development Plan, in October of 2003 with the Planning Division to allow for construction of a Lifestyle Retail Center, including specialty retailers, a multi-screen movie theater, restaurants, offices, and a four-story hotel on a 45-acre site located along the west side of Dale Road, between Standiford and Pelandale Avenues, just north of the existing Vintage Faire Mall, ("the Project"), and

WHEREAS, the application was deemed complete in January of 2004, and

WHEREAS, the City of Modesto ("the City"), on October 8, 2004, published an Initial Study and a Notice of Preparation for the Project, which identified potentially significant environmental impacts attributable to the Project, on which basis the City determined that an Environmental Impact Report ("EIR") was required for the Project, and

WHEREAS, the Notice of Preparation provided notice of the City's determination, and solicited public input on the proposed scope and content of the EIR for the Project, and

WHEREAS, on November 8, 2004, the City held a public scoping meeting to receive public comments on the scope and content of the EIR, and

WHEREAS, the City published and distributed a Draft EIR for the Promenade Project (State Clearinghouse Number 2004102044) ("DEIR") for public comment on June 9, 2006, in accordance with Section 21091 of the California Environmental Quality Act ("CEQA"), and

WHEREAS, the DEIR was available for public comment for a period of 45 days as required by Section 21091 of CEQA, the close of the public comment period being July 24, 2006, and

WHEREAS, the public comment period was extended for an additional 10 days to close on August 3, 2006, and

WHEREAS, during the 55-day public comment period the City received eight letters commenting on the DEIR, and

WHEREAS, subsequent to the release of the DEIR and close of the public comment period the Project entitlement applications were suspended in September of 2006 by the Project applicant, and

WHEREAS, the applicant requested to move forward with certification of the EIR without any approval of the Promenade Project or related entitlements, and

WHEREAS, the City continued with the certification of the EIR at the applicant's request and prepared written responses to all written comments received on the DEIR, said responses being contained in a Final EIR for the Promenade Project (State Clearinghouse Number 2004102044) ("FEIR") prepared pursuant to Section 15089 of the CEQA Guidelines, and

WHEREAS, the FEIR was published and distributed on January 31, 2007, and consists of the Draft EIR, a list of commentors, copies of all written comments received, responses to those comments that raise environmental issues, and any revisions to the text of the Draft EIR made in response to the comments, as required by Section 15132 of the CEQA Guidelines, and

WHEREAS, no action is being taken on the Promenade Project for development approval due to the suspension of planning entitlement applications by the Project applicant, and

WHEREAS, no findings of fact are required to be adopted by the decision-making agency unless action is being taken on approval of a project, in accordance with section 15091(a) of the CEQA Guidelines, and

WHEREAS, no mitigation monitoring and reporting program is required to be adopted by the decision-making agency unless action is being taken on approval of a project, in accordance with section 15091(d) of the CEQA Guidelines, and

WHEREAS, no statement of overriding considerations is required to be adopted by the decision-making agency unless action is being taken on approval of a project, in accordance with section 15093 of the CEQA Guidelines, and

WHEREAS, a no public hearing was held by the Planning Commission as the Project applicant has requested that the planning entitlement applications be suspended from consideration at this time, and

WHEREAS, certification of the Promenade FEIR (SCH No. 2004102044) was set for a public hearing of the City Council to be held on February 13, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing of the Council evidence both oral and documentary was received and considered, and

WHEREAS, the City Council has received and considered the FEIR for the Promenade Project (SCH No. 2004102044) that analyzed the potential environmental effects of the proposed Project.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby finds and determines in respect to the FEIR:

1. That the FEIR has been completed in compliance with CEQA; that the City Council has reviewed and analyzed the FEIR and other information in the record and has considered the information contained therein, including the written and oral comments received at the public hearings on the FEIR, prior to certifying the FEIR; and that the FEIR represents the independent judgment of the City of Modesto (Section 15090(a)); and

2. The City Council hereby finds and recognizes that the FEIR contains additions, clarifications, modifications and other information in its responses to comments on the Draft Environmental Impact Report for the Project ("DEIR") and also incorporates information obtained by the City since the DEIR was issued. This Council hereby finds and determines that such changes and additional information are not significant new information as that term is defined under the provisions of the California Environmental Quality Act, because such changes and additional information do not indicate that any new significant environmental impacts not already evaluated would result from the Project and do not reflect any substantial increase in the severity of any environmental impact; that no feasible mitigation measures considerably different from those previously analyzed in the DEIR have been proposed that would lessen significant environmental impacts of the Project; and that no feasible alternatives considerably different from those analyzed in the DEIR have been proposed that would lessen significant environmental impacts of the Project. Accordingly, this Council hereby finds and determines that recirculation of the FEIR for further public review and comment is not warranted; and

3. The City Council does hereby designate the Community and Economic Development Director of the City of Modesto, at his office at 1010 Tenth Street, Modesto, California 95354 as the custodian of documents and record of proceedings on which the decision is based; and

4. The City Council does hereby make the foregoing findings with respect to the significant effects on the environment of such Project, as identified in the FEIR, with the stipulations that all information in these findings is intended as a summary of the full administrative record supporting the FEIR, which full administrative record should be consulted for the full details supporting these findings, and that any mitigation measures and/or alternatives that were suggested by commentors to the DEIR and were not adopted as part of the FEIR are hereby expressly rejected for the reasons stated in the responses to the comments set forth in the FEIR and elsewhere in the record.

BE IT FURTHER RESOLVED by the Council that it hereby certifies the Final Environmental Impact Report for the Promenade Project (SCH No. 2004104022), a copy of which is available in the City Clerk's Office.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of February, 2007, by Councilmember Olsen, who moved its adoption, which motion being duly seconded by Councilmember Marsh, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-128

A RESOLUTION ALLOWING A REFUND TO CITIFINANCIAL AUTO CORPORATION OF OVER PAID BUSINESS LICENSE TAXES AND AUTHORIZING THE CITY MANAGER TO EXECUTE SAID REFUND

WHEREAS, CitiFinancial Auto Corporation has submitted a request for a business license tax refund in the amount of $27,433.42, and

WHEREAS, the City Finance Department has verified said refund, and

WHEREAS, the Modesto City Council is required to approve all refunds of more than $5000.00,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto hereby authorizes a refund in the amount of $27,433.42 be paid to CitiFinancial Auto Corporation.

BE IT FURTHER RESOLVED that the City Manager or his designee is hereby authorized to execute said refund.

The forgoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-129

RESOLUTION DECLARING ONE (1) 1977 VAN PELT FIRE ENGINE AND (1) 1982 VAN PELT FIRE ENGINE SURPLUS, AND SELL BOTH TO THE YOSEMITE COMMUNITY COLLEGE DISTRICT (YCCD) FOR $1 EACH, FOR USE AT THE REGIONAL FIRE TRAINING CENTER (RFTC).

WHEREAS, in 1995 the City of Modesto partnered with the Yosemite Community College District (YCCD) and Stanislaus County in the construction and operation of the Regional Fire Training Center, and

WHEREAS, the RFTC maintains fire engines, utilized by the Regional Fire Academy, Modesto Fire Explorers, and others who rent the facility, and

WHEREAS, rent from the facility, in part, offsets partnership costs of the center, and

WHEREAS, the 1977 and 1982 Van Pelt fire engines function, but are very old and are being replaced in their reserve status by newer fire engines which have been removed from front line service, and

WHEREAS, the 1977 and 1982 Van Pelt fire engines have reached the end of their fire fighting service life, and

WHEREAS, the Council of the City of Modesto desires to sell the 1977 and 1982 Van Pelt fire engines to YCCD for one dollar ($1.00) each,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby declares that the 1977 and 1982 Van Pelt fire engines have become surplus property.

BE IT FURTHER RESOLVED that the sale of the 1977 and 1982 Van Pelt fire engines to the YCCD for one dollar ($1.00) each is hereby approved.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-130

ADOPT A RESOLUTION AUTHORIZING THE MODESTO FIRE DEPARTMENT TO APPLY FOR A LIVESCAN ACCOUNT WITH THE DEPARTMENT OF JUSTICE, GIVING THEM ACCESS TO LOCAL, STATE AND FEDERAL SUMMARY CRIMINAL HISTORY INFORMATION FOR EMPLOYMENT, LICENSING OR CERTIFICATION PURPOSES.

WHEREAS, Penal Code Sections 11105(b)(10) and 13300(b)(10) authorize cities, counties and districts to access local, state and federal summary criminal history information for employment, licensing or certification purposes, and

WHEREAS, Penal Code Section 11105(b)(10) authorizes cities, counties and districts to access federal level criminal history information by transmitting fingerprint images and related information to the Department of Justice to be transmitted to the Federal Bureau of Investigation, and

WHEREAS, Penal Code Sections 11105(b)(10) and 13300(b)(10) require that there be a requirement or exclusion from employment, licensing, or certification based on specific criminal conduct on the part of the subject of the record, and

WHEREAS, Penal Code Sections 11105(b)(10) and 13300(b)(10) require the city council, board of supervisors, or governing body of a city, county or district to specifically authorize access to summary criminal history information for employment, licensing, or certification purposes,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Modesto Fire Department to apply for a LiveScan account with the Department of Justice, giving access to local, state and federal level summary criminal history information for employment (including volunteers and contract employees),

licensing, or certification purposes and may not disseminate the information to a private entity; and

BE IT FURTHER RESOLVED, that the Modesto Fire Department shall not consider a person who has been convicted of a felony or misdemeanor involving moral turpitude eligible for employment (including volunteers and contract employees), or licensing; except that such conviction may be discharged if it is determined that mitigating circumstances exist, or that the conviction is not related to the employment, volunteer or license in question.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-131

A RESOLUTION APPROVING A SECOND AMENDMENT TO A LEASE AGREEMENT BETWEEN THE CITY OF MODESTO AND GOLDENSTATE TOWERS, LLC FOR EXPANSION OF A CELLULAR TOWER SITE LOCATED ON A PORTION OF CREEKSIDE MUNICIPAL GOLF COURSE, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE SECOND AMENDMENT TO THE LEASE AGREEMENT.

WHEREAS, GoldenState Towers, LLC currently leases a cellular tower site located on a portion of Creekside Municipal Golf Course, and

WHEREAS, it has been determined that the space being used by GoldenState Towers, LLC is larger than identified in the lease, and

WHEREAS, GoldenState Towers, LLC has agreed to a rent increase from $1,000 per month to $1,250 per month to compensate the City for the additional ground space,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves a Second Amendment to a Lease Agreement between the City of Modesto and GoldenState Towers, LLC for expansion of a cellular tower site located on a portion of Creekside Municipal Golf Course.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Second Amendment to the Lease Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-132

A RESOLUTION AMENDING THE CURRENT "SUPPORTIVE SERVICES FOR HOUSING" COMMUNITY HOUSING AND SHELTER SERVICES (CHSS) COMMUNITY DEVELOPMENT BLOCK GRANT (CDBG) PUBLIC SERVICE AGREEMENT FOR FISCAL YEAR 2006-2007 TO USE UP TO $4,800 OF THE EXISTING GRANT TO PAY FOR WORKSPACE RENTAL AND SUPPLIES FOR THE STAFF PERSON, AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AMENDMENT TO AGREEMENT.

WHEREAS, on May 2, 2006, by Resolution No. 2006-274, the City Council approved the allocation of the CDBG public service grant funding for Fiscal year 2006-2007, and

WHEREAS, included in this resolution was the allocation of $21,809 in CDBG funds to Community Housing and Shelter Services (CHSS), to be utilized for staff salary and benefits for Supportive Services for Housing, and

WHEREAS, CHSS had originally requested funding of $34,166, but due to limited funding all applicants received partial funding and had to adjust their funding requests accordingly, and

WHEREAS, on November 21, 2006, CHSS requested to amend their agreement to reallocate $4,800 of their funding to pay for rent and supplies for the staff person in the Supportive Services for Housing position, and

WHEREAS, the agreement currently funds staff salary and benefits only and the reallocation would allow them to use up to $4,800 of the existing grant to pay for workspace rental and supplies for the staff person, and

WHEREAS, CHSS is requesting this change because adequate funding has been identified to pay the staff person's salary but CHSS is in need of funding for workspace rental and supplies, and

WHEREAS, the Citizens Housing and Community Development Committee met on January 26, 2006 and supported the recommendation to amend the agreement to use up to $4,800 of the existing grant to pay for workspace rental and supplies for the staff person,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves amending the current "Supportive Services for Housing" Community Housing and Shelter Services (CHSS) Community Development Block Grant (CDBG) Public Service agreement for fiscal year 2006-2007 to use up to $4,800 of the existing grant to pay for workspace rental and supplies for the staff person.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the amendment to agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-133

A RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO ISSUE A FORMAL REQUEST FOR BIDS TO RE-ROOF THREE CITY OWNED RESTROOMS AND REPAIR ROOFS ON FOUR CITY OWNED RESTROOMS AT AN ESTIMATED COST OF $65,000.

WHEREAS, staff of the Parks, Recreation and Neighborhoods Department is responsible for the maintenance of all City owned park sites, and

WHEREAS, staff has made a thorough review of the park sites, and an analysis of the roofing structures determined that the roofs on the restrooms at Marshall Park, Cesar Chavez Park, and Beardbrook Park have significant dry rot damage and are in need of complete re-roofing including replacement of trusses at an estimated cost of $41,000.00, and

WHEREAS, during the review of restroom roofs, it was determined that the roofs on the restrooms at East La Loma Park, Revard Park, Lakewood Park, and Sipherd Park show some signs of dry rot and are in need of repair due to leakage at an estimate estimated cost of $24,000, and

WHEREAS, a formal Request for Bids (RFB) must be issued to complete repairs that will cost an estimated $65,000,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby authorizes the Purchasing Manager to issue a formal Request for Bids to re-roof three City owned restrooms and to repair the roofs on four City owned restrooms.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-134

A RESOLUTION SUPPORTING A PILOT PROGRAM TO CURB VANDALISM AND GRAFFITI OCCURRENCES AT THE MODESTO HIGH SCHOOL CAMPUS.

WHEREAS, during the week of January 15, 2007, a member of the Modesto City Schools staff (MCS) contacted staff at the Parks, Recreation and Neighborhoods Department (PR&N) regarding an increase in graffiti and negative behavior taking place on the Modesto High School campus, and

WHEREAS, the area specifically being affected is the Modesto High School tennis courts which are co-owned by the Modesto City School and the City of Modesto and managed through a use-agreement, and

WHEREAS, the school district's main concerns are the occurrence of daily graffiti on the tennis courts, unlimited access to the tennis courts and lack of lighting in the area of the tennis courts, and

WHEREAS, after further discussion, PR&N and Modesto High School staff proposed that City graffiti crews will order paint which matches the tennis courts, and deliver the paint to the Modesto High School campus, and the school district personnel will paint out the graffiti as it occurs, and

WHEREAS, staff further proposed that the Modesto High School staff could lock the gates accessing the tennis courts from 9:00 p.m. to 6:30 a.m. and that the Modesto High School staff would be responsible for locking and unlocking the gates on a daily basis, and

WHEREAS, staff further proposed that the tennis court light timers be set so the lights will come on at 6:00 p.m. and turn off at 6:30 a.m., and

WHEREAS, after one month, both PR&N staff and School District staff will evaluate the pilot program, and

WHEREAS, the Safety and Communities Committee met on February 5, 2007, and supported the recommended pilot program to curb vandalism and graffiti occurrences at the Modesto High School campus,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves the pilot program to curb vandalism and graffiti occurrences at the Modesto High School campus.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNIL
RESOLUTION NO. 2007-135

A RESOLUTION AFFIRMING THE CITY'S CO-SPONSORSHIP OF "EARTHDAY IN THE PARK FESTIVAL, 2007" AT GRACEADA PARK AND ALLOWING THE SALE OF MERCHANDISE IN THE PARK DURING THE EVENT.

WHEREAS, in 1970, Earth Day was established to make the public aware of programs successful in protecting the environment and conserving natural resources, and

WHEREAS, on March 24, 1992, by Resolution No. 92-129, the City Council acknowledged "Earth Day in the Park" as an annual event, and

WHEREAS, the Citizen's Advisory Committee on Recycling (CACOR) sponsors the event, and the 18th Annual "Earth Day in the Park" will be held on Saturday, April 21, 2007, at Graceada Park, and

WHEREAS, this event provides a forum for merchants to display and sell their "environmentally friendly" merchandise, and for the creation of a "festival atmosphere", while giving the public an opportunity to make purchases of positive benefit to the environment, and

WHEREAS, "Earth Day in the Park Festival, 2006" had nearly 100 vendor booths, and

WHEREAS, as in prior years' events, the Committee seeks Council approval for the sale of merchandise in the Park during the event,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the City hereby affirms its co-sponsorship of "Earth Day in the Park Festival, 2007", to be held on April 21, 2007, at Graceada Park.

BE IT FURTHER RESOLVED by the Council that it hereby approves the sale of merchandise at Graceada Park during the "Earth Day in the Park Festival, 2007" event.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-136

A RESOLUTION APPROVING AN INCREASE IN THE GROVER LANDSCAPING CONTRACT BY AN ADDITIONAL $129,140 TO ADD ADDITIONAL, NEWLY DEVELOPED PARK AND OPEN SPACE SITES, SPECIFICALLY THE VIRGINIA CORRIDOR, FREEDOM NEIGHBORHOOD PARK, SANDERS NEIGHBORHOOD PARK, FLOYD & FINE STREETSCAPE, RANCHO ENCANTADO – HATCH WALL, AND FAIRWAY NEIGHBORHOOD PARK.

WHEREAS on March 7, 2006, by Resolution No. 2006-134, the City Council approved a Landscape Maintenance Agreement, effective March 21, 2006, between Grover Landscape Services, Inc. and the City, and

WHEREAS, since implementation of the agreement several park and open space sites have been developed or are in the development stage, and

WHEREAS, these newly developed park and open space sites will require on-going maintenance and an increase in the number of Grover Landscaping contracted sites, and

WHEREAS, these sites are the Virginia Corridor, Freedom Neighborhood Park, Sanders Neighborhood Park, Floyd & Fine Streetscape, Rancho Encantado – Hatch Wall, and Fairway Neighborhood Park, and

WHEREAS, the annual costs for these sites are $8,340 for the Virginia Corridor, $30,900 for Freedom Neighborhood Park, $29,700 for Sanders Neighborhood Park, $17,700 for Floyd & Fine Streetscape, $15,300 for Rancho Encantado – Hatch Wall, and $27,200 for Fairway Neighborhood Park for a total of $129,140, and

WHEREAS, the additional charge of $8,340 to the General Fund for the Virginia Corridor is budgeted in 0100-350-3522-0235, and

WEHREAS, the additional charge for Freedom Neighborhood Park, Sanders Neighborhood Park and the Floyd and Fine Streetscape is $78.300, and

WHEREAS, one-half of the additional charge ($39,150) for Freedom Neighborhood Park, Sanders Neighborhood Park and the Floyd and Fine Streetscape is budgeted in the Village One Community Facilities District account 2600-020-0207-0231, and

WHEREAS, one-half of the additional charges ($39,150) for Freedom Neighborhood Park, Sanders Neighborhood Park and the Floyd and Fine Streetscape are budgeted in the Village One #2 Community Facilities District account 2690-020-0207-0231, and

WHEREAS the additional charge of $42,500 for the Rancho Encantado – Hatch Wall and the Fairway Neighborhood Park is budgeted in the Fairview Village Community Facilities District account 2640-020-0207-0231, and

WHEREAS, there is a need to increase the Grover Landscaping contract by a total of $129,140 as described above,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves increasing the Grover Landscape Services, Inc. agreement by an additional $129,140 per year to add additional, newly developed park and open space sites.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-137

A RESOLUTION REVISING THE POSITION CLASSIFICATION PLAN FOR THE CITY OF MODESTO.

WHEREAS, a Position Classification Plan for the City of Modesto was adopted by Modesto City Council Resolution No. 88-338 pursuant to Rule 2 of the Personnel Rules and Regulations of the City of Modesto, and

WHEREAS, the City Manager has recommended to the Council amendments to the Position Classification Plan, and

WHEREAS, Rule 2.2 of the City of Modesto Personnel Rules provides that revisions to the Classification Plan shall be effective upon adoption of resolution of the City Council,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION I. CLASSIFICATION CREATED. The Position Classification Plan of the City of Modesto is hereby amended to create the following classification:

Parking Services Supervisor

The job specification for this classification is being created as part of a new program to automate the City's parking garages. The job specification for the classification of Parking Services Supervisor, as shown on the attached **Exhibit "A,"** which is hereby made a part of this resolution by reference, is hereby approved and made part of the Position Classification Plan of the City of Modesto.

SECTION 2. EFFECTIVE DATE. This resolution shall become effective on and after February 27, 2007.

The foregoing resolution was introduced in a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

CITY OF MODESTO FEBRUARY 2007
No. 6809

PARKING SERVICES SUPERVISOR

Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are not intended to reflect all duties performed within the job.

DEFINITION

To plan, organize, supervise and participate in the City's parking operations; and to manage a variety of both parking and facility maintenance duties.

SUPERVISION RECEIVED AND EXERCISED

Receives direction from higher level supervisory and management staff.

Exercises direct supervision over assigned parking and maintenance staff.

ESSENTIAL AND MARGINAL FUNCTION STATEMENTS

Essential and other important responsibilities an duties may include, but are not limited to the following:

Essential Functions:

Recommend and assist in the implementation of goals and objectives; establish schedules and methods for providing parking services; implement policies and procedures.

Plan, prioritize, assign, supervise and review the work of staff involved in providing parking services.

Assist in developing and monitoring of the Parking Services Budget.

Participate in the selection of staff; provide or coordinate staff training; work with employees to correct deficiencies and initiate disciplinary actions as necessary.

Participate in the solicitation and evaluation of bids for price and quality; make contractual recommendations to management.

Develop and implement maintenance management plans for parking structures.

Supervise the response to emergency requests for service.

Inspect areas to ensure work standards are met and maintenance problems are corrected.

Essential Functions: (Continued)

Maintain time, material and equipment use records; test and evaluate maintenance supplies; requisition supplies and materials; and distribute supplies and equipment to staff.

Operate a personal computer to utilize required computer programs and software.

Oversee revenue collection, deposit of, and reporting activities within Parking Services.

May perform some maintenance tasks on parking equipment, as needed.

Compile information and prepare reports.

Marginal Functions:

Performs related duties as assigned.

QUALIFICATIONS

Knowledge of:

Methods and practices used in parking services and minor facility maintenance activities.

Tools, equipment and supplies used in providing comprehensive parking services and minor facility maintenance services.

Principles and practices used in the supervision and training of personnel.

Safe work practices; regulatory safety programs and procedures.

Word processing, spreadsheet applications, and Internet usage necessary for job performance.

State and municipal parking regulations.

Ability to:

Establish and maintain cooperative working relationships with those contacted in the course of work.

Plan, estimate, direct coordinate, schedule and review the work of others.

Ability to: (Continued)

Communicate clearly and concisely, both orally and in writing.

Supervise, train and evaluate the performance of assigned staff.

Operate a variety of modern office, communication, and parking equipment.

EXPERIENCE AND TRAINING GUIDELINES:

Any combination equivalent to experience and education that could likely provide the required knowledge and abilities would be qualifying. A typical way to obtain the knowledge and abilities would be:

Experience:

Four years of increasingly responsible experience involving customer services management. Experience must include the supervision of staff. Parking facility experience is highly desirable.

Education:

Equivalent to completion of the twelfth grade preferably supplemented by specialized training related to the supervision of personnel.

License or Certificate:

Possession of, or the ability to obtain, a valid California driver's license.

WORKING CONDITIONS

Environmental Conditions:

Office and field environment. travel from site to site; hot and cold temperatures; inclement weather.

Physical Conditions:

Essential and marginal functions may require maintaining physical condition for sitting for prolonged periods of time; attending meetings; using a personal computer and related office equipment.

CITY OF MODESTO FEBRUARY 2007
No. 3340

LABORATORY ANALYST III

Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are not intended to reflect all duties performed within the job.

DEFINITION:

Performs a variety of chemical, biochemical, and physical analyses of water, domestic and industrial wastewater, receiving waters, and other samples, using a variety of laboratory instruments and equipment; and may perform varied bacteriological analysis as required.

DISTINGUISHING CHARACTERISTICS

The Laboratory Analyst III is considered the lead level in the Laboratory Analyst series. The class is distinguished from the Laboratory Analyst II by the analysis of complex and difficult laboratory procedures involving GC, GCMS, ICPMS, AA. Incumbents may be assigned projects and may direct the work of the Laboratory Analyst I/II on certain project assignments.

SUPERVISON EXERCISED AND RECEIVED

Receives general supervision from the Environmental Laboratory Supervisor. May exercise technical or functional supervision over assigned staff.

ESSENTIAL AND MARGINAL FUNCTION STATEMENTS – Essential and other important responsibilities and duties may include, but are not limited to, the following:

Essential Functions:

Perform a full range of chemical and biological tests following standardized procedures as related to treatment, quality control and distribution of drinking water and of domestic and environmental compliance, wastewater effluent and receiving waters.

Interpret results of analysis, recognizing problems, which may occur during the process; determine the cause for and recommends corrective measures; evaluate results of chemical testing.

Serve as technical consultant regarding chemical treatment and analytical testing to plant staff such as plant operators, environmental compliance inspectors and plant engineers on matters relating to the wastewater treatment process.

Essential Functions: (Continued)

Perform calculations, complete forms maintain records and prepare oral and written reports of work performed.

Maintain proper quality assurance and follow work safety procedures; recommend improvement to work procedures, methods and forms.

Prepare standards, chemical solutions and reagents, clean glassware and specialized equipment.

Operate and maintain laboratory instruments and equipment such as atomic absorption/mass spectrophotometer, gas chromatograph, flow injection analyzer and others as needed.

Collect wastewater, storm water, receiving water and potable water distribution system samples.

Provide input to assist in maintaining and developing State and EPA approved test methods and procedures.

Assist with special projects, reports, and implementation of a quality assurance/ quality control program, according to regulatory requirement.

Assist in maintaining the laboratory Chemical Hygiene Plan according to regulatory requirements.

Provide training to laboratory staff in the use of sophisticated analytical instruments.

Provide supervision of staff in the absence of the Environmental Laboratory Supervisor.

Marginal Functions:

Performs related duties as assigned.

QUALIFICATIONS

Knowledge of:

Standard methods used in the analysis of water and wastewater.

Principals and practices used in water, wastewater and environmental compliance analyses.

Knowledge of: (Continued)

Organic, inorganic, physical chemistry and biochemistry.

Principals and operation of atomic absorption mass spectrometer and gas chromatograph.

Sampling techniques and statistical analysis, principles of water and wastewater treatment.

Basic computer operations.

Pertinent Federal, State, and local laws, codes and regulations.

Ability to:

Analyze and interpret the results of complex laboratory tests of water and wastewater.

Operate laboratory equipment in a safe manner.

Understand and carry out oral and written instructions.

Maintain accurate records and prepare complete and concise reports.

Make timely and accurate calculations.

Establish and maintain cooperative-working relationships with those contacted in the course of work.

Occasionally lift and carry up to 50 lbs. of weight.

Assist in the evaluation and acquisition of laboratory equipment.

EXPERIENCE AND TRAINING GUIDELINES

Any combination of experience and training that would likely provide the required knowledge and abilities is qualifying. A typical way to obtain the knowledge and abilities would be:

Experience:

A minimum of three years of laboratory experience in a water, wastewater, environmental or industrial setting, performing testing, analysis and control.

Training:

Possession of a Bachelor of Science degree from an accredited college or university in chemistry, biochemistry, biology or closely related scientific field. The degree must include upper division coursework in chemistry.

License or Certificate:

Possession of Laboratory Analyst III certificate issued by the California Water Environmental Association is required by the end of probationary period.

Must possess a valid California driver's license and have a satisfactory record.

WORKING CONDITIONS

Environmental Conditions:

Laboratory and occasional field environment; exposure to potentially hazardous chemicals; work in or with water and wastewater; exposure to inclement weather conditions; some work is performed in varying temperatures and humidity.

Physical Conditions:

Essential and marginal functions may require maintaining physical condition necessary for walking, standing or sitting for prolonged periods of time, manual dexterity, the ability to accurately distinguish color. Occasionally lift and carry up to 50 lbs. of weight.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-141

A RESOLUTION APPROVING A PROFESSIONAL SERVICES AGREEMENT WITH BOYLE ENGINEERING CORPORATION IN THE NOT-TO-EXCEED AMOUNT OF $452,207 FOR THE DESIGN OF SYLVAN AVENUE BETWEEN MILLBROOK AVENUE AND CLAUS ROAD, AND LITT ROAD FROM SYLVAN AVENUE TO THE NORTH END OF THE GROGAN PARK SITE, AND AUTHORIZING THE COMMUNITY FACILITIES DISTRICT ADMINISTRATOR, OR HIS DESIGNEE, TO EXECUTE THE AGREEMENT

WHEREAS, following a Request for Qualifications which was sent to engineering firms, eight firms were asked to provide a proposal for the design of various road improvement projects, and

WHEREAS, a selection team interviewed eight consulting firms, and

WHEREAS, the Selection Committee determined that Boyle Engineering Corporation rated highest for the design of the Sylvan Avenue from Millbrook Avenue to Claus Road, and Litt Road from Sylvan Avenue to the north end of the Grogan Park site, in accordance with Administrative Directive 3.1, and

WHEREAS, the District Engineer has recommended that Boyle Engineering Corporation be accepted as the most qualified engineering consulting firm for engineering design services for the "Sylvan Avenue from Millbrook Avenue to Claus Road, and Litt Road from Sylvan Avenue to the north end of the Grogan Park site" project, and

WHEREAS, the District Engineer has recommended accepting the proposal of Boyle Engineering Corporation, in an amount not-to-exceed $452,207.00,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves an Agreement between City of Modesto Community Facilities

District and Boyle Engineering Corporation for engineering design services for the project titled "Sylvan Avenue from Millbrook Avenue to Claus Road, and Litt Road from Sylvan Avenue to the north end of the Grogan Park site" project in the not-to-exceed amount of $452,207.00.

BE IT FURTHER RESOLVED that the District Administrator, or his designee, is hereby authorized to execute said Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-142

A RESOLUTION AMENDING THE FY 06-07 CIP BUDGET BY DECREASING THE APPROPRIATION FOR THE MARY GROGAN COMMUNITY PARK PROJECT (P501) BY $170,000 AND RETURNING THOSE FUNDS TO RESERVES, THEN TRANSFER FROM THE PARKS CFF FUND TO THE VILLAGE ONE #2 CFD #2004-1 CIP FUND, REAPPROPRIATING $170,000 FROM THE VILLAGE ONE #2 CFD #2004-1 CIP FUND TO THE SYLVAN AVENUE BETWEEN MILLBROOK AVENUE AND CLAUS ROAD PROJECT (X536) TO FULLY FUND THE SYLVAN AVENUE BETWEEN MILLBROOK AVENUE AND CLAUS ROAD, AND THE LITT ROAD FROM SYLVAN AVENUE TO THE NORTH END OF THE GROGAN PARK SITE PROJECT

WHEREAS, on October 3, 2006, by Resolution No. 2006-637 the Council of the City of Modesto adopted the 2006/2007 Capital Improvement Program, and

WHEREAS, the 2006/2007 Capital Improvement Program included projects titled "Mary A. Grogan Community Park" (P501) and "Sylvan Avenue from Millbrook to Claus" (X536), and

WHEREAS, the street improvements on Litt Road adjacent to the Grogan Park site are being combined with the Sylvan Avenue project in an effort to take advantage of the cost savings associated with combining two medium sized projects into one large project, and

WHEREAS, staff recommends decreasing the CIP Account P501 "Mary Grogan Community Park" project by $170,000 and returning those funds to reserves, then transfer from the Parks CFF Fund to the Village One #2 CFD #2004-1 CIP fund, then reappropriating $170,000 from the Village One #2 CFD #2004-1 CIP fund to the CIP Account X536 "Sylvan Avenue from Millbrook to Claus" to provide for the Parks CFF

share of the costs for this work and to fully fund the design of the "Sylvan Avenue Millbrook to Claus, and the Litt Road Sylvan to north end of Grogan Park site" project,

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Modesto hereby approves amending the FY 06-07 CIP budget by decreasing the CIP Account P501 "Mary Grogan Community Park" project by $170,000 and returning those funds to reserves, then transfer from the Parks CFF Fund to the Village One #2 CFD #2004-1 CIP fund, then reappropriating $170,000 from the Village One #2 CFD #2004-1 CIP fund to the CIP Account X536, "Sylvan Avenue from Millbrook to Claus" to provide for the Parks CFF share of the costs for this work and to fully fund the design of the "Sylvan Avenue Millbrook to Claus, and the Litt Road Sylvan to north end of Grogan Park site" project.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-143

A RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO ISSUE A FORMAL REQUEST FOR PROPOSALS (RFP) FOR THE PROVISION OF TRANSIT TICKET PRINTING SERVICES FOR THE PUBLIC WORKS DEPARTMENT, TRANSIT DIVISION, FOR A TWO (2) YEAR AGREEMENT, WITH THREE (3) ONE-YEAR EXTENSION OPTIONS AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED ANNUAL COST OF $20,000.

WHEREAS, the current contract for Modesto Area Express (MAX) transit ticket printing services was last bid in 2004 for a three-year period and will expire May 1, 2007, and

WHEREAS, Dillingham Tickets is the current contractor, and

WHEREAS, the new vendor selected through the RFP process will provide seven (7) different types of transit tickets, and

WHEREAS, the City provides specifications and artwork for each type of ticket and requires deliveries be made to specific locations at specified times according to the needs of the Transit Division, and

WHEREAS, funds for the transit ticket printing services are budgeted in 6540-165-1672-0205, and

WHEREAS, Modesto Municipal Code ("MMC") Section 8-3.203, generally requires all purchases, which meet or exceed $50,000 for material, equipment, or contractual services to be formally bid, and

WHEREAS, the issuance of a formal Request for Proposal for transit ticket printing services will conform to MMC Section 8-3.203,

NOW, THEREFORE, BE IT HEREBY RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. The City Clerk is hereby authorized to call for public competitive sealed proposals for the purchase of transit ticket printing services to be opened in the Office of the City Clerk, 1010 Tenth Street, in the City of Modesto. The City Clerk shall be directed to give notice inviting such sealed bids in the time, form, and manner provided by law.

SECTION 2. After the sealed proposals are opened they shall be tabulated and analyzed by the Purchasing Division and Transit Staff and a report submitted to Council.

SECTION 3. The Purchasing Manager is hereby authorized to issue a formal Request for Proposals for the provision of Transit ticket printing services for the Public Works Department, Transit Division, for a two (2) year agreement with three (3) one-year extensions options at the sole discretion of the City, for a total estimated annual cost of $20,000.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen. Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-144

A RESOLUTION APPROVING THE FINAL MAP OF SPORTSMEN ESTATES IN THE BASELINE DEVELOPED AREA OF THE CITY OF MODESTO AND AUTHORIZING THE CITY MANAGER TO EXECUTE A SUBDIVISION AGREEMENT WITH WJC DEVELOPMENT, LLC.

WHEREAS, WJC DEVELOPMENT, LLC ("Subdivider"), is possessed of a tract of land situated in the City of Modesto, County of Stanislaus, consisting of 3.72 acres, known as Sportsmen Estates ("SUBDIVISION"), in the Baseline Developed Area, and

WHEREAS, WJC Development, LLC is proposing to develop a subdivision, and

WHEREAS, a tentative map of said tract was approved by the Planning Commission of the City of Modesto on the 3rd day of March, 2006, and

WHEREAS, the Secretary of the Planning Commission of the City of Modesto and the City Engineer have certified that the final map of said tract substantially conforms to the approved tentative map, and

WHEREAS, the City Engineer of the City of Modesto has certified that the final map of said SUBDIVISION meets all of the provisions of the California Subdivision Map Act and the provisions of the Modesto Municipal Code relating to subdivisions, and that the map is technically correct,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that said final map be approved; that the dedications for public streets and easements as shown thereon within the boundaries of said tract be accepted on behalf of the public for public use; and that the City Clerk be authorized to certify the map of said tract on behalf of the City of Modesto after the fees and deposits required by the Modesto Municipal Code in amounts determined by the City Engineer have been paid and after Subdivider

has furnished securities, as set forth in Section 4-4.605 of the Modesto Municipal Code, which shall secure the obligations set forth in Section 66499.3 of the Government Code of the State of California. Said securities shall be in forms acceptable to the City Attorney and in the amounts required by the City Engineer.

BE IT FURTHER RESOLVED that the City Manager and the City Clerk be authorized to execute and attest, respectively, an agreement with WJC Development, LLC, as required by Section 4-4.604(c) of the Modesto Municipal Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-145

A RESOLUTION REJECTING THE SOLE BID FOR "MARSHALL PARK RENOVATION" AND AUTHORIZING STAFF TO RE-ADVERTISE THE PROJECT AT A FUTURE DATE

WHEREAS, the sole bid for "Marshall Park Renovation" was opened at 11:00 a.m. on January 23, 2007, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the sole bid received for "Marshall Park Renovation" was 50% above the architect's estimate, and

WHEREAS, the sole bid for the project unreasonably exceeded the architect's estimate, and

WHEREAS, during the bid evaluation process staff determined that there was insufficient bid competition. Therefore, staff recommends the bid be rejected and staff be allowed to re-advertise the project,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the sole bid received for "Marshall Park Renovation", opened in the office of the City Clerk on January 23, 2007, is hereby rejected.

BE IT FURTHER RESOLVED that staff is hereby authorized to re-advertise the project at a future date.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

A RESOLUTION REJECTING THE TWO BIDS FOR THE PROJECT TITLED "SYLVAN AND MARSHALL PARK SPLASH PADS" AND AUTHORIZING STAFF TO RE-ADVERTISE THE PROJECT AT A FUTURE DATE

WHEREAS, the two bids received for "Sylvan and Marshall Splash Pads" were opened at 11:00 a.m. on January 23, 2007, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the two bids received for "Sylvan and Marshall Splash Pads" were 95% and 205% above the architect's estimate, and

WHEREAS, all bids for the project exceeded the architect's estimate by an excessive amount, and

WHEREAS, during the bid evaluation process staff determined that the two bids unreasonably exceeded the architect's estimate. Therefore, staff recommends the bids be rejected and staff be allowed to re-advertise the project,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the two bids received for "Sylvan and Marshall Splash Pads", opened in the office of the City Clerk on January 23, 2007, are hereby rejected.

BE IT FURTHER RESOLVED that staff is hereby authorized to re-advertise the project at a future date.

A RESOLUTION APPROVING THE MASTER AGREEMENT ADMINISTERING AGENCY-STATE AGREEMENT FOR TRANSPORTATION-RELATED FEDERAL AID PROJECTS, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE MASTER AGREEMENT, PROGRAM SUPPLEMENTAL AGREEMENTS, FUND EXCHANGE AGREEMENTS, AND/OR FUND TRANSFER AGREEMENTS

WHEREAS, the City of Modesto uses various federally funded programs for transportation related projects, and

WHEREAS, these federal funds are controlled by the State of California through its agency, Caltrans, and

WHEREAS, the terms and conditions for use of these funds are established by an agreement between the City and Caltrans, and

WHEREAS, the Master Agreement for all of the federally funded projects has been revised by Caltrans to incorporate the various changes in regulations and policies, and

WHEREAS, approving the Master Agreement is requisite for the City to continue use of these programs,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Master Agreement Administering Agency-State Agreement for transportation-related Federal Aid Projects.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Master Agreement, Program Supplemental Agreements, Fund Exchange Agreements and/or Fund Transfer Agreements.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-151

A RESOLUTION APPROVING THE TUOLUMNE RIVER BANK EROSION PROJECT AND ADOPTING A MITIGATED NEGATIVE DECLARATION (MND) AND A MITIGATION MONITORING PROGRAM (MMP) FOR THE PROJECT (SCH# 2006102058).

WHEREAS, due to heavy rains over the past year, erosion on a portion of the Tuolumne River embankment near Neece Drive has occurred, and

WHEREAS, the erosion left a gravity sewer pipe undermined and unsupported in two locations of approximately two (2) linear feet each, and

WHEREAS, at one of these locations, a manhole's concrete footing is partially exposed and unsupported, and

WHEREAS, the same conditions exist for approximately 200 feet upstream and 100 feet downstream along the river's edge, and

WHEREAS, as an emergency measure, the City has backfilled underneath the pipeline in the unsupported location to temporarily stabilize the manhole and protect the pipe from further undermining, and

WHEREAS, the recommended corrective work at the site includes (1) adding soil backfill above the pipe and down the slope (above the water surface, and most likely below the water line) to provide adequate cover for the pipe, (2) addition of a foundation of rock slope protection, and (3) approximately 300 linear feet of rock slope protection to be added upstream and downstream of the affected pipeline segment to further stabilize the bank, and

WHEREAS, on March 28, 2006 Council, by Resolution No. 2006-172, authorized a contract with Kleinfelder in the amount of $61,800, with $20,000 in contingency funds, for permitting assistance and environmental review support for this project, and

WHEREAS, at this same meeting, Council, by Resolution No. 2006-173, authorized the solicitation of a request for proposals (RFP) for performance of the project, and

WHEREAS, several state and federal permits are required because the improvements and restorations could directly affect the river, and

WHEREAS, as the City is lead agency for this project, Council approval and its associated MND is required prior to permit approval by the various agencies,

WHEREAS, Section 15070 of the CEQA Guidelines relating to Initial Study/Mitigated Negative Declarations (EA/PW No. 2006-11) provides for a lead agency to prepare an Initial Study on any proposed Project to analyze whether the Project may cause a significant effect on the environment, and

WHEREAS, the City of Modesto Department of Public Works has prepared an Initial Study/Mitigated Negative Declaration (SCH #2006102058) as provided for by CEQA, and

WHEREAS, a 30-day public review period for the proposed Initial Study/Mitigated Negative Declaration began on October 17, 2006 and ended on November 17, 2006, and

WHEREAS, the City received no public comments on the draft Initial Study/Mitigated Negative Declaration and no changes to the document were necessary as a result, and

WHEREAS, a Mitigation Monitoring Program (MMP) is included and incorporated within the Initial Study/Mitigated Negative Declaration,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council has reviewed and considered the Initial Study/Mitigated Negative Declaration and Mitigation Monitoring Plan prepared for the Tuolumne River Bank Erosion Project, and based on the substantial evidence provided in said Initial Study/Mitigated Negative Declaration makes the following findings:

1. The recitals set forth above are true and correct.

2. The Initial Study/Mitigated Negative Declaration prepared for the proposed project has identified that the proposed mitigation measures/Best Management Practices would reduce all potentially adverse impacts to less-than-significant levels.

