The purpose of this article is not to deny anyone the right to use fluoridated water, should they so desire. The purpose is to present the scientific facts in opposing the addition of sodium fluoride to the public water supply.

In some localities fluoride is found in water in its natural state. Calcium fluoride -- not sodium fluoride. Sodium fluoride is one of the deadliest of poisons. It is the heretofore unsaleable waste product left from the manufacture of aluminum. Alcoa is burdened with 15 to 20 million dollars worth annually. An outlet had to be found wherein the aluminum companies could dispose of this huge amount of poisonous waste, the price of which has already doubled.

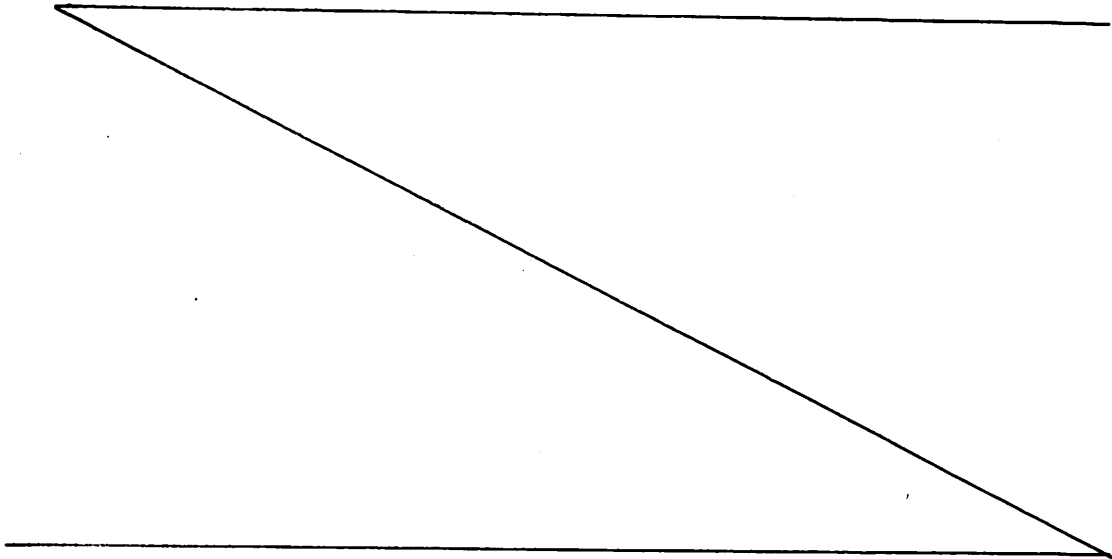

Fluoridation is not to be confused with chlorination. Chlorine is added to the water to destroy bacteria and make the water suitable for human consumption. It passes off in the form of gas as the water runs from the tap or is boiled. Sodium fluoride cannot be removed by boiling or filtering. Boiling only adds to its harmfulness, as it is then more concentrated. The use of any such permanent additive can therefore only be classed as medication.

At the so-called "safe" concentration, fluoride is a potential danger to every individual, especially to diabetics who drink more water, to those suffering from nephritis or kidney disease, who can't eliminate fluoride readily, and to allergic people who have a low tolerance to drugs. That it accumulates in the system even in the most minute doses has recently been shown in Berkeley radio-active tracer studies.

Sodium fluoride is a violent poison to all living tissue; but in minute doses, no ill effects may show up for several years. The most common of these is fluorosis, or chronic fluoride poisoning, the first sign of which is mottled teeth. Such teeth are structurally weak, and when decay sets in, repair is often impossible.

Now comes the question of cost. This would be insignificant if there were any proof of the value of water fluoridation, but there has never been a documented statement as evidence that sodium fluoride prevents tooth decay. The estimated cost is \$78,840 for the first year. One-tenth of one per cent of water is consumed by mouth.

Northerly along said Westerly line of said Conejo Avenue to its intersection with the Westerly projection of the Northerly boundary of said Uccello Tract; thence continuing along the existing Corporate City Limits, Easterly along said Westerly projection of the Northerly line of said Uccello Tract to its intersection with the Easterly quarter section line of the Southwest quarter of said Section 27, said line being the Easterly boundary of the Modesto City School property as described in Volume 1269 at Page 26, Stanislaus County Records; thence Northerly along said quarter section line to its intersection with the Southerly line of said Modesto Irrigation District Lateral Number 2; thence Westerly along said Southerly line of Lateral Number 2, to the point of beginning of this description.

BE IT FURTHER RESOLVED that the City Clerk be, and he is hereby directed to file a certified copy of this resolution with the State Board of Equalization, the governing body of said Fire Protection District, and the Assessor of Stanislaus County.

The 99.9% goes through sinks, toilets, fire-fighting equipment, to water lawns, etc. Is it good business to spend \$78,840 for an actual total value of \$78.84, even if such a value had been proven?

Water fluoridation is spoken of as a "controlled" measure. There is a great variation in the amount of water consumed by individuals. One child may drink one glass, while another may drink four or five in the same length of time, so there is no "control" on the part of the consumer.

