Modesto Wastewater Treatment Plant Going Green

At the City's Wastewater Treatment Plant, methane gas is generated as a part of the wastewater treatment process. Since methane gas is a renewable resource, the Wastewater Division installed a digester gas treatment system that utilizes the methane gas (instead of natural gas) to fuel boilers needed in the treatment process. By replacing natural gas with methane gas, this system will save approximately \$80,000 per year. It will also reduce air emissions by approximately 35% because the methane gas will no longer be released to the atmosphere. In addition, the City received a PG&E rebate for \$72,000 for reducing our dependence on natural gas.

Move those cans...

Did you know there are City rules and regulations about garbage can placement? Help keep Modesto a safe place for everyone by following these simple rules. They pertain to garbage cans that are placed in the street in front of your home, not to placement in alley ways. If you place your garbage cans in the street, you can only place them out 24 hours in advance of your pick-up day and you need to move them off the street within 24 hours from the day you garbage was collected.

It is also important to remember that garbage cans placed in the street, need to sit on the pavement next to the curb or on the edge where your driveway meets the pavement. Pedestrians, handicapped residents and people with strollers have the right-of-way on sidewalks so they should never be blocked.

Have questions about how, where and when to place your garbage can(s)? Call the City of Modesto Solid Waste Office at (209) 577-5493.