3. Before the Initial Study/Mitigated Negative Declaration was released for public review, feasible mitigation measures were made by or agreed to by the City, which will avoid or mitigate the effects to a point where clearly no significant effect will occur.

4. There is no substantial evidence, in light of the whole record before the public agency, that the project, as revised, may have a significant effect on the environment (Public Resources Code Section 21064.5(2)).

5. The Initial Study/Mitigated Negative Declaration reflects the independent judgment of the lead agency.

6. As required by Public Resources Code Section 21081.6 et seq., the Mitigation Monitoring and Reporting Program is hereby adopted, a copy of which is included in the Mitigated Negative Declaration, which is on file with the City Clerk.

7. The Initial Study/Mitigated Negative Declaration, Environmental Assessment (EA/PW 2007-04) provides the substantial evidence to support findings 1 through 6, above.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Tuolumne River Bank Erosion Project, and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby adopts the Initial Study/Mitigated Negative Declaration (EA/PW 2007-04), copy of which is on file with the City Clerk and incorporated herein by reference.

BE IT FURTHER RESOLVED that the City of Modesto Public Works Department, Wastewater Collections Division, is the custodian of the documents and other materials, which constitute the record of proceedings upon which its decision is based. The records are located at the office of the City of Modesto Public Works Deputy Director, 1212 Sutter Avenue, Modesto, CA 95351.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that the Public Works Director is hereby authorized and directed to file a Notice of Determination within five (5) business days with the Stanislaus County Clerk and the Governor's Office of Planning Research, State Clearinghouse and Planning Unit, pursuant to Section 21152 of the Public Resources Code.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-152

A RESOLUTION ACCEPTING A DEED OF AVIGATION AND HAZARD EASEMENT FROM BEARD LAND IMPROVEMENT COMPANY THAT ALLOWS AIRCRAFT FLIGHT OVER REAL PROPERTY ON HOOVER AVENUE LOCATED OFF MITCHELL ROAD NORTH OF THE MODESTO CITY-COUNTY AIRPORT, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE ACCEPTANCE ON BEHALF OF THE CITY.

WHEREAS, Beard Land Improvement Company has requested a Deed of Avigation and Easement for real property located on Hoover Avenue, located off Mitchell Road north of the Modesto City-County Airport in the City of Modesto, and

WHEREAS, Modesto City-County Airport is an active airport with commercial and general aviation aircraft arrivals and departures that will be flying over and near the parcel of land that is being sold, and

WHEREAS, Beard Land Improvement Company provided the City of Modesto with a Deed of Avigation and Hazard Easement (Deed), at no cost, that will assign perpetual, assignable easement in and over the real property named in that document, and

WHEREAS, the Deed gives the Airport certain rights that ensure safe flight over the property, and authorizes access to the property for specific purposes stated in the Deed, and

WHEREAS, the Deed dedicates easement and right-of-way that will allow continued flight operations at Modesto City-County Airport,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby accepts the Deed of Avigation and Hazard Easement from Beard Land Improvement Company.

BE IT FURTHER RESOLVED that the Council hereby authorizes the City Manager, or his designee, to sign the Deed of Avigation and Hazard Easement on behalf of the City of Modesto.

The foregoing resolution was introduced at a special meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carrier and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-153

A RESOLUTION ADOPTING CRITERIA FOR THE PRIORITIZATION OF STAFF WORK ON SPECIFIC PLANS

WHEREAS, from time to time, the volume of Specific Plans and related projects received for processing exceeds the available staff resources required to provide all projects with "top priority" service, and

WHEREAS, on July 10, 2006, August 7, 2006 and September 11, 2006, the Economic Development Committee of the City Council of the City of Modesto received a staff presentation regarding potential criteria for prioritization of work, and directed staff to schedule a discussion before the full Council of the matter, and

WHEREAS, selecting a set of criteria will provide the private sector as well as staff with guidance regarding the relative priority of various specific plan development proposals, and

WHEREAS, the establishment of such criteria is general policy-making and is not a "project" under Section 15378 (b) (2) of the California Environmental Quality Act (CEQA) Guidelines, and

WHEREAS, said matter was considered by the City Council on February 27, 2007, at 5:30 p.m., in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby adopts criteria for the prioritization of Specific Plans, attached hereto as **Exhibit "A"**, and incorporated herein by reference.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember O'Bryant, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-154

A RESOLUTION ADOPTING CITY OF MODESTO DEVELOPMENT APPLICATION SUBMITTAL REQUIREMENTS

WHEREAS, the City of Modesto has established a Process Improvement program for development processes, which program has identified the need for increased clarity and specificity in submittal requirements for development applications, and

WHEREAS, after a public hearing held on January 22, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, it was found and determined by the Planning Commission, by its Resolution No. 2007-04 that adoption of submittal requirements for development applications will benefit public health, safety and welfare for the following reasons:

a. Establishment of submittal requirements ensures that adequate information is available on which to make decisions regarding land development projects.

b. California state law requires that local jurisdictions have a standard by which an application is determined to be complete for processing.

and,

WHEREAS, said matter was set for a public hearing of the City Council to be held on February 27, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time said duly noticed public hearing was held, and

WHEREAS, after said public hearing the Council found and determined that adoption of submittal requirements for development applications is consonant with public necessity, convenience and general welfare for the reasons set forth in Planning Commission Resolution No. 2007-04 and quoted above, and

WHEREAS, the Council has introduced Ordinance No. 3435-C.S. on the 27th day of February, 2007, amending Sections 4-4.401 and 4-4.502 and repealing Sections 4-4.402 and 4-4.403 of the Municipal Code relating to submittal requirements for tentative subdivision and parcel maps.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that Development Application Submittal Requirements as shown in **Exhibit "A"** attached hereto and incorporated herein by reference are hereby adopted.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of February, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Olsen, was upon roll call carried and the resolution adopted by the following vote:

GENERAL REQUIREMENTS:

- ☐ 1. The Uniform Development Application must be typed or printed and filled in completely.
  - ☐ a. If the applicant is not the property owner, the property owner shall designate the applicant as the authorized agent to act on his or her behalf and both shall sign this application.
- ☐ 2. Abandonment petition signed by all affected property owners (i.e. property owners with an interest in property underlying right-of-way to be abandoned, all immediately adjacent owners, and any parties whose access will be affected).
- ☐ 3. Financial Interest Disclosure Form.
- ☐ 4. Environmental Information Form if required as determined by the Planning Division per the California Environmental Quality Act.
- ☐ 5. Title report showing underlying fee ownership of right-of-way to be abandoned.
- ☐ 6. Drawings:
  - ☐ a. Thirty (30) sets of abandonment map at a scale sufficient to adequately show the details of the area to be abandoned.
  - ☐ b. If larger than 8½" X 11", plans shall be folded to a size of approximately 8½" X 11". *Plans will not be accepted for filing unless folded.*
  - ☐ c. If larger than 8½" X 11", six (6) copies reduced to 8½" X 11".
  - ☐ d. Scale of 1":100' for large areas or 1":50' for small areas.
  - ☐ e. One (1) set provided in electronic format on CD or DVD, AutoCAD or .jpg format
- ☐ 7. Photographs of the project site and surrounding properties where needed to illustrate development.
- ☐ 8. All applicable filing fees (see adopted fee schedule).

MAP REQUIREMENTS:

- ☐ 1. Scale, north point, and date.
- ☐ 2. Vicinity map.
- ☐ 3. Name and business address of person or firm who prepared the map.
- ☐ 4. Clearly depict the boundaries of the area to be abandoned.
- ☐ 5. Location of existing and structures and improvements in relation to area to be abandoned.
- ☐ 6. Names, existing widths and centerlines of all adjoining and contiguous streets, width of adjacent streets from centerline to edge of property line, and distance of property to nearby street intersections (if property is located mid-block).
- ☐ 7. Location and character of all existing and proposed street improvements, including curb and gutter, and sidewalk.
- ☐ 8. Identify traffic improvements needed as a result of the proposed project, if any.
- ☐ 9. Location and character of all existing public utilities within and adjacent to area to be abandoned.

Submittal Requirements for Revised Plans (after City has accepted the application and deemed it complete)

Submittals of revised plans shall include the following:

☐ 1. All changes shall be designated by deltas or clouds on the revised plans.

☐ 2. Notes describing all changes made to the plan, keyed to the deltas or clouds.

☐ 3. The date that the revisions were made.

Failure to include the above requirements on revised plan will be grounds for rejecting revised plans.

FOR YOUR INFORMATION: Staff may deem additional submittal information necessary to adequately analyze the project, complete environmental review for the project, or make recommendations to the Board of Zoning Adjustment, Planning Commission or City Council. Completion of the application does not presume approval nor staff support of the application. Such approval is discretionary with the Director, Board of Zoning Adjustment, Planning Commission, and/or City Council. The Board of Zoning Adjustment, Planning Commission, or City Council may deny, modify, or conditionally approve the application.

All entitlement decisions of the Planning Commission or Board of Zoning Adjustment are final unless appealed within fifteen (15) days of the date on which the decision is made. The appeal shall be in writing and filed with the City Clerk. The appeal must set for the specific reasons for the appeal. All applicable fees must accompany appeals. Building permits, certificates of occupancy, or licenses will not be issued until the appeal period has elapsed. If the entitlement decision is appealed, building permits, certificates of occupancy, or licenses will not be issued until the final decision has been made on the appeal or the appeal is withdrawn.

Lot Line Adjustment
Submittal Requirements

GENERAL REQUIREMENTS:

☐ 1. The Uniform Development Application must be typed or printed and filled in completely.

  ☐ a. If the applicant is not the property owner, the property owner shall designate the applicant as the authorized agent to act on his or her behalf and both shall sign this application.

☐ 2. Evidence of property ownership, e.g. deed, title insurance policy.

☐ 3. Notarized Lot-Line Adjustment Agreement and Legal Descriptions.

☐ 4. Legal Descriptions of the existing parcels and of the parcels as they will exist after the Adjustment is completed.

☐ 5. Eight (8) copies of drawing of the proposed lot-line adjustment on 8-1/2" x 11".

Show structures—existing proposed to be removed, parking spaces and driveways, utility easements and utility lines, access ways and parking agreements and their relationship, including dimensions, to property lines before and after. Identify the properties. All drawings to be to scale and accurate. Include north arrow. Include or attach vicinity map depicting location of subject properties.

  ☐ a. One (1) set provided in electronic format on CD or DVD, to include AutoCAD and .jpg formats.

☐ 6. Applicable filing fees (see adopted fee schedule) and Recording Fee.

Submittal Requirements for Revised Plans (after City has accepted the application and deemed it complete)

Submittals of revised plans shall include the following:

☐ 1. All changes shall be designated by deltas or clouds on the revised plans.

☐ 2. Notes describing all changes made to the plan, keyed to the deltas or clouds.

☐ 3. The date that the revisions were made.

Failure to include the above requirements on revised plan will be grounds for rejecting revised plans.

FOR YOUR INFORMATION: Staff may deem additional submittal information necessary to adequately analyze the project. Completion of the application does not presume approval of the application.

All entitlement decisions are final unless appealed within fifteen (15) days of the date on which the decision is made. Appeals to staff decisions shall be in writing and filed with the Community and Economic Development Department. The appeal must set forth the specific reasons for the appeal. All applicable fees must accompany appeals. Building permits, certificates of occupancy, or licenses will not be issued until the appeal period has elapsed. If the entitlement decision is appealed, building permits, certificates of occupancy, or licenses will not be issued until the final decision has been made on the appeal or the appeal is withdrawn.

Second Story Dwelling Review Submittal Requirements

GENERAL REQUIREMENTS:

☐ 1. The Second-Story Dwelling Review Application must be typed or printed and filled in completely.
  ☐ a. If the applicant is not the property owner, the property owner shall designate the applicant as the authorized agent to act on his or her behalf and both shall sign this application.

☐ 2. Two (2) sets of site plans and elevations of the proposed project (see attached requirements).
  ☐ a. Size: sheets not less than 18" X 24", nor greater than 32" X 42" in size.
  ☐ b. All plans shall be folded to a size of approximately 8½" X 11". *Plans will not be accepted for filing unless folded.*
  ☐ c. Other plans may be required depending on the complexity of the project.

☐ 3. Applicable filing fees (see adopted fee schedule)

SITE PLAN REQUIREMENTS-SECOND STORY REVIEW

The site plan is a part of the application and becomes part of the official record. In the case of appeal, it will be reduced photographically and included in the agenda report. It is, therefore, necessary that the plan contain complete and clear graphic information relative to the application to assist the public, City staff, and Board of Zoning Adjustment (if appealed) in reviewing the proposal.

The site plan must be legible and its information organized so that it is readily understandable. Additional information may be necessary under the circumstances of a particular application. In general, however, the site plan should be prepared in accordance with the following requirements:

☐ 1. A legend including at least the following information:
  ☐ a. Assessors parcel number
  ☐ b. Address
  ☐ c. Building and paved area coverage area and percent
  ☐ d. Landscaping area and percent

☐ 2. Scale, north point, and date. (Plans shall be drawn to a scale sufficient to show required details).

☐ 3. Vicinity map.

☐ 4. Identification of all multi-story construction. Show all windows, balconies, and exterior stairways.

☐ 5. Location of existing and proposed structures and improvements in relation to street, alley, or property lines.

☐ 6. Property dimensions and lot size.

☐ 7. Building dimensions.

- ☐ 8. Setbacks.
- ☐ 9. For projects involving redesign of existing development, the site plan(s) must clearly show both the existing and proposed development.
- ☐ 10. Location and nature of proposed landscaping, particularly as it relates to privacy issues.
- ☐ 11. Location and detail of proposed walls, fences, or other screening structures, including height and materials.
- ☐ 12. Location of existing residences on surrounding properties.
- ☐ 13. Where needed, provide sight line diagrams/analysis.

ELEVATION AND FLOOR PLAN REQUIREMENTS

- ☐ 1. Building elevations shall conform to the following requirements:
  - ☐ a. Dimension height of all structures from the highest adjacent curb to the top of slab and to the roof peak on all elevations.
  - ☐ b. Dimension height of all floors from the highest adjacent curb.
  - ☐ c. Building elevations shall depict all sides of building and indicate colors and materials proposed. Provide detail including dimensions and type of windows/doors for all upper-story windows, exterior doors, and balconies.
  - ☐ d. Dimension section drawings to show grade differential and structures/building heights.
- ☐ 2. Provide floor plans for each story. Detail all upper-story windows and balconies.

Submittal Requirements for Revised Plans (after City has accepted the application and deemed it complete)

Submittals of revised plans shall include the following:

- ☐ 1. All changes shall be designated by deltas or clouds on the revised plans.
- ☐ 2. Notes describing all changes made to the plan, keyed to the deltas or clouds.
- ☐ 3. The date that the revisions were made.

Failure to include the above requirements on revised plan will be grounds for rejecting revised plans.

FOR YOUR INFORMATION: Staff may deem additional submittal information necessary to adequately analyze the project, complete environmental review for the project, or make recommendations to the Planning Commission, Board of Zoning Adjustment or City Council. Completion of the application does not presume approval nor staff support of the application. Such approval is discretionary. The Director may deny, modify, or conditionally approve the application.

All entitlement decisions are final unless appealed within fifteen (15) days of the date on which the decision is made. Appeals to staff decisions shall be in writing and filed with the Department of Community and Economic Development. The appeal must set forth the specific reasons for the appeal. All applicable fees must accompany appeals. Building permits, certificates of occupancy, or licenses will not be issued until the appeal period has elapsed. If the entitlement decision is appealed, building permits, certificates of occupancy, or licenses will not be issued until the final decision has been made on the appeal or the appeal is withdrawn.

Tentative Subdivision and Parcel Map Submittal Requirements

GENERAL REQUIREMENTS:

- ☐ 1. The Uniform Development Application must be typed or printed and filled in completely.
  - ☐ a) If the applicant is not the property owner, the property owner shall designate the applicant as the authorized agent to act on his or her behalf and both shall sign this application.
- ☐ 2. Financial Interest Disclosure Form.
- ☐ 3. Environmental Information Form if required, as determined by the Planning Division per the California Environmental Quality Act. (some Parcel Maps do not require this form, please inquire).
- ☐ 4. Evidence of property ownership, e.g. deed, title insurance policy.
- ☐ 5. Maps:
  - ☐ a. Thirty (30) sets of the subdivision or parcel map conforming to the attached requirements.
  - ☐ b. Maps shall be not less than 18" X 24", nor greater than 32" X 42" in size.
  - ☐ c. Scale of 1" = 100' for large areas, or a scale of 1" = 40' for small areas unless otherwise approved by the Planning Division.
  - ☐ d. All maps shall be folded to a size of approximately 8½" X 11".
  - ☐ e. Six (6) sets of maps reduced to 8½" X 11" and ten (10) sets reduced to 11" X 17".
  - ☐ f. One (1) set provided in electronic format on CD or DVD, AutoCAD or .jpg formats.
- ☐ 6. Photographs of the project site and surrounding properties where needed to illustrate development.
- ☐ 7. All applicable filing fees (see adopted fee schedule).

NOTE: If a proposed map requires adoption of a GPA, a SP or SPA or a change in zoning/other zoning related approval before it can be deemed consistent with the applicable plans or zoning, then the map application will not be deemed complete until all GP, SP and/or zoning requirements have been approved and are in effect. Major map revisions/resubmittals which require recirculation to City staff or other agencies will be processed as a new application and will result in a new "deemed complete" date.

UTILITIES REQUIREMENTS:

The following requirements apply to major projects*, defined as a project with 50 or more dwelling units or the equivalent (see p.2). If you are not sure if this applies to your project, please consult with the Public Works Department-Current Facilities Planning, 209-571-5801. Please see Public Works-Current Facilities Planning for assistance with the following Water, Wastewater, and Storm Drainage requirements

Water:

- ☐ 1. Water demand calculations for all major projects are required. Water demand calculations supporting all facility assumptions shall be land-use based and generated for total build out of the project.
- ☐ 2. For major projects, identify and demonstrate the adequacy of the anticipated water supply for the project.

Wastewater:

☐ 1. Wastewater capacity calculations for all major facilities are required. Design calculations supporting all facility assumptions shall be land-use based and generated for total build out of the project.

Storm Drainage/Treatment:

☐ 1. Identify and demonstrate the capacity of the downstream facilities expected to accommodate storm drainage flows from the proposed project area, where proposing to utilize downstream facilities for storm drainage (hydrology and hydraulic reports).

☐ 2. Storm drainage capacity calculations for all major projects are required (including temporary and permanent facilities). Design calculations supporting all facility assumptions shall be land-use based and generated for total build out of the project.

☐ 3. Soils Report – 1 copy.

TRAFFIC REQUIREMENTS:

☐ 1. A Traffic Study is required, per City Council policy, for projects producing 100 or more peak-hour trips.

☐ 2. Narrative: Identify financing sources for traffic improvements implementation.

☐ 3. Submittal plan shall include bicycle facilities as required by the Non-Motorized Transportation Plan, where applicable.

ADDITIONAL SUBMITTAL REQUIREMENTS:

Additional information, such as any of the following items, may be required based on further review of the development application. The contents of these items are described in other handouts, State regulations, or the City's Ordinances:

☐ Noise Study

☐ Biological Assessment

☐ Parking Study

☐ Drainage Report

☐ Arborist Report (trees)

☐ Sight line diagrams/analysis (multi-story construction adjacent to residences)

* Major projects for utility purposes are defined as follows:

1. 50 or more dwelling units.
2. A proposed shopping center or business establishment employing more than 50 persons or having more than 20,000 square feet.
3. A proposed commercial office building employing more than 50 persons or having more than 10,000 square feet of floor space.
4. A proposed hotel or motel having more than 50 rooms.
5. A proposed industrial, manufacturing, or processing plant or industrial park planned to house more than 50 persons, occupying more than 3 acres of land or having more than 30,000 square feet of floor area.
6. A mixed-use project that includes one or more of the projects specified above.
7. A project that would demand an amount of water equivalent to or greater than the amount of water required or wastewater generated by a 50 dwelling unit project.

TENTATIVE SUBDIVISION MAP/PARCEL MAP REQUIREMENTS:

Maps shall be clearly and legibly reproduced and shall include the following information:

☐ 1. A key or location map on which shall be shown the general area including adjacent property, subdivisions and roads.

☐ 2. Legend including:

- ☐ a. **For Subdivision Maps** (only): The tract name.
- ☐ b. Date, north point, scale and sufficient description to define location and boundaries of the proposed map.
- ☐ c. Name, address, phone and fax number and of recorded owner or owners.
- ☐ d. Name, address, phone and fax number and of the subdivider.
- ☐ e. Name, business address, phone and fax number and of the engineer who prepared the map. (Maps must be stamped and signed with a valid stamp.)
- ☐ f. Acreage of proposed tract to the nearest tenth ($1/10^{th}$) of an acre.

Traffic requirements:

☐ 1. Sufficient elevations or contours to determine the general slope of the land and the high and low point thereof. Elevation data for proposed and existing street improvements sufficient to establish vertical alignment.

☐ 2. The locations, names, and widths of all existing and proposed roads, streets, highways, and right-of-ways in the proposed map, both public and private. All dedications shall be clearly identified and distinguished from existing rights of way. Public and private facilities shall be clearly distinguished.

☐ 3. The locations, names and existing width of all adjoining and contiguous highways, streets, and ways.

☐ 4. Names, existing widths and centerlines of all adjoining and contiguous streets, width of adjacent streets from centerline to edge of property line, and distance of property to nearby street intersections (if property is located mid-block).

☐ 5. Location and character of all existing and proposed street improvements.

☐ 6. Identify traffic improvements needed as a result of the proposed project.

Utility requirements:

☐ 1. Locations and size of all pipelines and structures used in connection therewith.

☐ 2. Alignment and location of all backbone water facilities (i.e. pipes eight inches and larger, wells, wellhead treatment facilities, tanks, booster pump stations, ASR wells, connections to adjacent facilities, etc.).

☐ 3. Alignment and location of all backbone wastewater facilities (i.e. pipes ten inches and larger, lift stations, connections to adjacent facilities, etc.).

☐ 4. Alignment and location of all backbone storm drain facilities (i.e. pipes ten inches and larger, lift stations, detention basins, outfall facilities, basin service roads, connection to adjacent facilities, flood hazard areas, etc.), as applicable.

☐ 5. Plans must address any on-site stormwater treatment and how it is proposed to be handled. On-site treatment is required for any map of 10 or more lots.

☐ 6. Location, size, and character of all existing and proposed private and public utilities above and below ground.

☐ 7. The widths, location and purposes of all existing and proposed easements.

General Requirements:

- ☐ 1. Lot layout, lot **and block** numbers, and dimensions of each lot.
- ☐ 2. Identify land uses on surrounding properties.
- ☐ 3. City limit boundary lines in the general vicinity of the map.
- ☐ 4. Bearings and distances to quarter-section bounds within the general vicinity of the map.
- ☐ 5. **For Subdivision Maps:** Boundaries of any units within the subdivision if the subdivision is to be recorded in phases.
- ☐ 6. The outline of any existing buildings to remain in place and their locations (with pertinent dimensions) in relation to existing or proposed street and lot lines. Structures and trees to be removed.
- ☐ 7. Location, size and type of all existing trees on the property and proposed public property.
- ☐ 8. Location of all areas adjacent to inundation or storm water overflow and the location, width and direction of flow of all watercourses. If any portion of the map is within the 500-year flood zone or any floodway, depict flood zone/floodway boundaries on map.
- ☐ 9. **Exception:** A statement must be submitted on or accompanying the map providing Justification and reasons for any exceptions to provisions of the City's subdivision regulations, zoning regulations, or Standard Specifications which are requested in conjunction with the proposed map. Exceptions may require additional processing procedures that may extend the processing time for the tentative map.

Environmental review is required for tentative subdivision maps. Unless there has been previous environmental review of the "project" or it is concurrently under environmental review in connection with a zoning application, an "Environmental Information Form" and the environmental processing fee must be submitted with the tentative map (see adopted fee schedule). Make a single check for total fees for tentative map processing and environmental review payable to the City of Modesto.

Normally, environmental review is not required for tentative parcel maps. However, it is required if any of the following conditions or circumstances exist:

- ☐ 1. The parcel map is to create more than 4 parcels.
- ☐ 2. The parcel map will not conform to the General Plan or zoning regulations.
- ☐ 3. Variances or exceptions are required for approval.
- ☐ 4. All services and access to the proposed parcels to City standards are not available.
- ☐ 5. The parcel was involved in a division of a larger parcel within previous two years.
- ☐ 6. The parcel has an average slope of greater than 20%.
- ☐ 7. The parcel is wholly or partially within a riparian corridor as defined in the General Plan Master EIR.

If environmental review is required, an "Environmental Information Form" and the environmental processing fee must be submitted with the tentative map (see adopted fee schedule). A single check for the total fee for tentative parcel map processing and environmental review may be made payable to the City of Modesto.

Planning Commission action on tentative subdivision and parcel maps is final unless appealed to the City Council within 15 days.

Submittal Requirements for Revised Maps (after City has accepted the application and deemed it complete):

Submittals of revised Maps shall include the following:

☐ 1. All changes shall be designated by deltas or clouds on the revised map.

☐ 2. Notes describing all changes made to the map, keyed to the deltas or clouds.

☐ 3. The date that the revisions were made.

Failure to include the above requirements on revised map will be grounds for rejecting revised map.

FOR YOUR INFORMATION: Staff may deem additional submittal information necessary to adequately analyze the project, complete environmental review for the project, or make recommendations to the Planning Commission, Board of Zoning Adjustment or City Council. Completion of the application does not presume approval nor staff support of the application. Such approval is discretionary with the Director, Board of Zoning Adjustment, Planning Commission, and/or City Council. The Board of Zoning Adjustment, Planning Commission, or City Council may deny, modify, or conditionally approve the application.

All entitlement decisions of the Planning Commission or Board of Zoning Adjustment are final unless appealed within fifteen (15) days of the date on which the decision is made. The appeal shall be in writing and filed with the City Clerk. The appeal must set for the specific reasons for the appeal. All applicable fees must accompany appeals. Building permits, certificates of occupancy, or licenses will not be issued until the appeal period has elapsed. If the entitlement decision is appealed, building permits, certificates of occupancy, or licenses will not be issued until the final decision has been made on the appeal or the appeal is withdrawn.

Please note that for applications involving both discretionary approvals (such as rezonings and specific plan amendments) and quasi-judicial approvals (such as tentative subdivision or parcel maps), the quasi-judicial application **cannot be deemed complete** or scheduled for a public hearing until the discretionary application has been approved by the City Council and becomes effective (for actions requiring adoption of an ordinance, such as a rezoning, the action becomes effective 30 days after the second reading of the ordinance).

Variance
Submittal Requirements

GENERAL REQUIREMENTS:

- ☐ 1. The Uniform Development Application must be typed or printed and filled in completely.
  - ☐ a. If the applicant is not the property owner, the property owner shall designate the applicant as the authorized agent to act on his or her behalf and both shall sign this application.
- ☐ 2. Completed **Variance Questionnaire.**
- ☐ 3. Financial Interest Disclosure Form.
- ☐ 4. Environmental Information Form if required as determined by the Planning Division per the California Environmental Quality Act. (not all Variances require this form, please inquire).
- ☐ 5. Evidence of property ownership, e.g. deed, title insurance policy.
- ☐ 6. Plans:
  - ☐ a. Thirty (30) sets of site plans (see Site Plan Requirements).
  - ☐ b. Two (2) sets of floor plans and building elevations. (See Elevation Requirements).
  - ☐ c. Size: sheets not less than 18" X 24", nor greater than 32" X 42" in size.
  - ☐ d. All plans shall be folded to a size of approximately 8½" X 11". *Plans will not be accepted for filing unless folded.*
  - ☐ e. Six (6) sets of plans reduced to 8½" X 11" and ten (10) sets reduced to 11" X 17".
  - ☐ f. One (1) set provided in electronic format on CD or DVD, AutoCAD or .jpg format.
- ☐ 7. Photographs of the project site and surrounding properties where needed to illustrate existing and proposed development.
- ☐ 8. All applicable filing fees (see adopted fee schedule).

SITE PLAN REQUIREMENTS-VARIANCE

The Modesto City Board of Zoning Adjustment requires that all applications for variances must be accompanied by site plans. The site plan is a part of the application and becomes part of the official record. It is usually reduced photographically and included in the agenda report. It is, therefore, necessary that the plan contain complete and clear graphic information relative to the application to assist the public, City staff, and Board of Zoning Adjustment in reviewing the proposal.

The site plan need not contain final construction details, but shall accurately show the location of existing and proposed on-site and off-site improvements and their relationship to streets and alley lines, property lines, and adjacent development where pertinent. The site plan must be legible and its information organized so that it is readily understandable. Additional information may be necessary under the circumstances of a particular application. In general, however, the site plan should be prepared in accordance with the following requirements:

I. Simpler applications (most single-family applications) will require the following information:

☐ 1. A legend including at least the following information:

- ☐ a. Assessors parcel number
- ☐ b. Address
- ☐ c. Building and paved area coverage area and percent
- ☐ d. Landscaping area and percent

☐ 2. Scale, north point, and date. (Plans shall be drawn to a scale sufficient to show required details).

☐ 3. Vicinity map.

☐ 4. Depict variance location and nature.

☐ 5. Identification of all multi-story construction (height and number of stories).

☐ 6. Location of existing and proposed structures and improvements in relation to street, alley, or property lines.

☐ 7. Property dimensions and lot size.

☐ 8. Building square feet and dimensions.

☐ 9. Setbacks.

☐ 10. For projects involving redesign of existing development, the site plan(s) must clearly show both the existing and proposed development.

☐ 11. Location and nature of proposed landscaping, and if landscaping is proposed to be used for storm drain treatment.

☐ 12. Location and detail nature of proposed walls, fences, or other screening structures.

☐ 13. For colored display plans, at least the following should be distinguished in color: buildings, landscaped areas, vehicular areas (parking and driveways).

☐ 14. Land uses and location of adjacent buildings on surrounding properties.

☐ 15. Location of all areas adjacent to inundation or storm water overflow and the location, width and direction of flow of all watercourses. If any portion of the site is within the 500-year flood zone or any floodway, depict flood zone/floodway boundaries on plan.

II. More complex applications may require the following information, please consult with a planner:

☐ 1. Area of parking lot, number of parking spaces.

☐ 2. Fire access turning radii.

☐ 3. Locations of all existing and proposed driveways on the project site and the location of all driveways on adjacent properties within 100' of the proposed project, and properties on the opposite side of all streets.

☐ 4. Layout of existing and proposed parking areas and driveways with pertinent dimensions including Driveway widths, location, and throat depth.

☐ 5. Size and location of trash enclosures, including provision for recyclables.

☐ 6. Names, existing widths and centerlines of all adjoining and contiguous streets, width of adjacent streets from centerline to edge of property line, and distance of property to nearby street intersections (if property is located mid-block).

☐ 7. Location and character of all existing and proposed street improvements, including curb and gutter, and sidewalk.

☐ 8. Identify traffic improvements needed as a result of the proposed project.

☐ 9. Existing and proposed street and alley lines, property lines, property dimensions and easements with pertinent dimensions. Indicate any grade differential between adjacent properties, alleys, or streets.

☐ 10. Existing traffic signals, traffic signs, and pavement markings adjacent to and 250' on either side of the proposed development.

☐ 11. Sufficient elevations or contours to determine the general slope of the land and the high and low point thereof where storm drain facilities are proposed. Elevation data for proposed and existing street improvements sufficient to establish vertical alignment.

☐ 12. Location and size of existing and proposed infrastructure, including sewer, water and storm drain lines in adjacent streets.

☐ 13. City limit boundary lines in the general vicinity of the project.

☐ 14. Sight line diagrams/analysis (multi-story construction adjacent to residences)

ELEVATION REQUIREMENTS-VARIANCE

☐ 1. Building elevations shall conform to the following requirements:

- ☐ a. Dimension height of all structures from the highest adjacent curb to the top of slab and to the roof peak on all elevations.
- ☐ b. Building elevations shall depict all sides of building and indicate colors and materials proposed.

Submittal Requirements for Revised Plans (after City has accepted the application and deemed it complete)

Submittals of revised plans shall include the following:

☐ 1. All changes shall be designated by deltas or clouds on the revised plans.

☐ 2. Notes describing all changes made to the plan, keyed to the deltas or clouds.

☐ 3. The date that the revisions were made.

Failure to include the above requirements on revised plan will be grounds for rejecting revised plans.

FOR YOUR INFORMATION: Staff may deem additional submittal information necessary to adequately analyze the project, complete environmental review for the project, or make recommendations to the Planning Commission, Board of Zoning Adjustment or City Council. Completion of the application does not presume approval nor staff support of the application. Such approval is discretionary with the Director, Board of Zoning Adjustment, Planning Commission, and/or City Council. The Board of Zoning Adjustment, Planning Commission, or City Council may deny, modify, or conditionally approve the application.

All entitlement decisions of the Planning Commission or Board of Zoning Adjustment are final unless appealed within fifteen (15) days of the date on which the decision is made. The appeal shall be in writing and filed with the City Clerk. The appeal must set forth the specific reasons for the appeal. All applicable fees must accompany appeals. Building permits, certificates of occupancy, or licenses will not be issued until the appeal period has elapsed. If the entitlement decision is appealed, building permits, certificates of occupancy, or licenses will not be issued until the final decision has been made on the appeal or the appeal is withdrawn.

Please note that for applications involving both discretionary approvals (such as rezonings and specific plan amendments) and quasi-judicial approvals (such as tentative subdivision or parcel maps), the quasi-judicial application cannot be scheduled for a public hearing until the discretionary application has been approved by the City Council and becomes effective (for actions requiring adoption of an ordinance, such as a rezoning, the action becomes effective 30 days after the second reading of the ordinance).

Zoning Application Submittal Requirements

(for Use Permit, Plot Plan, P-D Zone and similar applications)

GENERAL REQUIREMENTS:

- ☐ 1. The Uniform Development Application must be typed or printed and filled in completely.
  - ☐ a. If the applicant is not the property owner, the property owner shall designate the applicant as the authorized agent to act on his or her behalf and both shall sign this application.
- ☐ 2. Financial Interest Disclosure Form.
- ☐ 3. Environmental Information Form if required, as determined by the Planning Division per the California Environmental Quality Act.
- ☐ 4. Evidence of property ownership, e.g. deed, title insurance policy.
- ☐ 5. Plans:
  - ☐ a. Thirty (30) sets of site plans (see Site Plan Requirements).
  - ☐ b. Two (2) sets of floor plans and building elevations (see Elevation Requirements).
  - ☐ c. Size: sheets not less than 18" X 24", nor greater than 32" X 42" in size.
  - ☐ d. All plans shall be folded to a size of approximately 8½" X 11".
  - ☐ e. Six (6) sets of plans reduced to 8½" X 11" and ten (10) sets reduced to 11" X 17".
  - ☐ f. One (1) set of plans colored to illustrate the design and development concept of the proposed project shall also be submitted.
  - ☐ g. One (1) set provided in electronic format on CD or DVD, AutoCAD or .jpg formats.
  - ☐ h. Other plans may be required depending on the complexity of the project.
- ☐ 6. Photographs of the project site and surrounding properties where needed to illustrate existing and proposed development.
- ☐ 7. All applicable filing fees (see adopted fee schedule).

UTILITIES REQUIREMENTS:

The following requirements apply to major projects*, defined as a project with 50 or more dwelling units or the equivalent (see p. 2). If you are not sure if this applies to your project, please consult with the Public Works Department-Current Facilities Planning, 209-571-5801. Please see Public Works-Current Facilities Planning for assistance with the following Water, Wastewater, and Storm Drainage requirements.

Water:

- ☐ 1. Water demand calculations for all major projects are required. Water demand calculations supporting all facility assumptions shall be land-use based and generated for total build out of the project.
- ☐ 2. For major projects, identify and demonstrate the adequacy of the anticipated water supply for the project.

Wastewater:

- ☐ 1. Wastewater capacity calculations for all major projects are required. Design calculations supporting all facility assumptions shall be land-use based and generated for total build out of the project.

Storm Drainage/Treatment:

☐ 1. Identify and demonstrate the capacity of the downstream facilities expected to accommodate storm drainage flows from the proposed project area, where proposing to utilize downstream facilities for storm drainage (hydrology and hydraulic reports).

☐ 2. Storm drainage capacity calculations for all major projects are required (including temporary and permanent facilities). Design calculations supporting all facility assumptions shall be land-use based and generated for total build out of the project.

☐ 3. Soils Report – 1 copy.

TRAFFIC REQUIREMENTS:

☐ 1. A Traffic Study is required, per City Council policy for projects producing 100 or more peak-hour trips.

☐ 2. Narrative: Identify financing sources for traffic improvements implementation.

☐ 3. Submittal plan shall include bicycle facilities as required by the Non-Motorized Transportation Plan where applicable.

ADDITIONAL SUBMITTAL REQUIREMENTS:

Additional information, such as any of the following items, may be required based on further review of the development application. The contents of these items are described in other handouts, State regulations, or the City's Ordinances:

☐ Noise Study
☐ Biological Assessment
☐ Parking Study
☐ Drainage Report
☐ Arborist Report (trees)
☐ Sight line diagrams/analysis (multi-story construction adjacent to residences)

* Major projects for utility purposes are defined as follows:
  1. 50 or more dwelling units
  2. A proposed shopping center or business establishment employing more than 50 persons or having more than 20,000 square feet
  3. A proposed commercial office building employing more than 50 persons or having more than 10,000 square feet of floor space
  4. A proposed hotel or motel having more than 50 rooms
  5. A proposed industrial, manufacturing, or processing plant or industrial park planned to house more than 50 persons, occupying more than 3 acres of land or having more than 30,000 square feet of floor area
  6. A mixed-use project that includes one or more of the projects specified above
  7. A project that would demand an amount of water equivalent to or greater than the amount of water required or wastewater generated by a 50 dwelling unit project.

FOR YOUR INFORMATION: Staff may deem additional submittal information necessary to adequately analyze the project, complete environmental review for the project, or make recommendations to the Planning Commission, Board of Zoning Adjustment or City Council. Completion of the application does not presume approval nor staff support of the application. Such approval is discretionary with the Director, Board of Zoning Adjustment, Planning Commission, and/or City Council. The Board of Zoning Adjustment, Planning Commission, or City Council may deny, modify, or conditionally approve the application.

All entitlement decisions of the Planning Commission or Board of Zoning Adjustment are final unless appealed within fifteen (15) days of the date on which the decision is made. The appeal shall be in writing and filed with the City Clerk. The appeal must set for the specific reasons for the appeal. All applicable fees must accompany appeals. Building permits, certificates of occupancy, or licenses will not be issued until the appeal period has elapsed. If the entitlement decision is appealed, building permits, certificates of occupancy, or licenses will not be issued until the final decision has been made on the appeal or the appeal is withdrawn.

Please note that for applications involving both discretionary approvals (such as rezonings and specific plan amendments) and quasi-judicial approvals (such as tentative subdivision or parcel maps), the quasi-judicial application cannot be deemed complete or scheduled for a public hearing until the discretionary application has been approved by the City Council and becomes effective (for actions requiring adoption of an ordinance, such as a rezoning, the action becomes effective 30 days after the second reading of the ordinance).

SITE PLAN REQUIREMENTS

The site plan need not contain final construction details, but should accurately show the location of existing and proposed on-site and off-site improvements and their relationship to streets and alley lines, property lines, and adjacent development where pertinent. The site plan should be legible and its information organized so that it is readily understandable. Additional information may be necessary under the circumstances of a particular application. In general, however, the site plan is to be prepared in accordance with the following requirements:

Plans shall be drawn to a scale sufficient to show the following details:

- ☐ 1. A legend including at least the following information:
  - ☐ a. Assessors parcel number
  - ☐ b. Address (if known)
  - ☐ c. Gross and net size of property
  - ☐ d. Number of units (residential), square footage of buildings, (non-residential)
  - ☐ e. Number of parking spaces (existing and proposed) and parking calculations showing comparison between parking required by Code and that provided
  - ☐ f. Building and paved area coverage area and percent
  - ☐ g. Landscaping area and percent
  - ☐ h. Seats in the facility (where applicable)
- ☐ 2. Scale, north point, and date.
- ☐ 3. Key or vicinity map.
- ☐ 4. If the proposed project is part of a larger complex (such as a shopping center), plans shall be submitted showing the layout of buildings, driveways and parking areas for the entire complex, showing how the proposal relates to the complex as a whole.
- ☐ 5. Sufficient description/labeling to establish the nature of proposed development.
- ☐ 6. Identification of all multi-story construction (height and number of stories).
- ☐ 7. Location of existing and proposed structures and improvements in relation to street, alley, or property lines.
- ☐ 8. Label all important dimensions, including lot dimensions, setbacks, driveway widths and throat depth, parking space dimensions, etc. Label property lines.
- ☐ 9. For projects involving redesign of existing development, the site plan(s) must clearly show both the existing and proposed development.
- ☐ 10. Location and nature of proposed landscaping, and if landscaping is proposed to be used for storm drain treatment. Distinguish landscaped areas by shading or color.
  - ☐ a. Identify plazas, sidewalks, and other hardscape elements
  - ☐ b. Identify and depict any common amenities such as common areas, public open spaces, or recreation areas
- ☐ 11. Size and location of trash enclosures, including provision for recycleables.
- ☐ 12. Location and detail of proposed walls, fences, or screening, including height and materials.
- ☐ 13. Land uses and locations of adjacent buildings on surrounding properties.
- ☐ 14. City limit lines in the general vicinity of the project.

☐ 15. For colored display plans, at least the following should be distinguished in color: buildings, landscaped areas, vehicular areas (parking and driveways).