While 50 million people in 639 cities have rejected fluoridation; only 595 cities have accepted it. Thirty-nine cities have abandoned it after going to the great expense of starting it.

~~Fluoride can be administered in many ways, individually and in-expensively, to those who desire it. Let us not add a poison to our drinking water.~~

A RESOLUTION GRANTING REQUEST OF E. VARNI TO BLACKTOP THE DRIVEWAY AND PARKING AREAS ADJACENT TO C STREET AND SIERRA DRIVE ON HIS PROPERTY LOCATED ON THE TRIANGLE AREA AT 241 SEVENTH STREET

WHEREAS, E. Varni, 241 Seventh Street, has filed a request for variance from the provision of the Municipal Code as it relates to

Section 2-1.104 (a) - maximum width of driveways;

Section 7-1.203 (a) and (c) - type of construction of driveways and sidewalks

to permit the blacktopping of the driveways and parking areas adjacent to C Street and Sierra Drive on his property located in the triangular area in Block V and to construct the blacktop driveways of a length and width in excess permitted in the Code, and

WHEREAS, the Council of the City of Modesto has determined, after a thorough consideration of the request, the following findings:

1. That the proposal for the improvement of this property would improve the general area;
2. That since there was little, if any, pedestrian traffic in this vicinity the granting of the request was a special case and the Council would not set a precedent for similar requests since each case must be considered on its own merits;
3. That due to the peculiar shape and size of the property and the whole block was under one ownership, the installation of curbs and gutters would not be beneficial to the general welfare of the area and would serve no purpose;
4. That if pedestrian conditions ever changed in the general area of this property that Mr. Varni could be required to install curbs, gutters and driveways according to city standards.

NOW, THEREFORE, BE IT RESOLVED that the request of E. Varni to blacktop the driveway and parking areas on his property in Block V and to construct a driveway 138 feet in width on Sierra Drive and a driveway 105 feet in width on C Street, as indicated on the drawing on file in the office of the Public Works Department of the City of Modesto, be and it is hereby approved.

WHEREAS, the Council of the City of Modesto held a public hearing in the Council Chamber, May 8, 1957, at 8:00 P.M., for the purpose of considering an appeal filed by Joe Mineni, Jr. on April 8, to the decision of the Modesto City Planning Commission on March 26, denying his request for the rezoning from Multiple-Family Zone (R-3) to Neighborhood Commercial Zone (C-1) the following described property:

Lots 5-25, inc. in Block 568, City of Modesto, located on the north side of Downey Avenue, between McHenry Avenue and Johnson street.

NOW, THEREFORE, BE IT RESOLVED, by the Council of the City of Modesto that the appeal of Joe Mineni, Jr., to the decision of the Commission on the rezoning of the above described area, be denied and the recommendation of the Commission be affirmed.

RESOLUTION NO. 57-332

A RESOLUTION GRANTING REQUEST OF THE GENERAL PETROLEUM COMPANY FOR VARIANCE FROM CURB CUT PROVISIONS OF MUNICIPAL CODE FOR SERVICE STATION ON NORTHEAST CORNER OF NEEDHAM AND COLLEGE AVENUES, IN THE CITY OF MODESTO

WHEREAS, the General Petroleum Company has filed a request for variance from the provisions of the Municipal Code, as it related to

Section 7-1.104 (a) maximum width of driveways

Section 7-1.104 (c) percentage of curb cuts not to exceed
40% of the frontage upon any street

to permit the installation of three 35 foot approaches to its new service station to be constructed on the northeast corner of the intersection of College and Needham Avenues; one driveway to be located on College Avenue and two on Needham Avenue, and

WHEREAS, the Company has also requested permission to remove all existing large trees located on the street right of way in order to install full-width sidewalks at this property, and

WHEREAS, the Council of the City of Modesto has determined after a thorough consideration of the request, the following finding:

- 1- That the request for a variance on the three driveway approaches could be granted on the condition that the top of the cut be limited to 35 feet instead of the bottom of the cut as shown in the diagram on file in the office of the City Clerk;
- 2- That although the total number of feet in the request for curb cuts would exceed the 40% maximum limitation, the difference of 7 feet would not be critical since the locations of the cuts would be such that on-street parking could be properly utilized;
- 3- That the trees in the street right of way could be removed by the company providing the removal be at its expense; the city be held harmless from any loss, injury or damage to persons or property resulting from said tree removal; the tree roots be removed to a depth of not less than 18 inches and all holes be backfilled to original ground level; all limbs, branches, roots and trunks be disposed of at company's expense. It would not be necessary for the company to leave spaces for the planting of ornamental trees due to the nature of the use of the premises.

NOW, THEREFORE, BE IT HEREBY RESOLVED, that the request of General Petroleum Company for variance from the provisions of the Municipal Code and for permission to remove the street trees in the right of way at its new service station to be located at the northeast corner of the intersection of College and Needham Avenues be approved under the conditions outlined above in the findings of the Council.

