*"Our mission is to
construct and maintain
public infrastructure and
operate utility and
transportation systems to
the highest standard of
excellence and
accountability in order to
support a vibrant business
environment and to
enhance the quality of
community life."*

Start Date: July, 2019

**Anticipated
End Date:** July, 2020

Location: Corporation Yard

Project Summary:

Fleet Services is currently divided in two buildings and three shops. This new shop building will be one step closer to having all of Fleet Services in one building.

Project Description:

Currently Fleet is spread out in 3 different areas. The older shops are extremely crowded and inefficient. The newly constructed Bus Maintenance Facility was constructed in such a way to accommodate expansion and already incorporates lube, compressed air, utilities, restroom facilities and breakrooms to accommodate all of Fleet Services. The new facility will have 8 heavy duty truck bays and equipment and tool storage that will be connected to the existing facility parts room and connecting corridor.

Benefits:

This shop will allow all of Fleet Services to be under one roof. This will facilitate labor sharing by allowing mechanics to move their tool boxes between buildings and work on vehicles where the labor is needed at the time. With this streamlined facility, Fleet will be able to turn vehicles out faster and provide one central location for our customers to bring their vehicles.

Funding:

Fleet Facility Funds