☐ 16. Where new signs are proposed, all free-standing signs shall be shown on the site plan, all wall signs shown on the building elevations, sign sizes and heights identified, and provide photographs of existing signs on the subject property.

☐ 17. Location of all areas adjacent to inundation or storm water overflow and the location, width and direction of flow of all watercourses. If any portion of the site is within the 500-year flood zone or any floodway, depict flood zone/floodway boundaries on plan.

☐ 18. Depict all above ground utilities (utility boxes, backflow preventers, etc.) and the way in which they are to be screened.

Traffic requirements:

☐ 1. Locations of all existing and proposed driveways on the project site and the location of all driveways on adjacent properties and properties on the opposite side of all streets.

☐ 2. Layout of existing and proposed parking areas and driveways with pertinent dimensions.

☐ 3. Streets information:

- ☐ a. Names, existing widths and centerlines of all adjoining and contiguous streets,
- ☐ b. width of adjacent streets from centerline to edge of property line
- ☐ c. distance of property to nearby street intersections (if property is located mid-block).

☐ 4. Identify traffic improvements needed as a result of the proposed project.

☐ 5. Existing and proposed street and alley lines, property lines, property dimensions and easements with pertinent dimensions. Indicate any grade differential between adjacent properties, alleys, or streets.

☐ 6. Location and nature of existing and proposed street improvements, including curb and gutter, and sidewalk, and bicycle improvements in accordance with the Non-Motorized Transportation Plan.

☐ 7. Existing traffic signals, traffic signs, and pavement markings adjacent to and 250′ on either side of the proposed development.

Utility requirements:

☐ 1. Location and size of existing and proposed infrastructure, including sewer, water and storm drain lines in adjacent streets.

☐ 2. Alignment of all backbone water facilities (i.e. pipes eight inches and larger, wells, wellhead treatment facilities, tanks, booster pump stations, ASR wells, connections to adjacent facilities, etc.).

☐ 3. Alignment of all backbone wastewater facilities (i.e. pipes ten inches and larger, lift stations, connections to adjacent facilities, etc.).

☐ 4. Alignment of all backbone storm drain facilities (i.e. pipes ten inches and larger, lift stations, detention basins, outfall facilities, basin service roads, connection to adjacent facilities, flood hazard areas, etc.), as applicable.

☐ 5. Submittal plans should address the on-site stormwater treatment and how it is proposed to be handled.

☐ 6. Sufficient elevations or contours to determine the general slope of the land and the high and low point thereof where storm drain facilities are proposed. Elevation data for proposed and existing street improvements sufficient to establish vertical alignment.

Fire requirements:

☐ 1. Fire access turning radii

☐ 2. Depict emergency site access consistent with City of Modesto Standard Specifications

☐ 3. Provide dimensions sufficient to determine that all buildings have emergency access consistent with Standard Specifications

ELEVATION REQUIREMENTS

☐ 1. Building elevations shall conform to the following requirements:

- ☐ a. Dimension height of all structures from the highest adjacent curb to the top of slab and to the roof peak on all elevations.
- ☐ b. Building elevations shall depict all sides of building and indicate colors and materials proposed.
- ☐ c. Dimension section drawings to show grade differential and structures/building heights.
- ☐ d. Demonstrate the manner in which roof-mounted equipment is to be screened.

Submittal Requirements for Revised Plans (after City has accepted the application and deemed it complete)

Submittals of revised plans shall include the following:

☐ 1. All changes shall be designated by deltas or clouds on the revised plans.

☐ 2. Notes describing all changes made to the plan, keyed to the deltas or clouds.

☐ 3. The date that the revisions were made.

Failure to include the above requirements on revised plan will be grounds for rejecting revised plans.

Applicants are encouraged to consult the Zoning Regulations or with the Planning staff to determine the required yard areas, off-street parking, building separation or other requirements relative to a particular zone or use.

If an application is approved subject to revision of the original site plan, a new site plan containing such revisions may be required and must be reviewed and approved by the Community and Economic Development Director prior to issuance of a building permit. Precise landscaping, irrigation, or lighting plans may also be required as conditions of approval. Although it is not required that site plans be professionally prepared, it is usually more expedient for the applicant to utilize the services of an architect, engineer, or building designer in preparing the plans.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-155

A RESOLUTION APPROVING A THREE-YEAR FUNDING COMMITMENT, BEGINNING FY 2007-2008, TO 2-1-1 STANISLAUS HELPLINE.

WHEREAS, the City has received a request from United Way of Stanislaus for funding support of the 2-1-1 Stanislaus HelpLine, a toll-free telephone number to confidentially access health and human services, and

WHEREAS, the local United Way Board will not allow the launch of the 2-1-1 telephone line unless three-year funding needs are met, and

WHEREAS, the Finance Committee reviewed this request at their regularly scheduled meeting of February 15, 2007, and recommended its approval,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the three-year funding commitment to 2-1-1 Stanislaus HelpLine, beginning in FY 2007-2008, in the annual amount of $24,694.

BE IT FURTHER RESOLVED that the Finance Department is hereby authorized to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES: Councilmembers: Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

NOES: Councilmembers: None

ABSENT: Councilmembers: None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-156

A RESOLUTION AUTHORIZING THE PURCHASE OF VIRGIN GRADE, GRANULAR ACTIVATED CARBON (GAC) FOR THE PUBLIC WORKS DEPARTMENT, WATER DIVISION, BY ACCESSING THE TERMS OF A COMPETITIVELY BID CONTRACT FROM THE CITY OF FRESNO, CONTRACT NO. 8836, TO CALGON CARBON CORPORATION, PITTSBURGH, PA, FOR A TERM OF ONE (1) YEAR, WITH TWO (2) ONE-YEAR EXTENSION OPTIONS AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED COST OF $327,500

WHEREAS, granular activated carbon units are pressure vessels filled with granular activated carbon (GAC), and

WHEREAS, the GAC is a filter used to remove and dissolve organics and chlorine from drinking water, and

WHEREAS, these vessels treat water down flow through a fixed bed of GAC, handling varying flows and on-off operating conditions, and

WHEREAS, the GAC has a life expectancy of approximately two (2) years while filtering contaminants out of the groundwater, and

WHEREAS, the City of Modesto currently has nineteen (19) water wells retrofitted with pressure vessels, and

WHEREAS, in an ongoing effort to improve the quality of the City's drinking water, the Public Works Department, Water Division, periodically replaces the GAC in these vessels, as required, and

WHEREAS, a unit change-out requires the spent GAC to be removed from each vessel and replaced with new GAC, and

WHEREAS, once the spent GAC is removed the service contractor transports the spent GAC to a reactivation facility where it is re-furbished and processed for re-use, as non-virgin grade GAC, and

WHEREAS, there are approximately eight (8) water well unit change-outs performed annually, for a total of 352,000 lbs of GAC, and

WHEREAS, by accessing the terms or "piggybacking", the City of Modesto has historically purchased GAC from a competitively bid City of Fresno contract, and

WHEREAS, City staff recommends the purchase of virgin grade, Granular Activated Carbon (GAC) for the Public Works Department, Water Division, by accessing the terms of a competitively bid contract from the City of Fresno, Contract No. 8836, to Calgon Carbon Corporation, Pittsburgh, PA, for a term of one (1) year, with two (2) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $327,500, and

WHEREAS, Modesto Municipal Code, Section 8-3.203, generally requires all purchases, which meet or exceed $50,000.00 for material, equipment or contractual services to be formally bid. However, there are exceptions to the rule set forth in the Modesto Municipal Code. One exception, Section 8-3.204 (d), is available where the Purchasing Manager, in his discretion, determines that a process other than the usual formal bid procedure set forth in Section 8-3.203 will result in procurement for the City at the lowest possible cost commensurate with the desired quality. Acting within his discretion, the Purchasing Manager invoked that exception for this purchase. The purchase of GAC, by accessing the terms of a competitively bid contract from the City of Fresno, Contract No. 8836, to Calgon Carbon Corporation, Pittsburgh, PA, conforms to code,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the purchase of virgin grade, Granular Activated Carbon (GAC) for the Public Works Department, Water Division, by accessing the terms of a

competitively bid contract from the City of Fresno, Contract No. 8836, to Calgon Carbon Corporation, Pittsburgh, PA, for a term of one (1) year, with two (2) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $327,500.

BE IT FURTHER RESOLVED that the Purchasing Manager will issue a purchase agreement for the purchase of virgin grade, Granular Activated Carbon (GAC) for the Public Works Department, Water Division, by accessing the terms of a competitively bid contract from the City of Fresno, Contract No. 8836, to Calgon Carbon Corporation, Pittsburgh, PA, for a term of one (1) year, with two (2) one-year extension options at the sole discretion of the City, for a total estimated annual cost of $327,500.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

A RESOLUTION AMENDING THE FISCAL YEAR 2006/07 OPERATING BUDGET, ESTIMATING REVENUE OF $25,000 FROM ASSET FORFEITURES TO POLICE OPERATIONS FOR SPECIAL OPERATIONS TO COMBAT DRUG AND DRUG-RELATED CRIMES IN THE COMMUNITY.

WHEREAS, drug use, sales, and activity has continued to plague the city of Modesto, and

WHEREAS, experience reveals drug activity is also connected to property crimes, high technology crimes, and many other forms of criminal activity, and

WHEREAS, current budgeted operating funds do not provide for sustained special operations in order to reduce these types of criminal activity, and

WHEREAS, the Modesto Police Department would like to use this funding for special operations to combat drug and drug-related crimes in the community,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the 2006/07 Operating Budget is hereby amended as indicated below:

Appropriate:			
To:	0100-190-1941-0429	$25,000	Investigations Fund
Revenue:			
To:	0100-190-1941-7202	$25,000	Asset Forfeitures
Balance Sheet Account:			
From:	8600-BS-3409	$25,000	Seized Forfeitures

BE IT FURTHER RESOLVED that the Finance Director, or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

A RESOLUTION AUTHORIZING THE POLICE DEPARTMENT TO SOLICIT INFORMAL REQUEST FOR PROPOSALS (RFP) FOR PSYCHOLOGICAL SERVICES FOR THE POLICE DEPARTMENT FOR A FIVE (5) YEAR AGREEMENT, WITH THREE (3) ONE-YEAR EXTENSION OPTIONS AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED ANNUAL 2007/08 COST OF $60,000.

WHEREAS, since January 1, 1980, the City of Modesto has provided counseling and psychological services to Modesto Police Department full-time sworn police officers, community services officers, and reserves, and

WHEREAS, the Modesto Police Officers Association Memorandum of Understanding requires these services are provided to full-time sworn police personnel, and

WHEREAS, the Modesto Police Department would like to continue to provide these services, and

WHEREAS, this independent contractor services agreement will provide counseling/therapy 24-hours a day, participation in Modesto Police SWAT activations and hostage negotiations, consultation on cases with the Investigative Services Division and Administration, and provides crisis debriefing, and

WHEREAS funds will be included in the Police Department 2007/08 Operating Budget and available in the following account for psychological services:

01000190-1921-0235	$60,000	Psychological Services

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the Police Department to solicit informal Request for Proposals (RFP) for Psychological Services for the Police Department for a five (5) year agreement, with three (3) one-year extension options at the sole discretion of the City, for a total estimated annual 2007/08 cost of $60,000.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-159

A RESOLUTION ACCEPTING THE WORK BY GEORGE REED, INC., FOR THE PROJECT TITLED "2500 SYLVAN AVENUE STREET IMPROVEMENTS PROJECT" AS COMPLETE, AUTHORIZING THE CITY CLERK TO FILE A NOTICE OF COMPLETION WITH THE STANISLAUS COUNTY RECORDER, AND AUTHORIZING PAYMENTS OF AMOUNTS TOTALING $417,310.32

WHEREAS, a report has been filed by the Public Works Director that the project titled "2500 Sylvan Avenue Street Improvements" has been completed by George Reed Inc., in accordance with the contract agreement dated October 4, 2005,

NOW, THEREFORE, BE IT RESOLVED by the Council that the project titled "2500 Sylvan Avenue Street Improvements" is hereby accepted as complete from said contractor, George Reed, Inc., that the City Clerk is authorized to file a Notice of Completion with the Stanislaus County Recorder, and that payment of amounts totaling $417,310.32, is authorized as provided in the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-160

Print

A RESOLUTION APPROVING A SECOND AMENDMENT TO AGREEMENT WITH WOOD RODGERS, INC., FOR CONSTRUCTION PERIOD AND ADDITIONAL DESIGN SERVICES IN THE AMOUNT OF $205,085, FOR ADDITIONAL WORK NOT INCLUDED IN THE ORIGINAL AGREEMENT AND FOR REIMBURSABLE EXPENSES FOR THE PROJECT TITLED "PELANDALE AVENUE 6-LANE WIDENING– DALE ROAD TO MCHENRY AVENUE", AND AUTHORIZING THE CITY MANAGER, OR DESIGNEE, TO EXECUTE THE SECOND AMENDMENT TO AGREEMENT. THIS SECOND AMENDMENT BRINGS THE TOTAL CONTRACT TOTAL TO $900,468

WHEREAS, the widening of Pelandale Avenue to full six-lane expressway status is scheduled to commence fiscal year 2006, and

WHEREAS, the roadway improvements will convert Pelandale Avenue to full Expressway status with three (3) new westbound lanes and two (2) new eastbound lanes from Dale Road to McHenry Avenue, and

WHEREAS, within the project limits of the Pelandale Avenue widening project, additional design and engineering analysis are necessary and associated with adjacent land development projects (specific plans) and/or project alternatives along Pelandale Avenue proposed by the City Planning Department, and

WHEREAS, the City plans to install a bus turnout west of Carver Road on the north side of Pelandale Avenue, within the City's 135 ft. Pelandale right-of-way, and

WHEREAS, the City plans to install an at-grade bicycle/pedestrian path along the north side of Pelandale near Prescott Avenue that will include a connection with the bike path at the MID canal and the future path along the south side of Pelandale Avenue, and

WHEREAS, the City plans to construct a detention basin to handle storm water runoff and to modify the proposed drainage system plans to accommodate roadway drainage in the ultimate 6-lane roadway configuration, and

WHEREAS, the City plans to evaluate various alternatives for "single" or "dual-use" drainage basins on City owned property west of the MID Canal No. 6 at the Virginia Corridor intersection with Pelandale Avenue, and

WHEREAS, the revised drainage system design will accommodate both interim and ultimate storm water interception and disposal and allow elimination of roadside ditches where necessary, and

WHEREAS, the various alternatives will include configuration of a detention basin to accommodate predicted storm water volumes, including appropriate landscaping, parking for up to 10 vehicles, and a connection to the proposed cul-de-sac on the eastern side of the canal at Pelandale/McHenry Subdivision, and

WHEREAS, the City plans to install the ultimate irrigation piping system as part of the construction plans for the Pelandale widening project, and

WHEREAS, modification of the design of the roadway cross-sections and grading plans for the roadsides and median will be necessary to accommodate the ultimate landscape irrigation piping design, and

WHEREAS, within the currently agreed construction limits, the City plans to provide street lighting with 200W fixtures on alternating sides of the street every 150 ft. on 28 ft. poles with 15 ft. mast arms, 4 ft. from the back of curb, and

WHEREAS, the original contract did not provide for Post Design Services - Preparation of Construction Contract Addenda; Pre-Construction Services - Assistance

During Advertising; or Construction Support Services - preparation of As-built Drawings and Change Order Drawing Revisions, and

WHEREAS, the City has evaluated the cost and time benefit of providing the aforementioned extra work, and

WHEREAS, the construction of the aforementioned extra work prior to final pavement installation on Pelandale Avenue will avoid future traffic disruption, eliminate the need to remove and restore sections of newly constructed asphalt pavement, and will offer the most effective cost and time alternative for the project, and

WHEREAS, a Second Amendment to the current Consultant design contract for the Pelandale Avenue 6-Lane Widening – Dale Road to McHenry Avenue Project is necessary in order to facilitate the aforementioned design and construction of the required extra work, and

WHEREAS, the roadway improvements will convert Pelandale Avenue to full Expressway status with three (3) new westbound lanes and two (2) new eastbound lanes from Dale Road to McHenry Avenue,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves a Second Amendment to Agreement between the City of Modesto and Wood Rodgers, Inc., for construction period and additional design services in the amount of $205,085, for additional work not included in the Original Agreement and for reimbursable expenses for the project titled "Pelandale Avenue 6-Lane Widening– Dale Road to McHenry Avenue."

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute said Second Amendment to Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

A RESOLUTION AUTHORIZING THE AWARD OF PROPOSAL AND CONTRACT FOR THE FURNISHING AND INSTALLATION OF AN AUTOMATIC VEHICLE LOCATION (AVL) SYSTEM FOR THE MODESTO AREA EXPRESS (MAX) TRANSIT SYSTEM TO AVAIL TECHNOLOGIES, INC., STATE COLLEGE, PA, IN THE APPROXIMATE AMOUNT OF $948,000.

WHEREAS, a major goal for public transit is to make travel safer and more efficient, while increasing passenger satisfaction, and

WHEREAS, Automatic Vehicle Location (AVL) systems cost-effectively assist transit systems in operating more safely and efficiently while also increasing overall passenger satisfaction, and

WHEREAS, an AVL system uses global positioning (GPS) technology to provide real time communication of exact bus location to the central bus dispatcher, and

WHEREAS, said real time information provides management with a tool to enable them to provide immediate response in the most effective manner to a wide variety of situations that affect both safety and performance , and

WHEREAS, on February 26, 2002, Council approved an agreement with URS Corporation to assist the Transit Division in preparing a Request for Proposal (RFP) for the furnishing and installation of an Automatic Vehicle Location system, and

WHEREAS, on July 5, 2005, Council approved Resolution No. 2005-348, authorizing the Purchasing Manager to formally solicit proposals for the furnishing and installation of an Automatic Vehicle Location (AVL) system, and

WHEREAS, the Purchasing Division solicited Request for Proposal No. 0506-01, for the furnishing and installation of an AVL system, to forty-eight (48) prospective proposers, posted the proposal on the City's web site, and formally advertised as required by law, and

WHEREAS, of the forty-eight (48) companies solicited, three (3) companies chose to respond with responsive and responsible proposals, and

WHEREAS, the proposals were evaluated by an evaluation committee and oral interviews were conducted, and

WHEREAS, based on being ranked highest in total evaluation criteria, the evaluation committee recommended award of proposal and contract to Avail Technologies Inc. of State College, PA,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby awards Proposal No. 0506-01 and contract for the furnishing and installation of an Automatic Vehicle Location system, to Avail Technologies, Inc., of State College, PA in the approximate amount of $948,000.

BE IT FURTHER RESOLVED that the City Manager or his designee, is hereby authorized to execute said contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

RESOLUTION NO. 2007-162

Print

A RESOLUTION ACCEPTING THE CFD-FUNDED STORM DRAIN SYSTEM IMPROVEMENTS AND ALL PUBLIC IMPROVEMENTS FOR UNIT 1 EXCLUDING WATER BOOSTER PUMPING STATION, WATER WELL, WATER TANK, YARD PIPING AND MISCELLANEOUS, WELL HEAD TREATMENT, PARK IMPROVEMENTS, AND STREET LANDSCAPE AND IRRIGATION RELATED TO THE GALAS BROTHERS SUBDIVISION UNIT 1 LOCATED IN THE FAIRVIEW VILLAGE SPECIFIC PLAN AREA AND AUTHORIZING THE CITY CLERK TO FILE A NOTICE OF COMPLETION AND AUTHORIZING TO RELEASE SECURITIES UPON EXPIRATION OF STATUTORY PERIODS

WHEREAS, Del Valle Homes, a California corporation ("DEVELOPER"), is the developer of the Galas Subdivision, also known as the Rancho Encantado Subdivision ("DEVELOPMENT"), and

WHEREAS, as a condition of DEVELOPMENT, DEVELOPER was to construct a CFD-funded Storm Drain System ("CFD-FUNDED IMPROVEMENTS") and all Public Improvements ("IMPROVEMENTS") located within the DEVELOPMENT, and

WHEREAS, the Construction Administration Office, in a memorandum to staff, indicates that said CFD-FUNDED IMPROVEMENTS, which is only one of several facilities included in the Acquisition and Shortfall Agreement ("AGREEMENT") between the City of Modesto Community Facilities District No. 2003-1 (Fairview Village), a District created pursuant to the provision of the California Government Code Section 53311.5 et. seq. ("DISTRICT") and the DEVELOPER, has been completed to the satisfaction of the Public Works Department, and

WHEREAS, the Construction Administration Office, in a memorandum to staff, indicates that said IMPROVEMENTS have been completed to the satisfaction of the Public Works Department, and

WHEREAS, DEVELOPER has filed several warranty bonds to guarantee the IMPROVEMENTS and CFD-FUNDED IMPROVEMENTS in the DEVELOPMENT, and

WHEREAS, the Construction Administration Office has indicated that it would be in order for the City Council to accept said CFD-FUNDED IMPROVEMENTS and IMPROVEMENTS in said development as complete, and authorize the City Clerk to record a Notice of Completion,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that:

1. The CFD-funded Storm Drain System, which includes basin landscaping, a concrete maintenance road into the basin, fencing around the basin, a storm drain pump station and a force main to existing storm drain system/outfall per the AGREEMENT, are hereby accepted and the City Clerk is hereby authorized to record a Notice of Completion for said improvements.
2. The improvements in the GALAS BROTHERS SUBDIVISION UNIT 1 are hereby accepted, excluding Water Booster Pumping Station, Water Well, Water Tank, Yard Piping and Miscellaneous, Well Head Treatment, Park Improvements, and Street Landscape and Irrigation and the City Clerk is hereby authorized to record a Notice of Completion for the improvements.
3. The City Clerk is hereby authorized to release the subdivision bond for faithful performance in the amount of $4,225,689 upon recordation of the Notice of Completion and receipt of a replacement security, in a form acceptable to the City Attorney, for those improvements which have not been accepted.

4. The City Clerk is hereby authorized to release the subdivision bond for labor and materials in the amount of $4,225,689 sixty (60) days after the recordation of the Notice of Completion and receipt of a replacement security, in a form acceptable to the City Attorney, for those improvements which have not been accepted, provided no claim is made thereon.

5. The City Clerk is hereby authorized to release the warranty bond to guarantee improvements in the amount of $422,568 one year and one day after the effective date of this resolution and receipt of a replacement security, in a form acceptable to the City Attorney, for those improvements which have not been accepted, provided no claim is made thereon.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant, Olsen, Mayor Ridenour

A RESOLUTION ESTABLISHING SUBSTANDARD AND DANGEROUS BUILDING CODE FEES.

WHEREAS, Section 9-8.05.01 of the Modesto Municipal Code authorizes the City Council, by resolution, to establish a fee which shall be imposed on the owner of any property for which a notice and order is issued to recover the cost of inspections and enforcement by the City of Modesto associated with a dangerous building, and

WHEREAS, Section 9-8.07.01 of the Modesto Municipal Code authorizes the City Council, by resolution, to establish an appeal fee to be paid at the time a written appeal notice is filed to recover the costs incurred in the appeal including, but not limited to, staff time to process and handle the appeal, preparation and service of notices and staff appearance at the appeal hearing associated with a dangerous building, and

WHEREAS, Section 9-8.05.01 of the Modesto Municipal Code authorizes the City Council, by resolution, to establish a fee at the conclusion of any matter in which a notice and order has been issued to recover the cost of closing the file, removing or placing liens on the property, at title report, and other costs associated with a dangerous building, and

WHEREAS, Section 9-9.1204 of the Modesto Municipal Code authorizes the City Council, by resolution, to establish a fee which shall be imposed on the owner of any property for which a notice and order is issued to recover the cost of inspections and enforcement by the City of Modesto, associated with a substandard building, and

WHEREAS, Section 9-9.1204 of the Modesto Municipal Code authorizes the City Council, by resolution, to establish a fee at the conclusion of any matter in which a notice

and order has been issued to recover the cost of closing the file, removing or placing liens on the property, a title report, and other costs associated with the matter, and

WHEREAS, Section 9-9.1305 of the Modesto Municipal Code authorizes the City Council, by resolution, to establish an appeal fee to be paid at the time a written appeal notice is filed to recover the costs incurred in the appeal including, but not limited to, staff time to process and handle the appeal, preparation and service of notices and staff appearance at the appeal hearing, associated with a substandard building, and

WHEREAS, the Fees Committee Task Force reviewed the proposed fees on December 18, 2006, at which time it was approved and recommended for submittal to the Finance Committee, and

WHEREAS, the Finance Committee reviewed the proposed fees on January 29, 2007, at which time it was approved and recommended for submittal to the City Council, and

WHEREAS, by an agenda report to the City Council from the Police chief and the Community and Economic Development Director, dated February 27, 2007, City staff recommended establishing substandard and dangerous building code fee, and

WHEREAS, said matter was set for public hearing of the City Council to be held at 5:30 p.m. on March 6, 2007, in the Tenth Street Place Chambers located at 1010 Tenth Street, Modesto, California, at which date and time said duly noticed public hearing was held,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. FEES. Fees for substandard and dangerous buildings are hereby established as follows:

(a) Substandard Building

Notice and Order Fee	$950.00
Appeal Fee	$1,000.00
Closing Fee	$125.00

(b) Dangerous Building

Notice and Order Fee	$950.00
Appeal Fee	$1,000.00
Closing Fee	$125.00

SECTION 2. EFFECTIVE DATE. The fees relating to substandard buildings will become effective upon the adoption of this resolution. The fees relating to dangerous buildings will not become effective unless and until Ordinance No. 3436-C.S. authorizing the establishment of said fees becomes effective.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 6th day of March, 2007, by Councilmember Olsen, who moved its adoption, which motion being duly seconded by Councilmember Hawn, was upon roll call carried and the resolution adopted by the following vote:

A RESOLUTION APPROVING AN AGREEMENT WITH COMCATE, INC. TO UTILIZE ITS CUSTOMER RELATIONSHIP MANAGEMENT SYSTEM CALLED EFEEDBACK MANAGER TO IMPROVE COMMUNITY ACCESS TO CITY GOVERNMENT IN THE AMOUNT OF $86,000 OVER A FIVE YEAR PERIOD AND AUTHORIZING THE CITY MANAGER TO EXECUTE AGREEMENT

WHEREAS, the City of Modesto desires to improve the community's access to city government, and

WHEREAS, it is recommended that the City of Modesto implement a web-based software application through which members of the community and City employees can communicate to the City Council and other designated managers within the City through the Internet, and

WHEREAS, the requested application enables the City to manage requests for information or service, recommendations for change, complaints or general concerns regarding the City of Modesto, and

WHEREAS, the goal of this software application is to allow more public access to city government, and

WHEREAS, a sole source agreement with Comcate, Inc., is requested as they provide the only stand-alone application that meets governmental requirements for Brown Act compliance,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the agreement between the City of Modesto and Comcate, Inc., in the amount of $86,000 over a five-year period is hereby approved.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember Keating, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-166

A RESOLUTION APPROVING A JOINT EXERCISE OF POWERS AGREEMENT BY AND BETWEEN THE INDUSTRIAL FIRE DISTRICT, THE CITY OF MODESTO, AND THE CITY OF CERES AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT.

WHEREAS, the City of Modesto and the City of Ceres entered into a fifteen year contract in 1993 with the Industrial Fire District (District) to provide fire and life safety services to the residents and properties of the District, and

WHEREAS, the revenue collected by the District has been divided equally between the City of Modesto and the City of Ceres, with 4 percent being retained by the District for administrative costs and insurance, and

WHEREAS, the response areas for Modesto and Ceres were determined by the general plan spheres of influence, and

WHEREAS, the current agreement expires in August 2008, and it is critical to establish a new, long-term agreement prior to this date, and

WHEREAS, the City of Modesto desires to enter into a Joint Exercise of Powers Agreement with the Industrial Fire District, the City of Modesto, and the City of Ceres, which will increase the City of Modesto's designated revenue, and

WHEREAS, by participating in the Joint Powers Agency, the City of Modesto will acquire Fire Station #10, which will increase the City's property assets, and

WHEREAS, the Safety and Communities Committee approved this request at the November 6, 2006, meeting for recommendation to the full Council,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Joint Exercise of Powers Agreement between the Industrial Fire District, the City of Modesto, and the City of Ceres.

BE IT FURTHER RESOLVED that the City Manager is hereby authorized to execute the Joint Exercise of Powers Agreement between the Industrial Fire District, the City of Modesto, and the City of Ceres and the Industrial Fire District.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-172

A RESOLUTION APPROVING CONTINUATION OF THE BLUE BAG RECYCLING PROGRAM, AND AUTHORIZING STAFF TO LAUNCH A PROMOTIONAL CAMPAIGN ENCOURAGING RESIDENTS TO PUT PAPER AND OTHER ORGANICS INTO THE GREEN CAN FOR COMPOSTING ONCE A NEW HORIZONTAL GRINDER HAS BEEN PURCHASED FOR THE COMPOST FACILITY.

WHEREAS, the passage of AB939 required all cities and counties to reduce the amount of garbage going to the landfills by 50% by the year 2000 through the implementation of waste reduction and recycling programs, and

WHEREAS, the City of Modesto has responded to this mandate by implementing a comprehensive waste reduction system including the collection of residential recyclables in bags, separate collection of green waste, food waste, and pruned refuse for composting, used motor oil recycling, CRT recycling, bulky item collection, waste tire recycling, and the operation of a waste-to-energy plant to further reduce disposal and generate electricity from materials which cannot be reduced, reused, recycled, or composted, and

WHEREAS, the City also actively promotes waste reuse, reduction, recycling, and composting through a wide array of educational programs and advertising campaigns, the annual Earth Day in the Park Festival and other community events, workshops on backyard composting, and by inviting citizen participation in the Citizen's Advisory Committee on Recycling (CACOR), and

WHEREAS, by virtue of these significant efforts, the City of Modesto exceeded the state 50% waste reduction mandate, having attained a diversion rate of 54% in 2004, and remains committed to attaining further waste reduction while keeping garbage rates as low as possible, and

WHEREAS, the California Integrated Waste Management Board reports that organics make up 30% of all waste still going to the landfills statewide and thus has targeted the increased diversion of organics as a priority for waste reduction programs, and

WHEREAS, CACOR has conducted an assessment of the blue bag program and evaluated both the cost and effectiveness of other potential methods of residential recycling, and

WHEREAS, after evaluating other options and considering the potential cost to the ratepayers, CACOR has recommended that the City continue the blue bag program, and

WHEREAS, at its January 8, 2007, meeting, CACOR recommended that once the City's Compost Facility has purchased its new horizontal grinder, which will be capable of processing mixed paper and other organics along with green waste, the City should conduct an aggressive public education campaign to encourage residents to put other organics such as food waste, newsprint, magazines, phone books, junk mail, computer paper, paper napkins and towels, and cardboard in the green waste container for composting,

NOW, THEREFORE BE IT RESOLVED, by the City Council of the City of Modesto that it hereby approves continuation of the blue bag program.

BE IT FUTHER RESOLVED that the Council hereby authorizes staff to launch an aggressive promotional campaign encouraging residents to put other organics into their green waste container for composting once the Compost Facility has purchased the new horizontal grinder.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

RESCINDED
THIS RESOLUTION WAS
RESCINDED BY MODESTO
CITY COUNCIL RESOLUTION
NO. 2007-506
JUL 14 2007

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-173

A RESOLUTION APPROVING QUARTERLY FUEL ADJUSTMENTS TO THE MAXIMUM RATE SCHEDULE FOR CITY RESIDENTIAL, COMMERCIAL, AND INDUSTRIAL SOLID WASTE COLLECTION SERVICES, AND RESCINDING RESOLUTION NO. 2006-579.

WHEREAS, with the adoption of Ordinance No. 3068-C.S. in November of 1997, the City no longer sets rates for the collection of garbage in Modesto, and instead performs a comprehensive review of cost information submitted by the contract garbage haulers, and

WHEREAS, the City sets a maximum rate that the haulers may charge for the various types of services provided under the contracts based on cost data provided by the lowest cost hauler, and

WHEREAS, Section f (2) of the City's Service Agreements with its solid waste collectors requires that when the City makes adjustments to the collection services provided under the Agreements, any additional costs should be covered by adjustments to the maximum rates, and

WHEREAS, in addition, maximum rates for solid waste collection services are reviewed annually as requested by the City's garbage collection companies, and

WHEREAS, the City conducted an analysis using the audited financial statements provided by the garbage haulers, supplemental data provided by the garbage haulers, and fuel price information and forecast prices developed by the United States Department of Energy, and

WHEREAS, new maximum rates were calculated, and a recommendation for a new maximum rate schedule was developed, which included a recommendation that quarterly adjustments to the fuel component of the maximum rates be made, and

WHEREAS, the Economic Development Committee met on June 12, 2006, and supported the recommendation to approve adjustments to the maximum rate schedule for City

solid waste collection services, including the recommendation for quarterly fuel adjustments to the maximum rates, and

WHEREAS, a report dated June 13, 2006, from the Parks, Recreation and Neighborhoods Department, a copy of which is on file in the office of the City Clerk, set forth said recommendations, and

WHEREAS, said report was considered at a public hearing of the City Council on June 27, 2006, and

WHEREAS, during the public hearing on June 27, 2006, it was found and determined by the Council of the City of Modesto that the existing schedules of rates and charges for garbage service in the City of Modesto should be revised as recommended, and that quarterly adjustments to the fuel component of the maximum rates should be made, and

WHEREAS, staff has adjusted the fuel component of the maximum rates and has incorporated the fuel component adjustment into the schedule of Maximum Charges for Garbage Service attached hereto, marked **Exhibit "1"** and incorporated herein by reference,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto as follows:

1. The Maximum Charges for Garbage Service as attached hereto, marked Exhibit "1" and incorporated herein by reference are hereby approved.

2. Said Maximum Charges for Garbage Service include twice-a-year bulky item pickup for residential customers and all other residential services as stipulated in the Service Agreements.

3. Said Maximum Charges for Garbage Service shall become effective on April 1, 2007, and shall remain in effect until revised by Council.

BE IT FURTHER RESOLVED that any person who has prepaid garbage service charges for residential garbage service shall receive garbage service for the balance of said prepaid period at the prepaid rates.

BE IT FURTHER RESOLVED that Resolution No. 2006-579 is hereby rescinded, effective April 1, 2007.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

(Once a Week Pickup Service)

Standard container service shall include the following:

- One, 96-gallon container for garbage/recyclables
- One, 96-gallon container for green waste
- Blue bag recycling
- Countertop container for kitchen scraps
- Drop-off of old TV and computer tubes
- Two bulky item collections per year by appointment

Standard container service customers may opt for smaller containers; however, maximum rates apply. Containers must be placed in a location set forth in Section 5-5.11 of the Municipal Code.

1. Standard container service –

a. The maximum rate for new sign ups for service or changes in service that occur after July 1, 1996, shall be **$19.64 per month** regardless of size of container. **A fuel component of $0.88 per month is included in the maximum rate for the quarter beginning April 1, 2007 and ending June 30, 2007**. The fuel component may be adjusted quarterly.

b. The maximum rate for each additional garbage container shall be **$14.62 per month**.

2. 60-gallon container service (grandfathered customers) –

a. The maximum rate for customers with 60-gallon containers who subscribed to service at an address prior to July 1, 1996 and who have not changed their service address shall be **$16.59 per month**. **A fuel component of $0.88 per month is included in the maximum rate for the quarter beginning April 1, 2007 and ending June 30, 2007.** The fuel component may be adjusted quarterly.

b. The maximum rate for each additional garbage container shall be **$14.62 per month.**

3. Fuel Component adjustments - The fuel component shall be analyzed quarterly and adjustments shall be made as necessary. The adjustment shall be based on the average price of fuel for a preceding quarter as follows: July 1/January-March; October 1/April-June; January 1/July-September; April 1/October-December. Average prices shall be determined based on published prices for California from the Department of Energy, Energy Information Agency.

DETACHABLE CONTAINERS*
Maximum Monthly Rates
Number of Collections Per Week

Container Size	NUMBER OF COLLECTIONS PER WEEK					
	1	2	3	4	5	6
1 CY	$ 33.37	$ 56.25	$ 79.10	$101.97	$ 124.84	$ 147.71
1 1/2 CY	$ 44.84	$ 79.10	$113.45	$147.46	$ 182.38	$ 216.33
2 CY	$ 56.25	$ 101.97	$147.71	$193.44	$ 239.16	$ 284.89
3 CY	$ 79.10	$ 147.71	$216.30	$284.89	$ 353.50	$ 422.09
4 CY	$101.97	$ 193.44	$284.89	$376.36	$ 467.82	$ 559.29
5 CY	$124.84	$ 239.16	$353.50	$467.82	$ 585.16	$ 696.48
6 CY	$147.71	$ 284.89	$422.09	$559.29	$ 696.48	$ 833.68

* A detachable container rental rate of $10.00 per month is included in the above schedule.

1. **Weekly rental/Detachable Containers** - Shall not exceed the rate for 1 pickup per week for each size container.

2. **Fuel Component** - A fuel component of $0.18 per cubic yard ($0.77 per month for a 1 cubic yard container collected once a week) is included in the maximum rate for the quarter beginning April 1, 2007, and ending June 30, 2007. The fuel component shall be analyzed quarterly and adjustments shall be made as necessary. The adjustment shall be based on the average price of fuel for a preceding quarter as follows: July 1/January-March; October/April-June; January 1/July-September; April 1/October-December. Average prices shall be determined based on published prices for California from the Department of Energy.

DROP BOX CONTAINERS

1. **Pick up charge** - $202.10 per pick up
2. **Rental**
   - $0.85 per day up to 7 day maximum rental
   - $3.00 per day for boxes kept 7 or more days without servicing
   - $10 per day for boxes kept 21 or more days without servicing

3. **Disposal charge** - Actual charge to be paid by customer. Garbage company will provide up to 40 CY Drop Box containers for above stated charges subject only to load limit of transfer vehicle.

COMPACTORS

Maximum Monthly Rates

Front Loader Type:

Compactor Size	NUMBER OF COLLECTIONS PER WEEK					
	1	2	3	4	5	6
3 CY	$152.12	$304.24	$456.36	$608.48	$760.60	$912.72
4 CY	$201.72	$403.44	$605.16	$806.88	$1008.60	$1210.32

Roll-Off Type:

1. 6 CY to 40 CY	$202.10 per pickup
2. Medical waste compactors	$265.00 per pickup
3. Washing compactor	$30.00
4. Disposal Charge:	Actual charge to be paid by customer

EXTRA PICKUPS

1. Standard containers or equivalent	$3.50 plus $1.38/container
2. Detachable containers	$12.00 plus $2.75/cubic yard

SPECIAL SERVICE CONDITIONS

In situations where none of the above maximum rates reasonably apply, the cost of service is to be negotiated between the garbage company and the customer.

DETACHABLE CONTAINER ONLY REPLACEMENT AND CLEANING SERVICE

1 CY	1½ CY	2 CY	3 CY	4 CY	5 CY	6 CY
$10.12	$11.00	$12.10	$15.40	$20.24	$25.08	$29.92

NOTATIONS

1. The above maximum rates include a $0.25 per month per household recycling fee, a $0.05 per cubic yard commercial recycling fee, and a $0.25 per ton industrial recycling fee, payable to the City by the garbage company.
2. Pursuant to Section 11-6.16(c)(2) of the Modesto Municipal Code, the garbage company may require a deposit equivalent to two (2) months service charge from customers prior to beginning service.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-174

A RESOLUTION APPROVING THE MEMORANDUM OF UNDERSTANDING (MOU) BETWEEN THE CITY OF MODESTO AND THE MODESTO POLICE NON SWORN ASSOCIATION (MPNSA) FOR A TERM OF MARCH 13, 2007 THROUGH JULY 23, 2007.

WHEREAS, in March 2006, a group of employees, formerly represented by the Modesto City Employees Association (MCEA), petitioned to form a separate bargaining unit comprised of public safety non-sworn employees, entitled Modesto Police Non Sworn Association (MPNSA), which was recognized in June 2006 as the exclusive representative for the newly created bargaining unit, triggering an obligation to meet and confer with the newly established unit, and

WHEREAS, the City of Modesto and MPNSA have been operating under the terms and conditions of the Memorandum of Understanding for MCEA, and

WHEREAS, representatives of the CITY and MPNSA have met and conferred in good faith concerning wages, hours, terms and conditions of employment for employees in said bargaining unit, and

WHEREAS, pursuant to an Agenda Report dated February 26, 2007, a copy of which report is on file in the office of the City Clerk, the CITY and MPNSA have reached agreement on a new MOU which, upon execution, shall replace the MCEA MOU and shall be **attached** hereto and made a part hereof, and

WHEREAS, the MOU provides as follows:

SECTION 1. SALARY INCREASE. An across-the-board salary increase of 2.5% was effective February 20, 2007 as provided in the MCEA MOU.

SECTION 2. HEALTH, DENTAL AND VISION BENEFITS. The City's contribution to employees' Health, Dental and Vision coverage shall remain as follows:

	7/25/06
Family	$812
Single	$445
Opt Out	$375

SECTION 3. AGENCY SHOP. By separate ballot, the bargaining unit voted to implement an agency shop agreement.

SECTION 4. ADDITIONAL CHANGES. Other negotiated additions, deletions or amendments to the text of the Memorandum of Understanding deal with retiree court overtime, Field Training pay, uniform allowance, witness pay, employee assistance plan, renegotiations, full understanding and waiver, and elimination of language specific to MCEA, and

WHEREAS, the Council considered this matter at its meeting of March 13, 2007,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the Memorandum of Understanding (MOU) between the City of Modesto and the Modesto Police Non Sworn Association (MPNSA), which covers a term from March 13, 2007 through July 23, 2007, and upon execution of same, a copy of the MOU will be on file in the office of the City Clerk.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-175

A RESOLUTION APPROVING THE CLASS RANGE TABLE FOR PUBLIC SAFETY NON-SWORN CLASSES AS SET FORTH IN EXHIBIT "A" ATTACHED HERETO EFFECTIVE MARCH 13, 2007, AND ADOPTED CONCURRENTLY WITH RESOLUTION NO. 2007-174APPROVING THE MEMORANDUM OF UNDERSTANDING BETWEEN THE CITY OF MODESTO AND THE MODESTO POLICE NON SWORN ASSOCIATION (MPNSA) ADOPTING SALARY AND BENEFIT CHANGES AND SETTING FORTH SALARY SCHEDULES FOR PUBLIC SAFETY NON-SWORN CLASSES.