WHEREAS, the Douglas Oil Company has filed a request for variance from the provision of the Municipal Code, as it related to

Section 7-1.104 (a) maximum width of driveways;

40% of the frontage upon any street;

to permit the installation of approaches to its new service station being constructed at H, Downey and Burney Streets intersection, in the City of Modesto:

Two 30 foot driveway approaches on Burney Street,
One 30 foot driveway approach on Downey Avenue,
One 41 foot driveway approach on H Street,

and,

WHEREAS, the Council of the City of Modesto has determined, after due consideration of the request, the following findings:

- 1- That due to the layout of this property and the existence of the surrounding street network, the ~~petitioner~~ should be granted the request for the driveway lengths as proposed, although the total length of 131 feet would be in excess of the 40% limitation;
- 2- That since the location of the 41 foot driveway, as proposed on H Street side of the property, is not finally determined, approval of request would be subject to approval of location of this driveway by the Director of Public Works (after the property owner and the Director of Parking and Traffic have had an opportunity to work out the possible dedication of land for street purposes allowing a greater width on H Street);

Two 35' driveway approaches on H Street,

One 35' driveway approach on 12th Street,

The following "Planning Principles" have been unanimously approved and have been recommended to each Council, Commission and Board throughout the County, for adoption by each. This action was taken at the meeting of the Stanislaus Cities-County Advisory Planning Committee on August 3, 1957.

A. GENERAL PRINCIPLES

1. The individual identity and protection of each planning unit should be preserved and enhanced through separation by natural or man-made features.
2. Land uses, transportation and other facilities should be coordinated within the Urban Region and with adjoining counties.
3. All planning units should be compact, attractive, and functional, with employment area appropriate and sufficient to their needs.
4. All land uses should be protected from encroachment and adverse effects of others.
5. All uses should be located on land best suited to their particular needs and logically grouped and related to each other.
6. A proper relationship between building bulk and open spaces should be established by the formation of building intensity ratios for all urban land uses.
7. Urban communities which will be permanent should be encouraged to develop into a self-supporting physical, social, and economic unit.
8. Urban developments should locate only where adequate services and facilities can be economically provided.
9. To create a more aesthetically pleasing appearance, urban and rural areas should be encouraged to incorporate into their developments basic principles of good design.

B. RESIDENTIAL AREAS

1. The proper location, character and extent of public and private services and facilities should be determined on the basis of neighborhood and residential community planning units.
2. The needs of diverse family sizes, age groups, and income levels should be met by a variety of population densities and building types in each residential community.
3. Areas of higher residential densities should be in close proximity to centers of activity.

C. COMMERCIAL AREAS

1. The central business districts should continue as the main concentration of commerce, with civic and related activities located adjacent thereto.
2. Neighborhood and residential community shopping facilities should be related in size and location to the area and population to be served.

D. INDUSTRIAL

1. The size of industrial areas should be determined on the basis of reasonable potential demand.
2. Industrial areas should be located adjacent to major transportation and utility services, within convenient commuting distance of the potential labor force, and on land suitable for industrial development.
3. Industries which complement the economy and are compatible with the physical patterns and social needs should be encouraged to locate in the area.

E. WHOLESALE - WAREHOUSING AREAS

1. Wholesale, storage, distributive and truck terminal uses should be located contiguous to major transportation facilities and to the commercial and industrial areas which they serve.
2. The size of wholesale, storage, distributive and truck terminal uses should be determined on the basis of reasonable potential demand.

F. TRANSPORTATION

1. Transportation facilities should be designed and located in proper relation to the demands of land use.
2. A functional system of streets and highways should be developed which provides separate but integrated facilities for the various types of traffic movements.
3. Transportation facilities should be so located that they will assist in the long-range stabilization of land use patterns of both agricultural and urban areas.
4. Major streets should bound but not penetrate planning units.
5. Adequate off-street parking and off-street loading and unloading facilities should be provided according to intensity of use.

G. PARKS AND RECREATION

1. Neighborhood parks and elementary schools should be planned as integral units.
2. Residential community parks and recreational areas should be planned in conjunction with junior and senior high schools.
3. Sufficient areas adjacent to streams and other waterways, to serve the potential recreational demand, should be acquired by the public and should be made available to the public.
4. Public and private recreational programs should complement each other in providing recreational facilities and services.
5. Large scale parks and facilities should be provided in areas which will best serve the regional recreation needs.

8. AGRICULTURAL AREAS

1. The highest priority development of the area should be preserved by zoning which governs character and size of structures permitted.
2. Agricultural land should be protected from encroaching urban developments.

9. SCHOOLS

1. All schools should be planned as economic units and located so as to provide adequate educational programs.
2. Elementary schools in urban areas should be located in the center of a neighborhood unit.
3. Junior and senior high schools should be located adjacent to major thoroughfares.

10. UTILITIES

The future expansion of urban development should be controlled with the ability to produce a sufficient quantity and quality of water and to adequately collect and treat the excess effluent of all land uses.

Executive Office Council
Advisory Planning Committee