WHEREAS, on March 13, 2007, the City Council adopted Resolution No. 2007-174 approving the Memorandum of Understanding (MOU) between the City of Modesto and the Modesto Police Non Sworn Association (MPNSA) and setting forth salary schedules for public safety non-sworn classes, and

WHEREAS, Council desires to establish a Class Range Table for said classes,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves the Class Range Table for Public Safety Non-Sworn Classes, entitled "City of Modesto Class Range Table Public Safety Non-Sworn Classes Effective March 13, 2007" which is attached hereto as **Exhibit "A"** and made a part hereof as though set forth in full herein.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-177

A RESOLUTION ACCEPTING THE FLOYD AVENUE IMPROVEMENT PROJECT BETWEEN FINE AVENUE AND CLAUS ROAD RELATED TO THE FALLING LEAF SUBDIVISION AND AUTHORIZING THE CITY CLERK TO FILE A NOTICE OF COMPLETION

WHEREAS, William Lyon Homes, Inc., a California corporation ("DEVELOPER"), is the developer of the Falling Leaf Subdivision ("DEVELOPMENT"), and

WHEREAS, as a condition of DEVELOPMENT, DEVELOPER was to construct Floyd Avenue between Fine Avenue and Claus Road ("IMPROVEMENTS") located adjacent to the DEVELOPMENT, and

WHEREAS, the City Engineer, in a memorandum to staff, indicates that said IMPROVEMENTS, included in the Acquisition and Shortfall Agreement ("AGREEMENT") between the City of Modesto Community Facilities District No. 2004-1 (Village One #2), a District created pursuant to the provision of the California Government Code Section 53311.5 et. seq. ("DISTRICT") and the DEVELOPER, has been completed to the satisfaction of the Public Works Department, and

WHEREAS, DEVELOPER filed with the City and/or DISTRICT adequate improvement securities to secure faithful performance of this Agreement and to secure payment for labor and materials, and

WHEREAS, DEVELOPER has filed a warranty bond to guarantee the IMPROVEMENTS in the DEVELOPMENT, and

WHEREAS, the City Engineer has indicated that it would be in order for the City Council to accept said IMPROVEMENTS in said development as complete, and authorize the City Clerk to record a Notice of Completion,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Floyd Avenue Improvement Project, between Fine Avenue and Claus Road, is hereby accepted and the City Clerk is hereby authorized to record a Notice of Completion for said improvements.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Dunbar, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-178

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MODESTO CERTIFYING THE FINAL MASTER ENVIRONMENTAL IMPACT REPORT FOR THE CITY OF MODESTO WASTEWATER MASTER PLAN UPDATE (SCH No. 2006052076) IN ACCORDANCE WITH THE CALIFORNIA ENVIRONMENTAL QUALITY ACT, AND MAKING CERTAIN FINDINGS CONCERNING ENVIRONMENTAL IMPACTS, MITIGATION MEASURES, AND ALTERNATIVES TO THE PROJECT, ADOPTING A MITIGATION MONITORING AND REPORTING PROGRAM, AND ADOPTING A STATEMENT OF OVERRIDING CONSIDERATIONS, IN CONNECTION WITH APPROVAL OF THE PROJECT CONTEMPLATED BY THE FINAL MASTER ENVIRONMENTAL IMPACT REPORT

WHEREAS, in 1997, the City of Modesto ("City") prepared a Wastewater Master Plan ("WWMP") to provide for major rehabilitation of the treatment plan, separation of cannery waste from conventional treatment, improvement to the existing collection system and extension of sewer facilities into areas of new urban development; and,

WHEREAS, in May 1997, the City certified a Master Environmental Impact Report ("MEIR") for the WWMP (SCH No. 96042009) in accordance with the California Environmental Quality Act, Public Resources Section 21000, et seq ("CEQA"); and,

WHEREAS, the City has prepared a WWMP Update to guide the improvement and expansion of its wastewater collection, treatment, and disposal facilities, and operation and maintenance of those facilities over the next 30 years ("Project"); and

WHEREAS, based on the nature of the proposed Project, the potential for new significant impacts as a result of the proposed Project and the potential for changed conditions since the certification of the 1997 MEIR for the WWMP, the City determined

that a Master Environmental Impact Report ("MEIR") was required for the proposed Project;

WHEREAS, on May 12, 2006, the City, as the lead agency, published a Notice of Preparation of a MEIR ("NOP") for the proposed Project; and

WHEREAS, the NOP provided notice of the City's determination, and solicited public input on the proposed scope and content of the MEIR for the proposed Project; and

WHEREAS, on December 21, 2006, the City published and distributed a Draft MEIR for the proposed Project, which was available for public review and comment for a period of 45 days as required by Section 21091 of CEQA; and

WHEREAS, during the 45-day public comment period the City received five letters commenting on the Draft MEIR; and

WHEREAS, the City prepared written responses to all written comments received on the Draft MEIR, said responses being contained in a Final Master Environmental Impact Report ("Final MEIR") for the proposed Project, which Final MEIR was prepared pursuant to Section 15089 of the CEQA Guidelines; and

WHEREAS, the Final MEIR was published and distributed on March 2, 2007, and consists of the Draft MEIR, a list of commentors, copies of all written comments received, responses to those comments that raise environmental issues, and any revisions to the text of the Draft MEIR made in response to the comments or as staff-initiated text changes, as required by Section 15132 of the CEQA Guidelines; and

WHEREAS, the City proposes to approve and adopt the Project as analyzed by the Final MEIR; and,

WHEREAS, certification of the Final MEIR and approval of the proposed Project were scheduled for hearing by the City Council to be held on March 13, 2007, in the Tenth Street Place Chambers located at 1010 10th Street, Modesto, California, at which date and time evidence both oral and documentary was received and considered by the Council, and

WHEREAS, the City Council has received and considered the Final MEIR for the proposed WWMP Update (SCH No. 2006052076) which analyzes the potential environmental effects of the proposed Project; and

WHEREAS, CEQA requires that, in connection with the certification of a Final MEIR, the decision-making agency make certain written findings.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby finds and determines as follows:

1. The foregoing recitals are true and correct.

2. The Final MEIR has been completed in compliance with CEQA; and

3. The Final MEIR has been presented to the City Council and the Council has reviewed and analyzed the Final MEIR and other information in the record and has considered the information contained therein, including the written and oral comments received at the public hearings on the Final MEIR; and

4. That all significant effects of the Project on the environment have been eliminated or substantially eliminated where feasible.

5. That the Findings set forth in Exhibit "A" and incorporated by this reference are hereby adopted as the City's findings under the California Environmental Quality Act ("CEQA"), Public Resources Code Sections 21000, et seq., and the CEQA guidelines, Cal. Code Regs., Title 13, sec. 15000, et seq., relating to the Project. The Findings provide the written analysis and conclusions of the Council regarding the Project's environmental impacts, mitigation measures and alternatives to the Project.

6. That pursuant to Public Resources Code Section 21091 and CEQA Guidelines Sections 15091, et seq., the City Council hereby adopts and makes the Statement of Overriding Considerations as set forth in Section V of **Exhibit A** attached hereto and incorporated by this reference, regarding the remaining significant and unavoidable impacts of the Project and the anticipated environmental, economic, legal, social, technological, and other benefits of the Project. The significant and unavoidable impacts identified in the Final MEIR cannot be avoided or substantially reduced by feasible changes or alterations to the Project, other than the changes or alterations already adopted.

7. The Mitigation Monitoring and Reporting Program for the Final MEIR ("MMRP") is contained in the Final MEIR and is attached to this resolution as **Exhibit "B"**, incorporated by this reference. The MMRP identifies impacts of the Project, corresponding mitigation, designation of responsibility for mitigation implementation and the agency responsible for the monitoring action. The Council hereby adopts the MMRP, with the exception of Mitigation Measure B.1.

8. The Final MEIR contains additions, clarifications, modifications and other information in its responses to comments on the Draft MEIR for the Project and also incorporates information obtained by the City since the Draft MEIR was issued. This Council hereby finds and determines that such changes and additional information are not significant new information as that term is defined under the provisions of the CEQA, because such changes and additional information do not indicate that any new significant environmental impacts not already evaluated would result from the proposed Project and do not reflect any substantial increase in the severity of any environmental impact; no feasible mitigation measures considerably different from those previously analyzed in the Draft MEIR have been proposed that would lessen significant environmental impacts of the Project; and no feasible alternatives considerably different from those analyzed in the Draft MEIR have been proposed that would lessen significant environmental impacts of the proposed Project. Accordingly, this Council hereby finds and determines that recirculation of the Final MEIR for further public review and comment is not warranted; and

9. The City Council does hereby designate Rich Ulm, Deputy Director of Public Works, for the City of Modesto, at his office at 1010 Tenth Street, Suite 4100, Modesto, California 95354 as the custodian of documents and record of proceedings on which this decision is based; and

10. The City Council does hereby make the foregoing findings with the stipulations that all information in these findings is intended as a summary of the full administrative record supporting certification

of the Final MEIR, which full administrative record should be consulted for the full details supporting these findings, and that any mitigation measures and/or alternatives that were suggested by commentors to the Draft MEIR and were not certified as part of the Final MEIR are hereby expressly rejected for the reasons stated in the responses to the comments set forth in the Final MEIR and elsewhere in the record.

11. The Final MEIR and all findings contained herein represent the independent judgment of the City of Modesto; and

BE IT FURTHER RESOLVED by the Council that it hereby certifies the Final Master Environmental Impact Report for the WWMP Update (SCH No. 2006052076), a copy of which is available in the City Clerk's Office.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March 2007, by Councilmember O'Bryant, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	Olsen, Mayor Ridenour

CITY OF MODESTO WASTEWATER MASTER PLAN UPDATE ENVIRONMENTAL IMPACT REPORT (SCH# 2006052076)

FINDINGS AND STATEMENTS REQUIRED UNDER THE CALIFORNIA ENVIRONMENTAL QUALITY ACT
(Public Resources Code, Section 21000 *et seq.*)

I. Introduction

On behalf of the City of Modesto (the "City"), and pursuant to the California Environmental Quality Act ("CEQA"), Turnstone Consulting has prepared a Final Environmental Impact Report (the "FEIR") for the City of Modesto Wastewater Master Plan Update and other related approvals described below (collectively, the "Project"). The City is the lead agency for the FEIR.

To support its certification of the FEIR and approval of the Project, the City Council of the City of Modesto (the "City Council") makes the following findings of fact and statements of overriding considerations (collectively, the "Findings"). These Findings contain the City Council's written analysis and conclusions regarding the Project's environmental effects, mitigation measures, alternatives to the proposed Project, and the overriding considerations which, in the City Council's view, justify the approval of the Project despite its potential environmental effects. These Findings are based upon the entire record of proceedings for the FEIR, as described below.

The Wastewater Master Plan Update proposes a program of facility improvements to be funded by proposed increases in wastewater rates and charges, including collection system and treatment plant improvements, as well as operation and maintenance of the existing and proposed wastewater facilities. The wastewater collection system and Primary Plant improvements will be made within the City's wastewater service area. The City is located in Stanislaus County, California in the central San Joaquin Valley, and the City's wastewater service area includes all of the incorporated City of Modesto, a portion of north Ceres, the unincorporated community of Empire, and unincorporated "islands" in the County within the City that are served by agreement. The Primary Plant is located in the southwestern portion of the City adjacent to the north bank of the Tuolumne River. The Secondary Plant is outside the City limits, and is located approximately 6.5 miles southwest of the City, on the east side of the San Joaquin River. A 60-inch Primary Effluent Outfall pipeline and a Cannery Segregation Line (Outfall) follow a generally diagonal route, carrying primary treated effluent and wastewater from wet industries between the Primary Plant and the Secondary Plant.

The approvals necessary for implementation of the Wastewater Master Plan Update include: approval by the City Council of the Master Plan Update, new wastewater rates and capacity charges to fund construction of facilities identified in the Plan, and subsequent approval documents for individual projects; approval by the State Department of Fish and Game of a lake/streambed Alteration Agreement; approval of encroachment

permits by the State Reclamation Board and the California Department of Transportation; approval of 401 Water Quality Certification and a National Pollutant Discharge Elimination System by the Regional Water Quality Control Board for the Central Valley Region; approval by Stanislaus County of the construction of wastewater collection facilities and new Outfall in County road rights-of-way; granting of permission to cross canals by the Modesto Irrigation District and the Turlock Irrigation District; approval of permits for emergency generators by the San Joaquin Valley Air Pollution Control District; and approval of a Section 404 permit by the U.S. Army Corps of Engineers ("USACE").

II. General Findings and Overview

A. Record of Proceedings and Custodian of Record

The record of proceedings for the City's findings and determinations is available for review by responsible agencies and interested members of the public during normal business hours at 1010 Tenth Street, Suite 4600, Modesto, California. The custodian of these documents is Richard Ulm, Deputy Director of Public Works.

B. Preparation and Consideration of the FEIR and Independent Judgment Findings

The City Council finds, with respect to the City's preparation, review and consideration of the FEIR, that:

- The City retained the independent firm of Turnstone Consulting ("Turnstone") to prepare the FEIR, and Turnstone prepared the FEIR under the supervision and at the direction of the City of Modesto Public Works Department.

- The City circulated the DEIR for review by responsible agencies and the public and submitted it to the State Clearinghouse for review and comment by state agencies.

- The FEIR has been completed in compliance with CEQA.

- The Project will have significant, unavoidable impacts as described and discussed in the FEIR.

- The FEIR is adequate under CEQA to address the potential environmental impacts of the Project.

- The FEIR has been presented to the City Council, and the City Council has independently reviewed and considered information contained in the FEIR.

- The FEIR reflects the independent judgment of the City.

By these Findings, the City Council ratifies, adopts and incorporates the analyses, explanations, findings, responses to comments, and conclusions of the FEIR, except as specifically described in these Findings.

C. Findings Regarding Less-Than-Significant Impacts.

By these Findings, the City Council ratifies and adopts the FEIR's conclusions for the following potential environmental impacts which, based on the analyses in the FEIR, the City Council determines to be less than significant:

1. Land Use

- Impact A.1 – Proposed improvements to the wastewater collection system in the vicinity of established or planned land uses could create land use compatibility conflicts.

- Impact A.2 – The proposed project includes the construction and/or rehabilitation of portions of sewer lines under the watercourses or near the banks of the Tuolumne River and Dry Creek that could conflict with land use plans and policies.

- Impact A.3 – Proposed improvements to the Primary Plant in the vicinity of established or planned land uses could create land use compatibility conflicts.

- Impact A.4 – Proposed improvements in the Secondary Plant and Ranch could result in land use compatibility conflicts.

- Impact A.5 – Proposed improvements in the wastewater collection and treatment system could conflict with applicable land use plans and policies.

2. **Agricultural Resources**

   - Impact B.1 – Construction of Collection System Improvements would not result in the permanent loss of Prime Farmland.

3. **Parks and Recreation**

   - Impact C.1 – The Beard Brook Reliability project could result in an increase in localized noise and dust, and restrict access and enjoyment of Beard Brook Park.

   - Impact C.2 – Construction of a pipeline near the Dryden Municipal Golf Course could result in an increase in localized noise and dust, and restrict access and enjoyment of this recreational facility.

   - Impact C.3 – The rehabilitation of the Primary Effluent Outfall could result in a temporary increase in localized noise and dust, and could temporarily impair access and enjoyment of a park facility at the southwest corner of West Hatch Road and Rancho Encantado Lane.

4. **Water Quality and Hydrology**

   - Impact D.6 – The proposed increase in application of wastewater and biosolids to land would not significantly affect regional groundwater quality.

   - Impact D.7 – Implementation of the project would not result in depletion of groundwater resources.

5. **Biological Resources**

   - Impact E.9 – Construction activities could affect the habitat for Western Pond Turtles, the nesting and foraging habitat for Loggerhead Shrikes, and foraging habitat for Short-eared Owls, Northern Harriers, and Tricolored Blackbirds.

   - Impact E.10 – Construction of a new diffuser in the San Joaquin River, and additional discharges of treated wastewater to the San Joaquin River from the Secondary Plant could affect the spawning habitat or affect the health of the Sacramento Splittail.

6. **Transportation**

   - Impact F.1 – Temporary reduction in roadway capacity and increased traffic delays.

   - Impact F.2 – Short-term traffic increases on roadways due to construction-related vehicle trips.

- Impact F.3 – Increased potential for traffic safety hazards for vehicles, bicyclists, and pedestrians on public roadways during construction.

- Impact F.4 – Increases in vehicle trips to and from the facility sites for operation and maintenance.

7. **Air Quality**

   - Impact G.3 – Emissions during project operation could cause sensitive receptors to be exposed to toxic air contaminants.

   - Impact G.4 – Emissions of objectionable odors could occur during project operation.

8. **Noise**

   - Impact H.2 – Operation of new stationary sources of noise at the Primary and Secondary Plants associated with the proposed project could generate noise.

   - Impact H.3 – Increased trips by Public Works Department employees could cause noise increases for existing sensitive receptors in the project vicinity.

9. **Visual Resources**

   - Impact I.1 – The proposed aboveground structures associated with wastewater collection would impact the visual quality of their surroundings.

   - Impact I.2 – At the Primary and Secondary Plants, the proposed new aboveground structures and alterations to existing aboveground structures could impact the visual quality of their surroundings.

   - Impact I.3 – The proposed area of fill, and the berm around the perimeter of the fill at the Primary Plant would impact visual quality in the vicinity of the project when viewed from surrounding public streets and parks.

10. **Public Health and Safety: Hazardous Materials**

    - Impact J.1 – Hazardous materials use, storage, and transportation during construction would cause potential hazards to the public and the environment.

    - Impact J.2 – Hazardous materials use, storage, and transportation during the operation of the wastewater collection and treatment system would cause potential hazards to the public and the environment.

- Impact J.3 – Increased use of chlorine and sulfur dioxide at the Secondary Plant could expose workers and the public to accidental release of toxic gases.

- Impact J.4 – Construction and operation of the wastewater collection and treatment facilities would increase the amount of hazardous waste generated at the facilities, resulting in increased hazards to the public and the environment.

- Impact J.5 – The project would involve increased use and transport of hazardous waste materials and hazardous wastes within California.

III. Findings and Recommendations Regarding Significant Environmental Impacts

A detailed analysis of the potential environmental impacts and the proposed mitigation measures for the City of Modesto Wastewater Master Plan Update is set forth in Chapter IV of the DEIR, as incorporated into the FEIR. The City Council concurs with the conclusions in the DEIR, as incorporated into the FEIR, that: (i) changes or alterations have been required, or incorporated into, the project which avoid or substantially lessen many of the significant environmental effects identified in the DEIR; and (ii) specific economic, legal, social, technological, or other considerations make it infeasible to substantially lessen or avoid the remaining significant impacts, as further described in the Statement of Overriding Considerations below.

Chapter IV.B. Agricultural Resources

Impact B. 2. Construction of the Phase IA tertiary treatment facilities at the Secondary Plant would directly result in the permanent loss of Prime Farmland.

a) **Potential Impact.** The agricultural resources impact identified above is described and discussed on pages IV.B.8 and IV.B.9 of the DEIR.

b) **Alternatives.** As discussed in Section IV(B)(2) below, the City is adopting Alternative B to the project as proposed.

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that the adoption of Alternative B will avoid the proposed project's impact to Prime Farmland. Because the City is adopting Alternative B, there is no reason to adopt Mitigation Measure B.2. The Mitigation Monitoring and Reporting Program is hereby amended to delete Mitigation Measure B.2.

Impact B. 3. Construction of the proposed project components within the Planned Urbanizing Area would result in the cumulative loss of Prime Farmland.

a) **Potential Impact.** The agricultural resources impact identified above is described and discussed on pages IV.B.9 and IV.B.10 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring Program:

FEIR Mitigation Measure B.3 (p. IV.B.11 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Implementation of Mitigation Measure B.3 would partially mitigate the impact identified above by requiring that future development projects contribute to the California Farmland Conservancy fund, or an equivalent program, to fund farmland preservation project in Stanislaus County. However, preservation of Prime Farmland through agricultural easements or acquisition of other interests in such land, would not mitigate the indirect loss of Prime Farmland to a less-than-significant level. As explained in the DEIR (p. IV.B.11), it is not feasible to fully mitigate this impact, which will remain significant even with mitigation.

(ii) **Remaining Impacts.** As explained above, although implementation of Mitigation Measure B.3 will reduce the impact identified above, such impact would remain significant even with mitigation. Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

IV.D. Water Quality and Hydrology

Impact D.1. Excavation and construction activities could cause erosion and/or result in chemical releases causing degradation of water quality in nearby surface water and/or groundwater bodies.

a) **Potential Impact.** The water quality and hydrology impact identified above is described and discussed on pages IV.D.26 through IV.D.28 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure D.1 (pp. IV.D.28 through IV.D.30 of the DEIR as amended in the FEIR pursuant to a staff-initiated text clarification).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Mitigation Measure D.1 requires the City to prepare a SWPPP to reduce potential impacts to surface water quality through the construction period and identifies specific elements to be included in the SWPPP, including Best Management Practices to mitigate construction-related pollutants and reduce erosion of exposed soil, protocols to educate on-site personnel about the importance of stormwater quality protection, an on-site monitoring program to include both dry and wet weather inspections, and other specific measures that, together, will mitigate potential impacts to water quality resulting from Project-related excavation and construction activities. Implementation of Mitigation Measure D.1 therefore will substantially lessen or avoid the impact identified above.

Impact D.2. Elimination of the cross-connections between the stormwater drainage system and the wastewater collections system could result in localized flooding.

a) **Potential Impact.** The water quality and hydrology impact identified above is described and discussed on pages IV.D.30 and IV.D.31 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure D.2 (p. IV.D.31 of the DEIR, as amended in the FEIR in response to Comment C-3).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measure D.2, as amended in the Final EIR, will substantially lessen or avoid the impact identified above by requiring that prior to approval of each proposed cross-connection elimination project, its design be reviewed by the City Public Works Department specifically to ensure that it will not exacerbate existing flooding problems and will otherwise be fully compliant with City standards for stormwater conveyance.

Impact D.3. Implementation of the proposed project at a rate that does not match projected growth may result in an incremental increase in operation-period surface water quality degradation due to the deficient effluent disposal system.

a) **Potential Impact.** The water quality and hydrology impact identified above is described and discussed on pages IV.D.31 and IV.D.32 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure D.3 (p. IV.D.32 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure D.3 directs the City to continue to investigate the feasibility of several potential near-term solutions to the deficiencies of the existing effluent system. Implementation of the Wastewater Master Plan as proposed will mitigate the potential impact over time. However, as explained in the DEIR (p. IV.D.32), no feasible mitigation has been identified which can be implemented immediately in order to fully mitigate this impact at this time. Therefore, the impact will remain significant even with mitigation.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Impact D.4. Implementation of the proposed project may result in operation-period surface water quality degradation due to pollutant loading associated with treated wastewater discharges.

a) **Potential Impact.** The water quality and hydrology impact identified above is described and discussed on pages IV.D.33 through IV.D.35 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure D.4 (p. IV.D.35 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure D.4 directs the City to prepare a study in accordance with applicable State and Federal antidegradation policy standards to demonstrate that any expansion in river discharge capacity will not negatively impact water quality. The DEIR analysis concludes that based on current regulatory requirements, it is likely that implementation of this mitigation measure will mitigate the water quality and hydrology impact identified above to a less-than-significant level. However, as explained in the DEIR (p. IV.D.35), because several permit renewal cycles will occur over the life of the Project, there may be unforeseeable changes in regulatory policies and requirements. For this reason, the City cannot assure that implementation of currently available and identified mitigation measures will be adequate to fully mitigate such impacts identified in the future.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Impact D.5. Implementation of the proposed project may result in operation-period surface water quality degradation during daily operations and/or during flooding of the Primary Plant and sludge drying area.

a) **Potential Impact.** The water quality and hydrology impact identified above is described and discussed on pages IV.D.35 and IV.D.36 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure D.5(a) (p. IV.D.37 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure D.5(a) requires the City to retain a qualified registered civil engineer to conduct floodplain studies to determine whether the proposed floodplain encroachments could be constructed without increasing base flood elevations upstream or downstream of the Primary Plant. If such studies indicate that the encroachments can be constructed without impacts to base flood elevations, Mitigation Measure D.5(a) directs the City to work with relevant regulatory agencies to ensure that the design of such encroachments is appropriate. However, if such studies indicate that construction of the flood wall and levee system would increase base flood elevations, the mitigation measure directs the City to consider feasible options to offset such increases. Implementation of these mitigation measures would substantially lessen or avoid this water quality and hydrology impact. However, if no feasible options are available, the proposed fill placement and flood walls would not be constructed, and the impact to water quality would be significant and unavoidable.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Impact. D.8. The project would include construction activities within the San Joaquin River channel and on nearby levees and would include placement of a permanent structure in the San Joaquin River channel. These activities could affect river flow patterns and degrade water quality.

a) **Potential Impact.** The water quality and hydrology impact identified above is described and discussed on page IV.D.41 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure D.8 (p. IV.D.41 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that Implementation of Mitigation Measure D.8 will substantially lessen or avoid the impact identified above by requiring that all instream excavation and construction activities be conducted during low flow conditions in the river and that work within the wetted channel be avoided, by requiring compliance with applicable State and Federal regulatory requirements, and by directing that the design of the new outfall pipeline and diffuser minimize interference with water flow and water quality.

Chapter IV.E. BIOLOGICAL RESOURCES

Impact E.1. Construction of project facilities along the Tuolumne River adjacent to the Primary Plant, or in other riparian areas, could damage the habitat of the valley elderberry longhorn beetle.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.25 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measures E.1.1 and E.1.2a through E.1.2c (pp. IV.E.25 through IV.E.28 of the DEIR, as amended in the FEIR in response to Comment A-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Mitigation Measure E.1.1 requires that the project area and surrounding area be surveyed and mapped by a qualified biologist for the presence of the valley elderberry longhorn beetle and its elderberry host species plant. In the event that elderberry plants are discovered, Mitigation Measures E.1.2a through E.1.2c establish protocols for the City and its contractors to follow to ensure that the mitigation measure above is mitigated to a less than significant level. Specifically, these measures call for consultation and coordination with the US Fish and Wildlife Service and Army Corps of Engineers, implementation of avoidance mitigations where possible and transplantation of elderberry plants if necessary for the project.

Taken together, implementation of these mitigation measures will substantially lessen or avoid the biological resources impact identified above.

Impact E.2. Construction of project facilities could cause loss of occupied Burrowing Owl habitat.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on pages IV.E.28 through IV.E.29 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measures E.2.1 and E.2.2 (pp. IV.E.29 and IV.E.30 of the DEIR, as amended in the FEIR in response to Comment A-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Mitigation Measure E.2.1 requires completion of a pre-construction survey for Burrowing Owls in accordance with State and Federal regulations and establishes protocols to ensure that if breeding or resident owls are discovered, the City and its contractors act to protect their habitat from disruption during the nesting season. In the event that avoiding construction in occupied areas is not feasible. Mitigation Measure E.2.2 establishes standards for mitigation through the acquisition and preservation of offsite habitat. Together, implementation of these mitigation measures will substantially lessen or avoid the biological resources impact identified above.

Impact E.3. Construction of project facilities could cause disturbance of nesting raptors.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.30 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measures E.3.1 and E.3.2 (pp. IV.E.30 and IV.E.31 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measures E.3.1 and E.3.2 will substantially lessen or avoid the biological resources impact identified above by ensuring that to the extent

practicable, construction shall be scheduled to avoid the nesting season, and where such avoidance mitigation is not feasible, pre-construction surveys for nesting raptors shall be conducted to ensure that no active raptor nest is disturbed by construction activities.

Impact E.4. Construction of the project facilities could cause impacts to biological resources and regulated habitats of Dry Creek (Beard Brook) and of the Tuolumne River.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.31 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measures E.4.1 and E.4.2 (pp. IV.E.31 and IV.E.32 of the DEIR, as amended in the FEIR in response to Comment A-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Mitigation Measure E.4.1 requires that pre-construction surveys be conducted prior to project-related activities that would impact the resources of Dry Creek or the Tuolumne River. If such surveys identify potentially significant impacts, the measure requires that the City consult with State and Federal regulatory agencies to ensure that appropriate protocols are followed to mitigate any such impacts. Mitigation Measure E.4.2 additionally requires the City to implement standard avoidance and minimization mitigations in consultation with relevant regulatory agencies in the event that special-status species are identified in the project area. Implementation of Mitigation Measures E.4.1 and E.4.2 will substantially lessen or avoid the biological resources impact identified above by ensuring that the City implement standard protocols for avoiding impacts to special-status species and their habitat.

Impact E.5. Construction of project facilities or development facilitated by construction of project facilities could cause loss of Swainson's Hawk foraging habitat.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.32 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure E.5 (pp. IV.E.31 and IV.E.32 of the DEIR, as amended in the FEIR in response to Comment A-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: In the event that project facilities are constructed on lands identified as potential foraging habitat for Swainson's Hawks, implementation of Mitigation Measure E.5 will substantially lessen or avoid such impacts by requiring that the City offset such loss of habitat by providing offsite "Habitat Management" lands as provided in California Department of Fish and Game ("CDFG") standard protocols.

Impact E.6. Construction during the Swainson's Hawk breeding season could result in the incidental loss of fertile eggs or nestlings, or otherwise lead to nest abandonment.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.33 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure E.6a and E.6b (pp. IV.E.33 and IV.E.34 of the DEIR, as amended in the FEIR in response to Comment A-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measures E.6a and E.6b will substantially lessen or avoid the biological resources impact identified above by requiring that: (1) a qualified ornithologist conduct pre-construction surveys at the Jennings Plant site, in developing areas where collection system extensions are being constructed and within one-mile of previously undeveloped properties that could have trees with active nests; (2) if a nest site is found, the City consult with CDFG to ensure that the project will not result in nest disturbance; and (3) if it is not feasible to avoid active nest sites, that they be removed in accordance with standard protocols to ensure that any impacts of such removal are mitigated.

Impact E.7. Construction of improvements to the Secondary Plant may cause impacts to regulated habitats.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.34 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby

adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure E.7 (pp. IV.E.34 and IV.E.35 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measure E.7, which requires prior consultation with the USACE and/or CDFG if project facilities are to be constructed on or adjacent to wetland areas or other areas potentially under these agencies' regulatory jurisdiction, will substantially lessen or avoid the biological resources impact identified above, because those agencies will require adequate measures to offset impacts to riparian and aquatic resources.

Impact E.8. Microtunneling could cause impacts to riparian habitats under the jurisdiction of the California Department of Fish and Game and/or the U.S. Army Corps of Engineers.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.35 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure E.8 (p. IV.E.35 of the DEIR, as amended in the FEIR in response to Comment A-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measure E.8 will substantially lessen or avoid the biological resources impact identified above by requiring that prior to initiating microtunneling in a riparian area, a survey shall be conducted to determine whether special status species or habitat are present on or immediately adjacent to the construction area; the identification of such species or habitat will trigger consultation and coordination with CDFG and USACE, which will require appropriate avoidance steps or detailed mitigation measures before construction can proceed.

Impact E.11. Growth facilitated by the project would result in cumulative loss of Swainson's Hawk and Burrowing Owl habitat.

a) **Potential Impact.** The biological resources impact identified above is described and discussed on page IV.E.37 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

Mitigation Measures E.2, E.5 and E.6 (pp. IV.E.29 and IV.E.30, IV.E.31 and IV.E.32, and IV.E.33 and IV.E.34 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measures E.2, E.5 and E.6, as more fully discussed above, will substantially lessen or avoid the Project's impacts to Swainson's Hawk and Burrowing Owl habitat, and in so doing, will substantially lessen or avoid the Project's contribution to the cumulative impact identified above.

Chapter IV.F. Transportation

Impact F.1. The Wastewater Master Plan Update would accommodate growth that would cause direct and cumulatively considerable traffic impacts identified in the Urban Area General Plan.

a) **Potential Impact.** The transportation impacts identified above are described and discussed on pages IV.F.12 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure F.1 (p. IV.F.12 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure F.1 incorporates by reference the mitigation measures related to traffic from the EIR for the City's Urban Area General Plan Update adopted in 2003. Nonetheless, implementation of the Wastewater Master Plan will remove an obstacle to further growth in Modesto and the wastewater service area, and as further discussed in the DEIR (p. IV.F.12), it is not feasible to fully mitigate the cumulatively considerable traffic impacts identified above.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate these significant impacts, they are considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Chapter IV.G. Air Quality

Impact G.1. Emissions of criteria pollutants during construction of wastewater system improvements would contribute to existing violations of the ambient air quality standards in the region.

a) **Potential Impact.** The air quality impact identified above is described and discussed on pages IV.G.16 and IV.G.17 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure G.1 (pp. IV.G.17 and IV.G.18 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure G.1 requires implementation of a set of mitigation measures developed by the San Joaquin Valley Air Pollution Control District ("SJVAPCD") to mitigate the air quality impacts of construction activities. Implementation of these measures will reduce but not eliminate the emissions of construction-related PM_{10} and ozone precursors. Because such increases in emissions cannot be avoided entirely, and because City standards treat any net increase as a significant impact, it is not feasible to fully mitigate the air quality impact identified above.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Impact G.2. Emissions of criteria pollutants during operation of the proposed wastewater system improvements would contribute to existing violations of the ambient air quality standards in the region.

a) **Potential Impact.** The air quality impact identified above is described and discussed on pages IV.G.19 through IV.G.24 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure G.2 (pp. IV.G.24 and IV.G.25 of the DEIR, as amended in the FEIR in response to Comment D-1).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure G.2 requires the City to abide by permit limits and other requirements imposed by the SJVAPCD to reduce pollutant emissions from diesel-powered engines for emergency power generation and any other sources. Implementation of this mitigation measure will reduce but not eliminate the emissions of criteria pollutants during operation of the wastewater system improvements. Because such increases in emissions cannot be avoided entirely, and because City standards treat any net increase as a significant impact, it is not feasible to fully mitigate the air quality impact identified above.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Impact G.5. The Wastewater Master Plan Update would accommodate growth that would cause direct and cumulatively considerable air quality impacts identified in the Urban Area General Plan.

a) **Potential Impact.** The air quality impacts identified above are described and discussed on page IV.G.27 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure G.5 (pp. IV.G.27 and IV.G.28 of the DEIR, as amended in the FEIR pursuant to a staff-initiated text correction).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure G.5 incorporates by reference the mitigation measures related to traffic and energy use (and related to carbon monoxide and particulate matter in particular) from the City's 2003 Urban Area General Plan Final MEIR. However, even with implementation of such measures, the City Council found that the 2003 General Plan would result in significant and unavoidable impacts to air quality. Similarly here, although implementation of the mitigation measures identified in the earlier MEIR will reduce the cumulatively considerable air quality impacts identified above, it is not feasible to fully mitigate such impacts.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate these significant cumulative impacts, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Impact G.6. The wastewater treatment facilities would cause a cumulatively considerable net increase of pollutants for which the San Joaquin Valley is designated as nonattainment.

a) **Potential Impact.** The air quality impact identified above is described and discussed on page IV.G.28 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring Program:

FEIR Mitigation Measure G.6 (p. IV.G.28 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** Mitigation Measure G.6 incorporates by reference Mitigation Measures G.1 and G.2. Mitigation Measure G.1 requires implementation of a set of mitigation measures developed by the San Joaquin Valley Air Pollution Control District ("SJVAPCD") to mitigate the air quality impacts of construction activities. Mitigation Measure G.2 requires the City to abide by permit limits and other requirements imposed by the SJVAPCD to reduce pollutant emissions from diesel-powered engines for emergency power generation and any other sources. Implementation of these measures will reduce but not eliminate the emissions of PM_{10} and ozone precursors during construction and other criteria pollutants during operation of the improvements. Because such increases in emissions cannot be avoided entirely, and because City standards treat any net increase as a significant impact, it is not feasible to fully mitigate the air quality impact identified above.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Chapter IV.H. Noise

Impact H.1. Construction of the proposed project facilities could cause substantial, though intermittent and short-term, increases in noise levels, which would add to noise levels predicted by the City's *General Plan MEIR* and the County General Plan.

a) **Potential Impact.** The noise impact identified above is described and discussed on pages IV.H.9 and IV.H.10 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure H.1 (p. IV.H.11 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measure H.1 will substantially lessen or avoid the noise impact identified above by requiring that City contractors implement a set of best practices to ensure the protection of sensitive receptors from excessive construction noise. These best practices include limiting construction activities to daytime, ensuring that construction equipment and vehicles be equipped with properly operating mufflers, and requiring that stationary noise sources, construction staging areas, and construction vehicle routes be located to minimize their impact on sensitive land uses.

Impact H.4. The proposed project would support cumulative development that could increase noise levels in areas where noise levels exceed, or would exceed, the noise and land use compatibility guidelines adopted by the City of Modesto and Stanislaus County, or the noise performance standards set by the City and County.

a) **Potential Impact.** The noise impacts identified above is described and discussed on pages IV.H.12 and IV.H.13 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

There are no feasible measures to further mitigate the noise impact identified above.

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that:

(i) **Effects of Mitigation.** It is not feasible to further mitigate the impact identified above.

(ii) **Remaining Impacts.** Because there are no feasible measures available to further mitigate this significant impact, it is considered significant and unavoidable.

(iii) **Overriding Considerations.** The environmental, economic, social and other benefits of the Project override any remaining significant adverse impacts of the Project relating to the impact identified above, as set forth in the Statement of Overriding Considerations below.

Chapter IV.K. Public Health and Safety: Contaminated Soils and Demolition

Impact K.1. Excavation for installation of wastewater system improvements could encounter contaminated soil and/or groundwater and expose workers and the public to hazardous substances.

a) **Potential Impact.** The public health and safety impact identified above is described and discussed on pages IV.K.9 through IV.K.13 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure K.1a through K.1f (pp. IV.K.11 through IV.K13 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Mitigation Measures K.1a through K.1f establish a set of protocols to ensure that the impact identified above is substantially lessened or avoided. Mitigation Measure K.1a requires the City to use reasonable means (e.g., soil gas surveys, soil or groundwater sampling, and/or a Phase I Environmental Assessment) to determine the presence of soil or groundwater contamination prior to initiation of activities involving soil disturbance. If the presence of such contamination is detected, Mitigation Measure K.1b requires preparation of a Soil and/or Groundwater Investigation in accordance with state and local guidelines and regulations to assess the presence and extent of contamination and potential risk to human health and public safety. If the Soil and/or Groundwater Investigation indicates that a Site Remediation Plan is appropriate, Mitigation Measure K.1c requires its preparation and requires that groundbreaking activities in the areas of potential hazard not proceed until the Site Remediation Plan has been reviewed and approved by the County and is on file with the City. Mitigation Measure K.1d requires preparation of a project-specific Health and Safety Plan (detailing provisions for worker health and safety, monitoring, training for workers, identification of protective equipment and emergency response procedures and designating personnel responsible for Plan implementation) prior to any site work on a contaminated site or a site suspected to be contaminated. Mitigation Measure K.1e requires preparation of a Waste Disposal and Hazardous Materials Transportation Plan (including a description of analytical methods for characterizing wastes, handling methods required to minimize the potential for exposure, and protocols for safe storage, transport and disposal of contaminated materials) prior to construction activities where

hazardous wastes or materials requiring off-site disposal would be generated. Mitigation Measure K.1f establishes procedures for construction personnel to follow in the event that previously unidentified contamination is encountered during construction. Implementation of these mitigation measures will substantially lessen or avoid the public health and safety impact identified above by ensuring adequate planning and an appropriate response to the risks of hazardous exposure.

Impact K.2. Pipe bursting methods could release potentially hazardous material contaminants into soil and groundwater, causing health effects to construction workers and the public, and environmental degradation.

a) **Potential Impact.** The public health and safety impact identified above is described and discussed on page IV.K.14 of the DEIR.

b) **Mitigation Measures.** The following mitigation measure is hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure K.2 (p. IV.K.14 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Implementation of Mitigation Measure K.2 will substantially lessen or avoid the impact identified above by requiring that the contractor submit for City review a procedure to ensure that pipes are emptied of their contents and providing for the safe disposal of such contents prior to commencing pipe bursting activities.

Impact K.3. Construction activities involving demolition or modification of structures may result in the exposure of construction workers and the general public to added health risk.

a) **Potential Impact.** The public health and safety impact identified above is described and discussed on pages IV.K.14 through IV.K.15 of the DEIR.

b) **Mitigation Measures.** The following mitigation measures are hereby adopted and will be implemented as provided by the Mitigation Monitoring and Reporting Program:

FEIR Mitigation Measure K.3 (p. IV.K.15 of the DEIR).

c) **Findings.** Based on the FEIR and the entire record before the City, the City Council finds that: Mitigation Measure K.3 requires that a

qualified environmental professional perform a lead-based paint and asbestos-containing survey as a condition of approval for any demolition permit for a structure or facility potentially containing lead or asbestos and for any major modification to structures built before 1980. Mitigation Measure K.3 further provides that all loose and peeling lead-based paint and identified asbestos hazards be abated in accordance with local, state, and federal requirements and that other hazardous materials and wastes generated during demolition or renovation activities be managed and disposed of in accordance with applicable regulations. Implementation of this mitigation measure will substantially lessen or avoid the impact identified above by ensuring that potentially hazardous materials are identified prior to commencement of demolition or renovation activities and by ensuring that such materials are abated in accordance with standard protocols.

IV. Findings Regarding Project Alternatives.

A. Identification of Project Objectives.

The CEQA Guidelines state that the "range of potential alternatives to the proposed project shall include those that could feasibly accomplish most of the basic purposes of the project and could avoid or substantially lessen one or more of the significant effects" of the Project. CEQA Guidelines § 15126(d)(2). Thus, an evaluation of the Project objectives is key to determining which alternatives should be assessed in the EIR.

The DEIR lists fifteen specific objectives for the Project (pages III.2 and III.3):

For the Project as a whole:

1. Implement the City's economic goals and Urban Area General Plan by planning for, and providing, sewer infrastructure in a timely and cost-effective manner to serve new and existing development.

2. Continue the City's policy of providing affordable and attractive wastewater rates.

3. Repair and replace aging wastewater infrastructure.

4. Ensure adequate wastewater infrastructure and services are available to serve new growth within the City's Sphere of Influence.

5. Provide an adequate funding mechanism to pay for necessary improvements.

6. Require new development to pay for infrastructure necessary to serve it.

7. Plan for state-of-the-art facilities that reliably and economically meet the changing regulatory requirements.

For the collection system improvements:

8. To increase sewer capacity to convey peak wet weather flows for a 10-year storm event, and, where required, to serve future customers.

9. To reduce wet weather flow volumes by removing cross connections with stormwater sewers.

10. To extend service to new customers.

11. To replace, repair, or rehabilitate existing trunk sewers (by lining or coating the interior walls), and to reduce infiltration and inflow of stormwater into the sanitary sewers.

12. To improve sewer collection reliability by providing new and redundant infrastructure improvements, including sewer trunk lines and lift stations, in known deficient areas at critical areas within the existing system.

For the treatment plant improvements:

13. To increase capacity at the primary treatment plant to convey peak wet weather flows.

14. To increase the capacity of the outfall connecting the primary and secondary treatment plants, and to provide increased reliability for the existing outfall.

15. To increase effluent disposal capacity by upgrading from secondary treatment to tertiary treatment, and enabling the City to dispose of treated effluent to the San Joaquin River year-round.

B. Alternatives Analyzed in the FEIR.

The CEQA Guidelines state that the "range of potential alternatives to the proposed project shall include those that could feasibly accomplish most of the basic purposes of the project and could avoid or substantially lessen one or more of the significant effects of the Project. The City evaluated the alternatives listed below.

1. Alternative A: No Project Alternative.

a. Findings. Alternative A is described on pages VI.2 through VI.5 of the DEIR. This alternative is rejected, because it would not feasibly achieve the objectives of the Project.

b. Explanation. Although the No Project Alternative would avoid the Project's significant impacts, it would not further the City's Project Objectives to provide for much needed repair and replacement of aging wastewater infrastructure, provide an adequate funding mechanism to pay for the infrastructure necessary to serve the City, address changing regulatory requirements or address issues related to peak wet weather flow conditions. In addition, Alternative A would not further growth planning policies established in its General Plan. Indeed, it would achieve none of the Project objectives identified above.

2. Alternative B: Alternate Location for Phase 1A Tertiary Facilities.

a. Findings. Alternative B is described on pages VI.5 through VI.7 of the DEIR. Under Alternative B, rather than locate the Phase 1A tertiary facilities at the Secondary Plant, south of the chlorination channel on agricultural land, the City would build the Phase 1A tertiary facilities north of the chlorination channel. This alternative is accepted as a feasible alternative because it would avoid any significant and unavoidable agricultural impacts while feasibly achieving the Project objectives.

b. Explanation. As set forth in the DEIR, Alternative B would result in impacts which are almost identical to those of the proposed Project. Because the Phase IA tertiary treatment facilities would still be constructed at the Secondary Plant, in close proximity to the location identified in the proposed Project, Alternative B would feasibly achieve the Project objectives. By moving the Phase IA tertiary treatment facilities as identified in Alternative B, the significant and unavoidable impacts on agricultural resources would be eliminated.

3. **Alternative C: Reduced Size Alternative for Tertiary Treatment.**

a. Findings. Alternative C is described on pages VI.7 through VI.12 of the DEIR. Under Alternative C, rather than build tertiary treatment capacity sufficient to accommodate both the existing population and population growth, the City would build only enough tertiary treatment capacity to serve the existing population. This alternative is rejected, because it would not feasibly achieve the objectives of the Project.

b. Explanation. Although Alternative C would avoid Project impacts related to population growth, and is identified in the DEIR as the Environmentally Superior Alternative, it would not further the City's economic goals or General Plan policies related to growth, nor would it meet the other Project objectives of ensuring adequate wastewater infrastructure and services to serve new growth in the City's Sphere of Influence, extending service to new customers, or increasing effluent disposal capacity by upgrading from secondary treatment to tertiary treatment, and enabling the City to dispose of treated effluent to the San Joaquin River year-round.

4. **Alternative D: Build Certain Primary Treatment Facilities at the Secondary Plant.**

a. Findings. Alternative D is described on pages VI.12 through VI.18 of the DEIR. Under Alternative D, the City would address the flood risk at the Primary Plant by moving some of the primary treatment facilities to the Secondary Plant. The existing Primary Plant site would still retain the headworks, pump stations, and portions of the outfall pipelines to convey the wastewater flow to the Secondary Plant. This alternative is rejected, because it would result in an increase in significant and unavoidable impacts and would not feasibly achieve the objectives of the Project.

b. Explanation. Although Alternative D would avoid Project water quality and hydrology impacts related to flooding, it would result in new significant and unavoidable impacts related to the direct loss of Prime Farmland at the Secondary Plant and air quality impacts due to increased construction activity. As noted in the proposed Wastewater

Master Plan and related Engineer's Report, the engineer's estimate for constructing Alternative D is approximately $113M, more than twice the estimated cost of the proposed Project. This alternative would not further the Project objectives of providing affordable and attractive wastewater rates, economically meeting changing regulatory requirements or ensuring adequate funding to ensure the Project objectives will be feasibly attained.

5. Alternative E: Build Flood Protection Levee at Primary Plant.

a. Findings. Alternative E is described on pages VI.18 through VI.25 of the DEIR. Under Alternative E, the City would address the flood risk at the Primary Plant by constructing a flood protection levee around the entire Primary Plant. This alternative is rejected, because it would not feasibly achieve the Project's objectives.

b. Explanation. Although Alternative E would address the risk of flooding at the primary treatment facilities, it would significantly alter drainage patterns and increase offsite flooding hazards along the Tuolumne River. Additional floodplain studies would be needed to determine the possible upstream and downstream impacts of the levee. Without these potentially substantial studies, including an evaluation of the potential mitigation measures necessary to address these impacts and any secondary impacts created thereby, this alternative is not feasible. In addition, Alternative E could have greater impacts than the Project in other areas, including parks and recreation impacts and visual impacts. Indeed, the FEIR's analysis of this alternative concludes that its potential flooding impacts would be greater than the Project's. Moreover, due to the unknown and potentially significant costs associated with mitigation of offsite flooding impacts, Alternative E would not meet the Project objectives of providing affordable and attractive wastewater rates, economically meeting changing regulatory requirements or ensuring adequate funding to ensure the Project objectives will be feasibly attained. .

V. Statement of Overriding Considerations.

Pursuant to Public Resources Code Section 21081 and CEQA Guidelines Section 15093, this City Council adopts and makes the following Statement of Overriding Considerations regarding the remaining significant unavoidable impacts of the Project, as discussed above, and the anticipated economic, legal, social and other benefits of the Project.

The City finds and determines that: (i) the majority of the significant impacts of the Project will be substantially lessened or avoided by the mitigation measures required by these Findings; (ii) the City's approval of the Project as proposed will result in certain significant adverse environmental effects that cannot be avoided even with the

incorporation of all feasible mitigation measures into the Project; and (iii) there are no other feasible mitigation measures or other feasible Project alternatives that would further mitigate or avoid the remaining significant environmental effects. The significant effects that have not been mitigated to a less-than-significant level and are therefore considered significant and unavoidable are:

- B.3 – Agricultural Resources – Construction of the proposed project components within the Planned Urbanizing Area would result in the cumulative loss of Prime Farmland.

- D.3 – Water Quality and Hydrology – Implementation of the proposed project at a rate that does not match projected growth may result in an incremental increase in operation-period surface water quality degradation due to the deficient effluent disposal system.

- D.4 – Water Quality and Hydrology – Implementation of the proposed project may result in operation-period surface water quality degradation due to pollutant loading associated with treated water discharges.

- D.5 – Water Quality and Hydrology – Implementation of the proposed project may result in operation-period surface water quality degradation during daily operations and/or during flooding of the Primary Plant and sludge drying area.

- F.5 – Transportation – The Wastewater Master Plan Update would accommodate growth that would cause direct and cumulatively considerable traffic impacts identified in the Urban Area General Plan.

- G.1 – Air Quality – Emissions of criteria pollutants during construction of wastewater system improvements would contribute to existing violations of the ambient air quality standards in the region.

- G.2 – Air Quality – Emissions of criteria pollutants during operation of the proposed wastewater system improvements would contribute to existing violations of the ambient air quality standards in the region.

- G.5 – Air Quality – The Wastewater Master Plan Update would accommodate growth that would cause direct and cumulatively considerable air quality impacts identified in the Urban Area General Plan.

- G.6 – Air Quality – The wastewater treatment facilities would cause a cumulatively considerable net increase of pollutants for which the San Joaquin Valley is designated as nonattainment.

- H.4 – Noise – The proposed project would support cumulative development that could increase noise levels in areas where noise levels exceed, or would exceed, the noise and land use compatibility guidelines

adopted by the City of Modesto and Stanislaus County, or the noise performance standards set by the City and County.

The following statement identifies the reasons why, in the City's judgment, the benefits of the Project outweigh the significant and unavoidable effects. The substantial evidence supporting the enumerated benefits of the Project can be found in the record of proceedings as described in Section II.A. Each of the overriding considerations set forth below constitutes a separate and independent ground for finding that the benefits of the Project outweigh its significant adverse environmental effects and is an overriding consideration warranting approval.

The City finds that the Project would have the following economic, legal, social, technological, and environmental benefits:

1. **Wastewater Collection and Treatment Needs.** The City has grown rapidly and faces a number of challenges regarding its current wastewater collection and treatment facilities. Its 1980 population of 106,600 grew to 206,200 in 2004, putting pressure on an aging sewer system. The City currently lacks sufficient hydraulic capacity at the Primary Plant and has limited disposal options for the Secondary Plant's effluent. Portions of the system do not have capacity to convey peak wet weather flows, potentially causing wastewater surcharges or overflows. Portions of the City's collection system are very old and in significant need of repair and rehabilitation. In addition, portions of the collection system are undersized even for infill development. The Project will allow the City to more efficiently meet its wastewater collection and treatment needs, assuring water quality and addressing flooding and public health and safety concerns.

2. **Environmental Benefits of Tertiary Treatment.** The Project will significantly improve the quality of the City's treated wastewater effluent by upgrading to tertiary treatment and ensuring the City's ability to meet changing regulatory requirements. This upgrade will improve water quality.

3. **Growth Consistent With General Plan.** The City's General Plan provides a framework for the City's growth but has identified the City's wastewater treatment facilities as a potential constraint on desired growth. By removing this constraint, the Project will allow development consistent with the City's General Plan.

4. **Liability.** Without improvements to its wastewater infrastructure, the City runs the risk of violating existing State and Federal discharge requirements. Furthermore, the City anticipates that its discharge permitting conditions may become more stringent in the future, as they have become more stringent for other cities in the San Joaquin Valley. The Project will allow the City to meet its current and future discharge obligations and avoid liability for illegal discharges.

MODESTO WASTEWATER MASTER PLAN UPDATE EIR
MITIGATION MONITORING AND REPORTING PROGRAM (MMRP)

AGRICULTURAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
B.2. Compensation for loss of farmland The loss of Prime Farmland on the Secondary Plant and Ranch site directly resulting from the proposed project could be partially mitigated through the creation of a farmland conservation easement at an alternate location on the City Ranch or other City of Modesto property. The City could also partially mitigate the loss of Prime Farmland on the project site through contribution to the Farmland Conservancy Fund, or to an equivalent program for funding farmland preservation in Stanislaus County. The mitigation would conserve one acre of farmland for each acre developed. Contribution to the California Farmland Conservancy fund, or an equivalent program, to fund farmland preservation projects in Stanislaus County would serve to compensate for the loss of Prime Farmland directly resulting from the proposed project. However, preservation of Prime Farmland through agricultural easements on other Prime Farmland parcels would not mitigate the direct loss of Prime Farmland resulting from the proposed project to a less-than-significant level.	Public Works Department	Create farmland conservation easement, contribute to Farmland Conservancy Fund, or contribute to an equivalent fund to preserve existing prime farmland in Stanislaus County.	Prior to grading at the Secondary Plant and Ranch.
B.3. Each development project's contribution to the cumulative loss of farmland in Stanislaus County could be partially mitigated through contribution to the Farmland Conservancy Fund or an equivalent farmland preservation program, as a condition precedent to the issuance of building permits for projects within the City's Planned Urbanizing Area. Preservation of Prime Farmland through agricultural easements on other Prime Farmland parcels would not mitigate the cumulative loss of Prime Farmland resulting from the proposed project to a less-than-significant level.	Community & Economic Development Dept.	Implement mitigation measures for loss of agricultural land as identified in the 2003 Urban Area General Plan Master EIR by imposing as conditions of approval for development projects	As part of approval of each development project warranting mitigation under the 2003 Urban Area General Plan.

WATER QUALITY AND HYDROLOGY: Mitigation Measures	Responsibility	Action(s)	Timing
D.1. The City shall prepare a SWPPP designed to reduce potential impacts to surface water quality through the construction period of all of the project components (whether or not the particular portion of the project disturbs more than one acre). The SWPPP shall emphasize measures designed to minimize erosion and off-site sedimentation during improvements to the collection system and installation of the new outfall.	Public Works Department and Construction Contractor Representative	Prepare SWPPP or require construction contractor to prepare SWPPP; implement SWPPP	SWPPP shall be prepared prior to excavation or grading of any Wastewater Master Plan project and shall be implemented during grading and construction
It is not required that the SWPPP be submitted to the RWQCB, but must be maintained on-site and made available to RWQCB staff upon request. The SWPPP shall include: • Specific and detailed BMPs designed to mitigate construction-related pollutants. At a minimum, BMPs shall include practices to minimize the contact of construction materials, equipment, and maintenance supplies (e.g., fuels, lubricants, paints, solvents, adhesives) with stormwater. The SWPPP shall specify properly designed, centralized storage areas that keep these materials out of the rain. • To educate on-site personnel and maintain awareness of the importance of stormwater quality protection, site supervisors shall conduct regular tailgate meetings to discuss pollution prevention. The frequency of the meetings and required personnel attendance list shall be specified in the SWPPP. • A monitoring program that would be implemented by the construction site supervisor which will include both dry and wet weather inspections. In addition, in accordance with State Water Resources Control Board Resolution No. 2001-046, monitoring would be required during the construction period for pollutants that may be present in the runoff that are "not visually detectable in runoff." • BMPs designed to reduce erosion of exposed soil may include, but are not limited to soil stabilization controls, watering for dust control, perimeter silt fences, placement of hay bales, and sediment basins. Efforts should be made to keep the length of open trench and stockpile volumes to a minimum. The potential for erosion is generally increased if grading is performed during the rainy season as disturbed soil can be exposed to rainfall and storm runoff. If	Construction Contractor Representative	Maintain copy of SWPPP on construction site and implement SWPPP	Throughout all phases of construction for each project

WATER QUALITY AND HYDROLOGY: Mitigation Measures	Responsibility	Action(s)	Timing
grading must be conducted during the rainy season, the primary BMPs selected shall focus on erosion control, that is, keeping sediment on the site. End-of-pipe sediment control measures (e.g., basins and traps) shall be used only as secondary measures. Entry and egress from the excavation area shall be carefully controlled to minimize off-site tracking of sediment. Vehicle and equipment wash-down facilities shall be designed to be accessible and functional during both dry and wet conditions.			
• A drainage plan shall be prepared for the proposed sludge drying area at the Secondary Plant which specifies that the working surface will be lined with a cement-soil or concrete (to minimize infiltration) and runoff from all portions of the sludge drying area will be contained and treated prior to discharge. Treatment can occur in an appropriately designed detention basin or by filtration. The drainage plan shall consider reuse of stormwater for dust control. The drainage plan shall be reviewed and approved by the Department of Public Works prior to commencement of operations.	Public Works Department and Construction Contractor Representative	Prepare site drainage plan or require construction contractor to prepare plan; Implement plan	Plan shall be prepared prior to grading of sludge drying area and shall be implemented during grading and construction
• A monitoring and contingency plan for microtunneling that specifies how the likelihood of frac-out [tunnel collapse or the rupture of drilling mud to the surface, EIR p. IV.D.27] would be reduced and response actions should frac-out occur. The risk of frac-outs can be reduced through proper design, careful monitoring, and having appropriate equipment and response plans ready in the event of a frac-out. The monitoring and contingency plan shall specify that: • On-site briefings be conducted for the workers to identify and locate sensitive resources at the site. • All field personnel be fully briefed and understand their responsibility for timely reporting of frac-outs. • When excavating around existing rock wells, the inlet to the rock well will be sealed during the excavation activity so that sediment and pollutants cannot be discharged into the rock well in runoff or wash water. • Response equipment be maintained on-site or at a readily accessible location and in good working order.	Public Works Department and Construction Contractor Representative	Prepare monitoring and contingency plan for micro-tunneling or require construction contractor to prepare plan; Implement plan.	Plan shall be prepared prior to commencement of micro-tunneling under a riparian area or other identified wetland, and shall be implemented during micro-tunneling
Should a frac-out occur, the plan should specify that: • A qualified biologist would be retained to evaluate the potential for impacts to biotic resources and specify response actions, as appropriate.	Public Works Department and Construction	Prepare frac-out contingency plan for micro-tunneling or require construction	Plan shall be prepared prior to commencement of micro-tunneling in riparian and identified wetland

WATER QUALITY AND HYDROLOGY: Mitigation Measures	Responsibility	Action(s)	Timing
• All work stops, including the recycling of drilling mud/lubricant. • The location and extent of the frac-out is quickly determined. • If the frac-out occurs on land that the drilling mud is removed, the area reseeded and/or replanted using species similar to those in the adjacent area. • If the frac-out occurs underwater, the frac-out should be monitored for 4 hours to determine if the drilling mud congeals. (the bentonite clay typically used as a drilling mud will usually harden, effectively sealing the frac-out location). • If drilling mud does not congeal, erect isolation/containment environment (underwater boom and curtain). • If the fracture becomes excessively large, a spill response team be called in to contain and clean up excess drilling mud in the water. Phone numbers of spill response teams in the area should be maintained on site. • In any case, if a frac-out occurs, consultation with the appropriate regulatory agencies should occur promptly. The drilling and response plan shall be reviewed and approved by the City of Modesto Department of Public Works prior to implementation of the drilling activities.	Contractor Representative Public Works Department	contractor to prepare plan; Implement plan Review monitoring plan for drilling.	areas and shall be implemented during micro-tunneling. Prior to commencement of each micro-tunneling project .
D.2. Each proposed cross-connection elimination project shall be carefully designed to ensure that existing flooding problems are not exacerbated. If the proposed solution (either temporary or permanent) is not fully compliant with the City standards for stormwater conveyance, then it shall be demonstrated through detailed hydraulic analysis that the proposed solution does not make existing flooding problems worse. The designers of the new stormwater conveyance and treatment structures should consider a wide range of solutions when designing the temporary and permanent solutions, including: 1) positive connections to existing trunk lines, 2) construction of new trunk lines and laterals, 3) detention and retention basins, 4) rock wells, 5) onsite improvements to reduce discharge flows, and 6) positive connections to MID laterals. Each proposed cross-connection elimination design shall be reviewed for compliance with this performance standard by the City Public Works Department prior to approval of the project. In the event the City considers	Public Works Department	Prepare or review designs of stormwater cross-connection elimination project; determine compliance with City standards for storm water conveyance.	Prior to issuance of each construction contract.

WATER QUALITY AND HYDROLOGY: Mitigation Measures	Responsibility	Action(s)	Timing
elimination of a cross-connection by connecting to an MID lateral, the City will consult with MID at the earliest possible stage in the process.			
D.3 The City should continue to investigate the feasibility of near-term solutions: 1) additional land application of effluent, 2) expansion of storage capacity, and 3) conservation measures. However, under the existing conditions and with the project as proposed, the deficient effluent disposal system could result in significant water quality impacts and no feasible mitigation has currently been identified that could be implemented promptly. This impact is significant and unavoidable.	Public Works Department	If the Wastewater Master Plan is not implemented as proposed, investigate feasibility of other methods of effluent disposal.	Upon a determination that the Wastewater Master Plan will not be implemented as proposed
D.4. To mitigate the potential impacts to San Joaquin River water quality associated with the expansion of treated wastewater capacity, the City shall conduct an anti-degradation study as set forth above. The study shall be conducted in accordance with all applicable State and Federal anti-degradation policy standards. The City shall implement all feasible and necessary mitigation measures. Based on current RWQCB requirements, it is likely that the implementation of this mitigation measure will reduce operation-period surface water quality degradation due to pollutant loading associated with treated wastewater discharges to a less-than-significant level. The anti-degradation study is a requirement of NPDES permit renewals when additional river discharge capacity is requested and will be defined based on the permit provisions. However, because several permit renewal cycles will occur over the course of the project horizon, the City cannot determine the future requirements at this time and therefore cannot assure that the potential impacts will be fully mitigated. In addition, it is possible that State and Federal anti-degradation policies may change over time to a point where the potential impacts associated with a Project phase can no longer be fully mitigated.	Public Works Department	Conduct anti-degradation study and implement all feasible and necessary mitigation measures as directed by the RWQCB.	The study shall be conducted prior to issuance of an NPDES permit for tertiary treatment and shall be implemented prior to or concurrent with construction
D.5. **D.5(a).** To mitigate the potential impacts to local flooding conditions associated with placement of fill and construction of the flood walls proposed by the project, the City shall retain a qualified registered civil engineer or licensed architect to conduct the appropriate floodplain studies to determine whether the proposed	Public Works Department	Retain qualified registered civil engineer to conduct floodplain studies.	Prior to completion of final design documents and commencement of construction.

WATER QUALITY AND HYDROLOGY: Mitigation Measures	Responsibility	Action(s)	Timing
floodplain encroachments could be constructed without increasing base flood elevations upstream or downstream of the Primary Plant. If floodplain modeling indicates that the encroachments could be constructed without impacts to the base flood elevations, the City will work with FEMA and the Reclamation Board to ensure that the design is appropriate and all necessary permits are acquired prior to construction. If the floodplain studies indicate that base flood elevations would increase due to construction of the flood wall and levee system, then other appropriate channel modifications (e.g. expansion of the floodway to the south) shall be considered to offset the increases. If no feasible options are available to offset modeled increases in base flood elevations, then the proposed fill placement and flood walls will not be constructed. If the flood wall and levee system is not constructed, the impact to water quality (described under Impact D.5) would be significant and unavoidable.		If determined feasible, work with FEMA, Reclamation Board, and other agencies as necessary to secure appropriate permits and abide by all permit conditions, or pursue alternative design.	
D.8 To the extent feasible, all instream excavation and construction activities shall be conducted during low flow conditions in the river and work within the wetted channel will be avoided. As specified in the Biology section of this DEIR, the project sponsor will acquire all necessary permits from the US Army Corps of Engineers and California Department of Fish and Game (the provisions of these permits will include measures to protect water quality). In addition, the design of the new outfall and diffuser shall avoid, to the extent feasible, permanent features that extend above the active streambed that could cause flow disruption and scour.	Public Works Department	Acquire all necessary permits from the US Army Corps and the California Dept of Fish & Game, and abide by all permit conditions.	Obtain permits prior to commencement of construction; Comply with all permit conditions during construction.

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
E.1.1. Pre-Construction Surveys: The project area and immediately adjacent area shall be surveyed and mapped by a qualified biologist for the presence of the valley elderberry longhorn beetle and its elderberry host species plant. Mitigation is not required for plants with no stems measuring 1.0 inch (2.5 cm) or greater in diameter at ground level and surveys are valid for a period of two years. If plants larger than these are identified in the survey, Measures E.1.2a through E.1.2c shall be implemented.	Public Works Department and Project Biologist	Retain a qualified biologist and conduct pre-construction surveys for construction projects located along Tuolumne River or other riparian areas.	Conduct surveys prior to issuance of any construction contract.
E.1.2a. ***Agency Coordination and Consultation:*** Implementation of some features of the Wastewater Master Plan Update may impact USACE jurisdictional habitat. Therefore, construction along the banks of the Tuolumne River or other riparian areas where the appropriately-sized elderberry habitat is found would require USACE approval and necessary permits. Furthermore, these locations may fall within the jurisdiction of the Sacramento Field Office of USFWS. Finally, if any of the construction projects implementing the Wastewater Master Plan Update meet all four of the above criteria, they may be appended to the programmatic document. However, early consultation with the USACE and USFWS is recommended to determine adequate procedure, as implementation of a construction project will require a formal wetland delineation and determination by the USACE, modification and/or mitigation measures, and will require agency approval. The USFWS's Conservation Guidelines (see Appendix B in the Biotec Study, found in Appendix C in this EIR) establishes avoidance or replacement mitigation that would be appropriate for impacts on the elderberry shrub in the project area. The City shall implement either or both Measures E.1.2b and E.1.2c if appropriate in locations where construction would affect the valley elderberry longhorn beetle habitat.	Public Works Department and Project Biologist	Consult with USACE and USFWS.	Prior to issuance of any construction contract.
E.1.2b. Avoidance: Avoid and protect habitat whenever possible. If suitable habitat for the valley elderberry longhorn beetle occurs in the project area, to the extent practicable these areas shall be designated as avoidance areas that will be protected from disturbance during construction. Any valley elderberry longhorn beetle habitat that cannot be avoided shall be considered impacted and appropriate mitigation shall be implemented as described under Mitigation Measure E.1.2c.	Public Works Department, Project biologist and Construction	Designate avoidance areas along Tuolumne River near Primary Plant or other riparian areas proposed for construction of wastewater facilities and provide	Establish buffer areas prior to commencement of construction and monitor throughout construction

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
Core avoidance areas include all areas within 20 feet of the dripline of any elderberry plant with a stem measuring 1.0 inch (2.5 cm) or greater in diameter at ground level. Such core areas shall not be disturbed during construction. Buffer avoidance areas include all the area within 100 feet (30.5 m) of any elderberry plant with a stem measuring 1.0 inch (2.5 cm) or greater at ground level. If complete avoidance within a 100-foot (30.5 m) buffer cannot be provided, the USFWS must be consulted before any disturbances within the buffer area are considered. In addition, the USFWS must be provided with a map identifying the avoidance areas and written details describing the avoidance and protective measures. Protective measures include: • Temporary construction fencing shall be constructed to provide a minimum setback of at least 20 feet from the dripline of each potential host elderberry plant. • A tailgate education program on the valley elderberry longhorn beetle shall be given to each construction worker and all personnel working within the project area to avoid adverse effects on the beetle. • Signs every 50 feet (15.2 m) along the edge of the fence shall be placed along the exclusion fence to help identify the area as a protected area for the valley elderberry longhorn beetle for the duration of construction. Restoration and maintenance activities shall be implemented if activities occur within the 100-foot (30.5 m) buffer zone. Restoration and maintenance activities include: • Restore any damage done to the buffer area (area within 100 feet of elderberry plants) during construction. Provide erosion control and re-vegetate with appropriate native plants. • Buffer areas must continue to be protected after construction. Measures such as fencing, signs, weeding, and trash removal are usually appropriate. • No insecticides, herbicides, fertilizers, or other chemicals that might harm the beetle or its host plant shall be used in the buffer areas, or within 100 feet of any elderberry plant with one or more stems measuring 1.0 inch or greater in diameter at ground level. • The applicant must provide a written description of how the buffer areas are to be restored, protected, and maintained after construction is completed.	Contractor Representative	fencing, education of workers, signs, and implement restoration and maintenance activities.	

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
• Mowing of grasses/ground cover may occur from July through April to reduce fire hazard. No mowing shall occur within five (5) feet of elderberry plant stems. Mowing must be done in a manner that avoids damaging plants (*e.g.*, stripping away bark through careless use of mowing/trimming equipment). **E.1.2c. Transplantation of Elderberry Plants:** If elderberry shrubs cannot be avoided, elderberry plants with one or more stems measuring 1.0 inch (2.5 cm) or greater in diameter at ground level shall be transplanted to a mitigation area. The following guidelines will be followed. • A qualified biologist shall monitor the project and mitigation sites for the duration of the transplanting to ensure no unauthorized take or loss of individuals occurs. • Elderberry plants will be transplanted after shrubs have lost their leaves and are dormant, usually from November through the first two weeks in February. • Transplanting shall be conducted according to standard procedures set forth by the USFWS, which includes planting additional seedlings or cuttings at various ratios for plants removed for translocating. • A mitigation area set aside for translocated plants shall provide habitat for the beetle in perpetuity. The mitigation area shall provide at least 1,800 square feet for each transplanted elderberry shrub and follow USFWS guidelines for other associated native plants to be planted within the area. This mitigation area shall be weeded by mechanical means (no herbicides) once a year. • The mitigation area will be monitored for the general condition of the mitigation area, the condition of the elderberry plants, and the associated native plants, for a period of 10 consecutive years with surveys and reports every year, or for 15 years of monitoring with surveys and reports on years 1, 2, 3, 5, 7, 10, and 15. Reports shall be provided to the USFWS.	Public Works Department, Project Biologist and Construction Contractor Representative	Retain qualified biologist; Identify and monitor elderberry plants and implement USFWS procedures for transplanting elderberry plants.	Prior to authorizing construction near affected areas
E.2.1. Burrowing Owl Avoidance: In conformance with Federal and State regulations regarding the protection of raptors, a pre-construction survey for Burrowing Owls shall be completed, in conformance with CDFG guidelines, prior to the start of construction within suitable habitat. If no Burrowing Owls are located during these surveys, no additional action would be warranted. However, if breeding or resident owls are located on, or immediately adjacent to, the site, the	Public Works Department and Project Biologist	Retain qualified biologist to conduct pre-construction survey for breeding or resident burrowing owls in pastures, fallow fields, canal rights of way and	Survey, establish construction schedule and buffer area prior to issuance of any construction

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
following mitigation measures shall be implemented: • No burrowing owls would be evicted from burrows during the nesting season (February 1 through August 31). Eviction outside the nesting season may be permitted pending evaluation of eviction plans and receipt of formal written approval from the CDFG authorizing the eviction. • A 250-foot buffer, within which no new activity would be permissible, would be maintained between project activities and nesting burrowing owls. This protected area would remain in effect until August 31, or at the CDFG's discretion and based upon monitoring evidence, until the young owls are foraging independently. • If accidental take (disturbance, injury, or death of owls) occurs, the CDFG would be notified immediately.		other areas where ground squirrels occupy or have occupied burrows or pipes or other locations that could be used by burrowing owls. If found, establish construction schedule to avoid nesting season, identify buffer areas, and report accidental take to CDFG	contract, and monitor during construction.
E.2.2. Compensation for loss of Burrowing Owl habitat: If a pre-construction survey finds that Burrowing Owls occupy the project site and avoiding construction in occupied areas is not feasible, then habitat compensation on off-site mitigation lands shall be implemented. Habitat Management lands comprising existing Burrowing Owl foraging and breeding habitat shall be acquired and preserved. An area of 6.5 acres (2.6 ha) (the amount of land found to be necessary to sustain a pair or an individual owl) shall be secured for each pair of owls, or individual in the case of an odd number of birds. As part of an agreement with the CDFG, the project applicant shall secure the performance of its mitigation duties by providing the CDFG with security in the form of funds that would: • Allow for the acquisition and/or preservation of 6.5 acres (2.6 ha) of Habitat Management lands. • Provide initial protection and enhancement activities on the Habitat Management lands, potentially including but not limited to such measures as fencing, trash clean-up, artificial burrow creation, grazing or mowing, and any habitat restoration deemed necessary by CDFG. • Establish an endowment for the long-term management of the Habitat Management lands. • Reimburse the CDFG for reasonable expenses incurred as a result of the approval and implementation of this agreement. Pending CDFG approval, Habitat Management lands providing foraging habitat	Public Works Department and Project Biologist	If avoidance is not feasible, work with CDFG to secure a habitation mitigation agreement.	Prior to issuance of any construction contract.

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
for Swainson's Hawks (see "Loss of Swainson's Hawk Foraging Habitat" below) may also be used to mitigate impacts to Burrowing Owls provided the Habitat Management lands provide existing Burrowing Owl foraging and breeding habitat.			
E.3.1. Avoidance of Nesting Raptors: To the extent practicable, construction shall be scheduled to avoid the nesting season, which extends from January through August.	Public Works Department	To the extent practicable, limit construction periods to Sept. through December in or near nesting raptor habitat.	Prior to issuance of any construction contract
E.3.2. Pre-construction Surveys: If it is not possible to schedule construction between August and January, then one of the following options shall be implemented: • With the approval of the CDFG, trees containing known or potential raptor nest sites may be removed to discourage future nesting attempts on the condition that no raptor pair is currently utilizing the site; or, • Pre-construction surveys for nesting raptors shall be conducted by a qualified ornithologist or wildlife biologist to ensure that no raptor nests would be disturbed during project implementation. A pre-construction survey shall be conducted prior to the initiation of demolition/construction activities during the early part of the breeding season (January through April) and prior to the initiation of these activities during the late part of the breeding season (May through August). During this survey, the qualified person shall inspect all trees in and immediately adjacent to the impact areas for raptor nests. If an active raptor nest is found close enough to the construction area to be disturbed by these activities, the ornithologist, in consultation with CDFG, shall determine the extent of a construction-free buffer zone to be established around the nest.	Public Works Department and Project Ornithologist	Retain qualified ornithologist to conduct pre-construction surveys for nesting raptors and determine extent of construction-free buffer zone to be established.	Prior to issuance of any construction contract
E.4.1. Pre-Construction Surveys of sensitive riparian habitats, and Agency Coordination: Pre-construction surveys shall be conducted prior to project-related activities that would impact the resources of Dry Creek or the Tuolumne River in order to identify potentially significant impacts. If Dry Creek, the Tuolumne River, or their tributaries are impacted by project activities, USACE permits and a Streambed Alteration Agreement from CDFG may be required. If regulated habitats are impacted by project activities, USACE permits and a Streambed	Public Works Department and Project Biologist	Retain qualified biologist to conduct pre-construction surveys for projects that would impact Dry Creek and Tuolumne River and obtain USACE permit and Streambed Alteration	Prior to issuance of any construction contract.

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
Alteration Agreement from CDFG would be required. Early consultation with the USACE and CDFG is recommended to determine adequate protocols, as project modification and/or mitigation measures may be necessary and would require agency approval.		Agreement from CDFG, as necessary.	
E.4.2. Mitigation for Species of Special Status: If construction activities would result in impacts to any of the special-status species identified as possibly occurring in the project area, mitigation measures for that species shall be implemented. If surveys indicate that impacts would result to a special-status species not identified as possibly occurring in the project area, or for which mitigation measures are not described in this report, avoidance and minimization measures to reduce project impacts to less-than-significant levels shall be determined through coordination with the City of Modesto, CDFG, and USFWS.	Public Works Department and Project Biologist.	Retain qualified biologist to conduct pre-construction surveys for special-status species occurring within a project area; Identify and implement mitigation measures.	Conduct pre-construction survey and identify mitigation prior to issuance of any construction contract. Implement mitigation measures throughout construction.
E.5. Compensation for loss of Swainson's Hawk foraging habitat: If project facilities are constructed on lands identified as potential foraging habitat for Swainson's Hawks then the impacts shall be mitigated by providing offsite Habitat Management lands as described in the CDFG protocol. The final acreage of offsite management lands to be provided would depend on the distance between the project area and the nearest active nest site. Prior to grading of any site with potential foraging habitat, protocol-level surveys shall be conducted to determine the nearest active nest, if an active nest is not known within one mile of the site. The 1994 CDFG staff report states (HM = Habitat Management in the following paragraphs): • Projects within one mile of an active nest tree shall provide: – One acre of HM land (at least 10% of the HM land requirements shall be met by fee title acquisition or a conservation easement allowing for the active management of the habitat, with the remaining 90% of the HM lands protected by a conservation easement [acceptable to the Department] on agricultural lands or other suitable habitats that provide foraging habitat for Swainson's Hawk) for each acre of development authorized (1:1 ratio); or	Public Works Department and Project Biologist	Retain qualified ornithologist to conduct pre-construction surveys of project site in areas such as pasture, alfalfa, fallow fields, low-growing crops or field crops, rice land, and cereal grain crops to identify potential foraging habitat and active nests of Swainson's Hawks. If suitable foraging habitat is found, implement mitigation in accordance with CDFG requirements.	Prior to issuance of any construction contract.

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
– One-half acre of HM land (all of the HM land requirements shall be met by fee title acquisition or a conservation easement [acceptable to the Department] which allows for the active management of the habitat for prey production on the HM lands) for each acre of development authorized (0.5:1 ratio). • Projects within 5 miles of an active nest tree but greater than 1 mile from the nest tree shall provide 0.75 acres of HM land for each acre of urban development authorized (0.75:1 ratio). All HM lands protected under this requirement may be protected through fee title acquisition or conservation easement (acceptable to the department) on agricultural lands or other suitable habitats that provide foraging habitat for Swainson's Hawks. • Projects within 10 miles of an active nest tree but greater than 5 miles from an active nest tree shall provide 0.5 acres of HM land for each acre of urban development authorized (0.5:1 ratio). All HM lands protected under this requirement may be protected through fee title acquisition or conservation easement (acceptable to the Department) on agricultural lands or other suitable habitats that provide foraging habitat for Swainson's Hawks. • Management Authorization holders/project sponsors shall provide for the long-term management of the HM lands by funding a management endowment (the interest on which shall be used for managing the HM lands) at the rate of $400 per HM acre (adjusted annually for inflation and varying interest rates).			
E.6a. Pre-construction surveys for nesting Swainson's Hawks: In order to assure that nesting Swainson's Hawks will not be disturbed by construction activities at the Jennings Plant site, in developing areas where collection system extensions are being constructed on or within one mile of undeveloped properties that could have trees with active nests,, a qualified ornithologist shall conduct pre-construction surveys of the project site and adjacent areas within one mile of the project site. Survey Period I occurs from January 1 to March 20, Period II from March 20 to April 5, Period III from April 5 to April 20, Period IV from April 21 to June 10 (surveys not recommended during this period because identification is difficult as the adults tend to remain within the nest for longer periods of time), and Period V from June 10 to July 30. No fewer than three surveys shall be completed, in at least each of the two survey periods immediately prior to project initiation. If a	Public Works Department and Qualified ornithologist	Retain qualified ornithologist to conduct pre-construction surveys of project site and adjacent areas within one mile of project site during at least two of the survey periods identified. Identify and implement appropriate mitigation measures.	Prior to issuance of any construction contract.

BIOLOGICAL RESOURCES: Mitigation Measures	Responsibility	Action(s)	Timing
nest site is found, consultation with CDFG shall be required to ensure project initiation will not result in nest disturbance. **E.6b. Removal of Swainson's Hawk Nest Trees:** Nest trees on the project site(s) shall not be removed unless avoidance measures are determined to be infeasible. If a nest tree must be removed, a Management Authorization (including conditions to off-set the loss of the nest tree) must be obtained. The Management Authorization will specify the tree removal period, generally between October 1 – February 1. If construction or other project related activities which may cause nest abandonment or forced fledging are necessary within the buffer zone, monitoring of the nest site by a qualified biologist shall be required to determine if the nest is abandoned. If it is abandoned, and if the nestlings are still alive, the City shall fund the recovery and hacking (controlled release of captive reared young) of nestling(s).	Public Works Department and Qualified biologist	If avoidance measures are infeasible, obtain Management Authorization for removal of nest tree; Monitor nest tree and mitigate as appropriate if abandonment occurs due to construction activities.	Obtain Managament Authorization prior to issuance of any construction contract and removal of nest tree. Monitor nest tree throughout construction.
E.7. Pre-Construction Surveys for jurisdictional wetlands near Secondary Treatment Plant, and Agency Coordination: If project facilities are constructed on or adjacent to wetland areas and those areas potentially under the jurisdiction of the USACE and/or CDFG, pre-construction surveys shall be conducted. If these areas would be impacted by project activities, USACE permits and a Streambed Alteration Agreement from CDFG would be required. These agencies would request adequate measures to offset impacts to riparian and aquatic resources. Early consultation with the USACE and CDFG is recommended to determine adequate protocol, as project modification and/or mitigation measures may be necessary and would require agency approval.	Public Works Department and Qualified Biologist	Retain qualified biologist to conduct pre-construction surveys of potential wetland areas. Obtain USACE permits and Streambed Alteration Agreement for areas impacted by project activities and comply with permit requirements.	Conduct surveys and obtain permit prior to issuance of any construction contract. Comply with permit requirements throughout construction.
E.8. Preconstruction Surveys near microtunneling areas and Agency Coordination: Prior to initiating microtunneling in a riparian area, a survey shall be conducted to determine whether special status species or habitats are present on or immediately adjacent to the construction area. If it is determined that such species or habitats are present, and if the temporary impacts are determined to be significant, coordination with CDFG and USACE shall occur to determine appropriate avoidance steps or detailed mitigation measures to carry out prior to and during construction. These measures could include establishing a riparian buffer between the construction area and the identified resource or habitat, and monitoring during construction by appropriately qualified scientist(s).	Public Works Department and Qualified Biologist.	Retain qualified biologist to conduct pre-construction surveys for special status species or their habitats in riparian areas. Coordinate with CDFG and USACE, as appropriate.	Conduct survey prior to issuance of any construction contract. Implement and monitor avoidance and/or mitigation measures throughout construction.

TRANSPORTATION: Mitigation Measures	Responsibility	Action(s)	Timing
F.1. Implement the Urban Area General Plan 2003 Final Master EIR's mitigation measures related to traffic. This would reduce the significant cumulative impacts of growth accommodated by the Wastewater Master Plan, but not to less-than-significant levels.	Community and Economic Development Department	Implement mitigation measures for traffic as identified in the 2003 Urban Area General Plan Master EIR by imposing as conditions of approval on development projects	As part of approval of each development project warranting mitigation under the Urban Area General Plan

AIR QUALITY: Mitigation Measures	Responsibility	Action(s)	Timing
G.1: The construction plans for each group of building permits for wastewater system improvements shall incorporate the following recommendations from the San Joaquin Valley Air Pollution Control District to minimize emissions during construction phases:			
• The City or its contractor(s) shall review Regulation VIII of the San Joaquin Valley Air Pollution Control District regulations and prepare a compliance plan prior to commencing any phase of construction. The compliance plan must demonstrate that the current requirements of Regulation VIII will be implemented.	Public Works Department and Construction Contractor Representative	Prepare a dust control compliance plan.	Prepare plans and review new technologies prior to commencent of construction;
• Prior to the issuance of construction contracts, the City or its contractor(s) shall perform a review of new technology, as it relates to heavy-duty equipment, to determine what, if any, advances in emissions reduction are available for use. It is anticipated that in the near future both NO_x and PM_{10} control equipment will be available. The San Joaquin Valley Air Pollution Control District should be consulted during this process.		Review new emission control technologies in consultation with the SJVAPCD	
• The City or its contractor(s) shall limit traffic speed on unpaved roads to 15 miles per hour.		Implement these 4 dust control measures.	Implement and monitor compliance with dust and emission control measures throughout construction
• The City or its contractor(s) shall install sandbags or other control measures to prevent silt runoff to public roadways from sites with a slope greater than 1 percent.			
• The City or its contractor(s) shall install wheel washers for all exiting trucks, or wash off all trucks and equipment leaving the site, to prevent track-out of soil to public roadways.			
• The City or its contractor(s) shall install windbreaks at windward sides of construction areas, if necessary to prevent wind-blown dust.			
• The City or its contractor(s) shall suspend excavation and grading activity when winds exceed 20 miles per hour.		Limit or suspend grading when winds exceed 20 mph.	
• The City or its contractor(s) shall limit the area subject to excavation, grading, and other construction activity at any one time.		Limit area of disturbance	
• The City or its contractor(s) shall ensure that the accumulation of mud		Implement street sweeping	

AIR QUALITY: Mitigation Measures	Responsibility	Action(s)	Timing
or dirt is expeditiously removed from adjacent public streets at least once every 24 hours when construction activities are occurring (the use of dry rotary brushes is expressly prohibited except where preceded or accompanied by sufficient wetting to limit the visible dust emissions). • The City or its contractor(s) shall use alternative-fuel construction equipment, where feasible. • The City or its contractor(s) shall minimize idling time (e.g., to a 10-minute maximum). • The City or its contractor(s) shall limit the hours of operation of heavy-duty equipment and/or the amount of equipment in use to the minimum practical. • The City or its contractor(s) shall replace fossil-fueled equipment with electrically driven equivalents (provided they are not run via a portable generator set), where feasible. • The City or its contractor(s) shall take steps to curtail construction activity during periods of high ambient pollutant concentrations; this may include reducing construction activity during the peak hour of vehicular traffic on adjacent roadways or ceasing construction activity during days declared as Spare the Air days by the San Joaquin Valley Air Pollution Control District. • The City or its contractor(s) shall implement activity management to reduce cumulative short-term impacts.		program during construction Use alternative fuel equipment, where feasible Require contractor to minimize idling time. Work with contractor to establish minimum numbers of hours of operation of heavy equipment Implement ozone precursors control measures as specified in construction contract. Establish limitations on construction activities when spare-the-air days are declared by SJVAPCD; include in construction contracts. Implement measures included in contract, and report implementation in Daily construction log.	
G.2: The City shall abide by permit limits imposed by the SJVAPCD to reduce pollutant emissions from diesel-powered engines for emergency power generation and any other sources requiring permits. The City shall abide by permit limits imposed by the SJVAPCD on operation of digester-gas burning equipment at the Primary Plant.	Public Works Department	Obtain permits from SJVAPCD as required and comply with permit limits.	Prior to operation of facilities requiring SJVAPCD permit and ongoing, during operation of wastewater facilities.

AIR QUALITY: Mitigation Measures	Responsibility	Action(s)	Timing
G.5: With implementation of the *Urban Area General Plan's* mitigation measures related to traffic and energy use (and related to carbon monoxide and particulate matter, in particular), the significant cumulative impacts of growth accommodated by the project would be reduced, but not to less-than-significant levels.	Community & Economic Development Department	Implement air quality mitigation measures as identified in the 2003 Urban Area General Plan Master EIR by imposing as conditions of approval on development projects	As part of approval of each development project warranting mitigation under the Urban Area General Plan

NOISE: Mitigation Measures	Responsibility	Action(s)	Timing
H.1. Protection of sensitive receptors from excessive construction noise: In areas where there are sensitive receptors, the City shall ensure that contractors implement the following practices: • To the extent feasible, construction activities shall be restricted to the hours between 7:00 a.m. and 9:00 p.m., Monday through Friday, and between 9:00 a.m. and 9:00 p.m., Saturday and Sunday and state or federal holidays; minor construction equipment servicing and maintenance shall be excepted from this restriction. • Construction equipment and vehicles should be equipped with properly operating mufflers according to the manufacturers' recommendations. • Air compressors and pneumatic equipment should be equipped with mufflers, and impact tools should be equipped with shrouds or shields. • Stationary noise sources and construction staging areas shall be located as far as possible from existing residences, hospitals, schools, churches, and parks (preferably at least 200 feet), or contractors shall be required to provide additional noise-reducing engine enclosures (with the goal of achieving approximately 10 dBA of reduction compared to uncontrolled engines). • Construction vehicle access routes shall be designed to minimize the impact on sensitive land uses such as schools and residential areas.	Public Works Department and Construction Contractor Representative	Determine whether construction would occur near sensitive receptors; if so, require noise-reduction measures in construction contracts. Implement construction noise control measures.	Make determinations prior to issuing construction contracts Implement and monitor noise-reduction measures during all phases of site preparation and exterior construction activities.

PUBLIC HEALTH AND SAFETY: CONTAMINATED SOILS AND DEMOLITION: Mitigation Measures	Responsibility	Action(s)	Timing
K.1a. Prior to activities involving soil disturbance for the improvements to the wastewater collection and treatment systems, the City shall use reasonable means to determine the presence of soil or groundwater contamination. Those reasonable means may consist of soil gas surveys, soil or groundwater sampling, and/or a Phase I Environmental Site Assessment conducted by a qualified professional (e.g., a California-registered environmental assessor, Professional Geologist, or Professional Engineer). Any Phase I environmental site assessment shall be performed in conformance with the most recent standard adopted by ASTM International for Phase I site assessments, and shall present recommendations for further investigation of the site, if necessary (see Mitigation Measure K.1b below for details).	Public Works Department and, if appropriate, Environmental professional	Use reasonable means to determine presence of soil or groundwater contamination and retain environmental professional, if appropriate.. Report findings and recommendations to the City.	Prior to commencement of grading or construction
K.1b. If warranted, conduct soil and groundwater sampling and analysis. If the investigation activities in Mitigation Measure K.1a (e.g., soil gas surveys, sampling, and/or preparation of a Phase I environmental site assessment) were to indicate that a release of hazardous materials could have affected the location(s) where soil disturbance would occur, a Soil and/or Groundwater Investigation shall be conducted prior to soil disturbance by a qualified environmental professional (e.g., Professional Geologist, Professional Engineer) to assess the presence and extent of contamination at the site and the potential risk to human health and public safety from the contamination (if any). The Soil and/or Groundwater Investigation shall be conducted in accordance with state and local guidelines and regulations, and the most recent ASTM International Standard for Phase II Environmental Site Assessments, with oversight from a regulatory agency (e.g., Stanislaus County Environmental Resources Department). The findings of the investigation shall be documented in a written report and submitted to the regulatory agency and the City.	Public Works Department and Environmental professional	Conduct soil and groundwater sampling and analysis if warranted. Report findings to City.	Prior to commencement of grading or construction.
K.1c. If warranted, prepare a site remediation plan and health and safety plan. If the results of the subsurface investigation(s) (described in Mitigation Measure K.1b) indicate the presence of hazardous materials, the Stanislaus County Department of Environmental Resources shall be notified, and site remediation may be required by the applicable state or regulatory agency or the County Department of Environmental Resources Site Mitigation Unit. Specific remedies would depend on the extent and	Public Works Department, Environmental professional and Construction Contractor	If warranted by results of implementing Measure K.1b, prepare site remediation plan and site health and safety plan and implement site	Prior to commencement of grading or construction.

PUBLIC HEALTH AND SAFETY: CONTAMINATED SOILS AND DEMOLITION: Mitigation Measures	Responsibility	Action(s)	Timing
magnitude of contamination and the requirements of the regulatory agencies. Under the direction of the regulatory agencies and the City, a Site Remediation Plan shall be prepared, as required, by the contractor(s). The Plan shall: 1) specify measures to be taken to protect workers and the public from exposure to the potential site hazards, and 2) certify that the proposed remediation measures would clean up the waste, dispose the wastes, and protect public health in accordance with federal, state, and local requirements.	Representative	remediation plan	
If the parcel is found to be contaminated to a level that prohibits the proposed use, the potential for reduction of the hazard shall be evaluated in the Site Remediation Plan, in accordance with the General Plan. Groundbreaking activities in the areas of potential hazard shall not proceed until the Site Remediation Plan has been reviewed and approved by the County and is on file with the City.			During any excavation, grading or other soil disturbance.
K.1d. Where any activity would be performed at a contaminated site or where hazardous materials are suspected, the City's contractor shall prepare a project-specific Health and Safety Plan prior to any site work. The Health and Safety Plan shall be prepared by the contractor(s) filed with the City and regulatory agencies (as required). The Plan shall include required worker health and safety provisions for all workers potentially exposed to contaminated materials at the site, identification of hazardous materials present, monitoring to be performed during site activities (as appropriate), required training for workers, identification of appropriate personal protective equipment and emergency response procedures, and designation of personnel responsible for Plan implementation.	Public Works Department, Construction Contractor's Representative and Environmental Professional	If soil-disturbing activities would be in known or suspected contaminated areas, prepare site health and safety plan for City review and approval.	At early stage of construction contract, prior to any soil-disturbing activities.
K.1e. Prepare a Waste Disposal and Hazardous Materials Transportation Plan. The contractor(s) shall prepare a Waste Disposal and Hazardous Materials Transportation Plan prior to construction activities where hazardous wastes or materials requiring off-site disposal would be generated. The plan shall include a description of analytical methods for characterizing wastes and handling methods required to minimize the potential for exposure, and shall establish procedures for the safe storage of contaminated materials, stockpiling of soils, and storage of dewatered groundwater (as appropriate). The required disposal method for contaminated materials (including any lead-based paint, asbestos, or other hazardous building materials requiring disposal, see Mitigation Measure K.3) and the approved disposal	Public Works Department, Construction Contractor's Representative, and Environmental Professional	Where hazardous wastes or materials requiring off-site disposal would be generated, prepare Waste Disposal and Hazardous Materials Transportation Plan for City review and approval.	At early stage of construction contract, prior to construction activities that would transport hazardous materials or hazardous wastes off site.

PUBLIC HEALTH AND SAFETY: CONTAMINATED SOILS AND DEMOLITION: Mitigation Measures	Responsibility	Action(s)	Timing
site shall be indicated in the Plan. The Plan shall also identify specific routes to be used for transport of hazardous materials and waste to and from the project site, or specific routes to be avoided during transport. Routes shall be selected to minimize proximity to sensitive receptors to the greatest practical degree. Elements of the Plan regarding transportation of hazardous materials and wastes shall be reviewed and approved by the City Fire Department.			
K.1f. In the event that previously unidentified contamination is encountered (e.g., identified by odor or visual staining) during soil disturbance activities, or any underground storage tanks, abandoned drums, or other hazardous materials or wastes are encountered during construction, the contractor(s) shall immediately notify the City, and the City shall then notify the County. The contractor(s) shall have prepared a Contingency Plan for Sampling and Analysis of potentially hazardous substances and coordination with appropriate regulatory agencies. The Plan shall be submitted to the City prior to project activities involving soil disturbance. Any site investigations or remedial activities shall be performed in accordance with applicable laws under the direction of a regulatory agency and the City, in accordance with Mitigation Measures K.1c through K.1e above.	Public Works Department, Construction Contractor's Representative and Environmental professional	Prepare contingency plan for sampling and analysis of unidentified potentially hazardous substances. Stop work and notify City immediately if suspected hazardous material is encountered during soil disturbance or structure demolition.	Prior to commencement of grading or construction or any other soil disturbing activities. Ongoing, during all excavation and site preparation activities.
K.2. The contractor(s) shall prepare a procedure for review by the City for emptying pipes of their contents before pipe bursting begins. Once accepted by the City, with revisions if requested, the contractor shall implement the procedure prior to carrying out any pipe bursting. The purpose of this measure is to avoid the migration of any potentially hazardous materials in the pipes that may be released during pipe bursting into soil and groundwater, and to ensure the health and safety of construction workers and the public by reducing potential exposure. Material removed from the pipes before pipe bursting shall be characterized, handled, stored, and disposed of in accordance with the requirements of Mitigation Measure K.1e, above.	Construction Contractor and/or its environmental professional; Public Works Department	Prepare procedure for emptying and testing pipe contents for City review and approval. Once approved, implement procedure	Prior to commencing pipe bursting procedure

PUBLIC HEALTH AND SAFETY: CONTAMINATED SOILS AND DEMOLITION: Mitigation Measures	Responsibility	Action(s)	Timing
K.3. As a condition of approval for any demolition permit for a structure or facility potentially containing lead or asbestos under the proposed project, a lead-based paint and asbestos-containing survey shall be performed at the structure or facility by a qualified environmental professional. Also, any major modification to structures constructed prior to 1980 shall require a similar lead and asbestos survey for those portions of the structure to be modified. Based on the findings of the survey, all loose and peeling lead-based paint and identified asbestos hazards shall be abated by a certified contractor in accordance with local, state, and federal requirements. The findings of the survey shall be submitted to the City. Other hazardous materials and wastes generated during demolition or renovation activities, such as fluorescent light tubes and mercury switches, shall be managed and disposed of in accordance with applicable universal and hazardous waste regulations. Federal and state construction worker health and safety regulations shall apply to demolition activities, and any required worker health and safety procedures shall be incorporated into the contractor's specifications for the project. The requirements of Mitigation Measures K.1c through K.1f shall also apply.	Public Works Department, Construction Contractor's Representative and Environmental professional	Retain environmental professional to conduct pre-demolition surveys and report findings to City. Implement abatement as required by environmental professional.	Conduct survey prior to issuance of any construction contract and implement abatement prior to demolition of the structure.

Print

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-179

A RESOLUTION APPROVING THE 2007 WASTEWATER MASTER PLAN, WITH ADDENDA (PHASE 1 - COLLECTION SYSTEM AND PHASE 2 - TREATMENT SYSTEM) AS COMPLETE

WHEREAS, Council had approved contracts with Carollo Engineers to update the City's Wastewater Master Plan (WWMP), and

WHEREAS, the WWMP was divided into two major components with Phase 1 focusing on the Wastewater Collection System and Phase 2 concentrating on the Wastewater Treatment and Disposal System, and

WHEREAS, the WWMP serves as a roadmap in identifying wastewater infrastructure needed to serve both existing and future users via build-out of the City's planned sewer service area, and

WHEREAS, having a current and comprehensive WWMP is a critical step in keeping ahead of the replacement requirements of an aging infrastructure system and the pressures of expanding urban growth, and

WHEREAS, WWMP has identified a Capital Improvement Program for both Wastewater Collection and Treatment Facilities that will be required for the build-out of the City's Sewer Service Area, and

WHEREAS, Carollo Engineers has completed the 2007 Wastewater Master Plan, with Addenda,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the 2007 Wastewater Treatment Master Plan, with Addenda (Phase 1 - Collection System and Phase 2 - Treatment System) as complete.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember O'Bryant, who moved its adoption, which motion being duly seconded by Councilmember Dunbar , was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, Marsh, O'Bryant
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	Olsen, Mayor Ridenour

ATTEST: Jean Morris
JEAN MORRIS, City Clerk

FEB - 5, 2008

THIS RESOLUTION WAS RESCINDED BY MODESTO CITY COUNCIL RESOLUTION 2008-070

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-180

A RESOLUTION AMENDING SECTION 3.D.2.h OF RESOLUTION NO. 2006-61 TITLED "CAPITAL FACILTIES FEES POLICIES AND PROCEDURES" TO MODIFY THE EXEMPTION POLICIES FOR REPLACEMENT AND RECONSTRUCTIONN OF NON-RESIDENTIAL AND MULTI-FAMILY RESIDENTIAL STRUCTURES

WHEREAS, Sections 8-1.904 of the Modesto Municipal Codes authorizes the Council by resolution to establish Capital Facilities Fees ("CFF"), and

WHEREAS, since the inception of the CFF Program, multiple fee rate programs and policies relating to the administration of CFF have been established, and

WHEREAS, on January 24, 2006, the Council adopted Resolution No. 2006-61 combining the policies mentioned above and general CFF administrative guidelines into one document, called Capital Facilities Fees Policies and Procedures ("CFF Policies and Procedures"), and

WHEREAS, it may be necessary and beneficial to revise or modify the CFF Policies and Procedures from time to time, and

WHEREAS, current CFF exemption policy for replacement and reconstruction of non-residential and multi-family residential use structures permits applicants to expand square footage by no more than ten percent (10%) to receive a CFF exemption, and

WHEREAS, current CFF exemption policy for replacement and reconstruction of non-residential and multi-family residential use structures requires applicants expanding square footage by more than ten percent (10%) to pay full CFF based on the square footage of the entire structure, and

WHEREAS, it is recommended that the CFF exemption policies for the replacement and reconstruction of all non-residential and multi-family residential use

structures be modified to require CFF payment to be made on the incremental difference in total square footage of new construction,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby amends the CFF Policies and Procedures as follows and incorporated herein by reference:

Section 3.D.2.h. of the CFF Policies and Procedures read as follows:

For new developments, when a structure is demolished and a new structure is built, an exemption is appropriate for the structure that was destroyed provided:

Residential exemption: Any replacement or reconstruction of a residential structure that has been destroyed or demolished, provided that the building permit for reconstruction is obtained within two (2) years after the building was destroyed or demolished except to the extent that additional units are created and replacement or reconstruction is limited to residential use only.

Multi-family Residential: The payment of CFF will be exempt for the rebuilding of any multi-family residential structure that has been destroyed or demolished if both of the following conditions are met:

1. The square footage of the rebuilt structure is equal to or less than the square footage of the destroyed or demolished structure, and
2. The number of residential units in the rebuilt structure is equal to or less than the residential units that were contained in the destroyed or demolished structure.

Non-residential exemption: The payment of CFF will be exempt for the rebuilding of any non-residential structure that has been destroyed or demolished if both of the following conditions are met:

1. The square footage of the rebuilt structure is equal to or less than the square footage of the destroyed or demolished structure, and
2. The use of the rebuilt structure is the same as the destroyed or demolished structure.

If Condition #2 is met, and the square footage increases, then CFF shall be paid on only the incremental square footage increase.

BE IT FURTHER RESOLVED that Section 3.D.2.h. of Resolution No. 2006-61 is hereby amended effective upon adoption of this resolution, and all other provisions of

Resolution No. 2006-61 not in conflict with this resolution shall remain in full force and effect.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 13th day of March, 2007, by Councilmember Marsh, who moved its adoption, which motion being duly seconded by Councilmember O'Bryant, was upon roll call carried and the resolution adopted by the following vote:

AYES: Councilmembers: Dunbar, Hawn, Keating, Marsh, O'Bryant

NOES: Councilmembers: None

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-181

A RESOLUTION APPROVING AN AMENDED ADVANCED FUNDING AGREEMENT FOR THE TIVOLI SPECIFIC PLAN AREA BETWEEN THE CITY OF MODESTO, ON THE ONE HAND, AND RUSSELL A. NEWMAN, PROFESSIONAL LAW CORPORATION, TOM TROMBETTA, AND SHERRY TROMBETTA, ON THE OTHER HAND, FOR THE PREPARATION OF A FACILITIES MASTER PLAN, INFRASTRUCTURE FINANCE PLAN, AND FOR FORMATION OF A COMMUNITY FACILITIES DISTRICT FOR THE TIVOLI SPECIFIC PLAN AREA, AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AMENDED AGREEMENT

WHEREAS, Russell A. Newman, Professional Law Corporation, Tom Trombetta, an Individual, and Sherry Trombetta, an Individual ("Applicant"), have agreed to advance funds necessary to prepare a Facilities Master Plan ("FMP") and Infrastructure Finance Plan ("IFP"), and for formation of a Community Facilities District ("CFD") for the Tivoli Specific Plan Area, and

WHEREAS, the parties agreed to enter into an Amended Advanced Funding Agreement for the Tivoli Specific Plan Area by and between the City and the Applicant relating to advances made and to be made by the Applicant to the City, and providing for potential reimbursement to the Applicant if and when certain funds from the Tivoli CFD become available, a copy of which is attached as **Exhibit A**,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Amended Advanced Funding Agreement for the Tivoli Specific Plan Area between the City of Modesto, on the one hand, and Russell A. Newman, Professional Law Corporation, Tom Trombetta, and Sherry Trombetta, on the other hand, is hereby approved.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the Amended Advanced Funding Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, O'Bryant, Olsen, Mayor Ridenour
NOES:	Councilmembers:	None
ABSENT:	Councilmembers:	Marsh

AMENDED ADVANCED FUNDING AGREEMENT
FOR THE TIVOLI SPECIFIC PLAN AREA

THIS AMENDED ADVANCED FUNDING AGREEMENT FOR THE TIVOLI SPECIFIC PLAN AREA (this "Agreement"), dated as of _____, 2007 ("Effective Date"), is entered into by and between the CITY OF MODESTO, a municipal corporation of the State of California ("City"), on the one hand, and RUSSELL A. NEWMAN, a Professional Law Corporation, and TOM TROMBETTA, an individual and SHERRY TROMBETTA, and individual (collectively the "Applicants"), on the other hand.

RECITALS:

A. Applicants have - legal interests in real property located within the Tivoli Specific Plan Area ("Specific Plan") shown in Exhibit A attached hereto and incorporated herein by this reference, and are interested in pursuing development of properties in the Specific Plan.

B. Applicants have requested that the City prepare a Facilities Master Plan and Infrastructure Finance Plan ("FMP/IFP"), and create an appropriate financing mechanism, such as a community facilities district ("CFD") for the Specific Plan in order to facilitate the master planning and financing of various public facilities and services which are necessary to serve or desirable for the development of the Specific Plan (collectively the "Project").

C. City has either retained, or will retain outside consultants, to assist it with the Project and, if the City determines to proceed with the formation of a CFD, to assist it in connection therewith and with the possible issuance of bonds.

D. The scope of work for the Project ("Scope"), including the estimated costs for completing the Project ("Estimated Costs"), is attached as Exhibit B.

E. Collectively applicants are prepared to deposit with the City the amounts needed to fund as set forth in the Scope plus 30% for staff time and expenses in order to provide the City with an initial source of funds with which to pay expenses expected to be incurred in connection with the Project. Additional deposits will be provided by Applicants, as required by the City. Applicants desire to share in said costs in order to facilitate Applicants' ability to secure development entitlements for and annexation of Applicants' properties.

F. The City and Applicants are desirous of entering into this Agreement in order to provide monies for the City's costs for preparing the Project on a time and materials basis, to provide mechanisms by which the funds deposited under this Agreement shall be applied and by which Applicants may make additional deposits, and to reimburse Applicants for monies advanced for the benefit of other landowners in the Project.

G. Pursuant to California Government Code Section 53314.9 and the City's CFD Policies and Procedures, the City Council of the City is authorized to accept advances of funds or work-in-kind from any source, including, but not limited to, private persons or private entities, and may provide, by resolution, for the use of those funds or work-in-kind for any authorized purpose, including, but not limited to, paying any costs incurred in connection with the planning and formation of a community facilities district. The City Council of the City is also authorized to enter into an agreement, by resolution, with the person or entity advancing the funds or work-in-kind to

repay all or a portion of the funds advanced or to reimburse the person or entity for the cost or value of the work-in-kind provided that certain conditions are met. The conditions to be satisfied with respect to funds advanced require that (1) the proposal to repay the funds or to pay the cost or value of the work-in-kind must be included in the resolution of intention for the proposed community facilities district and in the resolution of formation for the proposed community facilities district, (2) any proposed special tax is approved by the qualified electors of the community facilities district and, if a proposed special tax is not approved, any funds advanced which have not been committed for any authorized purpose by the time of the election must be returned to the person or entity advancing funds and (3) any work-in-kind accepted shall have been performed or constructed as if the work had been performed or constructed under the direction and supervision, or under the authority, of the local agency.

H. The City and the Applicants are desirous of entering into this Agreement in accordance with Government Code Section 53314.9 and the City's CFD Policies and Procedures in order to provide a mechanism by which the Applicants may make additional deposits if determined necessary pursuant to the City's CFD Policies and Procedures and, when and if bonds are issued and proceeds are available, the CFD can reimburse the Applicants for the amounts advanced by the Applicants.

AGREEMENT

NOW, THEREFORE, in consideration of the mutual promises and covenants set forth herein, the parties hereto agree as follows:

1. Recitals. Each of the above recitals is incorporated herein and is true and correct.

2. Proposed Preparation of the Facilities Master Plan and Infrastructure Financing Plan.

   a. Applicants agree to pay all costs of preparing, processing and approving the FMP/IFP.

   b. On or about January 9, 2007, Applicant Russell A. Newman, PLC ("Newman") executed an Advanced Funding Agreement with the City. On or about December 5, 2006, Newman deposited an initial deposit of $300,000 to fund Task 1 as identified in the Scope ("Initial Deposit"). On or about January 10, 2007 City issued a Notice to Proceed to its Consultant to proceed with Task 1 on a time and materials basis. The Initial Deposit will be held in trust by the City and used solely for the purposes set forth in this Agreement.

   c. Prior to Council consideration of this Agreement, Applicants shall deposit with the City their proportionate shares of the remainder of the Estimated Costs, excluding costs for formation of the CFD, based on the percentages and in the amounts shown on Exhibit C attached hereto ("Supplemental Deposit"). The Supplemental Deposit includes 30% for staff time and expenses. The Supplemental Deposit will be held in trust by the City and used solely for the purposes set forth in this Agreement. Upon receipt by the City of the Supplemental Deposit and all documents deemed necessary by the City to proceed with the Project, the City will commence work on the Project on a time and materials basis and will provide a Notice to Proceed to its Consultant to

proceed with all remaining Tasks. In connection therewith, the City has either retained, or will retain, the consultants that the City determines necessary or convenient to assist it with the Project and, if the City determines to proceed with the formation of the CFD, to assist it in connection therewith and with the possible issuance of bonds.

After the Initial Deposit and Supplemental Deposit have been expended on the Project, Applicants shall make additional advances to the City as provided by subparagraph (e), below, until the Project has been completed or terminated, and all costs associated with the Project have been fully paid.

d. The consultants shall submit invoices to the City for payments based on work completed. Such invoices will be promptly sent by the City to the Applicants, who will have five (5) business days to challenge the work performed. The City will in good faith consider the position of the Applicants prior to approving payment for the invoice. Applicants understand and agree that City shall have the right, in its sole discretion, to approve and pay all such consultant invoices, and may do so without obtaining Applicants' approval.

Applicants shall make additional advances to the City within ten (10) business days following receipt from the City of a request for an additional advance to the cover the costs referred to herein. Any additional advances shall be made by Applicants based on the proportionate share that each party paid toward the original deposits ("Additional Advances"). The percentage shares for purposes of making additional advances are set forth in Exhibit C. In the event that any Applicant does not deliver its share of the Additional Advances to the City within this ten (10) business day period, the City will notify the other Applicant and offer the other Applicant the opportunity to deposit an amount equal to the missing share of the Additional Advances, then the reimbursement percentages will be adjusted accordingly. If no Applicant provides the Additional Advance, then City will have no obligation to proceed with any activity relating to the Project.

An Applicant may notify the City at any time, in writing, of its intention to abandon the Project. Within ten (10) business days of such notice City shall instruct its consultants to cease work immediately unless within that ten (10) business day period another Applicant offers to and does pay all funding costs which would have been paid by the Applicant who withdraws. The Applicants shall be responsible for all costs and expenses incurred by the City or any City consultant or advisors relating to the Project until City issues this cease work notice.

e. Within 60 calendar days after issuance of a cease work notice, City agrees to return to Applicants all unexpended amounts of the Initial Deposit, Supplemental Deposit and any subsequent deposits which exceed all costs and expenses incurred by City relating to the Project.

f. Applicants agree that, notwithstanding the funding and reimbursement obligations under this Agreement, the consultants selected by the City shall be the contractors exclusively of the City and not of the Applicants. Except for those

disclosures required by law including, without limitation the Public Records Act, all conversations, notes, memoranda, correspondence, and other forms of communication by and between the City and its consultants shall be, to the extent permissible by law, privileged and confidential and not subject to disclosure to the Applicants. Applicants agree that they shall have no claim to, nor shall they assert any right in any reports, correspondence, plans, maps, drawings, news releases or any and all other documents or work project produced by City's consultants. Applicants understand that they will not be third party beneficiaries to City's contracts with the consultants. City will consult with Applicants prior to replacing its current consultants; however, Applicants agree that City may select other consultants to replace its current consultants and may do so without obtaining Applicants' approval.

g. City and Applicants shall work cooperatively and in good faith to facilitate completion of the Project as quickly as possible and in the most cost effective way. City and Applicants shall meet and consult on dates and times as may be mutually agreed upon to discuss the progress and any key issues involved in the Project; provided, however, that Applicants' role is advisory only and that City shall control all aspects of the Project. The final work product to be produced by City's consultants shall be subject to the City's sole approval and control.

3. Proposed Formation of the CFD and Issuance of Bonds.

a. Applicants agree to pay all costs of preparing, processing and forming a CFD for the Specific Plan area.

b. Upon receipt by the City of a completed application for the formation of the CFD, the formation deposit for the CFD, and all documents related thereto as described in the City's CFD Policies and Procedures, the City will undertake to analyze the appropriateness of forming the CFD and the issuance of bonds by it. In connection therewith, the City has either retained or will retain, at the Applicants' expense, the consultants that the City determines necessary or convenient to assist it in studying the proposed formation of the CFD and, if the City determines to proceed with the formation of the CFD, to assist it in connection therewith and with the possible issuance of bonds.

c. Pursuant to the City's CFD Policies and Procedures, the Applicants shall make additional advances to the City within ten (10) days following receipt from the City of a request for an additional advance to cover the costs referred to herein. In the event the Applicants do not deliver the requested amount to the City within such ten (10) day period, the City will have no obligation to proceed with any activity relating to the formation of the CFD and/or the issuance of bonds. The Applicants may notify the City at any time, in writing, of their intention to abandon the formation of the CFD or the issuance of bonds. Upon receipt of such notice, the City shall instruct its consultants to cease work as soon as practicable. The Applicants shall be responsible for all costs and expenses incurred by the City or any City consultant or advisor relating to the proposed formation of the CFD and/or bond issuance until work with respect to the proposed formation or bond issuance ceases following the receipt of the Applicants' notice of abandonment. Within 60 calendar days after receipt of the Applicants' notice of

abandonment, City agrees to return to Applicants all unexpended amounts of any advances which exceed all costs and expenses incurred by City relating to the Project.

4. Reimbursement Procedure. If the CFD is formed and bonds are issued, bond proceeds in excess of the amount determined by the City's District Administrator to be required in order to administer the CFD, and to satisfy the requirements of the City's CFD Policies and Procedures with respect to capitalized interest and reserves, and to pay for the facilities and other incidental expenses, may be used to reimburse the Applicants for the amounts that the Applicants have advanced to the City in connection with this Agreement.

In the event that the CFD is not formed for any reason, or in the event that the CFD is formed and bonds are not issued for any reason, the City shall return any funds which have been advanced by the Applicants pursuant to this Agreement and which have not been expended, obligated or otherwise committed for any authorized purpose, subject to the complete reimbursement to the City of all of its direct and indirect costs. If the amounts previously advanced by the Applicants are insufficient to fully reimburse the City for all of its direct and indirect costs, the Applicants shall promptly pay to the City the amount of the deficiency in accordance with the percentages set forth in Exhibit C.

The City shall be entitled to pay any refund required pursuant to the provisions hereof to the entity that is the signatory to this Agreement irrespective of any changes in the ownership of the property or the organization of the Applicants, and the City shall not be required to pay interest on any amount required to be refunded pursuant to this Agreement. The City shall issue refunds or reimbursements, if any, in accordance with the percentages set forth in Exhibit C.

5. Abandonment of the Project. Applicants understand that, subject to the satisfaction of all applicable legal requirements, the decision to review, process, prepare or approved the proposed Project, shall be each in the sole discretion of the City. No provision of this Agreement shall be construed as a promise, warranty or agreement by the City to review, process, prepare or approve the proposed Project. The City shall have no liability to Applicants for a decision not to review, process, prepare or approve the proposed Project.

6. Abandonment of Proposed CFD. Applicants understand that, subject to the satisfaction of all applicable legal requirements, the decision to form the CFD and the decision to issue bonds shall be each in the sole discretion of the City. No provision of this Agreement shall be construed as a promise, warranty or agreement by the City to form the CFD or to issue bonds. Should the proceedings to form the CFD be abandoned for any reason, the City shall provide written notification of such abandonment to Applicants and shall return to Applicants all unexpended amounts of the Initial Deposit (and any subsequent deposits) which exceed all costs and expenses incurred by the City relating to formation of the CFD. Said monies shall be returned within 60 days of the issuance of the written notice of abandonment. Except for such reimbursement, the City shall have no liability to Applicants for a decision not to form the CFD or issue bonds.

7. Indemnification and Hold Harmless. Applicants hereby assume the defense of, and indemnify and save harmless, the City and each of its officers, directors and employees, from and against all actions, damages, claims, losses or expenses of every type and description to which they may be subjected or put, by reason of or arising out of any acts or omissions of Applicants or any of the Applicants' officers, employees, contractors and agents in connection with the proposed formation of the CFD or any work-in-kind provided by or on behalf of the Applicants or their

consultants, except for any action, damages, claims, losses or expenses arising out of the sole negligence or willful misconduct of the City, its officers, directors, employees or agents.

8. Notices. Any and all notices permitted or required to be given hereunder shall be deemed duly given and effective (1) upon actual delivery, if delivery is by hand; or (2) five (5) days after delivery into the United States mail if delivery is by postage paid registered or certified (return receipt requested) mail. Each such notice shall be sent to the parties at the address respectively indicated below or to any other address as the respective parties may designate from time to time.

Each party may change its address for delivery of notice by delivering written notice of such change of address to the other party.

9. Assignment. The Applicants may not assign their interests in this Agreement without the prior written consent of the City, which consent shall not be unreasonably withheld. Any assignment or attempt to assign this Agreement without the prior written consent of City shall be deemed null and void as of the date of the purported assignment. All covenants, stipulations, and agreements in this Agreement shall bind any such representatives, successors and assigns.

10. Severability. If any part of this Agreement is held to be illegal or unenforceable by a court of competent jurisdiction, the remainder of this Agreement shall be given effect to the fullest extent permitted by law.

11. Entire Agreement. This Agreement contains the entire agreement between the parties with respect to the matters provided for herein. All previous proposals, offers and communications relative to this Agreement, whether oral or written, are hereby superseded except to the extent that they have been incorporated into this Agreement. No future waiver of or exception to any of the terms, conditions, and provisions of this Agreement shall be considered valid unless specifically agreed to in writing by all the parties.

12. Amendments. This Agreement may be amended or modified only by written instrument signed by all parties. Any amendment or addendum to this Agreement shall expressly refer to this Agreement.

13. Governing Law. This Agreement and any dispute arising hereunder shall be governed by and interpreted in accordance with the laws of the State of California.

14. No Third Party Beneficiaries. No person or entity shall be deemed to be a third party beneficiary hereof; and nothing in this Agreement (either express or implied) is intended to confer upon any person or entity, other than the City (and its officers, directors, employees and agents providing services under this Agreement) and the Applicants, any rights, remedies, obligations or liabilities under or by reason of this Agreement.

15. Singular and Plural; Gender. As used herein, the singular of any word includes the plural, and terms in the masculine gender shall include the feminine.

16. Termination. This Agreement shall terminate and be of no further force and effect on the third anniversary of the date of this Agreement unless expressly amended by the parties; provided, however, that the Applicants' obligations under Section 7 shall survive the termination and the City's obligation to provide reimbursement in accordance with Section 4 for expenses incurred prior to the termination date shall also survive termination.

17. Time is of the Essence. Except as otherwise expressly stated, time is of the essence in the performance of each and every action required pursuant to this Agreement.

18. Language Construction. The language of each and all paragraphs, terms and/or provisions of this Agreement, shall, in all cases and for any and all purposes, and in any way and all circumstances whatsoever, be construed as a whole, according to its fair meaning, and not for or against any party hereto and with no regard whatsoever to the identity or status of any person or persons who drafted all or any portion of this Agreement.

19. Representations of Authority. Each party signing this Agreement on behalf of a party which is not a natural person hereby represents and warrants to the other party that all necessary legal prerequisites to that party's execution of this Agreement have been satisfied and that he or she has been authorized to sign this Agreement and bind the party on whose behalf he or she signs.

20. Relationship of Parties. Nothing contained in this Agreement shall be interpreted or understood by any of the parties, or by any third person, as creating the relationship of employer and employee, principal and agent, limited or general partnership, or joint venture between City and

Applicant or its agents, employees or contractors. Except as City may specify in writing, Applicants shall have no authority to act as an agent of City or to bind City to any obligation.

21. Title of Parts and Sections. Any titles of the sections or subsections of this Agreement are inserted for convenience of reference only and shall be disregarded in interpreting any part of this Agreement's provisions.

22. Waiver. The waiver by any party to this Agreement of any action, obligation, or commitment required by this Agreement or of a breach of any provision hereof shall be in writing and shall not operate or be construed as a waiver of any other or subsequent breach hereof or of any action, obligation, or commitment required by this Agreement unless specifically stated in writing.

23. Discretion of the City. City's execution of this Agreement in no way limits the discretion of City in the permit and approval process in connection with any entitlements within City's jurisdiction, including those related to the Project, or with the design, construction or funding of any onsite or offsite infrastructure improvements within the City's jurisdiction.

24. Prior Agreement. The parties acknowledge that on or about January 9, 2007, City and Newman entered into a contract for the same or similar work as contemplated by this Agreement ("Prior Agreement"). As of the Effective Date of this Agreement, this Agreement shall supersede the Prior Agreement and said Prior Agreement shall be automatically terminated. The parties further agree that to the extent any conflict exists between this Agreement and the Prior Agreement, the terms and conditions of this Agreement control.

IN WITNESS WHEREOF, the CITY OF MODESTO, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. 2007-____, adopted by the Council of the City of Modesto on the _____day of _____, 2007, and Russell A. Newman, PLC, Tom Trombetta and Sherry Trombetta have caused this Agreement to be executed in duplicate, as of the Effective Date first written above.

Harris & Associates
Scope of Work
For Task Order No. 4
Tivoli Development Project
Preparation of the Facilities Master Plan
and Infrastructure Financing Plan
December 27, 2006

The following describes Harris and Associates' (Harris) approach and level of effort for this scope of work. There are four sub consultants on this project; West Yost and Associates for Water; Carollo Engineers for Wastewater; Omni Means for Traffic; and Stantec for Storm Drainage. The scopes of work for each of the sub consultants are shown in Exhibits A through D. The cost estimate for Harris' hours and the sub-consultants are summarized in Exhibit E. Harris' hourly rates are shown in Exhibit F. In addition, Goodwin Consulting Group will prepare the necessary documents for the Community Facilities District. That fee is included in Exhibit D.

The following work will be performed on a time and materials (four sub-tasks):

- Task 4.1 reviews the technical studies associated with the project's Final EIR and defines the obligation (benefit and burden) that each acre of land within the development will have for infrastructure improvements;
- Task 4.2 produces the infrastructure financing plan for the build out of the Tivoli development and specifically sets the financing for the Capital Improvement Projects that are triggered by the development and anticipated during the first 10 years. The City and developer will define the phasing of development and the costs as identified in Task 4.1;
- Task 4.3 prepares of the Facilities Master Plan for the proposed development.
- Task 4.4 establishes the Community Facilities District formation

Task 4.1 – Preparation of a Benefit and Burden Analysis

The City will provide all of the technical studies prepared for the project's Final EIR, and Harris will review the required data on land uses that are anticipated in the Tivoli Specific Plan Area. Harris will collect from the developer, with the City's help, this land use data in electronic format. The land use data will include the development layout, irrigation areas (potable water demand), land uses, acreage, dwelling units, square footage of non-residential building space, pavement areas, and planned layout of the arterial streets and internal street network, which will be the responsibility of the project on and off-site infrastructure, as outlined in the project's Specific Plan and Draft EIR. Harris will also review the Draft Environmental Impact Report to determine all recommended mitigation measures

Harris will describe each type of capital facility that has been and will need to be constructed to serve the Tivoli Specific Plan Area. This data will be given to each of the sub-consultants to prepare the necessary reports to support the development of the Infrastructure Finance Plan

(IFP). These sub-consultants' reports will tier off the work completed for the Draft EIR by the City, and will include conceptual layouts and cost estimates of the infrastructure needed to support build-out of the development.

Based on the existing technical studies for the EIR and the new studies to support the IFP, Harris will prepare a Benefit and Burden Analysis. This analysis will define the infrastructure and cost burden that each land use will receive from the infrastructure that will be included in the IFP and detailed in the Facilities Master Plan (FMP). It will also identify the cost burden that each acre of land will have towards public facility improvements, by land use, at build-out of the development area. The benefit and burden analysis will also identify those projects that will need to be funded up-front by the developer in order to allow the development to proceed regardless of how the developer chooses to phase the construction of the project. This analysis will not define how these costs will be paid for. The analysis will be prepared for the entire development at build-out. As the project is further defined, if a phased Benefit and Burden Analysis is proposed, additional scope and consultant fees will be required.

Traffic Assessment – Omni-Means, Ltd.

Based on provided traffic model updated by Downling and Associates, Omni-Means will perform a "select link" analysis to identify traffic improvements required to mitigate the Tivoli development impact. These improvements will be determined based on existing deficiencies and the proportion of total improvements needed for new development phasing. Omni-Means will also prepare cost estimates for these mitigation projects, including cost per square foot for right-of-way acquisition. The traffic fee will be developed and applied on a cost per trip generation rate for each land use. Additionally, possible alternative funding sources will be reviewed and evaluated.

Water Capacity Study – West Yost associates (WYA)

Based on provided information regarding land use, roadway alignments, etc. WYA will model the proposed water system for project build-out. WYA will modify the existing water system hydraulic model to be representative of the new water demands of the project. This model will then be used to evaluate the potential hydraulic impacts of adding the new water demands required to serve the project on the City's existing water system. If the City's existing water system cannot meet the City's *minimum* water system design criteria with the increased demands, then WYA will make recommendations for whatever new water supply sources and/or water system infrastructure facilities will be required to mitigate the hydraulic impacts of the Project for both build-out and project phasing. WYA will prepare an estimate of the probable construction costs for the infrastructure required to provide adequate supply.

Wastewater – Carollo Engineers

Based on provided land use information, Carollo will update the hydraulic model to reflect changes in planning assumptions that have occurred since they completed the 2005 Final Wastewater Capacity Study. Carollo will revise needed sewer improvements to reflect changes in planning assumptions. The collection system and WWTP improvements will also be revised as necessary to accommodate growth based on revisions to the hydraulic model and updates to the WWTP Master Plan currently being prepared by Carollo. Carollo will develop probable construction cost estimates to reflect changes in the Capacity Study.

Storm Drain - Stantec

Based on provided land use information, existing studies, and Developer provided grading plans and detention basin plans and inverts, Stantec will define drainage sub-basin areas and perform hydrologic evaluations to determine10-year and 100-year discharges that will be generated by the development at build-out. Stantec will additionally provide peer review of the proposed dual use detention basin to access conformance to existing City guidelines.

Harris will participate in one (1) City Council presentation associated with this task, as well as three (3) meetings with staff and the developer. Harris will also set and attend meetings related to each infrastructure analysis with the sub consultants and various City departments as necessary. The Benefit and Burden analysis will define water, sewer, traffic, park, storm drainage and public and government facilities impacts.

Harris will provide ten (10) copies of the Draft Benefit and Burden Analysis for review by the City staff. Once written comments have been received, at the City's direction, a final draft will be prepared for review by the developers. At this point, Harris will try to reach consensus among the parties in order to proceed with a facility cost summary that all agree is appropriate. Twenty (20) final copies, including 1 electronic copy, will be provided to the City once all final comments have been received and incorporated.

Harris will assist the City in the preparation of the City Council staff report associated with the presentation of the Tivoli Development Benefit and Burden Analysis.

Estimated Level of Effort and Costs for Task 4.1:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	460	$ 69,540	3 w/staff; 1 w/Council
West Yost - Water	180	$ 28,000	
Carollo - Wastewater	200	$ 37,500	2 w/staff
Omni-Means - Traffic	292	$ 43,660	2 w/staff
Stantec - Drainage	164	$ 18,011	2
Mark-ups on Subs		$ 12,717	
Totals	**1,296**	**$ 209,428**	

Deliverables for Task 4.1

10 copies of the draft Benefit and Burden Analysis
10 copies of a final draft of the Benefit and Burden Analysis
20 copies of the final Benefit and Burden Analysis
1 electronic copy of the final Benefit and Burden Analysis.

Task 4.2 – Infrastructure Finance Plan

After the Benefit and Burden analysis is completed and prior to beginning the Infrastructure Finance Plan or Facilities Master Plan, Harris will meet with the developer and the City to determine how all of the infrastructure project costs will be paid. These payment methods include: 1) Developer "build and dedicate", 2) condition of approval on the development mapping, 3) defined points within a development agreement, 4) part of a land secure financing district and/or 5) paid for by the development impact fees for the Tivoli development.

Harris will work with the City and developer(s) to set project phasing. Harris, the sub-consultants and the City will build upon the Benefit and Burden analysis, and shall meet with and proceed with the coordination of all Finance Plan Consultants, including City CFD staff, the Appraiser, and Bond Counsel (assumed to have separate contracts with the City) regarding assumptions upon which the Tivoli Development Project IFP shall be performed.

The purpose of the IFP will be to clearly describe what is expected to occur with regard to land uses, infrastructure costs and financing. This is an iterative process that will require consensus building among all of the stakeholders. Harris will play an integral role in generating this consensus.

The IFP will define the financing details related to water, sewer, storm drainage, traffic, public facilities and parks. For those portions of the infrastructure that are associated with impact fees being prepared by Harris or the CFD being prepared by the City, a cash flow analysis will be provided defining when each project is anticipated and can be funded.

Harris will prepare a Draft Infrastructure Finance Plan based on the Technical Analyses performed by the Sub-consultants to include for each program: a project detail sheet, the project description, the itemized project costs, the capital improvement program (CIP) numbers, a priority list of projects, and cash flow projections based upon estimated revenue from fees and debt financing.

Upon approval of the draft plan, Harris will assist City staff in two (2) City Council presentations for the IFP. The first presentation will be a public meeting to present the IFP and receive comments. The second presentation will adopt the IFP and associated Development Impact Fees for Tivoli.

Harris will assist the City in the preparation of all required City Council staff reports, resolutions and public notices associated with the adoption of the IFP.

Harris will provide ten (10) copies for City staff review. At the City's direction, Harris will complete a final draft to be presented to stakeholders.

Estimated Level of Effort and Costs for Task 4.2:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	457	$ 63,250	4 w/staff; 2 w/Council
West Yost - Water	200	$ 29,500	1 w/staff
Carollo - Wastewater	128	$ 23,950	2 w/staff
Omni-Means - Traffic	208	$ 33,896	2 w/staff
Stantec - Drainage	376	$ 44,199	2
Mark-ups on Subs		$ 13,155	
Totals	**1,369**	**$ 207,950**	

Deliverables for Task 4.2

10 copies of the draft Infrastructure Finance Plan
10 copies of a final draft of the Infrastructure Finance Plan
20 copies of the final Infrastructure Finance Plan
1 electronic copy of the final Infrastructure Finance Plan.

Task 4.3 – Facilities Master Plan

Harris will prepare the Facilities Master Plan, which includes the following:

- Introduction
- Sanitary Sewer System
- Storm Drainage System
- Construction Phasing
- Opinion of Probable Cost (shown in IFP)
- Circulation System
- Potable Water System
- Parks (provided by City)

Harris will prepare the "Tivoli Facilities Master Plan". It will incorporate all of the information provided by the Sub-consultants related to infrastructure requirements. This task assumes that no aerial or field surveying is required but will be available from the other work being completed by the developer. If survey information is not available, then an additional task to provide this service will be needed.

The document will also include:

- Mitigation Measures from the EIR for Tivoli Specific Plan.
- Implementation and Funding
- Amendment Process.

This scope of work assumes that thirty (30) sheets of drawings will be created during this process.

Harris assumes that the adoption of the FMP will occur as part of the IFP process discussed in Task 4.2.

Ten (10) copies of the 30% design level drawings will be submitted to the City for review. The 30% submittal would include all drawings anticipated to be submitted and would include alignments and planned locations of all facilities. Once the City has submitted written comments to Harris, 90% drawings will be completed. Ten (10) copies of the 90% drawings will be submitted to the City for final review. The 90% submittal would include all alignments for roads and pipes including face of curb, edge of pavement, existing right-of-way, future right-of-way, and existing buildings, profiles for all roads and pipes including slopes, and elevation call-outs, cross section of roads including lane widths, landscaping widths and side walk widths, intersection details including lengths of turn lanes, lane configurations, face of curb, edge of pavement, existing right of way, future right of way, and any existing buildings and location of any planned detention basins, parks, schools, and any other pertinent facilities. The 90% would also include all notes, all call-outs, any details that are to be incorporated such as curb and gutter, sidewalk, etc. or reference to the City's design standards.

Twenty (20) copies of the final drawings, including an electronic copy, will be provided to the City when all comments have been addressed.

Task 4.3 assumes 4 meetings with the City and/or developers to discuss the drawings.

Estimated Level of Effort and Costs for Task 4.3:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	1,356	$ 157,060	4 w/staff
West Yost - Water	80	$ 17,500	
Carollo - Wastewater	24	$ 5,150	2 w/staff
Omni-Means - Traffic	36	$ 5,904	2 Public
Stantec - Drainage	164	$ 21,742	2
Mark-ups on Subs		$ 5,030	
Totals	**1,660**	**$ 212,386**	

Deliverables for Task 4.3

10 copies of the 30% level drawings of the Facilities Master Plan
10 copies of a 90% level drawings of the Facilities Master Plan
20 copies of the final Facilities Master Plan
1 electronic copy of the final Facilities Master Plan

Task 4.4 – Community Facilities District

Harris will manage the formation of the Community Facilities District.

A. Goodwin Consulting Group, Inc. (GCG) will serve as special tax consultant to assist the City of Modesto (City) in the formation of a Mello-Roos Community Facilities District (CFD) that will fund public improvements and public services required to serve the Tivoli project. GCG will meet with City staff, property owners, the City's financial advisor, bond counsel and other members of the financing team to compile data, and to discuss the structure and components of the Mello-Roos cash flow analysis.

This task will include:

(i) Determining the initial boundaries of the CFD and future annexation areas both inside and outside existing City limits

(ii) Identifying proposed land uses, public facilities to be financed, annual storm drain and landscape maintenance costs, anticipated absorption rates, and timing and number of bond issues

(iii) Discussing assumptions to be used for the initial allocation of special taxes to land uses within the CFD and reviewing the advantages and disadvantages associated with various allocation methods

(iv) Evaluating the potential for separate CFDs, improvement areas or tax zones based on the objectives of the City and developers, and

(v) Coordinating with the financial advisor regarding the anticipated bond structure, including special tax/debt service escalator, bond interest rate, short-term reinvestment rate, capitalized interest, reserve fund, and other features that may affect the size of bond issues and the corresponding annual debt service.

B. Mello-Roos Cash Flow Analysis: GCG will use the information compiled to prepare an analysis of the annual cash flow of the CFD. The analysis will identify the maximum special tax that will be needed to maintain required debt service coverage on bonded indebtedness issued on behalf of the CFD.

In addition, the cash flow analysis will

(i) Estimate the special tax burden on undeveloped property based on a given absorption scenario

(ii) Determine the size of the initial and subsequent bond sales taking into consideration minimum value-to-lien requirements set forth in state law and City policy, and

(iii) Evaluate the increased bonding capacity that is created from an escalating special tax and debt service or other unique bond structure.

GCG will present the cash flow analysis at a second meeting and discuss alternatives that the working group would like analyzed. Subsequent iterations of the analysis will be prepared based on feedback from City staff, affected property owners, the financial advisor, bond counsel and other members of the working group. Ultimately, through review and discussion of each alternative, the team will select a special tax structure, which GCG will incorporate in the Rate and Method of Apportionment of Special Tax outlined below.

C. Rate and Method of Apportionment of Special Tax: Based on the special tax structure selected pursuant to Task B-2 above, GCG will prepare the Rate and Method of

Apportionment of Special Tax (RMA), which will serve as the official special tax formula for the CFD. The RMA will provide detail and direction as to how the special tax should be levied in future years to ensure adequate revenues are available for timely repayment of debt service on bonded indebtedness issued by the CFD. The RMA will be included as an exhibit to the Resolution of Intention to Form the CFD, which will be adopted by the City Council as part of the first set of actions taken towards forming the CFD.

In addition to providing guidance relative to the annual levy of special taxes in the CFD, the RMA will provide some or all of the following items:

- Identification of the maximum special tax for each special tax category, including each category of developed and undeveloped property
- Provision for a back-up special tax or alternate mechanism to be used to maintain maximum special tax revenues in the event that land uses change in future years
- A detailed prepayment formula that will provide flexibility for a property owner to prepay all or a portion of the special tax obligation after some or all bonds have been issued for the CFD
- If additional property is expected to annex into the CFD, a description of the "catch-up tax" that will apply to annexing parcels to equalize the cumulative special tax burdens (if applicable)

D. *Contributions and Review of Other CFD Formation Documents:* In coordination with Harris, the City, and Stakeholders, GCG will review, prepare and contribute to other documents required in the CFD formation proceedings. Specifically, GCG will prepare the CFD Report required, pursuant to Section 53321.5 of the Government Code, to be filed with the City Clerk prior to the public hearing. GCG will also review all CFD formation documents and, based on results of the cash flow analysis, assist in calculating the maximum bond authorization and appropriations limit for the CFD. GCG will also ensure that the CFD boundary map is consistent with the areas expected to be included in the CFD when the maximum special tax and/or bonding capacity is calculated.

E. In preparation for the issuance of bonds, GCG will review the bond purchase agreement, fiscal agent agreement and/or bond indenture to assure that the flow of special tax revenues and interest earnings as set forth in these documents are consistent with assumptions used in the Mello-Roos cash flow analysis.

In addition, GCG will review the preliminary official statement and, at the request of the financial advisor or underwriter, prepare one or more of the following:

- A table demonstrating special tax coverage based on the projected stream of revenues compared to annual debt service on the bonds
- If multiple landowners/developers are included within the CFD, a table showing diversification of special tax burdens among the major participants
- Incorporating information provided in the appraisal, a table identifying the value-to-lien ratios for each assessor parcel or major property owner

- A table summarizing a sample tax bill for individual residential units within each tax category to demonstrate compliance with City policy pertaining to the total effective tax rate
- Any other tables requested by the financial advisor and/or underwriter to assist in disclosure related to the special tax formula

F. *Certification of Special Tax Revenues and Acceptance of Associated Liability:* GCG will execute the Certificate of Special Tax Consultant, which commits to bond buyers that the minimum debt service coverage will be maintained by application of GCG's tax formula regardless of land use changes that occur within the CFD in future years.

Task 4.4 assumes 4 meetings with the City and/or developers.

Estimated Level of Effort and Costs for Task 4.4:

Firm	Hours	Costs	Meetings in Scope
Harris - PM	212	$ 24,780	4 w/staff
Goodwin Consult Grp		$ 45,000	4 w/staff
Mark-ups on Subs		$ 4,500	
Totals	**212**	**$ 74,280**	

Deliverables for Task 4.4

See items A through E above.

Consulting Engineers

Exhibit "A"

December 13, 2006

Mr. Jim Bissell, P.E.
Program Manager
Harris & Associates
2850 North Tracy Blvd., Suite 200
Tracy, CA 95376

SUBJECT: Revised Proposal for Engineering Services – Evaluation of the Hydraulic Impacts of the Proposed Tivoli Project on the City's Existing Water System, and Related Engineering Support during Preparation of the FMP and IFP.

Dear Jim:

As requested, the following is West Yost Associates' (WYA) revised Scope of Work to provide Harris and Associates (HA) with limited engineering services related to evaluating the potential hydraulic impacts of the approximately 480 acre, Tivoli Development Project (Project) on the City of Modesto's (City's) existing water system. As part of these engineering services, we will provide HA with support services during preparation of the Facilities Master Plan (FMP), and provide HA with input during their preparation of the Infrastructure Financing Plan (IFP) and water system design, as limited and defined in our proposed Scope of Work.

Through our discussions with HA, it is understood that WYA will begin work on this Project after the Draft EIR has been publicly issued. Therefore, WYA has based the proposed scope and corresponding work efforts on the proposed land uses, acreages, roadway alignments, and other Project components as defined in the Draft EIR and Specific Plan. If any component in the Draft EIR or Specific Plan are modified, this will be considered a change in scope, and will require additional analysis and a budget augmentation prior to the completion of any related work products. WYA's proposed Scope of Work is as follows:

BASIC SCOPE OF WORK

Task 1: Update the Hydraulic Model and Hydraulically Analyze the System Demands of the Proposed Project (provides input to HA Task 4.1)

Based on the complete buildout of the Project water system defined in the Draft EIR (no Project phasing will be evaluated in this task), WYA will model the proposed Project water system, and modify the City's existing water system hydraulic model to be representative of the new water demands of the proposed Project. These hydraulic model system modifications will include planned distribution system pipelines and other water facilities, and the major connections to the City's existing water system necessary to meet the Project's demands. Projected demands will be distributed throughout the appropriate Project area, according to the projected land use demands.

7041 Koll Center Parkway, Suite 110 Pleasanton, CA 94566 Phone 925 426-2580 Fax 925 426-2585 e-mail: mail@westyost.com

Using this modified hydraulic model of the City's existing water system, WYA will evaluate the potential hydraulic impacts of the increased water demands and various fire flow analyses from the Project on the City's existing water system. The potential hydraulic impacts of adding the new water demands required to serve the Project on the City's existing water system will be evaluated for such criteria as, supply availability, delivery pressure, maximum water velocity and head loss in pipelines under various demand conditions (including fire flows), system pressures and system redundancy/reliability. If the City's existing water system cannot meet the City's minimum water system design criteria with the increased demands of the Project, then WYA will make recommendations for whatever new water supply sources and/or water system infrastructure facilities (consistent with the previously identified capital facilities required to serve buildout of the City's Sphere of Influence), that will be required to mitigate the hydraulic impacts of the Project. Such water facilities could include any or all of the following: new wells, water storage tanks, booster pump station, additional and/or up-sized connections into the existing City system and additional transmission pipelines, distribution and/or looping pipelines. No Project phasing will be evaluated in this task.

This initial analysis of the hydraulic impacts on the City's existing water system will then be provided to HA for review and integration with the initial technical evaluations of the other utility consultants (storm water, wastewater and transportation). Based on HA's overall Project review, there may be slight infrastructure alignments or other modifications that will be required of the recommended water system to accommodate the Project's overall infrastructure utility needs. If required, these minor water system modifications will be made, the water system re-analyzed, and infrastructure recommendations modified, if appropriate. A budget of 16 hours has been allocated to make changes requested by HA. If for whatever reasons HA's requested changes will require WYA to expend an effort beyond the 16 hour budget, a budget augmentation will be required and must be approved by HA prior to the commencement of any work efforts beyond the 16 hours.

WYA will also prepare an estimate of the probable construction cost for the water system infrastructure required to provide adequate supply, system pressures and storage at buildout of the Project to connect to the City's existing water system. This cost estimate will be tied to the San Francisco Construction Cost ENR Index.

Work Product: A 10 to 15 page Technical Memorandum (TM) describing the water system evaluation criteria, planned sources of supply, and the conceptual water system infrastructure layouts and facilities required to provide water service for buildout of the proposed Project and/or to mitigate the hydraulic system impacts of the proposed Project on the City's existing water system, will be prepared as the work product of this task (design of these facilities is outside the scope of these provided services). WYA will provide HA with a PDF electronic copy of both the draft and final TMs. Three (3) hard copies of the Draft TM, and three (3) hard copies of the Final TM will also be provided to HA for distribution to the City. WYA will also meet once with HA or the City to receive comments to the draft TM before the final TM is issued.

This technical work is intended to provide the City with an analysis of the ability of the City's existing water system to continue to provide water at adequate pressure and flow to existing customers, with the incremental additional system demands of the entire proposed Project. It does not include an evaluation of water supply availability or reliability in response to SB 610 or 221.

Task 2: Hydraulic Modeling Refinements, Project Phasing and Infrastructure Financing (provides input to HA Task 4.2)

Similar to the hydraulic analysis conducted for Project buildout as described in Task 1 above, if required, each individual Project Phase will be hydraulically evaluated to identify the water system infrastructure required to serve each Project Phase. For budgetary purposes, WYA has assumed that this Project will be evaluated in three phases which are to be specifically identified and provided to WYA by HA. Additional hydraulic analyses beyond the three initial Phasing plans provided to WYA by HA can be evaluated if a budget augmentation and schedule extension is authorized and provided in writing to WYA.

Based on our hydraulic analysis conducted in this task, WYA will prepare a short TM to address the Mitigation Fee Act (Government Code sections 6600, et seq., AB 1600), and provide the specific facts required to support the Infrastructure Finance Plan (IFP, to be prepared by HA). If requested by HA, WYA will also conduct additional hydraulic analyses up to the limited budget assumed for this task. For budgetary purposes, WYA has budgeted a total of 200 hours of engineering effort to conduct the Project phasing analysis, prepare the TM, respond to HA's comments on submitted work products and/or conduct additional, requested hydraulic modeling. Any work efforts beyond the budgeted 200 hours will only be performed after a budget augmentation has been approved by HA.

Work Product: WYA will provide HA with a PDF electronic copy of both the draft and final TMs. Three (3) hard copies of the Draft TM, and three (3) hard copies of the Final TM will also be provided to HA for distribution to the City. WYA will also meet once with HA or the City to receive comments to the draft TM before the final TM is issued.

Task 3: Provide Design Level Support (provides input to HA Task 4.3)

If requested by HA, WYA will provide additional Facilities Master Plan engineering services beyond the conceptual system layouts provided in Tasks 1 and 2, to supplement the water pipeline and water facility design efforts of HA. Because the level of required engineering support is unclear at this time, we have set aside a budget of $17,500 for a senior water systems design engineer to assist HA on an "as-needed" basis. This budget corresponds to a total of approximately 80 hours of engineering effort. Any work efforts beyond the 80 hours of budgeted time will require a budget augmentation to be approved prior to any work being conducted.

COMPENSATION

WYA will perform the Basic Scope of Work described in Tasks 1 through 3 on a time and materials basis, at the billing rates set forth in WYA's Billing Rate Schedule, for a not-to-exceed budget of $75,000. The estimated level of effort and costs associated with performing each task are summarized below.

Table 1. Estimated Level of Effort and Associated Costs

Task	Description	Labor, hours	Estimated Costs, dollars
1	Update Model and Analyze Buildout System	180	28,000
2	Hydraulic Modeling Refinements, Phasing Plan and Infrastructure Financing	200	29,500
3	Provide Limited Water System Design Support	80	17,500
	Project Contingency (@ 0%)		0
	Total Basic Scope of Work (Tasks 1-3)	**460**	**$75,000**

Any additional services not included in this Scope of Work will be performed only after receiving written authorization from HA and a corresponding budget augmentation.

Please do not hesitate to call me if you have any questions or need additional information.

Sincerely,

WEST YOST ASSOCIATES

Gerry Nakano, P.E.
Project Manager

Attachment: 2007 Billing Rate Schedule

WEST YOST ASSOCIATES
Consulting Engineers

WEST YOST ASSOCIATES, INC.

2007 Billing Rate Schedule

(Effective January 6, 2007 through December 31, 2007)*

Position	Labor Charges (dollars per hr)
Principal/Vice President	198
Engineering Manager	187
Principal Engineer/Scientist	171
Senior Engineer/Scientist	154
Associate Engineer/Scientist	138
GIS Analyst	138
Engineer II/Scientist II	121
Engineer I/Scientist I	105
Construction Manager III	149
Construction Manager II	138
Construction Manager I	127
Resident Inspector III	116
Resident Inspector II	107
Resident Inspector I	94
Sr. Designer/Sr. CAD Operator	99
Designer/CAD Operator	88
Technical Specialist II	86
Technical Specialist I	75

Administrative IV	88
Administrative III	77
Administrative II	66
Administrative I	55

Hourly labor rates include Direct Costs such as general computers, system charges, telephone, fax, routine in-house copies/prints, postage, miscellaneous supplies, and other incidental project expenses.

Outside Services such as vendor reproductions, prints, shipping, and major WYA reproduction efforts, as well as Engineering Supplies, Travel, etc. will be billed at actual cost plus 15%.

Mileage will be billed at the current Federal Rate.

Subconsultants will be billed at actual cost plus 10%.

Computers are billed at $25 per hour for specialty models and AutoCAD.

A Finance Charge of 1.5 percent per month (an Annual Rate of 18 percent) on the unpaid balance will be added to invoice amounts if not paid within 45 days from the date of the invoice.

Billing rates apply to all computers and equipment, whether owned or rented by WYA, and to all employment categories including regular full-time, part-time, limited term and contract personnel as defined in WYA's Employee Handbook.

*This schedule will be updated annually

Attention: Mr. Miller

Subject: Tivoli Proposal for Engineering Services

Dear Mr. Miller:

Below is Carollo Engineers, P.C. (Carollo) scope of work to evaluate the City of Modesto's (City) Collection System and Wastewater Treatment Plant (WWTP) impacts resulting from the 480 acre Tivoli development.

SCOPE OF WORK

Task 1: Engineering Support during the Environmental Impact Report (EIR) Process

Carollo will provide the EIR consultant with information related to the collection system or WWTP improvements required to support the Tivoli development. For budgetary purposes, a total of 60 hours of engineering effort has been assumed, including attendance at up to two meetings with the EIR consultant. Work beyond the budget for 60 hours of engineering effort will only be performed after receiving written approval of a budget augmentation.

Task 2: Revise Hydraulic Model and Analyze Collection System and Wastewater Treatment Plant Impacts

Carollo completed the 2005 Final Wastewater Capacity Study for the Proposed Tivoli Development Project (Capacity Study). This work is supplemental to previously completed work and assumes that the City of Modesto or Harris & Associates (HA) will provide the necessary development layout and land use data to complete this revision to the Capacity Study. The Capacity Study developed sewer improvements to serve the proposed project. The study also identified improvements in the collection system and at the WWTP necessary to serve future growth, including the Tivoli development. This task includes:

- Update the hydraulic model to reflect changes in planning assumptions that have occurred since the completion of the Capacity Study.
- Revise sewer and lift station improvements to reflect changes in planning assumptions
- Revise conceptual sewer layout.
- Revise the collection system and WWTP improvements necessary to accommodate growth based on revisions to the hydraulic model and updates to the WWTP Master Plan currently being prepared by Carollo.
- Update probable construction cost estimates to reflect changes in the Capacity Study.
- Evaluate the impacts to existing facilities if the Tivoli development is constructed in phases. It is assumed that HA will provide Carollo with timelines for constructing the different phases of the Tivoli development. Carollo will evaluate and propose timelines for building sewer facilities.

Consistent with the master plan, revisions to the hydraulic model will not include modeling sewer mains smaller than 10-inches in diameter. Design, including development of plan/profile drawings is

outside the scope of these services. It is assumed that HA will provide available ground elevations of the development and areas north of Claratina Avenue.

Attend meetings with HA, the City and project applicant. Carollo assumed attendance by the project manager and an engineer at up to two (2) meetings and one (1) City Council or Finance Committee meeting.

Task 3: Park Fee

Not applicable to this scope of work.

Task 4: Infrastructure Finance Plan

Provide calculations to support HA's completion of the Infrastructure Finance Plan (IFP). Information will include project summary table, project descriptions, costs, and prioritization of projects. Provide input during preparation of the IFP and comment on draft IFP. Prepare for and attend meetings with HA, the City and project applicant. Carollo assumed attendance by the project manager and an engineer at up to two (2) meetings. For budgetary purposes, Carollo budgeted a total of 128 hours of engineering effort for assisting in the preparation of the IFP and attending meetings.

Task 5: Facilities Master Plan Review

Review Facilities Master Plan prepared by others. For budgetary purposes, Carollo budgeted a total of 24 hours of engineering effort for reviewing the wastewater collection system and treatment plant component of the Facilities Master Plan.

DELIVERABLE

Carollo will provide HA with a draft, final draft, and final report summarizing Tasks 1, 2 and 4. This report will be brief and serve as an amendment to the Capacity Study. Five (5) hard copies and a 'pdf' file of each submittal will be provided.

ESTIMATED FEE

The fee estimate to complete Tasks 1 through 5 is attached.

Should you need additional information, or have questions regarding this proposal, please do not hesitate to call us.

Sincerely,

CAROLLO ENGINEERS, P.C.

RE: PROPOSAL – Tivoli Facilities Master Plan and Infrastructure Financing Plan – Traffic Support

Dear Jim:

In response to your request, OMNI-MEANS is pleased to submit this proposal to assist Harris and Associates in the preparation of the traffic element of the Tivoli Facilities Master Plan and Infrastructure Financing Plan. We have reviewed your overall scope of work for the project as well as the Traffic Impact Assessment for the Tivoli Specific Plan and understand your overall goals for this project.

The attached presents our Project Understanding, Scope of Work, schedule and budget.

Thank you for the opportunity to be a part of the Harris team and we look forward to working with you and the other team members on this key development project in the City of Modesto.

Sincerely,

OMNI-MEANS, Ltd.
Engineers & Planners

Martin R. Inouye
Senior Vice President

MRI/SAM
P3570scp005.doc

PROJECT UNDERSTANDING

Upon review of the Tivoli Specific Plan, its EIR and its traffic assessment, OMNI-MEANS has an understanding of the proposed development project and its off-site traffic impacts and required transportation mitigation measures. In review of the traffic assessment, in addition to the identification of needed phased on-site transportation infrastructure, much off-site improvements will likely be needed as well. Over 60 intersections and many roadway segments were studied in the traffic assessment identifying many traffic impacts requiring mitigation. Additionally, with a study of interim conditions in 2012 and 2017, traffic impacts on phased project conditions are also understood such that improvement phasing and financing can better be planned.

Our prior experience in updating the "Street Projects Fee" for the Capital Facilities Fee Program of the City of Modesto will also be an immense help in identifying preliminary designs of required mitigation improvements and in the preparation of the cost estimates. Already 16 of the 60 intersections understudy for the Tivoli project have been studied within the Citywide traffic fee update.

To prepare the benefit and burden traffic analysis, the Citywide traffic model updated by Dowling and Associates is required and will need to be provided to OMNI-MEANS. From the updated traffic model, through "select link" analysis, the portion of Tivoli traffic on the area street system can be identified as well as its proportion to the total increase in new development traffic. Connecting this analysis with the associated costs for transportation improvements, a preliminary fee can then be estimated.

Once the benefit and burden of the Tivoli project has been determined from the above analysis, using the development phasing analysis, a transportation finance plan can then be determined. Through the project phasing and the estimation of the generation of traffic fees, one can then determine the adequacy of funds from the fee program to timely fund and construct improvements when they are in fact needed. If sufficient funds can not be generated prior to the need of all of the required transportation and other infrastructure improvements, then a menu of other financing options, like assessment district or CFD financing, need to be explored, studied and negotiated to finalize a specific finance plan.

SCOPE OF WORK

TASK 1 PROJECT COORDINATION, ENVIRONMENTAL ASSISTANCE AND MEETINGS.

1.1 Project Management Services.
OMNI-MEANS will perform the following project coordination services:

- **OMNI-MEANS will attend** four (4) Staff/Steering Committee meetings, including the Project Initiation Meeting and two (2) hearings total before either Planning Commission and/or City Council, as required.
- **Coordinate** and **monitor** progress of the study and design elements for **conformance** with **City and State standards** with other infrastructure elements of the Facilities Master Plan and Financing Plan.
- Prepare and present study progress and findings at Staff/Steering Committee, Task Force and/or hearings throughout the project, including final adoption public hearings before the Planning Commission and City Council.
- Participate in, as directed, Staff/Steering Committee (SC) meetings, composed of representatives of City officials, staff and project developers. These meetings with staff and the SC will occur on a regular basis throughout the study process.

TASK 2 DATA COLLECTION AND PROJECT IDENTIFICATION

2.1 Data Collection.
The following data collection effort relative to the preparation of the facilities master plan and financing plan will be conducted to obtain a firm understanding of the current traffic fees that are collected within the City.

- Obtain the updated Citywide traffic model prepared by Dowling and Associates associated with the preparation of the traffic impact assessment for the Tivoli Specific Plan and EIR.
- Review assumptions utilized in the City's traffic model, such as trip generation rates for various types of land uses and Levels of Service for City roadway facilities.
- Review any updates to City design standards for the preparation of the preliminary improvement plans and their associated cost estimates.

2.2 Existing Deficiencies and Transportation Mitigation Improvement Requirements.
Based on the Traffic Impact Assessment prepared by Dowling and Associates, OMNI-MEANS will use the traffic impact analysis to determine existing deficiencies and required phased transportation mitigation improvements. Therefore, required improvements will be identified for existing, 2012, 2017 and 2025 traffic conditions.

TASK 3 PROJECT COST ESTIMATES, TRAFFIC MODELING AND FEE CALCULATION.

3.1 Preliminary Cost Estimates of Mitigation Improvements.
Opinions of cost for required mitigation improvements identified in Task 2.2 will be developed using current local unit costs. For the mitigation improvements, available aerial photography will be used to identify major features that could drastically influence the cost estimates. Right-of-way cost estimates will also be developed based on the City's experience with right-of-way acquisition and rough estimates of needed right-of-way. Right-of-way costs will be estimated from assessor information on per square foot basis and not on the basis of property appraisals.

These unit cost estimates are intended to provide only a "ballpark" cost that can be reasonably used for capital improvement programming, but should not be considered detailed cost estimates based on engineering design.

3.2 Review Alternative Funding Sources, including the CFF Fee.
Within this task, OMNI-MEANS will review and evaluate with the City the issue of fee credit for mitigation improvements already in the City's CFF fee program and the likelihood of obtaining Federal and/or State transportation funding assistance for these proposed improvement projects. Based on this review and discussion with StanCOG, the City will provide OMNI-MEANS direction, identifying the allocation of cost that will be funded through other sources, including the Capital Facilities Fee for Street Projects and other State and Federal sources, if any. Understanding the presumption of use of other funding sources, this task will identify the net balance of transportation improvement cost needing to be covered by the Tivoli financing plan.

3.3 Calculate Tivoli Traffic Fee.
Based on the analyses conducted in Tasks 3.1 through 3.2, an appropriate cost allocation methodology for the mitigation improvements list will be determined and calculated. OMNI-MEANS would use and run, as required, the (Dowling) updated traffic model to document projected deficient LOS locations throughout the City transportation system and establish benefit/burden of the Tivoli project through the use of the "select-link" module of the Citywide traffic model. Through the use of this "select link" analysis, the benefit/burden of mitigation improvements assigned to the Tivoli project as a proportion of the projected overall increase in traffic can be calculated. Upon identification of a per trip cost, a Tivoli traffic fee for each land use category will be calculated by applying the cost per trip determined above to the assigned trip generation rate (DUE) for each land use.

3.4 Tivoli Development Financing Plan, including Phasing of Capital Improvement Needs.
Preparing the Tivoli traffic facilities improvements program is critical to the successful implementation of needed circulation improvements. Our approach is to identify the improvement cost estimates for the entire plan area, including the anticipated threshold of need and timing, and then meet with the City Finance Department to review anticipated revenues over time. This will provide the ability to identify potential surpluses and shortfalls over time through the development of the project. Once this is completed we will then determine the overall economics and feasibility of funding the required facilities with the available resources within the fiscal constraints and recommended financing options. With Tivoli development

phasing information, adequacy of fee funding can be determined during the interim phasing years of 2012 and 2017. If Tivoli traffic fee generation does not keep ahead or at minimum, keep pace to fully fund needed transportation improvements, other funding options will be explored, including community facility district (CFD) or assessment district financing.

TASK 4 - TECHNICAL REPORT DOCUMENTATION, INCLUDING MITIGATION IMPROVEMENTS, BENEFIT/BURDEN ANALYSIS AND FEE CALCULATION, AND APPROVAL HEARINGS.

4.1 Technical Report Documentation.

This Technical Report will present and document all transportation improvements needs, associated costs, prioritized list of improvements and the traffic impact fee methodology. The report will provide a clear discussion of how the fees were calculated, the facilities and costs included in the calculation, and the use of other funding sources, if any.

For the preliminary cost estimates, at minimum, the following documentation will be provided:

- Project description
- Project location map
- Assumptions
- ROW requirements
- Estimate with the following information:
    - Line item description
    - Unit of measure
    - Quantity
    - Unit price
    - Total item price
    - Contingency
    - Design costs
    - Construction administration costs

The report will also identify the cost allocation methodology used to determine the fee amounts. Detailed display maps will be prepared graphically illustrating this data. All appropriate revisions obtained, as a part of previous Staff/SC meetings will be incorporated into the final version of this comprehensive Technical Report Documentation that will fully document the entire process. The report will be submitted as a part of the overall Tivoli Facilities Master Plan and Infrastructure Financing Plan to City staff for their review and comment prior to presentations to the Planning Commission and City Council.

4.2 Public Approval Hearings.

To enact the Tivoli Facilities Master Plan and Infrastructure Financing Plan, City Council must vote for their adoption. Up to two (2) public hearings have been budgeted. Presentations will be in support of Harris and Associates to City Council and will be as directed by City staff and Harris and Associates. If needed, OMNI-MEANS will be available to participate in additional public hearings and/or meetings as directed and additionally authorized in writing.

SCHEDULE AND BUDGET

OMNI-MEANS is prepared to work within a six month project schedule to achieve a draft technical documentation report. Beyond the preparation of the draft report, OMNI-MEANS will work within a schedule as set forth to meet and finalize the Facilities Master Plan and Infrastructure Financing Plan.

Our budget for the above scope of work is estimated as $83,460. Beyond the four (4) City staff/Steering Committee meetings and the two (2) public hearings, any additional meetings or analysis not defined in our scope of work are considered additional and will require additional written authorization and budget to be performed.

EXHIBIT D-1

SCOPE OF WORK
FOR ASSISTANCE WITH THE
TIVOLI STORM DRAINAGE FACILITY PLAN

The Consultant will assist Harris and Associates by preparing the storm drainage element of the Tivoli Facility Plan. The Tivoli Specific Plan area consists of approximately 480 acres located in the Roselle/Clarabel Comprehensive Planning District in northeast Modesto. Stantec has been working with the City of Modesto to prepare other documents that will be valuable resources in completing the Facility Plan. The documents include:

- Draft Storm Drainage Master Plan, July 2003
- Draft Northeast Area Offsite Watershed Storm Drainage Evaluation, March 2005
- Tivoli Specific Plan Storm Drainage Assessment, January 2006

A significant amount of background data has been collected and is included in these documents. However, the documents have all been prepared at a broader level for the overall Tivoli Specific Plan area, with no breakdown of the project into smaller storm drainage components or areas. It will be important for the Facility Plan to incorporate additional onsite detail to ensure that each sub-area within the Tivoli Specific Plan will be served by the overall storm drainage system and provide a complete listing and cost for trunk storm drainage facilities. Services to be provided by the Consultant as a part of the Storm Drainage Facility Plan include the tasks outlined below.

Task 1 Data Collection
The majority of the field reconnaissance and data collection has already been completed as a part of the reports listed above. However, the following information will be needed from the developer to lay out a drainage infrastructure plan: *grading plan and detention basin grades and inverts.*

Task 2 Hydrologic Evaluations
Initial definition of drainage sub-basin areas will be performed based on land use areas, grading plan, topographic mapping, and the current site plan dated November 16, 2005. A combination of empirical calculations (Rational Equation) and hydrologic modeling (HEC-HMS) will be completed to determine 10-year and 100-year discharges that will be generated by development of the overall Specific Plan Area at buildout.

Task 3 Drainage Infrastructure Plan
A storm drainage infrastructure plan will be formulated for the overall Specific Plan Area, with storm drains being sized to convey a 10-year storm discharge and detention basins being sized for a 100-year routed storm volume. According to the draft Storm Drainage Master Plan (SDMP) prepared by Stantec dated October 2006, the Specific Plan Area is coincident with Sub-basin 98. The terminal elements of the storm drainage facilities that may serve this sub-basin have been initially formulated and include a single detention basin, a pump station, and a force main discharge to the MID Lateral No. 6 to the north per the draft SDMP.

The drainage infrastructure developed as part of the Facility Plan will replace the infrastructure identified in the Draft SDMP. This is likely to include additional detention facilities in order for gravity systems to be used to drain to them, though additional pumping facilities will also be needed to serve additional detention basins. One or more of the detention basins that will be proposed to serve the Specific Plan Area are expected to be dual use facilities. The drainage infrastructure plan prepared for the Specific Plan Area will include storm drainage provisions to serve each land use parcel; however, onsite storm drainage infrastructure for individual parcels will not be developed and are assumed to be the responsibility of individual developers to design and construct. Unique requirements associated with the storm drainage solutions (such as the execution of a drainage agreement with MID) will be identified. Stantec will work with MID staff to determine if they have any special requirements that should be factored into the cost of storm drainage infrastructure.

The storm drainage system will also need to include the elements of an initial phase of the offsite improvements recommended in the Northeast Area Offsite Watershed Storm Drainage Evaluation (March 2005). Interim provisions to accommodate offsite runoff derived from the remaining undeveloped portion of the Roselle/Clarabel Comprehensive Planning District and offsite runoff derived from areas east of the railroad (in the absence of a constructed initial phase of offsite improvements) will not be included in the drainage infrastructure plan and are considered to be an onsite cost.

The Drainage Infrastructure Plan will include a conceptual storm drainage system. The conceptual layout will include pipe and detention pond locations and sizes. It is assumed that the developer's engineer will provide a grading plan. Through the program manager, the Consultant will adjust alignments of storm drainage facilities to better conform with other infrastructure elements. This scope of work includes the initial infrastructure plan and one revision. Additional revisions will be provided under a separate scope of work.

Should there be significant land use modifications that result in changes to the site hydrology, additional technical analysis will be required under a separate scope of work.

Task 4 Preliminary Opinion of Probable Cost

A preliminary opinion of probable cost will be prepared for the construction of the storm drainage elements contained in the drainage infrastructure plan. The preliminary opinion of probable cost will include quantity take-offs and costs for individual items of construction and estimated costs for required right-of-way, drainage easements, and drainage agreements. Mark ups of these costs will also be included to accommodate requirements for design and planning, construction management, program implementation and contingency.

Task 5 Phase 1 Analysis

A Phase 1 task is included to determine the storm drainage requirements associated with the possible development of a portion of the Specific Plan Area as a first phase of implementation. The elements of the drainage infrastructure plan for the overall Specific Plan Area that will need to be constructed or provided for the Phase 1 development will be identified, as well as any requirements that are unique to Phase 1 implementation.

Task 6 Impact Fee Calculations
Storm drainage impact fees will be calculated for the overall Specific Plan Area on a "per acre" basis for the applicable land use categories based on a "percent impervious" approach that relates proportional funding responsibility to runoff production characteristics. The impact fees will allocate the overall cost of implementation of the drainage infrastructure plan to the various land uses and areas represented on the Specific Plan based on their weighted runoff production characteristics.

Task 7 AB 1600 Assessment (Mitigation Fee Act)
Findings relevant to compliance with provisions of the Mitigation Fee Act will be prepared to support the proposed impact fees.

Task 8 Technical Report
The results of work associated with completing all of the above tasks will be summarized in a Technical Report that will provide written descriptions, maps and calculations that represent and support the elements of the drainage infrastructure plan for the overall Specific Plan Area. The Technical Report will be submitted at initial Draft, Final Draft, and Final stages of completion. It is anticipated that two months will be needed to complete the initial Draft Technical Report. The Final Draft and Final Technical Reports will be completed within three weeks of receiving comments.

Task 9 Coordination
Extensive coordination is expected to be required as a component of preparing the Technical Report. Coordination is assumed to include participation in formal meetings with the City and stakeholders scheduled by Harris and Associates and a City Council presentation. Separate meetings with MID staff or Stanislaus County staff may also be needed if they are not included in the stakeholder meetings. A total of six meetings are included in this scope of work.

Task 10 FIP Support
Additional technical support will be provided to the City and Harris and Associates to interpret storm drainage conclusions and priorities to assist the Harris and Associates in preparing a Financing and Implementation Plan for required Specific Plan Area infrastructure.

Task 11 Environmental Impact Report Assistance
The draft Environmental Impact Report (EIR) has been completed by the City's Environmental Consultant. The Consultant will assist the City and their Environmental Consultant with responding to comments on the hydrology and water quality section of the draft EIR as requested.

Task 12 Dual Use Detention Basin Peer Review
The Consultant will perform a peer review of the proposed dual use detention basin(s) to assess overall conformance with the City's Dual Use Detention Basin guidelines. This peer review will consist of a memorandum containing specific comments and participation in a meeting, if appropriate.

Fee Estimate

Work described herein will be completed on a time and materials basis for a not-to-exceed fee of $84,000 in conformance with the Billing Rate Schedule provided on Exhibit B.

EXHIBIT F

Harris & Associates

RANGE OF HOURLY RATES:
DESIGN AND PUBLIC WORKS SERVICE GROUPS

Effective January 1 – December 31, 2006

ENGINEERING DESIGN AND PUBLIC WORKS SERVICES GROUPS	HOURLY RATE
Jim Bissell, P.E.	$190
Steve Roberts, P.E.	$190
Dennis Anderson, P.E.	$180
Alison Bouley, P.E.	$160
Project Directors	$170-240
Project Managers	$120-190
Project Engineers	$80-160
Construction Manager	$120-190
Administration	$50-90

Notes:

1. These individuals include professionals and support personnel who might work on Harris projects. Support personnel include technicians and administrative staff.
2. Rates are subject to adjustment due to promotions during the effective period of this schedule. A new rate schedule will become effective and apply to this contract on January 1, 2007.
3. Unless otherwise indicated in the agreement, hourly rates include most direct costs such as vehicle usage and mileage, equipment usage (including computer and telephone), and printing and copying (except large quantities such as construction documents for bidding purposes).
4. Billing rates for independent contractors and hourly employees are determined on a case-by-case basis.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-182

A RESOLUTION APPROVING AMENDMENT NO. 4 TO THE AGREEMENT BETWEEN THE CITY OF MODESTO AND TURNSTONE CONSULTING CORPORATION FOR THE RESPONSES TO COMMENTS AND THE PREPARATION OF THE FINAL ENVIRONMENTAL IMPACT REPORT AND FOR ADDITIONAL WORK PERFORMED ON THE PREPARATION OF THE DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE TIVOLI SPECIFIC PLAN (FORMERLY ROSELLE NEIGHBORHOOD), AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE AGREEMENT IN AN AMOUNT NOT TO EXCEED $202,497

WHEREAS, Dave Romano, P.E/AICP, of Russell A. Newman P.L.C., has applied for a specific plan, referred to as the Tivoli (formerly Roselle Neighborhood) Specific Plan, to allow for the orderly and future development within the approximate 454-acre planning area bounded by Sylvan Avenue on the south, the extension of Claratina Avenue on the north, Roselle Avenue on the east and Oakdale Road on the west, and

WHEREAS, the Tivoli Specific Plan will also involve the following associated entitlements: prezoning to a Specific Plan-Overlay (SP-O) Zone; Annexation of the project site into the City of Modesto including approval by the Local Agency Formation Commission; adoption of a specific plan; a General Plan Amendment to 1) reclassify two sites consisting of approximately 67 acres from Village Residential to Regional Commercial, 2) allow Village Residential designation in TSP to exceed the recommended 5.1 units per gross acre, 3) allow commercial development for the Village Residential designation in TSP to exceed the recommended 4%, 4) allow for the TSP neighborhood center focus that combines a neighborhood park and elementary school, 5) reclassify Claratina Avenue from Oakdale Road to Roselle Avenue from a four-lane Expressway to a Principal Arterial with a Class I bike path, 6) reclassify Sylvan Avenue from east of

Oakdale Road to Roselle Avenue from a Principal Arterial to a Minor Arterial, 7) amend Oakdale Road from Sylvan Avenue to Claribel Avenue as a Principal Arterial to include Class 2 Bike Lanes, one lane on each side of the street; adoption of a Facilities Master Plan and a Infrastructure Finance Plan for the Tivoli Specific Plan area; formation of a Community Facilities District to fund the construction of "backbone" public infrastructure, maintenance of applicable public facilities, and applicable public services; approval of a Development Agreement to guide development within the Tivoli Specific Plan area; and subsequent entitlements, including abandonment of a portion of Mable Avenue, approval of Area Plans , Final Development Plans, tentative maps, Conditional Use Permits, and other City entitlement approvals, and

WHEREAS, Section 21080.1 of the California Public Resources Code requires the City of Modesto, as lead agency, to make a determination of whether an environmental impact report is required for projects, and

WHEREAS, the City has determined that an environmental impact report is required for the proposed Tivoli Specific Plan project and related applications, and

WHEREAS, by Resolution No. 2002-622, adopted on December 10, 2002, the City Council approved a list of environmental service providers, including the firm of Turnstone Consulting Corporation, to assist with the preparation of environmental impact reports and other environmental documents, and

WHEREAS, City staff selected Turnstone Consulting Corporation to prepare the environmental impact report for the Tivoli Specific Plan because of their extensive experience on similar projects in other jurisdictions, and

WHEREAS, the City Council adopted Resolution Number 2005-014 on January 4, 2005, approving an agreement with Turnstone Consulting Corporation for the preliminary work on the Environmental Impact Report for the Tivoli Specific Plan, and

WHEREAS, the City Council adopted Resolution Number 2005-184 on April 26, 2005, approving Amendment No. 1 to the agreement with Turnstone Consulting Corporation for the Biological Study and Traffic Study for the Tivoli Specific Plan, and

WHEREAS, the City Council adopted Resolution Number 2005-502 on October 11, 2005, approving Amendment No. 2 to the agreement with Turnstone Consulting Corporation for the preparation of the Draft Environmental Impact Report on the Tivoli Specific Plan, and

WHEREAS, the City Council adopted Resolution Number 2006-156 on March 28, 2006, approving Amendment No. 3 to the agreement with Turnstone Consulting Corporation for the preparation of a market analysis on the proposed regional commercial development for the Tivoli Specific Plan Environmental Impact Report, and

WHEREAS, City staff has negotiated a scope of work for a fourth amendment to the contract, to provide the responses to comments and the preparation of the Final Environmental Impact Report for the Tivoli Specific Plan in an amount not to exceed $162,797.

WHEREAS, during preparation of the Draft EIR issues arose that required additional analysis and services beyond the scope of Amendment No. 2 to the Agreement, requiring a further amendment to the Agreement for additional work performed on the Draft EIR in the amount of $33,200.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves Amendment No. 4 to the Agreement between the City of Modesto and Turnstone Consulting Corporation to provide the responses to comments and the preparation of the Final Environmental Impact Report for the Tivoli Specific Plan in an amount not to exceed $169,297 and for additional tasks performed related to the preparation of the Draft EIR for the Tivoli Specific Plan, in the amount of $33,200 for a total of $202,497, copies of which are on file in the City Clerk's office.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute Amendment No. 4 to the Agreement.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-183

A RESOLUTION AUTHORIZING THE AWARD OF BID AND CONTRACT FOR THE PURCHASE OF LIQUID CHLORINE AND LIQUID SODIUM HYPOCHLORITE TO PIONEER AMERICAS, LLC OF WALNUT CREEK, CA FOR A TWO (2) YEAR AGREEMENT, WITH THREE (3) ONE-YEAR EXTENSION OPTIONS, AT THE SOLE DISCRETION OF THE CITY, FOR A TOTAL ESTIMATED ANNUAL COST OF $25,205.20.

WHEREAS, the Public Works Department-Water Quality Control (WQC) Division has

requested the purchase of liquid chlorine, and

WHEREAS, the Public Works Department-Water Division has requested the purchase of

liquid sodium hypochlorite, and

WHEREAS, WQC uses liquid chlorine (CL2) during river discharge season from

October 1st through May 31st, and

WHEREAS, liquid chlorine is utilized at the Jennings Road facility to chlorinate and

disinfect the City's final effluent to the San Joaquin River, as required in the City's permit, and

WHEREAS, the Water Division uses liquid sodium hypochlorite to disinfect the

domestic water supply as specified by water purveyors permit issued by the California

Department of Health Services, and

WHEREAS, on October 24, 2006, Council approved Resolution No. 2006-662

authorizing the Purchasing Manger to issue a Request for Bid (RFB) for the purchase of liquid

chlorine and liquid sodium hypochlorite for the Public Works Department-Water Division and

the Water Quality Control Division for a two (2) year agreement, with three (3) one-year

extension options, at the sole discretion of the City, and

WHEREAS, on January 12, 2007, the Purchasing Division issued Request for Bid No.

0607-08 for the purchase of liquid chlorine and liquid sodium hypochlorite to six (6)

prospective bidders, of which none were local companies, posted the bid on the City's web site,

and formally advertised as required by law, and

WHEREAS, on February 13, 2007, bids were formally opened in the City Clerk's office,

and six (6) prospective bidders, three (3) chose to respond to the RFB, and

WHEREAS, based on being deemed the lowest responsive and responsible bidder, City

staff recommends the award of bid and contract for liquid chlorine and liquid sodium

hypochlorite to Pioneer Americas, LLC of Walnut Creek, CA for a two (2) year agreement, with

three (3) one-year extension options, at the sole discretion of the City, and

WHEREAS, Modesto Municipal Code Section 8-3.203, generally requires all purchases

which meet or exceed $50,000 for materials, equipment or contractual servies to be formally bid,

and

WHEREAS, the award of bid and contract for the purchase of liquid chlorine and liquid

sodium hypochlorite conforms to the Modesto Municipal Code,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto

that it hereby authorizes the award of bid and contract for the purchase of liquid chlorine

and liquid sodium hypochlorite to Pioneer Americas, LLC of Walnut Creek, CA for a two (2) year agreement, with three (3) one-year extension options, at the sole discretion of the City, for a total estimated annual cost of $25,205.20.

BE IT FURTHER RESOLVED that the Purchasing Manager is hereby authorized to issue purchase agreements for the purchase of liquid chlorine and liquid sodium hypochlorite to Pioneer Americas, LLC of Walnut Creek, CA for a two (2) year agreement, with three (3) one-year extension options, at the sole description of the City, for a total estimated annual cost of $25,205.20.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-184

A RESOLUTION REJECTING ALL BIDS AND AUTHORIZING THE PUCHASING MANAGER TO RE-ISSUE FORMAL REQUEST FOR BIDS (RFB) FOR THE PURCHASE OF WATER QUALITY CONTROL LABORATORY EQUIPMENT (PHASE 1) FOR THE PUBLIC WORKS DEPARTMENT, WATER QUALITY CONTROL DIVISION, AT AN ESTIMATED TOTAL COST OF $342,750

WHEREAS, currently, the Public Works Department, Water Division brings drinking water samples to the Water Quality Control-Lab for testing, and

WHEREAS, the Water Quality Control-Lab also analyzes stormwater and NPDES samples (wastewater and river waters) per permit regulations, and

WHEREAS, some of these samples are sent to an outside lab for analysis, and

WHEREAS, by purchasing new equipment, most of these tests will be performed in-house, reducing expenditures and response time for the Water Division and the Water Quality Control-Lab, and

WHEREAS, the following is a list of equipment that the Water Quality Control Lab plans to purchase during Phase 1:

- Benchtop Gas Chromatograph/Mass Spectrometer (GC/MS)
- Gas Chromatograph
- Inductively Coupled Plasma Mass Spectrometer
- AutoSampler-AutoInjector, and

WHEREAS, with the addition of this equipment and after certification by the Department of Health, staff anticipates future revenues from an increased ability to perform additional tests in-house for other outside divisions, agencies, and cities, and

WHEREAS, on May 2, 2006, Council approved Resolution No. 2006-270 authorizing the Purchasing Manager to issue formal Request for Bids (RFB) for the purchase of water quality control laboratory equipment (Phase 1) for the Public Works Department, Water Quality Control Division, and

WHEREAS, on June 13, 2006, the Purchasing Division issued Request for Bid No. 0506-28 for the purchase of water quality control laboratory equipment, and

WHEREAS, on July 18, 2006, RFB's were formally opened in the City Clerk's office, and

WHEREAS, two (2) companies chose to respond, and

WHEREAS, one company did not include the Bid Acknowledgement, **Exhibit A**, with their bid submittal, which is a requirement, and

WHEREAS, the company's bid was disqualified and received no consideration, and

WHEREAS, the second company did not submit pricing using the Addenda Pricing Schedule, **Exhibit "B"**, and

WHEREAS, the equipment bid was not representative of the laboratory equipment described in the RFB Addenda, and

WHEREAS, the company's bid was disqualified and received no consideration, and

WHEREAS, staff determined both bids were non-responsive and non-responsible and recommends both bids be rejected, and

WHEREAS, staff recommends the Purchasing Manager be allowed to re-issue a formal RFB for the purchase of water quality control laboratory equipment (phase 1) for

the Public Works Department Water Quality Control Division, at an estimated total cost of $342,750, and

WHEREAS, Modesto Municipal Code Section 8-3.203 generally requires all purchases, which meet or exceed $50,000 for material, equipment or contractual services to be formally bid, and

WHEREAS, the issuance of a formal Request for Bid for the purchase of water quality control laboratory equipment conforms to code,

NOW, THEREFORE, BE IT HEREBY RESOLVED by the Council of the City of Modesto as follows:

SECTION 1. The two bids received for the purchase of water quality control laboratory equipment are hereby rejected.

SECTION 2. The Purchasing Manager is hereby authorized to re-issue a formal Request for Bid for the purchase of water quality control laboratory equipment.

SECTION 3. The City Clerk is hereby authorized to call for public competitive sealed bids for the purchase of water quality control laboratory equipment, to be opened in the office of the City Clerk, 1010 Tenth Street, in the City of Modesto. The City Clerk shall be directed to give notice inviting such sealed bids in the time, form, and manner provided by law.

SECTION 4. After the sealed bids are opened, they shall be tabulated and analyzed by the Purchasing Division and a report submitted to Council.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmemeber Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-186

A RESOLUTION APPROVING THE PURCHASE OF A BUILDING PERMIT MODULE FOR THE CITY'S INTERACTIVE VOICE RESPONSE (IVR) SYSTEM FROM SELECTRON TECHNOLOGIES OF PORTLAND, OREGON FOR A TOTAL ESTIMATED COST OF $95,000.

WHEREAS, on July 1, 2003, the City Council by Resolution No. 2003-336 authorized the award of bid to Selectron Technologies for an Interactive Voice Response (IVR) System, and

WHEREAS, the Building and Development Services Division of the Community and Economic Development Department and the Information Technology Department are seeking to add a building permits module to the City's existing Interactive Voice Response (IVR) System, and

WHEREAS, the Building and Development Services Division of the Community and Economic Development Department, the Information Technology Department, and the Purchasing Division of the Finance Department have evaluated a price quote from Selectron Technologies for the building permit module, and

WHEREAS, funds were originally budgeted in 2001 in the Building and Development Services Division operating budget, and then transferred to the reserve fund to allow for the purchase, upgrade and training costs for the Tidemark and IVR systems, and

WHEREAS, funds for the purchase of the IVR system are held in the Information Technology Fund reserve,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the purchase of the Building Permit Module for the City's

Interactive Voice Response (IVR) System from Selectron Technologies of Portland, Oregon for a total estimated cost of $95,000.

BE IT FURTHER RESOLVED by the Council that the City Manager, or his designee, is hereby authorized to execute a purchase agreement for the purchase of a Building Permit Module for the City's Interactive Voice Response System from Selectron Technologies of Portland, Oregon for a total estimated cost of $95,000.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

RESOLUTION NO. 2007-188

A RESOLUTION AMENDING THE 2006/2007 BUDGET TO APPROPRIATE $23,578 FROM THE PD RECORDS AND SUPPORT DIVISION 0100-190-1921-0110 TO THE INFORMATION TECHNOLOGY NETWORK DIVISION 7130-070-0743-0110 TO FULLY FUND THE REALLOCATION OF ONE SOFTWARE ANALYST II/III

WHEREAS, a Software Analyst II position resides in PD Records and Support Div. (Org. 1921), and

WHEREAS, this position is dedicated to support the Modesto Police Department (MPD) for information technology needs, and

WHEREAS, the request has been made to reallocate one Software Analyst I/II (434) in the PD Records and Support Division (Org. 1921) to one Software Analyst I/II/III (438) in the Information & Technology Department Network Division (Org. 0743)s, and

WHEREAS, this request was reviewed and approved by Police Department management staff, and

WHEREAS, this reallocation request is made based upon departmental needs and changing workload demands, and

WHEREAS, this reallocation request will centralize and standardize Information Technology Department resources, assist in meeting the growing support requirements for the City, and provide the opportunity for career growth for staff assigned to this function, and

WHEREAS, annualized salary and benefits for the Software Analyst II position (Range 434) are currently budgeted in the amount of $98,264 in the PD Records and

Support Division (Org. 1921) and are requested to be transferred to the Information Technology Network Division (Org. 0743) for FY 07-08,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes amending the 2006/2007 budget to appropriate $23,578 from the PD Records and Support Division 0100-190-1921-0110 to the Information Technology Network Division 7130-070-0743-0110 to fully fund the reallocation of one Software Analyst II/II.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-189

ADOPT A RESOLUTION APPROVING A NEW SCHEDULE "A" AGREEMENT TO THE MUNICIPAL MASTER LEASE WITH DELL MARKETING L.P., FOR INFORMATION TECHNOLOGY HARDWARE PRODUCTS AND SERVICES FOR A PERIOD OF 48 MONTHS FOR THE ESTIMATED AMOUNT OF $40,019.88 PER YEAR, AND AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE, TO EXECUTE THE NEW SCHEDULE "A" AGREEMENT. THE TOTAL AMOUNT OF THE LEASE AGREEMENT IS ESTIMATED AT $160,079.52

WHEREAS, in 1998 the City established a Technology and Equipment Replacement Fund (TERF) for the purpose of replacing obsolete technology equipment, and

WHEREAS, in 1999 the City went through a formal bid process to establish a computer standard throughout the city, and

WHEREAS, Dell Marketing was the lowest responsive and responsible bidder to the formal bid process, and

WHEREAS, in March 2003 the City entered into a Municipal Master Lease Agreement with Dell Marketing L.P. for Information Technology (IT) Hardware Products and Services, and

WHEREAS, in August 2006 the City approved a new Schedule "A" Agreement to the Municipal Master Lease with Dell Marketing L.P. extending the term of the Lease for 48 months, and

WHEREAS, IT views this program as a cost effective measure for the City, emphasizing reduction of the Total Cost of Ownership (TCO) for the City's technology equipment and helping streamline the City's technology refresh program that affects all departments, and

WHEREAS, Dell Marketing has been providing personal computers to the City for the past seven years, and

WHEREAS, during that time the City has received Dell contractual pricing by taking advantage of the Western States Contracting Alliance (WSCA) pricing, and

WHEREAS, WSCA is a coalition of fifteen western states which was formed as a means by which participating states could join together to receive cost effective pricing on personal computers based on economies of scale, and

WHEREAS, the City routinely requires replacements, acquisitions and upgrades to existing city computer equipment inventory, and

WHEREAS, the funding for said computer equipment is approved and budgeted in the Technology and Equipment Replacement Fund (TERF), and

WHEREAS, the City is desirous of continuing to acquire computer equipment using the existing Municipal Master Lease Agreement with Dell Marketing L.P. for Information Technology Hardware Products and Services,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves a new Schedule "A" Agreement to the Municipal Master Lease Agreement with Dell Marketing L.P. and authorizes the City Manager, or his designee, to execute a new Schedule "A" Agreement to the Municipal Master Lease Agreement with Dell Marketing L.P. for Information Technology hardware products and services for a period of 48 months at an estimated cost of $160,079.52.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007- 193

A RESOLUTION AUTHORIZING THE PURCHASING MANAGER TO CONDUCT A SOLE-SOURCE PROCUREMENT FOR LEASE/PURCHASE OF A DIAMOND Z 5000 HORIZONTAL GRINDER, WITH PREVENTIVE MAINTENANCE, FOR CITY OF MODESTO COMPOST FACILITY

WHEREAS, the City of Modesto operates a Compost Facility at 7007 Jennings Road, and

WHEREAS, the operation of the Compost Facility is a critical component of the City's AB 939 plan, which mandates the reduction of disposal and requires the City to divert 50% or more of its waste from disposal, and

WHEREAS, a grinder is an essential piece of equipment in producing compost, and

WHEREAS, the grinder currently used at the Compost Facility has met its life expectancy, is dangerous to operate, cannot process large quantities of mixed paper, and the engine recently failed, and

WHEREAS, on April 4, 2006, by Resolution No. 2006-193, the City Council authorized the Purchasing Division to issue a Request for Bids (RFB) for the lease/purchase of a horizontal grinder to replace the current tub grinder at the City's Composting Facility that has become unreliable and costly to keep operational, and

WHEREAS, based on the observation of various grinders under field conditions, staff developed bid specifications for the RFB, including: a downward turning mill; feed roller that lifts out 90 degrees and locks in place allowing the employees to work without

crouching and eliminating the danger posed by working below the feed roller; and fluid coupler power transfer system, and

WHEREAS, following the issuance of the RFB and the bidders conference, Purchasing and Solid Waste staff determined that only one manufacturer, Diamond Z, could meet these safety/ergonomics and performance specifications in addition to the other bid specifications, and

WHEREAS, replacement of the existing grinder is critical to compost operations, and

WHEREAS, funds are budgeted in the FY 2006-2007 Compost Facility Budget ($104,000 in account number 6290-355-5222-0451, Principal Retirement, and $24,000 in account number 6290-355-5222-0452, Interest Expense) for this purpose, and

WHEREAS, the Citizen's Advisory Committee on Recycling has recommended that once the City's Compost Facility has purchased its new horizontal grinder, which will be capable of processing mixed paper and other organics along with green waste, the City should conduct an aggressive public education campaign to encourage residents to put other organics such as food waste, newsprint, magazines, phone books, junk mail, computer paper, paper napkins and towels, and cardboard in the green waste container for composting,

NOW, THEREFORE BE IT RESOLVED, by the Council of the City of Modesto that the Council hereby authorizes the Purchasing Manager to conduct a sole-source procurement for lease/purchase of a Diamond Z 5000 horizontal grinder, with preventative maintenance, for City of Modesto Compost Facility, for a total estimated cost over 5 years of $600,000.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AYES:	Councilmembers:	Dunbar, Hawn, Keating, O'Bryant, Olsen, Mayor Ridenour

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-194

A RESOLUTION AMENDING THE FY 06-07 CAPITAL IMPROVEMENT PROGRAM (CIP) TO: REDUCE EXPENDITURES IN PROJECT 8910-310-N441 BY $2,000,000 AND INCREASE EXPENDITURES IN PROJECT 8910-310-P844 BY $2,000,000 FOR CONSTRUCTION OF PHASE 1.2 IN THE TUOLUMNE RIVER REGIONAL PARK GATEWAY PARCEL

WHEREAS, the Parks, Recreation and Neighborhoods Department, on behalf of the Tuolumne River Regional Park Joint Powers Authority began a project to plan for the future development of the Tuolumne River Regional Park (TRRP) when the Joint Powers Authority of the City of Modesto, City of Ceres and Stanislaus County adopted the TRRP Master Plan in December 2001, and

WHEREAS, the Gateway Parcel is one of six planning areas addressed in the TRRP Master Plan, and

WHEREAS, the TRRP Commission envisions the Gateway Parcel to be a high-profile public gathering place close to the commercial centers of Modesto and Ceres and accessible to the rest of the region along major arterial streets and State Route (SR) 99, as defined in the TRRP Master Plan, and

WHEREAS, On February 13, 2007, the Modesto City Council adopted Resolution No. 2007-109 allocating $1,000,000 of Park Funds for the TRRP Gateway Parcel Phase 1.2, and

WHEREAS, on February 13, 2007, the County of Stanislaus also authorized the amount of $1,000,000 to be used for the TRRP Gateway Parcel Phase 1.2, and

WHEREAS, the funding was allocated to project 8910-310-N441, and in order to better reflect the current project account, the monies should be allocated to project 8910-310-P844,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that the Council hereby approves amending the FY 06-076 Capital Improvement Program (CIP) to reduce expenditures in Project 8910-310-N441 by $2 million and increase expenditures in Project 8910-310-P844 by $2 million.

BE IT FURTHER RESOLVED that the Finance Director or his designee, is hereby authorized to take the necessary steps to implement the provisions of this resolution.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-195

A RESOLUTION PRE-AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO EXECUTE AN AGREEMENT FOR CONSULTANT SERVICES WITH MERCER HEALTH AND BENEFITS LLC IN THE AMOUNT OF $48,000.

WHEREAS, the City desires to obtain the services of Mercer Health and Benefits LLC (Mercer) to provide retiree health program design and analysis, and

WHEREAS, the City desires to enter into an Agreement for Consultant Services with Mercer in the total amount of $48,000 which includes professional fees and expenses, and

WHEREAS, Mercer is specially trained, experienced and competent to provide retiree health program consulting for the City, and

WHEREAS, the public interest, economy and general welfare will be served by this agreement,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby pre-authorizes the City Manager or his designee to execute an "Agreement For Consultant Services" with the firm of Mercer Health and Benefits LLC in the amount of $48,000 with respect to providing retiree health program design services.

BE IT FURTHER RESOLVED by the Council of the City of Modesto that said Agreement may be amended, if needed, by mutual consent of the parties, provided that total fees and expenses do not exceed $75,000.

The foregoing resolution was introduced in a regular meeting of the Council of the City of Modesto held on the 27th of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-196

A RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AMENDED EMPLOYMENT AGREEMENT WITH JUDITH E. RAY TO CONTINUE TO SERVE AS DEPUTY CITY MANAGER.

WHEREAS, Judith E. Ray and the City of Modesto entered into an employment agreement on June 7, 2005, under authority of Resolution No. 2005-285, and

WHEREAS, Judith E. Ray has been serving as Deputy City Manager since June 7, 2005, and

WHEREAS, Section 900 of the City's Charter provides that the City Manager of Modesto, California, shall appoint the Deputy City Manager, in the Unclassified Service, to serve at the pleasure of the City Manager for an indefinite term, and may remove the Deputy City Manager at his pleasure, and

WHEREAS, the City desires to enter into an amended employment agreement with Judith E. Ray to continue to serve as Deputy City Manager of the City of Modesto and to provide the terms and conditions by which City shall continue to retain the service of Judith E. Ray at an annual salary of $144,552.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the City Manager to sign an amended employment agreement with Judith E. Ray to continue to serve as Deputy City Manager of the City of Modesto. Said amended employment agreement is attached hereto as **Exhibit A** and incorporated herein by this reference.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

AMENDED EMPLOYMENT AGREEMENT

This Amended Employment Agreement, made and entered into this 27th day of March, 2007 by and between the CITY OF MODESTO, State of California, a municipal corporation, hereinafter called, "CITY" and JUDITH E. RAY, hereinafter referred to as "EMPLOYEE," both of whom understand as follows:

R E C I T A L S:

WHEREAS, EMPLOYEE and CITY entered into an employment agreement on June 7, 2005 under authority of Resolution No. 2005-285, and

WHEREAS, EMPLOYEE has been serving as Deputy City Manager since June 7, 2005, and

WHEREAS, Section 900 of the CITY's Charter provides that the City Manager of Modesto, California, shall appoint the Deputy City Manager, in the Unclassified Service, to serve at the pleasure of the City Manager for an indefinite term, and may remove the Deputy City Manager at his pleasure, and

WHEREAS, it is the desire of the parties hereto to provide the terms and conditions by which CITY shall retain the service of EMPLOYEE and to provide for her to remain in such employment, and

WHEREAS, it is the desire of the parties hereto to amend the employment agreement.

NOW, THEREFORE, in consideration of the mutual covenants herein contained, the parties agree to amend the previous agreement in its entirety as follows:

Section 1. Duties

CITY hereby agrees to employ said Judith E. Ray as Deputy City Manager of said CITY to perform the functions and duties specified in the attached job description.

Section 2. Term

a. Effective March 27, 2007, EMPLOYEE shall continue employment as Deputy City Manager in the Unclassified Service, at the salary set forth herein and shall serve in this capacity until such time as EMPLOYEE terminates or resigns from the position of Deputy City Manager.

b. Nothing in this agreement shall prevent, limit or otherwise interfere with the right of the City Manager to terminate the services of EMPLOYEE at any time, subject only to the provisions set forth in Section 3, below.

c. Nothing in this agreement shall prevent, limit or otherwise interfere with the right of EMPLOYEE to resign at any time from her position as Deputy City Manager, subject only to the provisions set forth in Section 3, below.

Section 3. Termination

a. Notwithstanding any contrary provision of the Modesto Municipal Code and/or Personnel Rules of the City of Modesto, in the event the City Manager elects to terminate this agreement on or before October 7, 2007, said EMPLOYEE shall have reinstatement rights to the classification of Deputy Director of Public Works, provided that such termination is for reasons other than good cause.

b. In the event EMPLOYEE voluntarily resigns from the position of Deputy City Manager on or before October 7, 2007, EMPLOYEE shall have reinstatement rights to the classification of Deputy Director of Public Works.

c. Termination of this agreement by either party after October 7, 2007 shall not provide for reinstatement to the classification of Deputy Director of Public Works or to any other position in the Classified Service.

Section 4. Salary and Benefits

a. CITY agrees to pay EMPLOYEE for her services rendered pursuant to this agreement a monthly base salary of $12,046.00, payable in the installments at the same time as other employees of the CITY are paid. In addition, EMPLOYEE shall be granted salary increases within the salary range established by the City Council, based on merit and fitness as determined by the City Manager.

b. EMPLOYEE shall be eligible for all benefits currently authorized by the City Council for non-sworn Executive employees, and as such benefits may be amended from time to time by Council.

Section 5. Notices

Notices pursuant to this agreement shall be given by deposit in the custody of the United States Postal Service, postage pre-paid, addressed as follows, or as such address may be changed from time to time upon notice to the other:

CITY:
City Manager
City of Modesto
1010 Tenth Street
P. O. Box 642
Modesto, CA 95353

EMPLOYEE:
Judith E. Ray
924 Gina Court
Escalon, CA 95320

Alternatively, notices required pursuant to this agreement may be personally served in the same manner as is applicable to civil judicial practice. Notice shall be deemed

given as of the date of the personal service or as of the date of deposit of such written notice in the course of transmission in the United State Postal Service.

Section 6. General Provisions

a. The text herein shall constitute the entire agreement between the parties.

b. This agreement shall be binding upon and inure to the benefit of the heirs at law and executors of EMPLOYEE.

c. This agreement shall become effective commencing the 27th day of March, 2007.

d. If any provision, or any portion thereof, contained in this agreement is held unconstitutional, invalid or unenforceable, the remainder of this agreement, or portion thereof, shall be deemed severable, shall not be affected, and shall remain in full force and effect.

IN WITNESS WHEREOF the CITY OF MODESTO, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. 2007-196, adopted by the Council of the City of Modesto on the 27th day of March, 2007, and EMPLOYEE has caused this Agreement to be duly executed.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-197

A RESOLUTION AUTHORIZING THE CITY MANAGER, UPON THE RECOMMENDATION OF THE POLICE CHIEF, TO USE UNCLAIMED BICYCLES, IN THE POSESSION OF THE MODESTO POLICE DEPARTMENT, TO BE REFURBISHED BY THE PLEASANT VALLEY STATE PRISON IN COALINGA, CALIFORNIA AND RETURNED TO THE DONATING ORGANIZATION, FRIENDS OF MODESTO POLICE YOUTH ASSOCIATION (FMPYA), FOR DISTRIBUTION TO UNDERPRIVILEGED CHILDREN AND CHILDREN AT RISK FOR JUVENILE DELINQUENCY.

WHEREAS, Pleasant Valley State Prison in Coalinga, California offers a program of bicycle refurbishing, and

WHEREAS, Modesto Municipal Code Section 2-7.06 authorizes the City Manager to have unclaimed bicycles repaired and turned over to any charitable or nonprofit organization to participate in a program or activity designed to prevent juvenile delinquency, and

WHEREAS, the bicycles are to be returned to the Friends of Modesto Police Youth Association (FMPYA), a 501c3 (non-profit) organization, for distribution to underprivileged children and children at risk for juvenile delinquency, and

WHEREAS, the Modesto Police Department feels that by providing refurbished recycled bicycles to at risk children, via FMPYA, the program is able to meet its primary objective, which is to reduce juvenile delinquency in our community, and

WHEREAS, the benefit to the children far outweighs the potential revenue of the bicycles if they were sold at auction, and

WHEREAS, based upon the successful first test of the program, FMPYA and the Police Department are seeking recommendation to continue the program indefinitely, and

WHEREAS, staff will prepare an annual report to the Safety and Communities Committee on the status of the bicycle refurbishing/donation program, and

WHEREAS the fiscal impact of the bicycles not sold at auction would be a minimal loss of revenue to the City and the benefit to the children far outweighs the potential revenue of the bicycles if they were sold at auction, and

WHEREAS at its March 5, 2007 meeting, the Safety and Communities Committee approved the recommendation,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby authorizes the City Manager, upon the recommendation of the Police Chief, to use unclaimed bicycles, in the possession of the Modesto Police Department, to be refurbished by the Pleasant Valley State Prison in Coalinga, California and returned to the donating organization, Friends of Modesto Police Youth Association (FMPYA), for distribution to underprivileged children and children at risk for juvenile delinquency.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-198

A RESOLUTION APPROVING AN AGREEMENT FOR THE PURCHASE OF RETIRED CITY OF MODESTO POLICE CANINE BY THE ASSIGNED MODESTO POLICE DEPARTMENT CANINE HANDLER, OFFICER BONGIORNO, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE AN AGREEMENT WITH THE OFFICER FOR PURCHASE OF HIS POLICE CANINE.

WHEREAS, the Police Chief for the City of Modesto, from time to time, officially retires police canines from departmental service, and

WHEREAS, City of Modesto police canine handler, Officer Bongiorno, wishes to purchase and assume possession of his assigned canine, Randy, upon the dog's official retirement, and

WHEREAS, it is necessary to adopt a resolution authorizing the purchase of City of Modesto police canines by their assigned department handler,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the agreement with Officer Bongiorno for the purchase of his retired police canine, Randy, in the amount of One Dollar ($1.00) as more fully set forth in the Modesto Police Department Canine Transfer Contract attached hereto as **Exhibit "A"** and incorporated herein by this reference.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute said contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO POLICE DEPARTMENT CANINE TRANSFER CONTRACT

This AGREEMENT, made and entered into in the City of Modesto, State of California, this **27th** day of **March, 2007**, by and between the City of Modesto, a municipal corporation of the State of California, hereinafter referred to as "CITY", and Bradly Bongiorno, canine handler for the Modesto Police Department, hereinafter referred to as "HANDLER".

Facts:

Canine "Randy" has been with the Modesto Police Department since September of 2001. "Randy" has served the city for over five years. "Randy" was born in 1999 and will be eight years old in 2007. "Randy" has had a long and distinguished career as a narcotic detection dog. "Randy" has been unable to work for over six months and has reached an age where he is slowing down. It would not be feasible to retrain and recertify him. His ability to continue to do police work is diminishing and it is my recommendation he be retired from service.

This **AGREEMENT** is made with regard to the following recitals:

A. *HANDLER* wishes to assume ownership and take possession of that certain retired City of Modesto police canine named "Randy". *HANDLER* was previously the assigned canine handler for "Randy".

B. *HANDLER* wishes to maintain ownership of the above-referenced dog, and the CITY wishes to divest itself of both ownership and vicarious or direct liability for the subject dog.

C. CITY does hereby agree to relinquish all of its right, title and ownership interest in said dog whatsoever, effective upon *HANDLER's* execution and return of this document and payment of the sum of one and no/100ths dollars ($1.00) to the City of Modesto.

NOW, THEREFORE, in consideration of this AGREEMENT, the parties hereto agree as follows:

1. *HANDLER* does agree to assume ownership of the Modesto police canine named "Randy", and to assume any and all risks, including, but not limited to, risk of injury or death to third persons, and to hold CITY, its police department, and its employees and/or agents or volunteers harmless from any and all liability, claims, administrative proceedings or other responsibility whatsoever arising from any injuries or damages that may occur on or after the date ownership of the dog is transferred pursuant to this AGREEMENT. That date is hereby fixed by agreement by and among the parties hereto as being **March 27, 2007**.

2. *HANDLER* further agrees to assume all liability for risks and dangers relating to his/her ownership of the subject police dog on and after the aforementioned date, and to indemnify and hold CITY harmless in the event that any legal or administrative action, whether by claim, demand or otherwise, is made by any person or entity as a consequence of or arising out of any event, act or disturbance involving the subject police dog on or after the date ownership is transferred. These hold harmless provisions shall extend to any direct or vicarious liability arising from any and all losses, liabilities, charges (including reasonable attorney fees and court costs), and any other expenses whatsoever which may arise in any manner after the new owners assumption of ownership on the date identified herein.

3. *HANDLER* must retain ownership of "Randy" for at least eighteen (18) months prior to any sale of the aforementioned retired police canine.

4. The retired police canine "Randy" shall revert to CITY should the purchaser, *HANDLER* determine he/she can no longer care for the aforementioned dog within the period of

time commencing on the date of this AGREEMENT and ending eighteen (18) months from the date fixed by this AGREEMENT.

5. *HANDLER* acknowledges that he/she has read the foregoing AGREEMENT and understands that it is contractual in nature and understands each of its provisions.

IN WITNESS WHEREOF, the CITY OF MODESTO, a municipal corporation, has caused this Agreement to be executed in duplicate by its City Manager and attested by its City Clerk under authority of Resolution No. 07-____ adopted by the City Council of the City of Modesto on the 27th day of March, 2007.

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-199

A RESOLUTION APPROVING THE PROJECT, INCLUDING PLANS AND SPECIFICATIONS FOR THE PROJECT TITLED "2006 ADA CURB RAMP CONSTRUCTION", ACCEPTING THE LOW BID AND APPROVING A $175,936.00 CONTRACT WITH BDS CONSTRUCTION, INC., AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE CONTRACT

WHEREAS, plans and specifications have been prepared for the project titled "2006 ADA Curb Ramp Construction" and City staff recommends approval by the City Council, and

WHEREAS, the bids received for "2006 ADA Curb Ramp Construction" were opened at 11:00 a.m. on February 27, 2007, and later tabulated by the Public Works Director for the consideration of the Council, and

WHEREAS, the Public Works Director has recommended that the bid of $175,936.00 received from BDS Construction, Inc., be accepted as the lowest responsible bid and the contract be awarded to BDS Construction, Inc.,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the plans and specifications for said project, and accepts the bid of BDS Construction, Inc., in the amount of $175,936.00, and hereby awards BDS Construction, Inc., the contract titled "2006 ADA Curb Ramp Construction."

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:

MODESTO CITY COUNCIL
RESOLUTION NO. 2007-200

A RESOLUTION APPROVING A CONTRACT WITH HOLDREGE & KULL FOR THE PROJECT TITLED "GEOTECHNICAL STUDY AT CHLORINATION FACILITY," LOCATED AT THE JENNINGS ROAD SECONDARY TREATMENT PLANT IN AN AMOUNT NOT TO EXCEED $70,000, AND AUTHORIZING THE CITY MANAGER, OR HIS DESIGNEE, TO EXECUTE THE CONTRACT.

WHEREAS, the Secondary Treatment Facilities, located at Jennings Road, utilizes chlorine gas to disinfect the treated wastewater effluent prior to dechlorination and discharge to the San Joaquin River, and

WHEREAS, disinfection of the effluent is required as a condition of the City's wastewater discharge permit and is necessary to ensure that no potentially disease-causing microorganisms are in the water being discharged to the river, and

WHEREAS, during the spring floods of 2006, staff observed the ground sinking (subsidence) at the equipment pad for the Chlorination Facility at the Jennings Treatment Plant, and

WHEREAS, numerous sand boils and seeps occurred due to the 2006 San Joaquin River spring storm flows, and

WHEREAS, the sloping ground supporting an exposed portion of the 48" diameter loop pipeline is prone to seepage and small slides in the area have occurred in the past, and

WHEREAS, City staff requests a geotechnical study at the Chlorination Facility be performed for the following:

1) Evaluate the likely cause of the sand boils and ground subsidence,
2) Evaluate stability of the levee,

3) Assess subsurface conditions in the vicinity of the exposed section of loop pipeline, and
4) Develop mitigation measures for ground subsidence and for long-term stabilization of the levee,

and

WHEREAS, this project was approved as part of the FY 06-07 Capital Improvement Program, CIP #B824 Geotechnical Study at Chlorination Facility with a funding amount of $83,000, and

WHEREAS, a request for bids was sent to seven (7) Geotechnical Consultants for this project, and three bids were received, and

WHEREAS, after evaluating all three proposals, staff has determined that the proposal from Holdrege & Kull demonstrates the greatest understanding of conditions and potential corrective measures, and

WHEREAS, funds are budgeted in CIP Account 6210-480-B824-6010 Geotechnical Study at Chlorination Facility,

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Modesto that it hereby approves the contract with Holdrege & Kull for the project titled "Geotechnical Study at Chlorination Facility," located at the Jennings Road Secondary Treatment Plant in an amount not to exceed $70,000.

BE IT FURTHER RESOLVED that the City Manager, or his designee, is hereby authorized to execute the contract.

The foregoing resolution was introduced at a regular meeting of the Council of the City of Modesto held on the 27th day of March, 2007, by Councilmember Hawn, who moved its adoption, which motion being duly seconded by Councilmember Dunbar, was upon roll call carried and the resolution adopted by the following vote:
